

Funding Opportunities for Postgraduate Studies – Masters, PhD and Postdoctoral Research Fellows

The SENTECH Chair in Broadband Wireless Multimedia Communications (BWMC) at the University of Pretoria offers a world-class research environment with state-of-the-art facilities and collaboration with industry and internationally renowned researchers.

The Chair offers generous scholarships to exceptional South African academic achievers who want to pursue full-time undergraduate or postgraduate studies in Wireless Communications or Telecommunications Engineering in the following categories:

- Undergraduate BEng (Electronic or Computer Engineering);
- Masters or Doctoral (PhD); or
- Postdoctoral Research Fellows.

SENTECH
Chair in Broadband Wireless Multimedia Communications (BWMC)
Department of Electrical, Electronic and Computer Engineering

Funding Opportunities for Postgraduate Studies – Masters, PhD and Postdoctoral Research Fellows

SARChI Chair in Advanced Sensor Networks (ASN) which is co-hosted by the University of Pretoria and CSIR, carries out high level world class research in the broad areas of Wireless Sensor Networks, the Internet of Things, Smart Cities and several other areas related to ASN. There are several researchers in the ASN group at the University of Pretoria and also at CSIR.

The SARChI Chair at UP/CSIR offers scholarships for Electrical, Electronic or Computer Engineering studies only to South African students in the following areas:

- BEng (Honours)
- Masters
- Doctoral (PhD) (South African and a limited number of International)
- Postdoctoral Research Fellowships (South African and International).

The SENTECH Chair in BWMC and the SARChI Chair in ASN have been collaborating in the research area of cognitive radio networks for more than five years. Their joint focus has been in the area of resource allocation for cognitive radio networks, especially in the cases of underlay systems, and also applications of queueing theory to cognitive radio networks and wireless sensor networks. Recently the focus is on the role of 5G and IoT on smart cities and also on network restorations for wireless sensor networks. Jointly the two of them supervise several Masters and PhD students and postdoctoral fellows.
