South African Field Epidemiology Training Programme:

Call for applicants – 2020 intake

The South African Field Epidemiology Training Programme (SAFETP) is requesting applications for the incoming 2020 class from qualified health professionals with an interest in public health and commitment to public service.

SAFETP is hosted by the National Institute for Communicable Diseases (NICD) of the National Health Laboratory Services (NHLS), for the National Department of Health. The programme is a combination of didactic and practical training in which the resident is grounded in the academic basics of applied epidemiology and is assigned to field sites where s/he learns by doing while being mentored by supervisors in projects that address key public health priorities.

This residency programme is a **two-year, full-time training**, from which residents graduate with either a Masters in Public Health (MPH) from the University of Pretoria OR a Masters in Epidemiology (MSc) in Field Epidemiology from the University of the Witwatersrand. The 2020 cohort will begin in January 2020 and end in December 2021 and applicants are required to apply at both the University of Pretoria and the University of the Witwatersrand.

The growing field of public health and epidemiology in South Africa and globally brings exciting opportunities for graduates and professionals from health related fields to become competent in applied epidemiology of diseases and conditions relevant to South Africa. It also develops their leadership and management skills relevant to public health system strengthening and management. The training focuses on investigations of public health outbreaks (an acute health event or other epidemiological activity) and using epidemiology and biostatistics to conduct descriptive and analytical studies.

Bursaries/stipends may be available for select South African applicants fulfilling predefined criteria. South African applicants working currently within the South African government at various levels, who plan to take study leave to participate in the programme and afterwards return to their workplace, **must have written approval from their departments for the entire two years**. NICD staff that have been funded and granted study leave will be required to continue working for the NICD for at least two (2) years after completing the MPH **OR** MSc programme.

South Africans and permanent residents who are funded by their employers must ensure that this funding covers their salaries/stipends, as well as university registration and tuition fees for the two-year training period.

For applicants applying from other African countries - the eligibility requirements still apply and the international applicant must have the required visa and permissions to study in South Africa. The applicants must ensure that all the costs related to participation in SAFETP are fully covered for the 2 years of training – salaries/stipends, university registration and tuition fees,

accommodation, travel and accommodation to investigate outbreaks - by their respective governments.

Work experience requirements

- Professional experience in a health field or other fields relevant to health
- Experience of working in the public health system is desirable

Minimal Educational requirements (all degrees should be in a health, laboratory or public health related field from an accredited university):

- A medical, veterinary or dentistry degree ; OR
- A doctorate degree in a medical/health related field; OR
- A master's degree in a medical or health related field; OR
- An honour's/bachelor's degree with prior research experience

Please note that a B Tech degree does not fulfill the minimum educational requirements of the University of Pretoria, the University of the Witwatersrand and the SAFETP.

Key requirements:

Applicants must:

- Be registered with their respective professional bodies
- Be fluent in spoken and written English
- Be computer literate and proficient in Microsoft Word, Excel, Power Point and Outlook for use in communication, word processing, analysis, presentation and report generation. Knowledge of a statistical package will be an advantage
- Have a valid driver's license and be willing to drive a hired car
- Provide proof of current physical residential address for future purposes of *Domicilium citandi et executandi*.

How to apply

1. If you meet all the requirements, download and complete the application and two reference forms that are available on our website:
<http://www.nicd.ac.za/training/south-african-field-epidemiology-training-programme/>
2. Additional forms/documents required are:
 - a. Certified copies of qualification certificates
 - b. Statement of Purpose: In 500 words or less describe your career goals and your interest in applying for this programme
 - c. Curriculum Vitae (CV)
 - d. Results of the National Bench Mark Test –please visit the website of National Bench Mark Test via the website: www.nbt.ac.za and Tel: +27 (0)21 650 3523 for more information on dates and venues of the test. Please note that this is a University of Pretoria requirement and **NOT** a University of the Witwatersrand requirement.
 - e. Non South Africans who are accepted must do the Test of English as Foreign Language (TOEFL) and have their original degrees accredited by the South African Qualifications Authority (SAQA).
 - f. Proof of the online application from the University of Pretoria **AND** the University of the Witwatersrand as follows:

University of Pretoria: <http://www.up.ac.za/en/online-application/article/2445192/apply-at-the-university-of-pretoria> follow the process for applying online.

University of the Witwatersrand: Evidence of application to study Field Epidemiology in the MSc Epidemiology Programme of University of the Witwatersrand. Wits postgraduate application forms can be accessed online at: <http://www.wits.ac.za/postgraduate/applications/> Also visit the following page for the discipline specific requirements: <http://www.wits.ac.za/publichealth/academic-programmes/postgraduate/master-of-science-in-epidemiology/> Applicants should note to apply for accommodation if they will require it. The deadline for accommodation application is 30 October 2019.

All these completed forms should be submitted to: SAFETP via: Gloria Motshudi, e-mail GloriaMo@nicd.ac.za and carlr@nicd.ac.za

You may also hand deliver the above application forms to Gloria Motshudi, SAFETP Administration Office, Room L6, PRF Reception Building, NICD, No 1 Modderfontein Road, Sandringham, Johannesburg.

For enquiries or more information please contact:

SAFETP: Gloria Motshudi, telephone +27 11 386 6542 e-mail GloriaMo@nicd.ac.za

University of Pretoria: Mrs. René de Waal at rene.dewaal@up.ac.za or Mr Reuben Semanya at reuben.semenya@up.ac.za

University of the Witwatersrand: Lerato Podile, telephone: +27 11 717 2605, email lerato.podile@wits.ac.za

Closing dates:

University of Pretoria - 31 July 2019

University of the Witwatersrand – 31 July 2019

SAFETP – 31 July 2019

It is your responsibility to ensure that your application has been received by SAFETP. Non-certified copies of qualifications will not be considered, neither will those received after the closing dates. Reference checks will be conducted. All applications that meet the above requirements and received before the closing date will be acknowledged and given a reference number.

Correspondence will be made with short listed candidates only. If you have not heard from SAFETP within 6 weeks of the final closing date, please consider your application to be unsuccessful. For further information please visit the website:
