

UNIVERSITEIT VAN PRETORIA
UNIVERSITY OF PRETORIA
YUNIBESITHI YA PRETORIA

Autumn Graduation Ceremony
Herfspromosieplegtigheid
Moletlo wa Dikapešo wa Lehlabula

2021

Vision

To be a leading research-intensive university in Africa, recognised internationally for its quality, relevance and impact, and also for developing people, creating knowledge and making a difference locally and globally.

Mission

In pursuing recognition and excellence in its core functions of research, teaching and learning, and integrating engagement with society and communities into these, the University of Pretoria will use quality, relevance, diversity and sustainability as its navigational markers.

Make today matter

GROUPING

13 April 2021 | 10:00

Part 1

GORDON INSTITUTE OF BUSINESS SCIENCE

Postgraduate Diploma(Business Administration, Business Studies, General Management)

14 April 2021 | 10:00

Part 2

GORDON INSTITUTE OF BUSINESS SCIENCE

Doctor of Business Administration; Doctor of Philosophy; Master of Business Administration

14 April 2021 | 15:00

Part 3

FACULTY OF THEOLOGY AND RELIGION

All postgraduate and undergraduate fields of study

Honorary Doctorate: Prof IJ Mosala

15 April 2021 | 15:00

Part 5

FACULTY OF LAW

All postgraduate and undergraduate fields of study

Honorary Doctorate: Prof KRSD Boele-Woelki

Honorary Doctorate: Prof YP Ghai

16 April 2021 | 10:00

PART 6

FACULTY OF VETERINARY SCIENCE

All postgraduate and undergraduate fields of study

Chancellor's Medal: Prof GF Bath

Chancellor's Medal: Prof SS van den Berg

16 April 2021 | 15:00

PART 7

FACULTY OF HEALTH SCIENCES

School of Medicine

All postgraduate fields of study, *Excluding:* Honours

Undergraduate, *Only:* MBChB

19 April 2021 | 15:00

Part 8

FACULTY OF ENGINEERING, BUILT ENVIRONMENT AND INFORMATION TECHNOLOGY

Graduate School of Technology Management

All postgraduate fields of study

School of Engineering

All postgraduate and undergraduate fields of study

Departments:

Electrical, Electronic and Computer Engineering; Material Science and Metallurgical Engineering

Chancellor's Medal: Mr MA Mthethwa

20 April 2021 | 10:00

PART 9

FACULTY OF ENGINEERING, BUILT ENVIRONMENT AND INFORMATION TECHNOLOGY

School of Engineering

All postgraduate and undergraduate fields of study

Departments:

Chemical Engineering; Civil Engineering, Mining Engineering

20 April 2021 | 15:00

Part 10

FACULTY OF ENGINEERING, BUILT ENVIRONMENT AND INFORMATION TECHNOLOGY

School of Information Technology

All postgraduate and undergraduate fields of study

21 April 2021 | 10:00

Part 11

FACULTY OF ENGINEERING, BUILT ENVIRONMENT AND INFORMATION TECHNOLOGY

School of Engineering

All postgraduate and undergraduate fields of study

Departments:

Industrial and Systems Engineering; Mechanical and Aeronautical Engineering

Honorary Doctorate: Prof JR Thome

21 April 2021 | 15:00

Part 12

FACULTY OF ENGINEERING, BUILT ENVIRONMENT AND INFORMATION TECHNOLOGY

School for the Built Environment

All postgraduate and undergraduate fields of study

22 April 2021 | 15:00

Part 13

FACULTY OF EDUCATION

PhD(Assessment and Quality Assurance in Education and Training; Education Management, Law and Policy; Education Policy Studies); MEd; MEd(Assessment and Quality Assurance in Education and Training); BEdHons(Computer-integrated Education; Education Management, Law and Policy; Life Sciences Education; Mathematics Education; Physical Sciences Education; Technology Education); BEd(Further Education and Training: [Economic and Management Sciences]; [Human Movement Science and Sport Management]; [Natural Sciences]); BEd(Intermediate Phase; Intermediate Phase Teaching); Postgraduate Diploma(Technical and Vocational Education and Training); Postgraduate Certificate in Education(Further Education and Training Teaching; Senior Phase and Further Education and Training Teaching)

Honorary Doctorate: Prof RO Mabokela

23 April 2021 | 10:00

Part 14

FACULTY OF EDUCATION

PhD(Adult and Community Education and Training; Educational Psychology; Learning Support, Guidance and Counselling); MEd(Educational Psychology; Learning Support, Guidance and Counselling); BEdHons(Educational Psychology; Learning Support; Teacher Education and Professional Development); BEd(Early Childhood Development and Foundation Phase; Foundation Phase Teaching; Further Education and Training: General)

23 April 2021 | 15:00

Part 15

FACULTY OF ECONOMIC AND MANAGEMENT SCIENCES

BCom(Accounting Sciences)

26 April 2021 | 10:00

Part 16

FACULTY OF ECONOMIC AND MANAGEMENT SCIENCES

DCom(Auditing); PhD(Communication Management; Economics; Entrepreneurship; Financial Management Sciences; Leadership; Organisational Behaviour; Public Administration and Management; Taxation; Tourism Management); MCom(Advanced Data Analytics; Agricultural Economics; Econometrics; Economics; Human Resource Management; Industrial Psychology); MPhil(Economics; Human Resource Management; Taxation); BComHons(Agricultural Economics; Econometrics; Economics; Human Resource Management and Labour Relations; Industrial Psychology; Mathematical Statistics; Statistics and Data Science); BCom(Agribusiness Management; Econometrics; Economics; Human Resource Management; Statistics)

Honorary Doctorate: Prof PB Dixon

26 April 2021 | 10:00

Part 17

FACULTY OF ECONOMIC AND MANAGEMENT SCIENCES

MPhil(Business Management[Responsible Leadership]; [Strategic Management]; [Supply Chain Management]); MPhil(Development Practice; Entrepreneurship; Strategic Communication Management); BComHons(Business Management; Communication Management; Supply Chain Management); Postgraduate Diploma(Communication Management; Entrepreneurship); BCom; BCom(Business Management; Entrepreneurship; Supply Chain Management)

Applied Social Sciences:

All postgraduate and undergraduate fields of study

Departments:

Augmentative and Alternative Communication; Social Work and Criminology; Psychology; Speech-Language Pathology and Audiology; Sport and Leisure Studies

30 April 2021 | 10:00

Part 22

FACULTY OF HUMANITIES

Core Social Science and Languages

All postgraduate and undergraduate fields of study

Excluding: BA and BA Law

Departments:

Afrikaans; African Languages; Ancient and Modern Languages and Cultures; Anthropology and Archaeology; English; Geography; Geo-informatics and Meteorology; Historical- and Heritage Studies; Philosophy; Political Sciences; Sociology

Honorary Doctorate: Dr AH de Vries

Honorary Doctorate: Mr AH Fugard

Honorary Doctorate Mr AGH Pahad

30 April 2021 | 15:00

Part 23

FACULTY OF HEALTH SCIENCES

School of Healthcare Sciences

All postgraduate and undergraduate fields of study

03 May 2021 | 15:00

Part 24

FACULTY OF HUMANITIES

The Arts and BA Law:

All postgraduate and undergraduate fields of study

Departments/Schools:

School of the Arts: Drama; Music, Visual Arts and all departments within the BA Law programme

Honorary Doctorate: Mr A Ibrahim

Honorary Doctorate: Mr MSM Vundla

04 May 2021 | 10:00

Part 25

FACULTY OF HUMANITIES

Bachelor of Arts

All undergraduate fields of study

Departments:

All departments within the BA degree programme

04 May 2021 | 15:00

Part 26

FACULTY OF NATURAL AND AGRICULTURAL SCIENCES

All postgraduate and undergraduate fields of study

Departments:

Animal Science; Agricultural Economics, Extension and Rural Development; Consumer and Food Sciences; Plant and Soil Sciences, Zoology and Entomology (including Wildlife Management)

05 May 2021 | 10:00

Part 27

FACULTY OF NATURAL AND AGRICULTURAL SCIENCES

All postgraduate and undergraduate fields of study

Departments:

Actuarial Science; Mathematics and Applied Mathematics; Statistics

Honorary Doctorate: Prof C Castillo-Chavez

05 May 2021 | 15:00

Part 28

FACULTY OF NATURAL AND AGRICULTURAL SCIENCES

All postgraduate and undergraduate fields of study

Departments:

Biochemistry, Genetics and Microbiology. *Including:* Undergraduate (Medical Sciences and Human Physiology)

06 May 2021 | 10:00

Part 29

FACULTY OF NATURAL AND AGRICULTURAL SCIENCES

All postgraduate and undergraduate fields of study

Departments:

Peter Bishop **Dixon**

Professor Peter B. Dixon is a professor of Economics in the Centre of Policy Studies (CoPS) at Victoria University in Melbourne, Australia. He holds a PhD degree in Economics from Harvard University (1972).

Professor Dixon started his working career at the International Monetary Fund in Washington DC before returning to Australia to take up a position at the Reserve Bank of Australia. He was subsequently appointed as Professor of Economics at Monash University in Melbourne.

Professor Dixon received various awards during his career:

- He was elected Fellow of the Academy of Social Sciences in Australia in 1982.
- He was the joint recipient of the 1983 Research Medal of the Royal Society of Victoria with Professor A.A. Powell, given in recognition of their outstanding contribution to social science research in Australia.
- He was awarded the Distinguished Fellowship of the Economic Society of Australia in 2003.
- In 2006 Professor Peter Dixon was honoured as a Sir John Monash Distinguished Professor. The title is one of the more prestigious to be conferred on a Monash University academic and is awarded to only a few eminent professors.
- He was appointed Officer in the Order of Australia (AO) in the Queen's Birthday Honours of 2014.
- He was elected to the Hall of Fame in the Global Trade Analysis Project in 2015, the leading institution in his field worldwide.

Professor Dixon is known internationally for his work in computable general equilibrium (CGE) modelling. He created two well-known models, namely ORANI and MONASH, which have been prominent in academic and contract research worldwide during the past 40 years.

In recent years, he led the development of the USAGE model of the United States, which is used by the US International Trade Commission and the Departments of Agriculture, Commerce, Transportation and Homeland Security.

Professor Dixon's publication list contains about 240 articles and nine books, including three North Holland monographs. He edited, along with Dale Jorgenson, Elsevier's Handbook of Computable General Equilibrium Modelling (2013). He has an I10-index of 117 and has had 7 428 citations of his work.

In her thesis, **Signalling internal audit effectiveness**, the *promovenda* investigated the relationship between signalled internal audit effectiveness (IAE) factors and company performance. The study drew on agency and signalling theories. Following a quantitative research approach, the study was executed in three phases. The signalled IAE factors were derived from a content analysis of company integrated reports and other reports. These factors were reduced through a multiple correspondence analysis, and regression analysis was used to estimate the relationship. The research confirmed a mixed relationship between signalled IAE factors and company performance in South African listed companies. While governance codes recognise internal audit as an essential governance mechanism, this thesis addresses the link between IAE disclosure and company performance, which is a gap in the existing literature. The thesis provides management with a strategic tool for communicating value by revealing the signalled IAE factors linked to company performance.

Theshne Kisten

In her thesis, **Uncertainty, financial stress and monetary policy in South Africa**, the *promovenda* examined the role of economic uncertainty and financial market stress in the South African economy and its monetary policy implications. Following the development of a new comprehensive index to monitor the intensity of stress in the South African financial sector, the empirical study was executed in three phases. The research documented non-linearity in the transmission of financial and uncertainty shocks to the real economy depending on the state of financial markets, and the study revealed that accounting for intra-quarterly information improves the forecasting performance of financial information in terms of output growth and inflation. These are considered key economic indicators in formulating monetary policy decisions. The thesis revealed the critical role of financial market conditions and economic uncertainty in informing prudent macroprudential and monetary policy.

The degree Doctor of Philosophy

Gerrit Stefanus Kok

In his thesis, **Board characteristics and the financial performance and risk management of companies listed on the Johannesburg Stock Exchange**, the *promovendus* investigated the relationship between multiple board characteristics and five performance and risk-management indicators. Following criticism against testing for linear relationships when it comes to corporate relationships, the study used binary logistic regression to determine whether relationships exist between the board characteristics and the likelihood that companies will rank as top performers in terms of the respective measures. The research confirmed that several characteristics have statistically significant relationships with financial performance and risk-management measures. These findings are useful for determining the board characteristics a company should focus on, given the specific objectives a company wishes to pursue. However, findings in terms of board characteristics that did not show statistically significant relationships to financial performance and risk management measures are equally useful, as this indicates that those characteristics can be included in a board if there is a different motivation for doing so, without jeopardising the wellbeing of the company.

The degree Doctor of Philosophy

Elmarie Louw

In her thesis, **The value relevance of goodwill and its disclosure for companies listed on the JSE**, the *promovenda* investigated whether a company's value can be influenced by goodwill and its disclosure. Following a mixed-method research approach consisting of quantitative and qualitative methods, the value relevance of goodwill after the introduction of IFRS 3 was investigated. The determinants for both goodwill impairment decisions and the disclosure quality of goodwill impairments were identified. The study also considered the explanation strategies used by management to provide reasons for goodwill impairment. The empirical results confirmed that goodwill was indeed value relevant. Significant predictors of goodwill impairment were found to be potential earnings management, whether a firm was goodwill intensive, and corporate governance mechanisms. Goodwill impairment in itself was not value-relevant, but it was a predictor of market value when the quality of its disclosure was considered. The research concludes that if goodwill impairment is accompanied by goodwill impairment test-related disclosure, investors use the information in their decision-making.

The degree Doctor of Philosophy

Mandisa Tumeka **Matshoba-Ramuedzisi**

In her thesis, **Followership constructs and behaviours in a complex organisation: a South African perspective**, the *promovenda* investigated how employees at a South African metropolitan municipality socially construct their followership. Employing a qualitative approach, the study explored followers' beliefs about followership, their enactment of followership, and the factors contributing to their followership enactment. The study concluded that individual followers simultaneously held beliefs across the continuum of follower self-schemas from passive to proactive. However, the activation of the behaviours across the continuum is dependent on the followers' perceptions of the appropriate schema in response to the situation or environment. The thesis makes vital contributions to followership research by evaluating implicit followership theories from the perspective of followers and extending the current conceptualisations of followership to include definitions of followership in South Africa.

The degree Doctor of Philosophy

Mpoifeng Richard **Molefinyane**

In his thesis, **Essays on welfare implications of knowledge acquisition, corruption, and signalling costs from the perspective of a developing country**, the *promovendus* studied how regulatory interventions could improve a society's welfare under sub-optimal economic conditions, which are typical in developing countries. Examples of difficult economic conditions considered in this thesis are highly distortive tax systems, non-efficient monitoring of corruption, and the lack of competitive pressure on underdeveloped markets. The thesis arrived at two conclusions through the use of different versions of the principal-agent model developed by Jean-Jaques Laffont and Jean Tirole. Firstly, if the government cannot distinguish among state firms in terms of different cost structures, it can improve welfare by providing incentives to firms to reveal their costs if it has sufficient financial resources to do so. Secondly, if banks cannot distinguish among entrepreneurs of different abilities, the government can improve welfare by limiting the number of banks in the economy. The main contribution of the thesis is that it combines signalling and sequential bargaining on a banking market to study the impact of competitive pressure between banks on society's overall welfare.

The degree Doctor of Philosophy

Nompumelelo Lorraine **Monageng**

In her thesis, **The effect of reciprocity nudges on tax compliance: evidence from an experimental study**, the *promovenda* investigated the influence of reciprocity nudge messages on tax compliance behaviour. The thesis also explored the role of structural and content attributes of the message in the effectiveness of tax nudges. A core sequential mixed-methods approach was applied. Initially, a qualitative content analysis process was carried out, followed by a quantitative content analysis. The experimental phase of the thesis was then designed based on the results of the content analysis. The main confirmatory finding from the research is that appropriately crafted reciprocity messages can significantly secure greater tax compliance. This is significant because these findings extend the current knowledge of how insights from behavioural economics can be incorporated to assist in influencing voluntary tax compliance, particularly in a developing country setting

The degree Doctor of Philosophy

Tina **Roos**

In this thesis, **An exploration of leadership identity and intersectionality through selected life stories of black women in the South African Public Service**, the *promovenda* used the life stories of Black women employed by the Department of Employment and Labour to study leadership identity and role congruity through the lenses of intersectionality and post-colonial feminism. The study explored how the experiences of pre-1994, patriarchy and the triple intersectionality of gender, race and ethnicity affected Black women in senior positions in becoming the leaders they are and how those experiences manifested in their gendered leadership interactions.

The degree Doctor of Philosophy

Anna Herculina **Schoeman**

In her thesis, **The effects of changes in the Value-Added Tax rate on tax compliance behaviour in South Africa**, the *promovenda* considered the impact of changes in value-added tax rates on small business entities (SMEs). A between-subject pre-test/post-test online field experiment was conducted. The results indicated that the greater the VAT rate increase, the greater the level of non-compliance. Further, the greater the VAT rate increase, the more likely it was that taxpayers would deregister for VAT. This study contributes firstly by expanding on the limited body of knowledge on the effect of VAT rate changes on SMEs' tax compliance behaviour in a developing country. Secondly, the research has practical implications for policymakers contemplating VAT rate changes. Finally, the study indicates how experimental research methods can be used in tax compliance behaviour research in Africa.

The degree Doctor of Philosophy

Muriel Serfontein-Jordaan

In her thesis, **Designing an investor focused communication strategy framework based on dialogic theory: a study of publicly listed companies in South Africa**, the *promovenda* investigated investor relations theory in the context of dialogic theory and crystallised the critical constructs to include in a communication strategy. The study was executed in three phases and followed an interpretive multiple case study qualitative inquiry research design. The research confirmed that organisations need to critically re-evaluate how they communicate with investors, requiring interaction that extends beyond mere publication of obligatory reports to more frequent proactive two-way communication. The proposed framework is the culmination and outcome of a synthesis of an in-depth literature review, a content analysis of communicative products and semi-structured interviews with the case organisations' investor relations officers. Propositions informing the proposed framework were presented, and the proposed framework serves as the original contribution of this study.

The degree Doctor of Philosophy

Randolph Xolani Sibande

In his thesis, **Essays on the historical evolution of stock markets of advanced economies**, the *promovendus* sought to extend the current evidence body on financial market inefficiencies in developed markets, providing new policymaking insights. Recent advances in the generation and availability of historical financial market data enabled this study. The *promovendus* found that market inefficiencies in developed markets were most prevalent in the middle of the 20th century and provided profit opportunities. However, these market inefficiencies since disappeared and are in the main, in line with the Adaptive Market Hypothesis. For policymakers, the results of this study showed that under specific conditions, resurgences of market inefficiencies were possible, particularly in times of market stress, and that market inefficiencies can still be exploited for profit by investors. We, therefore, recommend further research on market inefficiencies in contemporary financial markets (e.g. crypto-market).

The degree Doctor of Philosophy

Liandi Magdalena Slabbert

In her thesis, **Modelling the uptake of visitor research in protected area visitor management**, the *promovenda* applied knowledge utilisation theory to investigate the research-practice gap in tourism and recreation. This mixed-methods study offered a novel conceptual framing of the components, movement and influencers involved in utilising visitor research in protected area visitor management. The study found that associations exist between different research categories and management application areas. However, research is not applied optimally in practice. Research utilisation is complex, involving many inhibitors and promoters. Engagement between the researcher and practitioner communities and the potential absorptive capacity of protected areas contribute significantly to increased research uptake. Results reaffirmed the importance of both organisational interest and interaction explanations and highlighted the role of embedded research capacity. This thesis provides a contemporary understanding of the role and utilisation of research in visitor management policies and practices.

In this thesis, **The interrelationships between entrepreneurial competencies, absorptive capacity and innovation capacity**, the *promovenda* investigated whether an entrepreneur's competencies and entrepreneurial absorptive capacity influence their capacity to innovate. Following a mixed-method research approach consisting of qualitative and quantitative methods, the study was executed in two phases. Firstly, a Delphi study and concept matrix was employed after empirically testing the causal relationships through structural equation modelling and artificial neural networking. The findings of the study indicated the importance of incorporating a unified entrepreneurial competency typology perspective on innovation. It further confirmed that entrepreneurial competencies, as well as entrepreneurial absorptive capacity, were significant predictors of innovation capacity. The study's implications extend to transmitting knowledge through absorptive capacity, allowing entrepreneurs to identify and exploit opportunities identified from new knowledge sources and incorporate them into innovations. These results have important implications for Industry 4.0 entrepreneurs, educators, policy makers, and entrepreneurship models.

In her thesis, **The economic effects of diabetes and sugar-sweetened beverage taxes**, the *promovenda* investigated the impact of diabetes on labour outcomes and the impact of sugar-sweetened beverage taxes on the economy. Following a mixed-method research approach consisting of regression analysis and computable general equilibrium (CGE) modelling, the *promovenda* conducted three independent studies. Firstly, she investigated the impact of diabetes on labour outcomes. She found that individuals with diabetes were less likely to be employed compared to individuals without diabetes. In the second study, she investigated the economy-wide impact of diabetes using a CGE model. Her analysis showed that diabetes reduced sectoral outputs, household consumption, as well as GDP. In her third study, she investigated the effects of sugar-sweetened beverages tax on the economy. Through CGE modelling, she found that the negative effect that diabetes has on South Africa's economy can be reversed through the tax policy.

In his thesis, **The value relevance of derivatives for South African listed companies**, the *promovendus* examined the determinants of derivatives use and the influence of derivatives on the value of 200 non-financial firms listed on the JSE. The study further explored the effects of global financial shocks such as the 2008/2009 financial crisis on the value relevance of risk disclosures. The study also investigated how quality of disclosure impacts the value relevance of derivatives disclosure. The estimation techniques utilised included mainly panel data econometric techniques. The results suggested among others that firm size, growth prospects, leverage and managerial risk aversion are important determinants of derivative use. Furthermore, the study found disclosure of firms' use of derivatives in the financial statements to be value relevant, that there are important differences in the value relevance during different economic periods and that the quality of disclosure is negatively associated with its disclosure.

In his thesis, **IT identity work of South African academics**, the *promovendus* investigated the IT identity work academics engaged in. Using semi-structured interviews and grounded theory analysis, a model was developed indicating different intensity levels individuals could engage in related to their IT identity. These range from low, moderate and high-intensity levels and are not unidirectional but oscillate between the different levels depending on the cognitive dissonance experienced. During the COVID-19 pandemic, academics engaged in high to moderate levels of IT identity work intensity due to high to moderate levels of cognitive dissonance experienced as a result of incorporating technology of different levels of difficulty. Low levels of IT identity work intensity were experienced by academics in their careers' developmental stages when they learned to use technology as part of their educational development with low levels of cognitive dissonance experienced.

Achievement Awards

STATOMET PRIZE

To the best performer in Statistics on Honours level.

National anthem | Nasionale lied |
Koša ya Setšhaba

Nkosi sikelel' iAfrika
Maluphakanyisw' uphondo lwayo,
Yizwa imithandazo yethu,
Nkosi sikelela, thina lusapho lwayo.
Morena boloka setjhaba sa heso,
O fedise dintwa le matshwenyeho,
O se boloke, O se boloke setjhaba sa heso,
Setjhaba sa South Afrika – South Afrika.

Uit die blou van onse hemel,
Uit die diepte van ons see,
Oor ons ewige gebergtes,
Waar die kranse antwoord gee,
Sounds the call to come together,
And united we shall stand,
Let us live and strive for freedom,
In South Africa our land.
