

Online Course in Project Procurement Management Principles and Practices

Presented by the Graduate School of Technology Management, University of Pretoria

3 ECSA CPD Points: CPD Reg No.: P0007285-2019

Project Management is the fastest growing form of management in the world. Procurement management is an important part of project management as the success of the project may depend either in part or entirely on the project team's ability to properly identify and acquire the deliverables necessary to execute the project. What deliverables should be procured? What aspects should be considered during procurement planning? How to correctly advertise, evaluate and award a bid based on tendering or negotiation? How to select the most appropriate contract payment type? These are some of the issues that are addressed in this **Online Course in Project Procurement Management Principles and Practices**. Upon successful completion, you will be able to utilise project procurement tools and techniques to identify, acquire and manage procurement relationship in a project environment.

This course earns you credit towards the Programme in Project Management (PPM).

Online Course in Project Procurement Management Principles and Practices

Presented by the Graduate School of Technology Management, University of Pretoria

Course content

- Introduction to project procurement
- Procurement planning
- Procurement methods
- Contract types
- Contract risk transfer and risk management
- Project stages and contracts
- Standard forms of contract
- Solicitation planning
- Source selection
- Sensitivity analysis

Learning outcomes

After successfully completing the course, you will be able to

- develop a contracting model appropriate to the procurement situation
- select an appropriate contract payment type with an accompanying procurement method
- identify, address and assign a contractual risk to the party best able to manage it and formulate a risk transfer and a risk enforcement mechanism
- construct a source selection value model, with appropriate qualification, critical and differentiation evaluation factors and evaluate various bids in accordance with the source selection value model
- use sensitivity analysis to understand the sensitivity of the evaluation
- recommend the best bid/bidder based on a trade-off analysis, and
- assemble a set of procurement procedures that satisfy the constitutional requirements of being fair, equitable, transparent, cost-effective and competitive.

Who should enrol?

This course is ideal for you if you are involved in or associated with projects or project procurement whether as a project manager, procurement officer, project team member or senior manager. The course is suitable for all sectors of business and government.

Course presenter

Dr Taryn Bond-Barnard
Senior Lecturer
Graduate School of Technology
Management
Email: taryn.barnard@up.ac.za

Taryn obtained a B.Eng Industrial Engineering degree and an M.Eng degree in Project Management, both with distinction, from the University of Pretoria. She went on to complete her PhD in Engineering at the same University in February 2015. Taryn is a certified Project Management Professional (PMP) and a professional engineer. Taryn has worked as an engineer, operations manager and project manager from 2008 to 2015. She has extensive experience in process engineering and business analysis in the information and communications technology industry. Taryn has been involved in project management for a number of years and has managed a variety of software development and business process improvement projects both in the public and private sector. Taryn teaches IT and services project management as part of the only master's programme on the African Continent that is accredited by the GAC (Global Accreditation Center) of the PMI (Project Management Institute). She has also been teaching project management at honours level, since 2014.
