UP-Carnegie conference
Pretoria, South Africa
24th - 31th March 2019

Outline;

- Introduction
- Situation at hand
- Factors affecting the realization of these goals
- What can the library do to achieve these goals
- How the library can realise these goals
- Activities in the three countries/ institutions,
 - Uganda SGD 2 by Jackie and SDG 3 by Martha
 - Nigeria by Francisca
 - Ghana by Lydia
- Conclusion

Introduction

- Reduction of undernourished people in the developing regions by almost half,
- Maternal mortality declined by 45%,
- New HIV infections fell by approximately 40%
- Uneven across regions and countries,
- No one should be left behind

UNDP (2015)

Situation at hand

- 815 million worldwide
- 12.9% is undernourished
- 45% deaths due to poor nutrition
- 23 million primary children attend classes hungry in Africa

- 400 million people have no basic health services
- Africa**
- 24% global disease burden
 - 72% deaths due to communicable diseases
 - 6 million children die before 5th birthday

Factors affecting the realization of these goals

- Level of education
- Untimely delivery of the information
- Inappropriate media of dissemination
- Income and social status
- Political instability
- Social support services
- Access and use of health services
- Physical environment
- Climate changes
- Poor transportation system

Walingo (2009), Ugwoke, Osagie, and Abuah (2015), Shapouri and Rosen (2001), Marza et al (2015), Marza, Angelescu and Tindeche (2015), Wichelns (2015)

What can the library do to achieve these goals?

- Collaboration with other players
- Research and Development
- Repackaging of Information
- Grant Funding Agencies
- Sensitization
- Community empowerment through ICT
- Education Centers/ corners
- Bibliotherapy
- Digital specialized consumer library

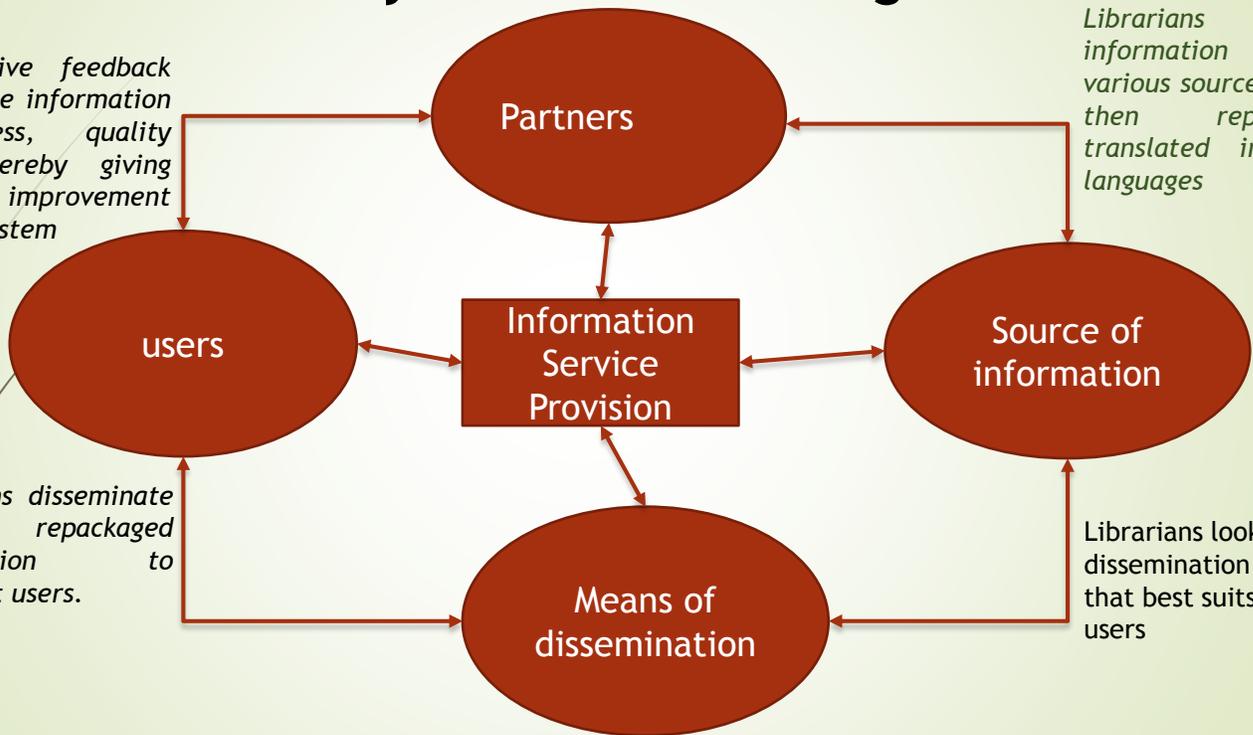

Ugwoke, Osagie and Abuah (2015), Nwaoguala et al (2015), Arko-Cobbah (2010), Duhon & Jameson (2013), Dadzie, Martin-Yeboah and Tachie-Donkor (2016)

How the library can realise these goals

Users give feedback about the information (timeliness, quality etc) thereby giving room for improvement of the system

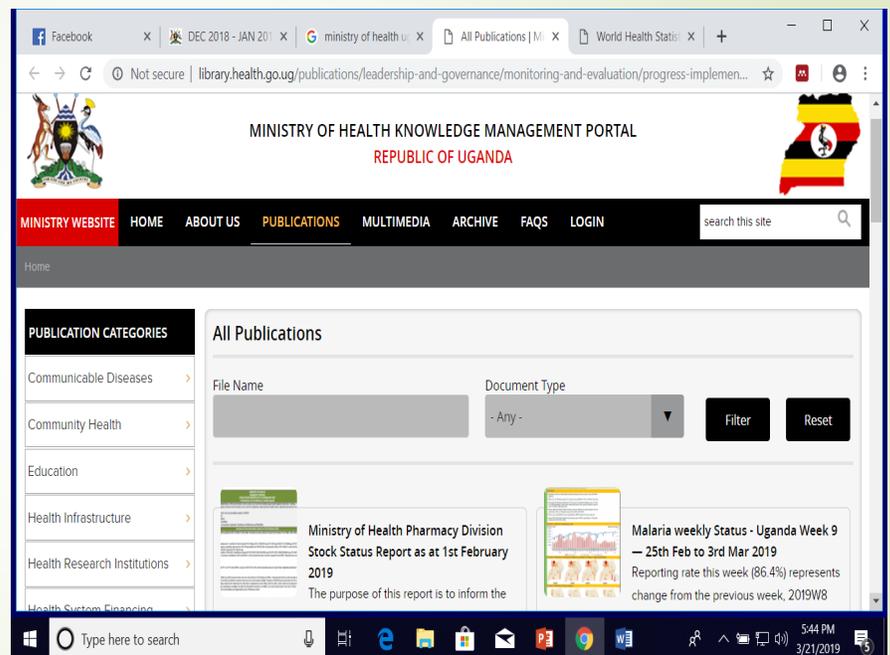

Librarians collect information from various sources. This is then repackaged/ translated in native languages

Librarians disseminate the repackaged information to different users.

Librarians look for a dissemination media that best suits the users

Good health and wellbeing for all in Uganda

Ainebyoona Daily Monitor, Saturday May 6 2017;
<https://www.monitor.co.ug/Magazines/Farming>)

Food Security for Zero Hunger In Uganda...

- 795 million people suffer chronic hunger in the world (Hickel, 2016). **Eradicating hunger is complex but achievable.**
- Post-harvest food losses estimated to be 1.3 billion tons per year worldwide contribute to the chronic hunger. Out of that Uganda postharvest loss is more than 20 million metric tonnes of grain in Uganda, valued at over \$4b annually which is enough to feed 48 million people (Dunford, 2015).**
- Associated with hunger in **Uganda** is postharvest loss due to lack of preservation and storage information, value addition and market. **During harvest seasons, the food stuffs are plenty and prices are low in most of the parts of the country. However dry seasons food is expensive which make Ugandans with low house hold income to go hungry.**
- Government of Uganda through Ministry of Agriculture, NARO and other 16 Institution using Agriculture Extension Workers, NGOs like Hunger Project and Development Partners have invested over the years to reduce postharvest loss. However the problem has persisted(USAID, 2018).**

Small Scale Farmers Information Need in Uganda

Post-Harvest Handling Information Academic Libraries

Database	Worldwide	Africa	Uganda
AGORA	16,737	5,550	1,051
Google Scholar	35,200	17,300	6,070
Total	51,937	22,850	7,121

Uganda Infohub & Repositories

- ▶ NARO works with Ministry of Agriculture, College of Agriculture and Environment Science, 16 other agricultural research institutes and other partners (<http://www.naro.go.ug>) to provide evidence based information stakeholders like farmers:
<http://www.naroinfohub.org/repository> - Lack specific information on post harvesting handling for most serials like maize, bananas, rice, cassava and sweet potatoes.

Applications by the Kampala International University

U.N. Sustainable Development Goals - SDG Inter-University quiz challenge

Youth Empowerment on Human rights for sustainable development. Availability of evidence based electronic information

Applications by the Nigerian Government

As the threat of hunger and food insecurity looms in Sub-Saharan Africa-Nigeria inclusive, FGN has incorporated many programmes and policies that will help to address this menace. Some of them include:

The Green Alternative Agriculture Promotion Policy- objectives to boost food production, curb importation, stimulate export and create jobs

Anchor Borrower's Programme- a CBN initiative to lift thousands of farmers out of poverty and generate jobs for the unemployed Nigerians.

Civil Society Organisation: end hunger, achieve food security & improve nutrition

Applications by the Nigerian Government...

Rural Finance Institution Building Programme - Prog. between the International Fund for Agriculture Development and FGN to develop and strengthen Micro Finance Bank by enhancing farmers to basic banking services

Youth Enterprise with Innovation in Nigeria (YouWin) - a collaborative effort of the Min. of finance , communication Tech and Youth Development-Assist aspiring entrepreneurial youth in the country to develop and execute their business ideas.

Staple Crops Processing zones- The concept is to set up processing plants in zones of high food production and to process commodities into food products. This way they attract and assist private sector agribusinesses.

Vitamin A Cassava or Yellow Cassava Project

Project Steps:

- Consultation/Partnership/Findings
- Sensitization about the Yellow cassava
- Visit/Project Implementation
- Seminar/farm Visit

Consultation/Partnership/Sensitization

Meeting with the Agric
librarian and Agric
Scientist in FUTO

Meeting the Women
leader of Eziobodo
Rural Farmers

Visit to the Ministry of
Agriculture for
consultation

Visit/Project Implementation

Presentation of kola nut to the
rural farmers.

Sharing/distribution of Vitamin
A/yellow cassava stem to the
farmers

Seminar/Farm Visit

A cross section of the farmers listening to the seminar presented in their own local language

Librarian, Agro-hive CEO posing with the project volunteers, some of the beneficiaries and cyclists that conveyed them to the farm

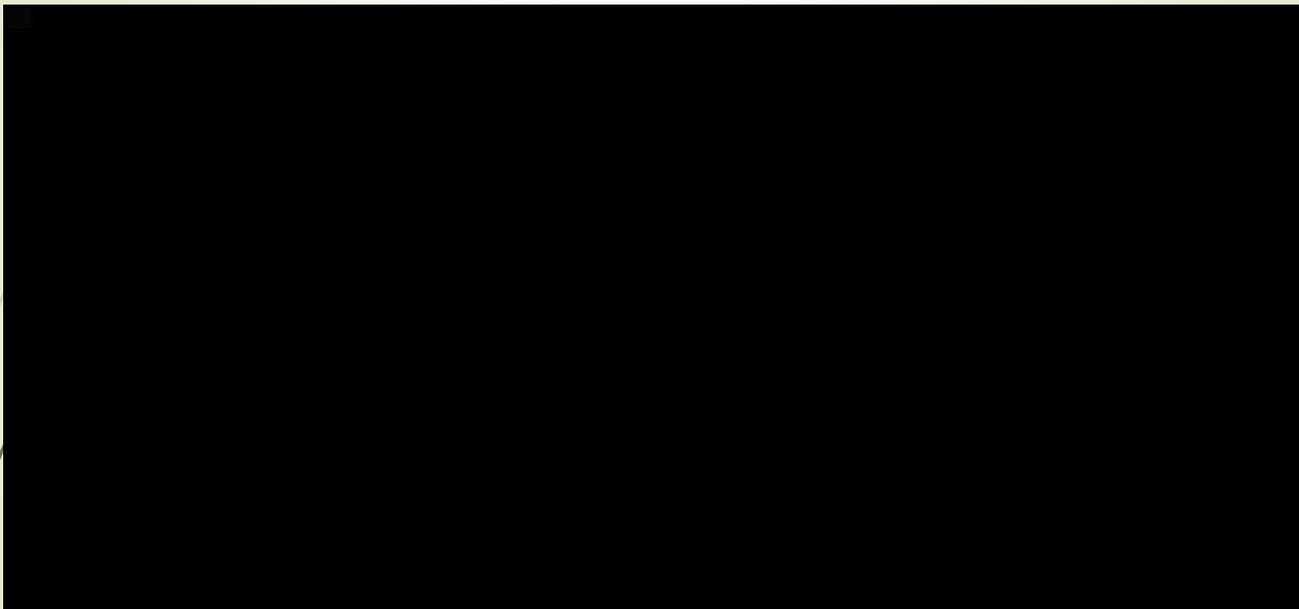

A cross section of the farmers with project partners after the farm visitation

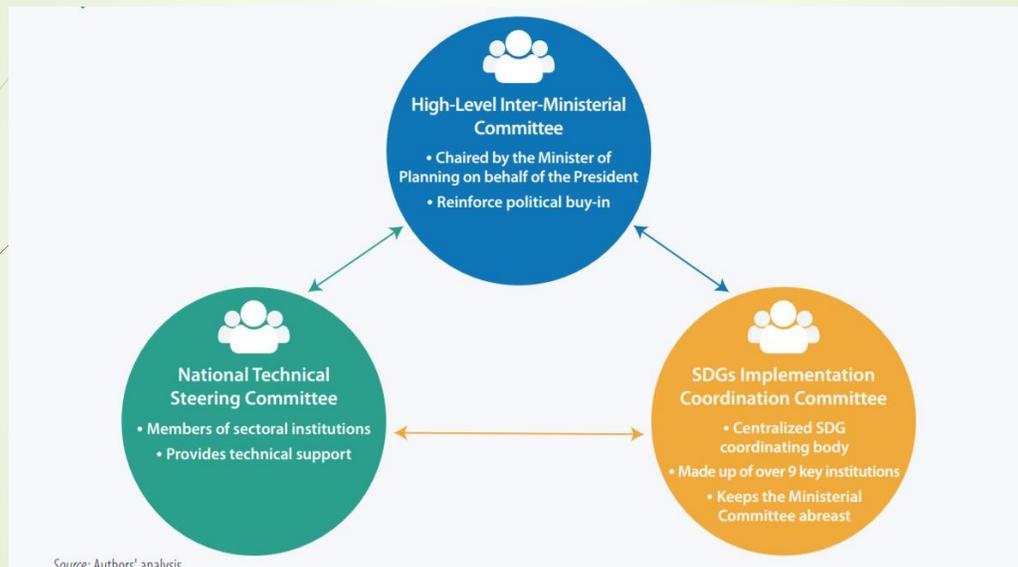

Two of the beneficiaries posing with the librarian and her project partner.

See Video Clip Covered During the Seminar and the Farm Visit

Application by the Ghana Government

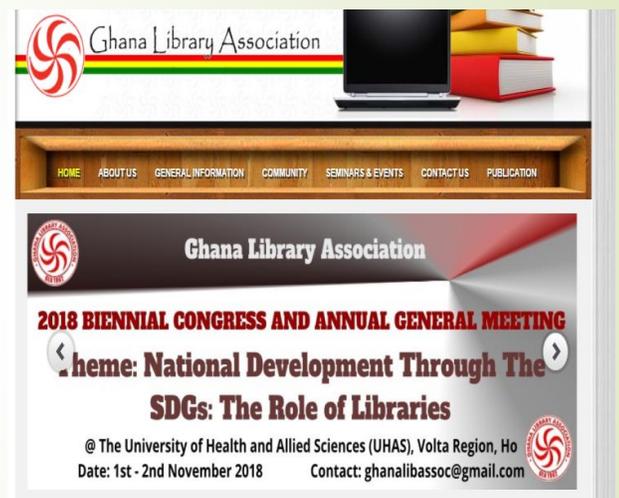

An Inclusive Approach by the Ghana Government

SDGs Africa, 2018

Efforts by Universities and the Ghana Library Association

Colleges of Health Sciences: SDG 3
UDS: SDG 2
UG: Awareness Creation

GLA Promoting SDGs

Application by Ghana Institute of Journalism

Collaboration with LA Public Health Unit to Educate the inmates at the Senior Correctional Centre

Collaboration with National Road Safety Commission to Educate Covenant Presbyterian Basic School

Application by the Ghana Institute of Journalism
