<b>Department</b>	Gordon Institute of Business Science
<b>Period of presentation</b>	Semester 2

### Module content

During this course, we take an integrative view of business and management. We introduce the concepts of strategy formulation and implementation and study the links between operations, processes and structures. Using the knowledge and skills learned throughout the programme, you will develop a holistic view of business and the organisation. The skill-building session will be a business simulation, with individual coaching on your decision-making position. Improving cross-functional organisational performance across the value chain, as well as the design of service delivery systems, is an important focus.
