# ACKNOWLEDGMENTS

I would like to take this opportunity to sincerely thank all those individuals and organisations across the UK Overseas Territories and their Governments and Administrations for allowing my team and I to visit, making us feel welcome, and helping our efforts to document the wildlife, history and heritage of the Territories. Your advice and help finding, studying, photographing and filming the animals, plants and other subjects featured in this work was essential, and only through your help could a book such as this be possible.

Assembling this overview of the aquatic life of all of the UK Overseas Territories presented unique challenges. Completing this work was possible only by bringing together key experts from across the world, whose studies concerned specific aspects of the marine biodiversity of each of the UK Overseas Territories.

I am astounded by how many people have so generously shared their findings, and contributed text, data and images to make this work complete. Such content would otherwise have been impossible to include, and has greatly enriched the content of this book.
