

"What is (the) law?"

By Riyaad Jamal

What is law?

Does it deserve a round of applause

For the tears which it saw?

Or was the change in the clause

All for a worthy cause?

What is law?

Was it there to maintain societies floors

Or was it meant to serve societies flaws?

Could the injured use it as a gauze

Against the wounds of the law?

What is law?

Is it simply an owners macaw

Or does the authority remain in the law?

Is it merely words engraved by a claw

Or are these words temporary law?

What is law?

Most importantly,

"What is (the) law?"
