

## University of Pretoria Yearbook 2017

## Animal health management: high impact and emerging diseases 814 (AHE 814)

**Qualification** Postgraduate

Faculty of Veterinary Science

Module credits 12.00

Programmes MSc Tropical Animal Health (Coursework)

**Language of tuition** Module is presented in English

**Academic organisation** Veterinary Tropical Diseases

**Period of presentation** Semester 2

## Module content

(elective)

This module deals with the concepts and principles of basic animal health management for livestock production and trade in livestock and livestock commodities. There will be a special focus on the management of infectious diseases that have a high impact in terms of international trade because of their detrimental effects on livestock production and health and/or human health. The module will also examine the drivers for emerging and reemerging diseases with special reference to the livestock/wildlife/human interface.

The information published here is subject to change and may be amended after the publication of this information. The General Regulations (G Regulations) apply to all faculties of the University of Pretoria. It is expected of students to familiarise themselves well with these regulations as well as with the information contained in the General Rules section. Ignorance concerning these regulations and rules will not be accepted as an excuse for any transgression.
