

University of Pretoria Yearbook 2017

Research report 772 (AHM 772)

Qualification	Postgraduate
Faculty	Faculty of Health Sciences
Module credits	30.00
Programmes	PGDip Health Systems Management Executive Leadership PGDip Health Systems Management General Operations
Language of tuition	Module is presented in English
Academic organisation	School of Health Syst & Public
Period of presentation	Year

Module content

Executive/Emerging Leadership

Participants will be required to write up a project which can consist of a Strategic Plan for Leadership at the workplace which they will be required to implement and monitor over a period of 6 months and then write up the strengths and weaknesses of whether this plan made a difference and to what extent they have been able to influence and change the approach of decision-making at their workplaces. A report from supervisors will be required and the project will include a literature review and a detailed analysis of what was achieved, what value-added difference the project made at the workplace, what were the sustainability factors built into the plan and how it had improved service delivery. The health leadership strategies that arise out of the project will be discussed and how its broader application can be implemented towards transforming healthcare delivery at district or hospital level.

The information published here is subject to change and may be amended after the publication of this information. The [General Regulations \(G Regulations\)](#) apply to all faculties of the University of Pretoria. It is expected of students to familiarise themselves well with these regulations as well as with the information contained in the [General Rules](#) section. Ignorance concerning these regulations and rules will not be accepted as an excuse for any transgression.
