Broad focus area	Specific areas	Identified topics
		• Disclosure of maternal HIV status to children - data available, should just be analysed (masters).
		Violence in schools / families in townships
		 HIV/AIDS prevention strategies – development for a variety of target groups, HIV testing, community stigma
		Family structures in a changing community
		Social aspects of substance abuse and HIV/AIDS as mental
		health issues with emphasis on the following:
		Situational and needs assessment
		 Prevention and intervention using Cognitive Behaviour
		Therapy (collaborative research project), Programme
		development, monitoring and evaluation,
Iteocona projecte	Creative arts therapy in a community clinic	Adolescents' mental health issues
Itsoseng projects	Creative arts therapy in a community clinic setting (at this stage these are focussed on	 Experiences of volunteers and clients in art therapy groups Developing art therapy groups for children who have been
	children in groups but may be extended to	exposed to abuse
	include adults)	• Experiences of music therapists and clients in music therapy
		 Experiences of facilitators and participants in therapeutic and/or psycho-educational drama groups
		Development of therapeutic library and reading groups for children
		• Experiences of participants in therapeutic reading, story- telling and/or creative writing groups
		Using art, music, drama or reading groups to screen for
		referral for psychological and other interventions
		• Experiences of participants in a creative sewing group
		Creative therapy and psycho-education with puppets
	Therapeutic training in a community clinic setting	• Experiences of trainee psychotherapists and counsellors in a community clinic setting
		• Experiences of trainee psychotherapists and/or counsellors working across language barriers
		• Experiences of trainee psychotherapists / counsellors working with interpreters
		• The development of working relationships between trainee therapists / counsellors and interpreters
	Volunteerism in a community clinic setting	• Experiences of volunteers working in a community clinic
	Youth leadership development projects in a community clinic setting	• Experiences of facilitators and/or participants in a youth leadership project
	Presenting problems in a community clinic setting	• Exploring the different meanings of presenting problems such as "learning problems"
	Statistical data nortaining to a community	The development of a mathematics support group
	Statistical data pertaining to a community clinic	• Further development and analysis of a relevant statistical data base in the clinic (client profiles, treatment, demographics, etc.)
	Psychological assessment in a community clinic setting	• Critical and explorative investigations into the use and relevance of norms of different assessment instruments in the clinic, for example the Ravens Progressive Matrices and
		МСМІ
	The interface between a community clinic and its network of collaborators in the	• Developing collaborative projects together with SOS village in Mamelodi
	community	• An exploration / further development of the referral network of the clinic
		• Psychological dimensions of community support for the clinic, for example experiences of donors, referral agents, community leaders and clients
	Preventative community projects in a community clinic setting	Development of community-centred psycho-educational and preventative projects
	HIV/AIDS prevention and counselling in a community clinic setting	 Client and counsellor experiences of HIV/AIDS counselling Development of community-based HIV/AIDS projects
