Department Public Law

Period of presentation Semester 2

Module content

The aim of this module is to equip students, without a formal legal background, a thorough understanding of the various socio-economic aspects and challenges related to the sustainable development and management of mineral and hydrocarbon resources. The topics covered include:

- Historical, philosophical and foundational aspects of non-renewable natural resource development and regulation, with particular reference to development in an African context.
- Basic concepts relating to the sustainable use and development of mineral, oil and gas resources, in general, and with specific reference to sustainable development, economic viability of resource deposits, project operationalisation requirements, good governance in private and public sectors, regulatory burden and policy development.
- The specific interface between responsible resource development and foreign direct investment.

The information published here is subject to change and may be amended after the publication of this information. The [General Regulations \(G Regulations\)](#) apply to all faculties of the University of Pretoria. It is expected of students to familiarise themselves well with these regulations as well as with the information contained in the [General Rules](#) section. Ignorance concerning these regulations and rules will not be accepted as an excuse for any transgression.
