Thank you to all who responded to the first issue which circulated last month. Your input was used to correct data and in response we received quite a number of articles which had not been submitted before. Your input and comments are valued and as this is a new initiative with some growing pains you are encouraged to send through information that will assist in an improved and more accurate presentation of the publication status for the Faculty. On a positive note, the list of authors who have published one article have increased from 111 to 132 this month whereas the three and more author list more than doubled.

This edition also provides information on the process on submission of publications. The list included herewith only reflects the approved submissions as at end August 2015. In the event that your article is not listed it might be that it is still “in process” and will appear in the next edition.

Thanks for the encouraging feedback and let’s continue with the hard work.

Tiaan de Jager

The following is a graphic representation of the number of authors who have so far submitted nothing, one, two and three or more articles this year.

PROCESSING RESEARCH OUTPUTS

1. Hard copies of research publications which meet the DHET criteria are collated by a departmental capturer and submitted to the Faculty Research Office. Papers can also be submitted directly to Ms Suna Redelinghuys (suna.redelinghuys@up.ac.za).
2. The relevant bibliometric data is captured on InfoEd. The hard copies are checked against the list of accredited journals, criteria for inclusion, affiliation of authors, and appointments are verified as part of a quality control process.
3. Once captured and approved at Faculty level onward submission to Department of Research Innovation Support (DRIS) takes place.
4. DRIS will perform quality control and will verify each input, refer back, or reject.
5. Only once DRIS approved the paper it will reflect on the InfoEd system, it will be counted and included in ImPress.
6. An independent audit will still take place at the end of the submission period, before final submission is made to the National Department of Higher Education for subsidy.

FOR ACCREDITED JOURNAL ARTICLES SUBMIT THE FOLLOWING:

1. A photocopy of the article, reflecting the journal name, volume, year of publication, title of article, start page and end page numbers, name/s of authors and their UP affiliation.
2. If the journal name does not appear on the published article, submit a copy of the journal cover, together with the table of contents page.

SUBMIT COMPLETE BOOKS, EVEN IF ONLY ONE OR MORE CHAPTERS ARE TO BE CLAIMED FOR.

For detailed information please consult the Faculty Research Office web page:
http://www.up.ac.za/faculty-of-health-sciences-research

THE KEY EXPLAINING BOLD AND UNDERLINED NAMES

Name **Bold**
Authors in Health Sciences

Name **Bold Underlined**
Authors listed in their departments

DISCLAIMERS

All data provided in the list of publications remains provisional until the audit has been done.

The list included herewith only reflects the approved submissions as at end August 2015. In the event that your article is not listed it might be that it is “in process”. Papers in non-accredited journals are not subsidised and therefore not reflected on the list.

Your name may appear on the wrong author list, which could easily be corrected upon submission of publication proof. Kindly refer to the section which details the process and submit to the relevant persons indicated.

The graph is based on HR provided data, which might not be a true reflection of the actual number of academic staff in the Faculty.
