## Gordon Institute of Business Science

### Welcome to the Gordon Institute of Business Science

The **University of Pretoria's Gordon Institute of Business Science (GIBS)** is a leading business school in the heart of Illovo, Johannesburg, close to the Sandton business hub. We offer academic programmes as well as a wide range of executive courses which can be custom-designed to suit specific company needs. GIBS is a faculty of the University of Pretoria.

For further information please visit: [www.GIBS.co.za](http://www.GIBS.co.za).

### Faculty regulations and information

*The regulations for the degrees published here are subject to change and may be amended after the publication of this information.*

*The General Academic Regulations and General Student Rules apply to all faculties and registered students of the University, as well as all prospective students who have accepted an offer of a place at the University of Pretoria. On registering for a programme, the student bears the responsibility of ensuring that they familiarise themselves with the General Academic Regulations of the University applicable to their registration, as well as the relevant faculty-specific and programme-specific regulations and information as stipulated in the relevant yearbook. Ignorance concerning these regulations will not be accepted as an excuse for any transgression, or basis for an exception to any of the aforementioned regulations.*

**Please note:** Due to the continuous restructuring of the Faculty and the accompanying phased-in introduction of modules and credits, some of the information in this publication may not fully reflect the most recent developments in the Faculty. Problems that are experienced as a result of this situation may be taken up with GIBS.

#### **Application, selection and admission**

Refer to General Academic Regulations A3, G1, G16, G31 and G42.

A selection procedure takes place prior to admission. Application forms are available at [www.GIBS.co.za](http://www.GIBS.co.za).

For further details refer to the GIBS student guidelines and regulations.

#### **General**

The Dean may authorise matters not provided for in the General Academic Regulations or in the GIBS regulations.

#### **Amendment of regulations and fees**

GIBS retains the right to amend the regulations and to change tuition fees without prior notification.

**Please note:** The fees advertised and thus levied in respect of a module or study programme presentation represents a combination of the costs associated with the formal services rendered (for example lectures, module material, field trips, simulations, etc.) as well as associated indirect overheads such as the provision of Information Centre and recreation facilities, security and cleaning services, electricity and water supply, etc. Therefore, the fees in respect of a module or study programme presentation cannot simply be reconciled with visible services that are rendered in respect of such module or study programme.

## Registration and student status

For renewal of registration, refer to General Academic Regulations G3, G18, G32 and G44.

For cancellation of registration, refer to General Academic Regulations G4, G19, G32 and G45.

For further details refer to the GIBS student guidelines and regulations.

## Examinations

- i. A student is only admitted to an examination if the lecturer of that module in consultation with the Dean, certifies that the student has prepared satisfactorily in their work and complied with the attendance requirements. Class attendance in all modules and for the full duration of all programmes is compulsory for all students.
- ii. The examination dates are set at the beginning of each year. Students must make arrangements with their organisations and/or employers in advance to be available on such dates since no alternative examination dates will be arranged. Should a student be unable to write an examination for reasons of serious illness, family crisis or unavoidable travel outside of South Africa, the Programme Manager must be informed in writing, preferably before the examination date or, failing that, within three business days of the examination.
- iii. A written application for a special examination must be made to the Programme Manager, accompanied by proof of the reason for missing the examination (for example medical certificate, copy of passport, subpoena). The examination papers (or orals) are completely different to the original papers. The applicant will be informed of the dates during the year.

For further details refer to the GIBS student guidelines and regulations.

## Pass requirements and subminimum in examinations

A final weighted average mark of at least 50% in a module is required to pass. A subminimum of 45% is required in the examination or examinable component for each module. Should the student fail to achieve the required subminimum, the student will be considered to have failed the module.

For further details refer to the GIBS student guidelines and regulations.

## Special examinations

(Refer to General Academic Regulations G12, G26, G37, G38 and G49.)

A student who is prevented from writing the standard examination due to illness or other qualifying circumstances, may be granted permission by the dean to write a special examination in the particular module(s).

An application to write a special examination, accompanied by supporting documentation in the form of a medical certificate issued by a registered medical practitioner in the case of illness (see Section A21 for more information on medical certificates), or appropriate supporting documents in the case of other qualifying circumstances (see Section A22 for more information on affidavits), accompanied by a letter of motivation, must be submitted to the dean in the prescribed manner, within three days of the date of the particular examination that was not written. If an application could not be submitted on time, a late application supported by the required documentation and a valid reason or motivation must be submitted to the dean for consideration. For further details refer to the GIBS student guidelines and regulations.

## General

It is the responsibility of all students to familiarise themselves with the General Academic and GIBS Regulations of the University, as well as the procedures, rules, and instructions pertaining to study at GIBS. Ignorance of the applicable regulations, rules and instructions, or the incorrect interpretation thereof will not be accepted as an excuse for not complying with the stipulations of such regulations, rules and instructions.

## Application of old and new regulations

(Refer to General Academic Regulations G5, G20, G32 and G42.)

Subject to transitional measures laid down by GIBS, a student must complete his or her programme in accordance with the regulations that were applicable when he or she first registered for a specific field of study or specialisation. If a student interrupts his or her studies or changes a field of study or specialisation, the regulations applicable in the following year in which studies are resumed, or the field of study is changed, apply. For further details refer to the GIBS student guidelines and regulations.

## Doctorate

### Doctor of Administration [DBA] (07264003)

**Minimum duration of study** 2 years

#### Programme information

The DBA (Doctor of Business Administration) is a doctoral degree with a focus on application. The doctorate is the final academic degree, and it is expected that the thesis will build on existing scholarly work. Students who are accepted onto the DBA will be offered support through online and contact sessions, and it is expected that they will also contribute to their peer community by participating in those sessions.

#### Admission requirements

1. MBA degree or master's degree in a business-related discipline on NQF level 9
2. Two referee reports from professional referees

#### Additional requirements

An application pack comprising the following must reach the Director of Research at GIBS before the due date:

- A completed and signed hard copy of the application form and contract.
- An application fee relevant for the year of admission, payable to the Gordon Institute of Business Science.
- Official academic transcripts of all academic qualifications obtained to date. (Please note that a degree certificate is not a transcript.)
- A 20-page research proposal, containing:
  - The research question;
  - A concise review of the literature most relevant to the research;
  - The proposed research design;
  - The proposed data source(s) and data gathering strategy.
- Reports from two independent professional referees with whom the candidate is well acquainted, commenting on the candidate's suitability for advanced academic study towards a doctorate. The signed referees reports should be marked "Admissions and the year of study" and sent directly to the Director of Research.
- Successful candidates will be required to pay a non-refundable deposit relevant to the year of application, deductible from their subsequent tuition fees.
- Assessments will be conducted to establish if candidates are capable of doctoral study. Continued study on the doctoral programme will be contingent upon meeting the requirements of the assessment.

#### Research information

Refer to General Academic Regulations G42-G55.

Progress on the research will be guided by a supervisor and monitored through regular engagement with the student. In order to complete the research, candidates need to share their research, at a practitioner-based forum.

The Dean may authorise matters not provided for in the General Academic Regulations or in the GIBS regulations.

[AdvDip in General Management](#)

**Prerequisites** No prerequisites.

**Contact time** 14 contact hours

**Department** Gordon Institute of Business Science

**Period of presentation** Semester 1 and Semester 2

## Module content

The course is based on the premise that everyone has the capacity to succeed in an entrepreneurial setting, although some people may have a greater propensity to succeed than others. The intention of this course is to develop entrepreneurial skills relating to opportunity identification and evaluation, resource gathering (with a particular focus on financial and human resources) and opportunity exploitation. The course considers these skills from the perspective of entrepreneurship in start-up and established organisations.

### Human resource strategy 314 (GAD 314)

<b>Period of presentation</b>	Semester 1 and Semester 2

### Module content

International and local studies show widespread acknowledgement of the benefits of gender-diverse leadership teams and of leadership diversity for the disruptive and VUCA times in which we live and work. Notwithstanding these findings, the percentage of women in executive teams (business) and leadership roles in general has remained constant for the last 5 years. In addition to understanding causes we look at practical tools and techniques that can help students (both male and female) optimally navigate their careers in these dynamics. Students will also study the trends and practices to address constraints and biases that prevail in maintaining the status quo.

### Organisational risk 322 (GAD 322)

**Qualification** Undergraduate

**Module credits** 9.00

**NQF Level** 07

[AdvDip in General Management](#)

**Prerequisites** No prerequisites.

**Contact time** 14 contact hours

**Department** Gordon Institute of Business Science

**Period of presentation** Semester 1 and Semester 2

### Module content

As leaders, we are aware of and acknowledge external risks more frequently than internal risks. Through conducting competitor and market analysis, we are continually aware of new competitions, new product offerings from competitors and emerging trends in the market. However, many companies make the mistake of ignoring internal risks within the company that can be just as damaging. These organisational risks are often hidden and difficult to spot until it's too late, unless you know what you're looking for. This module will equip students with the ability to analyse business challenges, gain familiarity with different risk mitigation tactics and formulate a comprehensive plan.

<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	14 contact hours
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Gordon Institute of Business Science
<b>Period of presentation</b>	Semester 1 or Semester 2

## Module content

Impact entrepreneurs must develop and manage complex business models, which meet the needs of funders, clients and beneficiaries. The development and innovation of such business models involves a deep understanding of the jobs-to-be-done of different stakeholders, and the definition of value propositions that meet these needs. By the end of this course, you will have a sound understanding of different types of business model, and how to develop and innovate your business models using techniques such as design thinking and the business model canvas.

### Building relationships and alliances 328 (GAD 328)

<b>Prerequisites</b>	No prerequisite.
<b>Contact time</b>	35 contact hours per 3 week-cycle
<b>Department</b>	Gordon Institute of Business Science
<b>Period of presentation</b>	Semester 1 or Semester 2

## Module content

Design thinking is a non-linear, iterative process involving five phases—Empathize, Define, Ideate, Prototype and Test—used to tackle problems that are ill-defined or unknown (wicked problems). Design thinking is useful in the ill-defined problem space because it uses a human-centric approach to reframe the problem to focus on what is most important for users. This course introduces the principles and application of design thinking.

## Business communication for impact 720 (GIA 720)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	10.00
<b>NQF Level</b>	08
<b>Prerequisites</b>	No prerequisite.
<b>Contact time</b>	28 contact hours
<b>Department</b>	Gordon Institute of Business Science
<b>Period of presentation</b>	Semester 1 or Semester 2

## Module content

This module is designed to enable students to communicate effectively and appropriately in a variety of business and academic settings. Through instruction and individual feedback, students will learn skills to improve their academic writing, and consider how to improve the quality of their writing in various organisational contexts. This module focuses on both verbal, nonverbal and written communication as well as the contexts of one-on-one, group and technology-based communication. Students will also learn to provide and receive feedback successfully, which is a critical skill for personal and organisational success. The module considers the development of these skills in both a face-to-face and virtual environment. Through various activities, the core cognitive skills that are targeted for development in this module are analysing, evaluating and synthesising.

## Analytical tools and techniques 750 (GIA 750)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	10.00
<b>NQF Level</b>	08
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	24 contact hours
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Gordon Institute of Business Science
<b>Period of presentation</b>	Semester 1 or Semester 2

## Module content

This module examines statistical tools used in business decision-making. Statistical methods will be introduced in a non-technical manner and developed in business contexts. Topics will include understanding differences, predictions and associations when using statistical analysis for business decision-making. These techniques will underpin the use of univariate and multivariate techniques. Statistical computer packages play a major supporting role in statistical applications, and frequently-encountered spreadsheet and software packages will be utilised during the course of the module. You will learn how to interpret the information contained in management data, and to define and analyse management problems quantitatively. You will develop an intuitive understanding of statistical techniques through explanations of methods and interpretation of real business problems. Ultimately, if you need to consult experts in this area, you will be better able to select, evaluate and use their services.

## Module content

A working knowledge of the law is an incredibly empowering tool. The law operates in the daily lives of all of us, as a natural product of our interaction with one another. Sometimes in our dealings with other people we encounter problems that may be brought about by any one of a variety of factors: incompetence, dishonesty and misunderstanding are the most common causes. The consequences of these problems can, at times, be rather severe. Business transactions, for example, carry high risks. The consequences of a mistake in the business world can be costly. Knowledge of the law becomes a very useful tool when it helps us to recognise the potential dangers so that we can avoid them, and equip us with a means of dealing with mistakes once they have already happened. A sound understanding of the law is both a privilege as well as an advantage in coping with the various problems that life in the business world may throw our way.

The course aims to equip candidates with an understanding of these dangers and an ability to identify what to do when things go wrong.

## Module content

The rationale for the course is that all businesses are increasingly exposed to the global context, whether in terms of their competitors, their markets or their supply chains. As such, it is incumbent upon all managers to have an appreciation of the opportunities and threats that exist in doing business on an international scale. To operate effectively in a global context, managers need to be able to evaluate differences between countries and the impacts of these differences on firm behaviour. This module aims to provide students with the skills necessary to develop global business strategies and meet the challenges entailed.

### Business analysis and communication 856 (GIA 856)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	0.00
<b>NQF Level</b>	09
<b>Contact time</b>	Twenty four hours
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Gordon Institute of Business Science
<b>Period of presentation</b>	Semester 2

## Module content

This module is designed to enable students to analyse business problems, derive appropriate solutions, and communicate them effectively. There are two parts to it:

Part A deals with the written analysis of business cases. Through classroom instruction and individual feedback, students learn to analyse a business case, generate and review solutions, and prepare a clear, logical written summary of their analysis. The skills learnt include the cognitive skills of analysing, evaluating and synthesising complex material, and the communication skills of presenting findings in oral and written English.

Part B applies the same skills to the analysis and solution of an actual business situation. Students are required to conduct research into a problem posed in a company. They analyse the problem, conduct the appropriate research in the industry, apply the models and techniques covered in their MBA core courses, and prepare a consulting report for presentation to management and faculty.

## Analytical tools and techniques 861 (GIA 861)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	9.00
<b>NQF Level</b>	09
<b>Contact time</b>	Twenty four hours
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Gordon Institute of Business Science
<b>Period of presentation</b>	Semester 1 or Semester 2

## Module content

This module examines statistical tools used in business decision-making. Statistical methods will be introduced in a non-technical manner and developed in business contexts. Topics will include understanding the differences, predictions and associations when using statistical analysis for business decision making. These techniques will underpin the use of univariate and multivariate techniques. Statistical computer packages play a major supporting role in statistical applications, and frequently-encountered spreadsheet and software packages will be utilised during the module. You will learn how to interpret the information contained in management data, and to define and analyse management problems quantitatively. You will develop an intuitive understanding of statistical techniques through explanations of methods and interpretation of real business problems. Ultimately, if you need to consult experts in this area, you will be better able to select, evaluate and use their services.

## Microeconomics: Prices and markets 862 (GIA 862)

<b>NQF Level</b>	09
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	28 contact hours per 3 week cycle
<b>Language of tuition</b>	Module is presented in English

**Department** Gordon Institute of Business Science

**Period of presentation** Semester 1 or Semester 2

### Module content

This module introduces microeconomic theory and its application to real business situations. The aim of the module is to establish a rigorous appreciation for the main drivers of any business and to show how different variables will impact the company bottom line. The module begins by examining consumer demand and covers why consumers act in a particular way, how they may react to market changes and what strategies a company may undertake to maximise their revenue in both the short and the long term. The course then shifts to the production decisions of a company and examines in detail the different types of costs within an organisation, what variables positively and negatively affect these costs and how these costs can be managed to maximise profits and profitability. Different market structures are analysed to assist students in placing their firm and sector in an appropriate market structure thus providing useful insight into options regarding inter-firm rivalry, firm interdependence, and strategies to deal with competition from similar firms. The module is designed to give the student a set of tools, models and causal chains which will help them make more informed strategic decisions regarding: the pricing of their goods, their cost management, their competition strategies and options to maximise profitability.

## Financial accounting 863 (GIA 863)

**Qualification** Postgraduate

**Module credits** 9.00

**NQF Level** 09

**Prerequisites** No prerequisite.

**Contact time** 28 contact hours per 3 week cycle

**Language of tuition** Module is presented in English

**Department** Gordon Institute of Business Science

**Period of presentation** Semester 1

### Module content

This module is designed to equip participants with the necessary skills to analyse and interpret financial information. An overview of the preparation of simple financial statements serves as the basis for understanding the uses and limitations of the financial reports that companies prepare for shareholders and other external agencies. Topics dealt with in-depth include the contents of financial reports, ratio analysis and cash flow analysis, in addition to specific techniques developed for prediction of financial failure and vulnerability to takeover. Actual financial statements are analysed, and participants are expected to be familiar with real cases in the current financial press. You will become familiar with how financial statements such as balance sheets, income statements, and cash flow statements are structured. Various methods of critically evaluating them in order to make conclusions about the company's financial strength or weakness, and future possibilities such as financial failure or the probability of takeover will be discussed.

#### Module content

This module is designed to equip participants with the necessary skills to analyse and interpret financial information. Actual financial statements are analysed, and participants are expected to be familiar with real cases in the current financial press. You will become familiar with how financial statements such as balance sheets, income statements, and cash flow statements are structured. Various methods of critically evaluating them in order to make conclusions about the company's financial strength or weakness, and future possibilities such as financial failure or the probability of takeover will be discussed. Management accounting provides managers with timely and appropriate information – firstly in order to understand the cause and behaviour of costs and to meaningfully allocate these costs to products, customers and inventories; secondly to assist in planning, budgeting and decision making; and finally in order to measure performance. This module is intended as an introduction for individuals who will plan, make business decisions and evaluate the performance of business units using information derived from the accounting system.

### Module content

This module explains both how human resource systems should support the achievement of strategic objectives in context, and how line managers should manage people to achieve those objectives. Module topics include the management of strategic human resources (aligning HR and business strategy, succession planning, and the war for talent), management of HR-firm infrastructure, training and development, managing employee contributions (performance management and industrial relations), and integrating HR strategies and business strategies. The role of the line manager in managing performance will be considered, and underpinned by an overview of the causes of human behaviour in organisations. The module will include case studies to illustrate unique problems and approaches to HR strategy. You will learn the strategic value of effective management of human resources and how alternative HR strategies deliver different results.

## Module content

This module examines how an organisation's structures, systems and processes contribute to its competitive position. This involves management of the processes whereby inputs such as labour, materials and equipment are converted to products or services that meet customers' needs at an acceptable cost. Improving performance cross-functionally and across the value chain is an important focus. Topics include functional versus corporate operations strategy, operations' reactive role, service-delivery systems design, process choice, quality management and improving operations, time and productivity, aligning operations to markets, and the impact of technology developments on the service-delivery system. You will be able to analyse an operating system's efficiency in terms of process design, capacity and quality of service, and make recommendations to improve its design or operation. You will have a greater appreciation of the need to manage integrated processes across the value chain to achieve business success.

<b>Contact time</b>	28 contact hours per 3 week cycle
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Gordon Institute of Business Science
<b>Period of presentation</b>	Semester 1 or Semester 2

## Module content

In this module 'technology' and 'emerging markets' will be brought together. The module will explore the challenges that business face when entering emerging markets with a technology enabled offering. The module will not be a theoretical discussion but will take students through practical application of frameworks and tools. The module will start with a technology trends analysis - looking at technology developments over the last 5-10 years and assessing how new and emerging technologies could change the way business is done. If emerging markets are "how" right now, they are certainly not all equally "hot" and the elective will look at emerging country assessment to determine how managers should go about assessing an emerging country.

## Module content

This course examines the macroeconomic and socio-political environment in which business operates. Its aims are, firstly, to demonstrate the multi-faceted way in which global economic trends and domestic socio-political strategies impact on the private sector. Secondly, the course aims to provide participants with an insight into, and understanding of, the major causal relationships encountered in the macroeconomic equation. The key topics include the political/economic cycle, a concise profile of the South African economy, aggregate supply analysis, aggregate demand analysis, public sector economics, international economics, globalisation and international competitiveness, monetary economics, and economic indicators (including the business cycle, inflation and unemployment). This course will provide you with the conceptual frameworks and analytical tools needed to understand and predict the impact of macroeconomics. The focus on the South African economy within the context of the global environment and the resultant challenges for business will provide you with an important perspective on doing business in South Africa in the future.

#### Module content

This course is based on the premise that everyone has the capacity to succeed in an entrepreneurial setting, although some people may have a greater propensity to succeed than others. The intention of this course is to demystify the phenomenon broadly referred to as entrepreneurship; to make it easily understood as a business concept, readily accessible as a career option and practically applicable as a style of management. The course provides a broad perspective on entrepreneurship and its strategic importance and social relevance. It also provides an understanding of and approach to managing the issues involved in pursuing an entrepreneurial career path. It integrates different aspects of the MBA in developing a business plan for a potential entrepreneurial idea, and thus provides a practical application of concepts dealt with in other MBA courses.

**NQF Level** 09

**Contact time** 28 contact hours per 3 week cycle

**Language of tuition** Module is presented in English

**Department** Gordon Institute of Business Science

**Period of presentation** Semester 1 or Semester 2

### Module content

To create new wealth, an enterprise or start-up needs to be truly customer focused. What this means and how to go about achieving this is what this module is all about. First, we look at the principles and practice of customer-focused strategy, and how it differs from some of the traditional models being used, holding organisations back. Then, sessions will demonstrate how to uncover new “market spaces” and a tried and tested methodology called the “customer activity cycle” will be used to discover and uncover innovative products and services opportunities. The final part of the module looks at a systematic process for implementation of customer focus – i.e., making it happen. What shapes success and failure? What makes a person an energizer driving change? What kinds of teams are needed when, how to involve silos, how and with whom to partner? How to test new ideas, pace and prioritize, and how internal and market take-up and scale-up can be achieved and sustained.

### Module content

This module is about international business and the strategies of MNEs. This module is from the perspective of the MNE and should not be confused with economics or country competitiveness. Globalisation is not an option for any business; it is a strategic imperative. The same is true for countries, which cannot grow rapidly without access to global capital and skills. The current global economic crisis has highlighted the interconnectedness of businesses (local and international) and requires an understanding and appreciation of global business. This module aims to provide students with the skills necessary to develop global business strategies and meet the challenges entailed.

The objective of this course is to create the opportunity for students to enhance their ability to work with others and help them reflect on their individual beliefs, attitudes, and responses to others. At the individual level the course will focus on two key areas of leadership: Managing yourself (self awareness and understanding) and managing relationships (the impact you have on others). These two aspects involve a high level of self-awareness, the willingness to risk new behaviours, and the capacity to be flexible and make changes as the environment changes. The course is integrative and focuses on different aspects important for success. It provides perspectives, frameworks and concepts from the different management disciplines that you have encountered during your MBA. Furthermore, it is dedicated to developing self-aware leaders who are able to effectively manage relationships and positively impact global business and society.

## Module content

This course focuses on knowing oneself and the impact of one's history or background on business effectiveness in the environment in which the students are or will be working. This course is designed around a road trip undertaken by all students at the end of year one, and provides them with an opportunity to analyse the current dynamics, challenges, social and political nuances and the history of the area they visit. By immersing the students in the culture and history of the places they visit, this experiential approach is designed to illustrate how history shapes peoples' outlook and the way they feel, think and act, enabling them to comprehend what has made South Africa what it is today. The analytic framework is the political economy of business, economic inclusion and connectivity between the South African economy and the region, the continent and the world. Emphasis will be placed on the businesses driving the economic and social dynamics of the locations which are visited.

## Module content

The objective of this module is to create the opportunity for students to enhance their ability to work with others and help them reflect on their individual beliefs, attitudes, and responses to others. At the individual level the module will focus on two key areas of leadership: Managing yourself (self-awareness and understanding) and managing relationships (the impact you have on others). These two aspects involve a high level of self-awareness, the willingness to risk new behaviours, and the capacity to be flexible and make changes as the environment changes. The module is integrative and focuses on different aspects important for success. It provides perspectives, frameworks and concepts from the different management disciplines that you have encountered during your MBA. Furthermore, it is dedicated to developing self-aware leaders who are able to effectively manage relationships and positively impact global business and society.

## Module content

Dynamic markets encompass a broad range of countries that exhibit exciting economic growth prospects, have undergone significant political, social and cultural change and show encouraging signs of innovation along with policy and institutional developments to address the voids and complexities prevalent in these markets. Despite some progress, these fast growing markets tend to defy the norm of doing business.

In this integrative course students will be introduced to the particular opportunities and challenges of managing a business in countries where the accepted norms of doing business may not apply - countries that exhibit exciting growth opportunities, have undergone significant political social and cultural change, and show encouraging signs of innovation. The course will address political, social and cultural issues and the policy and institutional developments that address the complexities of these markets. Students will be given the skills to draw on the business functions introduced during the previous modules to execute effectively in environments where their business acumen has to be attuned to the unexpected and where outcomes that go well beyond the financial bottom line need to be considered.

## Module content

In this module students will be introduced to micro-economic theory and its application to real business situations. The aim of the course is to establish a rigorous appreciation for the main drivers of any business and to show how different variables will impact the company bottom line. The course begins by examining consumer demand. Students will examine why consumers act in a particular way, how they may react to market changes and what strategies a startup company or corporate may undertake to maximise its revenue in both the short and the long term. The course then shifts to focus on the production decisions of a company and examines in detail the different types of costs within an organisation, what variables positively and negatively affect these costs and how these costs can be managed to maximise profits and profitability. Different market structures are analysed to assist students in placing their firm and sector in an appropriate market structure thus providing useful insight into options regarding inter firm rivalry, firm interdependence and strategies to deal with competition from similar firms. The course is designed to give the student a set of tools, models and causal chains which will help them make more informed strategic decisions regarding: the pricing of their goods, their cost management, their competition strategies and options to maximise profitability.

### Module content

The supply chain plays a vital role in the success of organisations. Supply chain management is responsible for ensuring the flow of products, information and money to ensure value is added to the end consumers and return on capital employed for the entire supply chain is improved. As the networks become more complex, with more variability and the customer's expectation of shorter lead times, there is a need to give students a more in-depth understanding of this function, viewed from a systems perspective. This means the focus has to change from make and sell what can be made (push-and -promote) to make and sell what can be sold (position-and-pull). More detail is provided in the elective manual.

### Module content

The rationale for the module is that all businesses are increasingly exposed to the global context, whether in terms of their competitors, their markets or their supply chains. As such, it is incumbent upon all managers to have an appreciation of the opportunities and threats that exist in doing business on an international scale. To operate effectively in a global context, managers need to be able to evaluate differences between countries in terms of issues such as economic policy, cluster development, industry structure, and the impact of these differences on firm behaviour. This module aims to provide students with the skills necessary to develop global business strategies and meet the challenges entailed.

## Module content

This elective on the development of entrepreneurship from the inside-out focuses on three main elements. First, entrepreneurs are faced with a myriad of challenges, including persuading others by displaying their passion, as well as failure, making the role of personal emotion and its regulation during the entrepreneurial journey an important foundational theme. Second, we expand the role of emotion by exploring the cognitive processes of entrepreneurial action through experiential peer coaching activities. Here, students will be challenged to develop their cognitive resources such as adaptability and learning skills related to entrepreneurial action. Lastly, the behavioural dimensions are simplified into intra- and inter-personal meta-skills that individuals need to build the agility, resilience, and social networks essential for entrepreneurial sustainability and success.

#### Module content

Wicked problems are the complex systemic issues that decision makers are faced with every day. When dealing with these, decision makers are in systems where information is confusing, incomplete and often have to work with clients and other decision makers who have conflicting values. Often the proposed solutions are worse than the problem or are viewed as a white washing of actual issues. This elective unpacks wicked problems through a combination of frameworks, theories and discussions.

## Module content

In contrast to a long only fund trying to beat the market, a hedge fund has the task of having its long portfolio beat its short portfolio. The benefit of being able to have a negative exposure to shares, allows for two major advantages a hedge fund has over vanilla long only funds: The first is the ability of the short portfolio to be the source of funding for the long portfolio - thus the strategies can be self-funding. The second is that by careful choice of the weights of constituent stocks, the hedge fund can be made neutral, not only to the market itself, but also to several macro-economic factors. This elective teaches students how to select stocks for both long and short portfolios, how to choose weights so as to make it market and factor neutral, and finally, how to manage the whole hedge fund, managing risk on a day to day basis.

[MPhil \(Business Management\) \(Corporate Strategy\) \(Coursework\)](#)

**Prerequisites** No prerequisites.

**Contact time** 28 contact hours per 3 week cycle

**Language of tuition** Module is presented in English

**Department** Gordon Institute of Business Science

**Period of presentation** Semester 2

## Module content

This module focuses on a broad range of strategic management concepts. The application of strategic management in business has been informed by a shift from a relatively stable to a more rapidly changing and competitive environment that is dynamic and informed by new technologies. It is an environment that demands an ability to anticipate change and the capabilities to operate in new geographic markets. Businesses need to be able to deal with uncertainty as well as analyse their internal and external operating environments. They need to effectively orchestrate resources and core capabilities to achieve competitive advantage. With a focus on an emerging market context, this module considers how strategic management scholarship can be enhanced by a greater appreciation of different organisational contexts. At the end of this module, students will have an understanding and working knowledge of strategic management concepts and their application, with a view to developing their own scholarship in the field.

<b>Contact time</b>	28 contact hours per 3 week cycle
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Gordon Institute of Business Science
<b>Period of presentation</b>	Semester 2

### Module content

This module focuses on strategic foresight and demonstrates the understanding and application of strategic foresight as a useful method to use in complex and uncertain environments to develop robust business strategies. Students will be provided with a diverse range of case studies to illustrate the practicality and relevance of strategic foresight as an essential way of thinking that frames corporate strategy, decision making and strategy execution. The process of anticipating alternative possible, plausible and preferred futures is a multidimensional learning process that considers multiple interconnected domains, from global to local, from regional to organisational, from country to community.

The course will provide opportunities for students to apply frameworks that consider alternative ways of understanding business futures and the interconnectedness of business, social and environmental issues. It introduces students to systemic approaches and complexity thinking, explores how technology can be used to address systemic issues, and provide a foundation for meaningful action.

The supply chain plays a vital role in the success of organisations. Supply chain management is responsible for ensuring the flow of products, information and money to ensure value is added to the end consumers and return on capital employed for the entire supply chain is improved. As the networks become more complex, with more variability and the customer's expectation of shorter lead times, there is a need to give students a more in-depth understanding of this function, viewed from a systems perspective. This means the focus has to change from make and sell what can be made (push-and -promote) to make and sell what can be sold (position-and-pull).

<b>Contact time</b>	28 contact hours per 3 week cycle
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Gordon Institute of Business Science
<b>Period of presentation</b>	Semester 1 or Semester 2

## Module content

In this module 'technology' and 'emerging markets' will be brought together. The module will explore the challenges that business face when entering emerging markets with a technology enabled offering. The module will not be a theoretical discussion but will take students through practical application of frameworks and tools. The module will start with a technology trends analysis – looking at technology developments over the last 5-10 years and assessing how new and emerging technologies could change the way business is done. If emerging markets are “how” right now, they are certainly not all equally “hot” and the elective will look at emerging country assessment to determine how managers should go about assessing an emerging country.

The aim is to better understand and gain a feeling of trade and business in and around Southern Africa – through a practical first-hand experience by road from Johannesburg to a neighbouring country (Zimbabwe or Mozambique). The goals and objectives include the gaining of some insight into the life blood of the region: the movement of goods and services between South Africa and surrounding countries. The role of infrastructure, policy, bureaucracy and security on trade and general economic activities will be witnessed first-hand and discussed in detail – with perspectives and solutions offered and exchanged among the group.

### Personal leadership development 850 (GIL 850)

**Qualification** Postgraduate

**Module credits** 6.00

**NQF Level** 09

**Language of tuition** Module is presented in English

**Department** Gordon Institute of Business Science

**Period of presentation** Semester 1 or Semester 2

### Module content

The objective of this module is to create the opportunity for students to enhance their ability to work with others and help them reflect on their individual beliefs, attitudes, and responses to others. At the individual level the module will focus on two key areas of leadership: Managing yourself (self-awareness and understanding) and managing relationships (the impact you have on others). These two aspects involve a high level of self-awareness, the willingness to risk new behaviours, and the capacity to be flexible and make changes as the environment changes. The module is integrative and focuses on different aspects important for success. It provides perspectives, frameworks and concepts from the different management disciplines that you have encountered during your MBA. Furthermore, it is dedicated to developing self-aware leaders who are able to effectively manage relationships and positively impact global business and society.

## Module content

This course examines the macroeconomic and socio-political environment in which business operates. Its aims are, firstly, to demonstrate the multi-faceted way in which global economic trends and domestic socio-political strategies impact on the private sector. Secondly, the course aims to provide participants with an insight into, and understanding of, the major causal relationships encountered in the macroeconomic equation. The key topics include the political/economic cycle, a concise profile of the South African economy, aggregate supply analysis, aggregate demand analysis, public sector economics, international economics, globalisation and international competitiveness, monetary economics, and economic indicators (including the business cycle, inflation and unemployment). This course will provide you with the conceptual frameworks and analytical tools needed to understand and predict the impact of macroeconomics. The focus on the South African economy within the context of the global environment and the resultant challenges for business will provide you with an important perspective on doing business in South Africa in the future.

<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Gordon Institute of Business Science
<b>Period of presentation</b>	Semester 1 or Semester 2

## Module content

To create new wealth, an enterprise or start-up needs to be truly customer focused. What this means and how to go about achieving this is what this module is all about. First, we look at the principles and practice of customer-focused strategy, and how it differs from some of the traditional models being used, holding organisations back. Then, sessions will demonstrate how to uncover new “market spaces” and a tried and tested methodology called the “customer activity cycle” will be used to discover and uncover innovative products and services opportunities. The final part of the module looks at a systematic process for implementation of customer focus – i.e., making it happen. What shapes success and failure? What makes a person an energizer driving change? What kinds of teams are needed when, how to involve silos, how and with whom to partner? How to test new ideas, pace and prioritize, and how internal and market take-up and scale-up can be achieved and sustained.

## Multinational enterprise business strategy 856 (GIL 856)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	6.00
<b>NQF Level</b>	09
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Gordon Institute of Business Science
<b>Period of presentation</b>	Semester 1 or Semester 2

## Module content

This module is about international business and the strategies of MNEs. This module is from the perspective of the MNE and should not be confused with economics or country competitiveness. Globalisation is not an option for any business; it is a strategic imperative. The same is true for countries, which cannot grow rapidly without access to global capital and skills. The current global economic crisis has highlighted the interconnectedness of businesses (local and international) and requires an understanding and appreciation of global business. This module aims to provide students with the skills necessary to develop global business strategies and meet the challenges entailed.

### Module content

In this module students will be equipped to execute their Integrative business research project. Each student's Integrative business research report will be focused on a key relationship or research question that relates directly to their new business idea. The module will focus on formulation of a research question, population and sampling concerns, the use of literature reviews, various qualitative and quantitative research methodologies including documentary research, surveys, questionnaire design and interviewing techniques. The analysis of data and research report writing will also be covered. The research report will serve as a means for students to deepen their insights into the market that they are preparing to enter or to help them understand a key relationship affecting their business. As such the module will prepare a student to do research that is of both practical and intellectual value.

### Regulations and rules

The regulations and rules for the degrees published here are subject to change and may be amended after the publication of this information.

The [General Academic Regulations \(G Regulations\)](#) and [General Student Rules](#) apply to all faculties and registered students of the University, as well as all prospective students who have accepted an offer of a place at the University of Pretoria. On registering for a programme, the student bears the responsibility of ensuring that they familiarise themselves with the General Academic Regulations applicable to their registration, as well as the relevant faculty-specific and programme-specific regulations and information as stipulated in the relevant yearbook. Ignorance concerning these regulations will not be accepted as an excuse for any transgression, or basis for an exception to any of the aforementioned regulations.

### University of Pretoria Programme Qualification Mix (PQM) verification project

The higher education sector has undergone an extensive alignment to the Higher Education Qualification Sub-Framework (HEQF) across all institutions in South Africa. In order to comply with the HEQSF, all institutions are legally required to participate in a national initiative led by regulatory bodies such as the Department of Higher Education and Training (DHET), the Council on Higher Education (CHE), and the South African Qualifications Authority (SAQA). The University of Pretoria is presently engaged in an ongoing effort to align its qualifications and programmes with the HEQSF criteria. Current and prospective students should take note that changes to UP qualification and programme names, may occur as a result of the HEQSF initiative. Students are advised to contact their faculties if they have any questions.
