

# University of Pretoria Yearbook 2022

## Introduction to physical geography 168 (GGY 168)

|                               |  |
|-------------------------------|--|
| <b>Qualification</b>          | Undergraduate  |
| <b>Faculty</b>                | Faculty of Natural and Agricultural Sciences                         |
| <b>Module credits</b>         | 12.00  |
| <b>NQF Level</b>              | 05   |
| <b>Programmes</b>             | BEd (Intermediate Phase Teaching)                                    |
|                               | BEd (Senior Phase and Further Education and Training Teaching)       |
|                               | BSc (Computer Science)   |
|                               | BSc (Information and Knowledge Systems)                              |
|                               | BA   |
|                               | BA (Languages)   |
|                               | BA extended programme  |
|                               | BPolSci (International Studies)                                      |
|                               | BSocSci (Heritage and Cultural Tourism)                              |
| <b>Service modules</b>        | Faculty of Engineering, Built Environment and Information Technology |
|                               | Faculty of Education   |
|                               | Faculty of Humanities  |
| <b>Prerequisites</b>          | No prerequisites.  |
| <b>Contact time</b>           | 1 practical fortnightly, 2 lectures per week                         |
| <b>Language of tuition</b>    | Module is presented in English                                       |
| <b>Department</b>             | Geography Geoinformatics and Meteorology                             |
| <b>Period of presentation</b> | Semester 2   |

### Module content

*Note: Students cannot register for both GGY 168 and GGY 166.*

This module serves as an introduction to the field of physical geography and geomorphology. Initially, a theoretical overview of a variety of geomorphic realms will be studied. Students will be taught about the key processes that are present in each realm and how those processes work together in order to produce specific landforms. In addition, students will receive training in several fundamental analytical techniques, including cartographic skills, aerial photographs and introductory GIS.

The regulations and rules for the degrees published here are subject to change and may be amended after the publication of this information.

The [General Academic Regulations \(G Regulations\)](#) and [General Student Rules](#) apply to all faculties and registered students of the University, as well as all prospective students who have accepted an offer of a place at the University of Pretoria. On registering for a programme, the student bears the responsibility of ensuring that they familiarise themselves with the General Academic Regulations applicable to their registration, as well as the relevant faculty-specific and programme-specific regulations and information as stipulated in the relevant yearbook. Ignorance concerning these regulations will not be accepted as an excuse for any transgression, or basis for an exception to any of the aforementioned regulations.
