MPM Graduation rate – 2006-2020

MPM Completion Rates:

Within *prescribed* two years: approximately 20-25%

Within 3-4 years: approximately 20-25%

Longer than 4 years: approximately 10% (requires special approval).

Reasons for relatively slow throughput:

Part-time programme; hence all participants work full-time. Requires disciplined personal time management.

The Research Project often takes more time and effort than expected. Data acquisition is typically time-consuming.

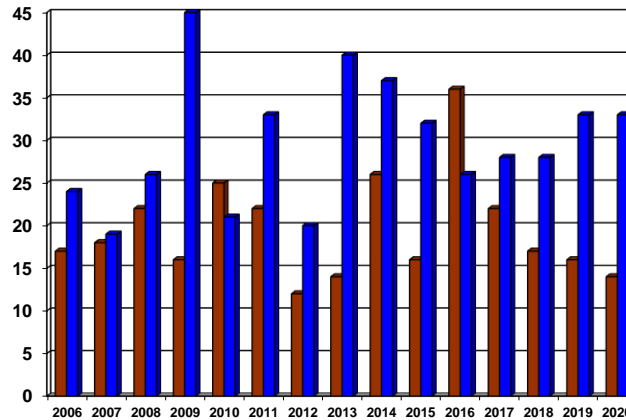

Students get promoted or change jobs while doing their Masters.

Students from remote areas experience problems with narrow band-width and unreliable internet access

$$591/981 = 60\%$$
