Dear SIAM Community,

We hope you are staying well during these challenging times. We know you have many competing priorities right now, and I want to reiterate how much we value the dedication and hard work of SIAM members and volunteers. Your support of SIAM and each other is seen and appreciated now more than ever. As your professional society, we are working hard to help facilitate a better understanding of this virus and the research surrounding it. Please take a look at the resources we've made available, listed below. It is our hope that these materials will help educate and mobilize the SIAM community.

- **FREE Content:**
 - **SIAM Epidemiology Collection**, focused on disease modeling, pandemics, and vaccines, is freely available to all for one year. Please share this important resource with your peers and students. [Access the collection.](#)
 - **SIAM Journal on Mathematics of Data Science (SIMODS)**: SIMODS is now freely accessible through 2021 – adding an additional year – in response to financial implications that individuals and institutions are feeling due to COVID-19. If you have any remote access needs for SIMODS or any other SIAM publication, please contact us at service@siam.org and we will work with you. [Access SIMODS.](#)
- **Lectures & Videos from Past Conferences**: Since 2008, SIAM has been recording many invited talks, prize lectures, minitutorials, and select minisymposia from our conferences. Many upcoming SIAM Conferences may be cancelled or postponed, but you can keep abreast with the latest research by [checking out this vast collection of 2,000+ presentations.](#) It may even be a helpful resource for your courses!
- **Funding Agency Accommodations**: The White House Office of Management and Budget has issued a memorandum to provide agencies with additional flexibilities for grant recipients affected by the loss of operational capacity and increased costs due to the COVID-19 crisis. [Learn more in this recent blog post.](#)
- **Mathematical Resources to Help Understand COVID-19**: We've gathered this collection of resources to facilitate a better understanding of the virus and associated research; we will be updating this post as we become aware of new materials. [Check out the collection.](#)

In addition, keep an eye out in the next few months for a special issue of *SIAM News* dedicated to infectious disease.

Remember, we are sharing important SIAM-specific updates via this blog post: go.siam.org/COVID19. Please check back for new information and reach out to us if you have any questions or feedback.

Thank you for your ongoing support of SIAM. Stay healthy!

Jim Crowley
SIAM Executive Director
