Responsible Grade 10 subject choices are important

It is a great disappointment when Grade 12 learners and their parents realise that the subjects the learners have chosen do not allow them to apply for their preferred study field at university. It can even happen that they have chosen the correct subjects, but they do not meet the minimum admission requirements.

Two reasons for high dropout rates are the following:

- (a) Learners choose the wrong programme.
- (b) Learners do not ensure that their Grade 10 subject choices align with their preferred programme.

This brochure enables Grade 9 learners to make sound subject choices in Grade 10 that will provide them access to an array of programmes. Learners have a crucial responsibility in this regard, because uninformed subject choice decisions may negatively affect their future career planning. Learners need not panic, they can consider options with their parents and educators to determine which exciting career they would like to pursue and what subjects they need to take in Grade 10 to make that dream possible.

This brochure is a unique, step-by-step guide that will enable Grade 9 learners to make sensible subject choices for Grade 10.

Steps to follow

Gather information on possible career opportunities

This is often the most difficult step and the one that causes parents and learners to become despondent, especially if a learner simply does not know what career they would like to follow one day. However, the aim with this step should not, in the first place, be to decide on a specific career, but rather to determine a broad field of career interest, eg health sciences, social sciences, natural sciences, engineering, etc.

Learners should obtain as much information as possible on the fields that hold their interest and are aligned with their personality. Parents play an important role in this process and can be of great help because they know more about the demands made by specific careers. It is important that learners should be supported and guided with advice to enable them eventually to make their OWN choices as far as possible. In this way, the self-image of learners will develop and they will take ownership of their decisions. Several sources are available where more information on fields of career interest may be obtained. One such source to be recommended is the website of PACE Careers.

Learners may follow the following steps:

- Go to www.pacecareers.com.
- Click on 'Services'.
- Scroll down and click on 'Take the questionnaire' and then on 'Start the questionnaire'.
- Register to complete the questionnaire. It consists of 105 simple statements to which the learner only has to answer 'Yes' or 'No'.
- When the last question is answered, a profile of the learner's fields of career interests is shown, with a clear indication of the fields of career interest that are the strongest.
- Next to every field of interest is a link on which a learner should click for a list of all possible careers within the field of interest concerned.
- By clicking on a specific career, the learner obtains information in connection with that career, including a summary of what the career entails, the subjects required and employment possibilities.
- It is further suggested that learners take time to do job shadowing. In this way learners can experience the real working environment, which is a crucial aspect when a decision about a specific career should be made.

The National Senior Certificate (NSC) and the Independent Examination Board (IEB) Certificate

The University of Pretoria accepts NSC/IEB results certified by Umalusi for bachelor studies, but learners must also adhere to the minimum admission requirements stipulated for each undergraduate programme offered in our 9 Faculties.

Grade 9 learners are required to include at least SEVEN subjects in their subject package for Grade 10, which will include:

Four compulsory subjects:

- Home Language
- First Additional Language
- Mathematics or Mathematical Literacy
- Life Orientation

Three optional NSC 20 credit subjects offered by the school

Make sure you are aware of the admission requirements for studies at a tertiary institution

Examples of tertiary institutions include universities, universities of technology, colleges for further education and training (FET colleges) and private colleges. Prospective students will have to comply with two sets of admission requirements based on their Grade 11 and/or Grade 12 results in order to study at a tertiary institution:

Admission requirements of the Department of Education

The statutory minimum requirements for degree studies is a National Senior Certificate (NSC) or an Independent Examination Board (IEB) Certificate with a minimum achievement level of 4 (50%–59%) in four recognised NSC 20-credit subjects.

Admission requirements of the different tertiary institutions

These admission requirements include faculty-specific admission requirements. Please note that the different tertiary institutions will have different admission requirements. For the admission requirements prescribed by the University of Pretoria, visit www.up.ac.za > study.

Steps to follow: Step 03 (continued)

In order to be considered for a programme, the applicant must meet the specific subject requirements as well as the APS (Admission Point Score) requirement, eg:

	Minimum requirements for 2020			
	Achieven	nent level		
Programme	Mathematics	English Home Language or English First Additional Language	APS	
	NSC/IEB	NSC/IEB		
BA (Audiology) [4 years] Closing dates: SA – 30 June Non-SA – 30 June	5	5	32	

Departmental selection is based on academic achievement. To retain admission, candidates will be expected to achieve an APS of at least 32 in Grade 12. Only 50 students are admitted. The provisional selection process commences in July in the year preceding the first year of studies. More information can be obtained from the programme coordinator. The first study year of Audiology and Speech-Language Pathology is the same. The NBT is not applicable to this programme. NOTE: We will consider both first and second choice applications for BA (Audiology).

Careers as an audiologist: Diagnostic and rehabilitative audiology, audiometry and hearing therapy, work in education, special education, hospitals, clinics, private practice, government, military and academic institutions (teaching, research), and industry.

The calculation of the APS is done on a seven-point rating scale

National Senior Certificate (NSC) seven-point rating scale

Achievement level	Description	Percentage
7	Outstanding achievement	80-100%
6	Meritorious achievement	70–79%
5	Substantial achievement	60–69%
4	Adequate achievement	50–59%
3	Moderate achievement	40-49%
2	Elementary achievement	30–39%
1	Not achieved	0–29%

Example: Joanne Govender

Subject	Percentage (%)	Achievement level	APS
English Home Language	73	6	6
Afrikaans FAL	68	5	5
Mathematics	81	7	7
Physical Science	84	7	7
CAT	91	7	7
Geography	72	6	6
Life Orientation	84	7	-

38 (APS TOTAL)

UP Language policy

From 1 January 2019 English will be the language of teaching and learning for all first-year programmes. The only exception is where students are studying other languages and in programmes with profession-specific language outcomes, subject to approval by Senate. English will also be the language of official communication and administration on all campuses and in residences. Where requested and feasible, administrative services may be provided in other South African languages.

Make an important choice between Mathematics and Mathematical Literacy

Not all learners have a love for Mathematics and not all learners have the same aptitude to master this subject equally well. Learners who do not like Mathematics and do not do well in this subject are unlikely to choose a field of study or career where Mathematics is a prerequisite. However, it is a reality that Mathematics is a compulsory subject for a number of programmes at tertiary level and that learners who do not take Mathematics, will therefore not be able to be considered for such programmes.

Learners usually find it easier to master the content of Mathematical Literacy than the content of Mathematics since Mathematical Literacy is aimed more at the practical application of mathematical principles and concepts in everyday life, eg calculating areas, volumes and circumferences, calculating profit and loss, drawing up a budget, etc. Remember that for a learner, a pass mark in Mathematical Literacy is better than a failing mark in Mathematics. This should also be the point of departure when the learner, together with his or her parents, should decide between these two subjects. Learners and parents are strongly advised to consider the recommendation from the school and the Mathematics teacher in this regard when making this decision.

Please also note that it is most definitely not the end of the study or career path for a learner who does not take Mathematics. **There are many fields of study available for learners taking Mathematical Literacy as a subject, and these are clearly indicated in the faculty tables in this brochure.** In addition, it is a fact that these learners may become just as successful in their subsequent careers as their colleagues who took Mathematics as a subject.

Decide now on a safe choice of subjects for Grade 10

The structure of the NSC and the IEB Certificate referred to in Step 02 allows Grade 10 learners, apart from the critical and compulsory subjects, to also take elective subjects that the learners enjoy and in which they can perform well to enhance their average marks.

Apart from good results in the subjects required for specific programmes, the average percentage achieved by learners for all their subjects taken together is very important with a view to eventually being admitted to a programme at a tertiary institution. The faculty tables from page 9 reflect all the undergraduate programmes offered by the University of Pretoria and also show the required NSC/IEB subjects from which learners will have to choose in Grade 10 in order to be considered for the programmes. These tables also include hints on other appropriate subjects to complete the subject package of seven subjects. Please note that some subjects indicated may not necessarily be offered at all schools. Some schools may also offer recognised NSC 20-credit subjects that do not feature in these tables, and these subjects may be taken as electives.

Become a JuniorTukkie

The JuniorTukkie programme of the Department of Enrolment and Student Administration at the University of Pretoria has been established to assist learners in Grades 9, 10, 11 and 12 to make responsible study and career choices.

The JuniorTukkie initiative also develops important skills to better equip learners for the challenges they may face as a student in their personal capacity, as well as professionally. The JuniorTukkie programme provides, among others, a wide variety of services to learners and students, such as first-hand information on study and career options, leadership, life skills and study skills development, as well as engagement in community projects and many more. Learners with a minimum academic average of 70% may apply for membership of the JuniorTukkie Club. Membership of the JuniorTukkie Club is free of charge.

Just look at all the benefits JuniorTukkies may enjoy:

........

- Two online editions per year of the JuniorTukkie magazine crammed with campus information and information on the various faculties and programmes we offer.
- Access to our JuniorTukkie website and JT App, where, among other things, study guides for a number of school subjects may be downloaded, events are live streamed, etc.
- Access to useful examination hints.
- Personal invitations to events and functions offered by the University of Pretoria.
- Direct access to the JuniorTukkie Office to assist you with enquiries.
- Assistance to ensure your application process runs smoothly when you apply in your Grade 12 year for admission to study at the University of Pretoria.
- Access to the JuniorTukkie Summer and Winter schools.
- Access to e-learning enrichment programmes in Mathematics and Physical Science.
- Access to the Lectorsa reading development programme.

Make a smart Grade 10 subject choice based on the relevant programme requirements.
