Malaria-related conferences and events

The list is in chronological order. The conferences or events are either focused on malaria-related issues or on specific subjects (i.e. public health or community health, health promotion, vaccine development, parasitology, infectious diseases, tropical diseases, non-communicable diseases, tropical medicine, immunology, vector control, mathematical modelling, big data, remote sensing) that could tie in with malaria research in a trans- or multi-disciplinary approach.

If you are aware of additional conferences or events that are not listed here or if any of the links are not working correctly then please notify us:
