### Module content

\*Closed – requires departmental selection

In this module the focus is on the way in which research is undertaken. This knowledge is essential because it serves as the basis for further study as well as research that may have to be undertaken within a future career. Aspects that are addressed include the following: what does scientific research entail; how is a research problem stated and hypothesis formulated; how are samples drawn; which methods could be used for collecting data; how is the data analysed, interpreted and presented in the research report.

The information published here is subject to change and may be amended after the publication of this information. The [General Regulations \(G Regulations\)](#) apply to all faculties of the University of Pretoria. It is expected of students to familiarise themselves well with these regulations as well as with the information contained in the [General Rules](#) section. Ignorance concerning these regulations and rules will not be accepted as an excuse for any transgression.
