

## **Letlhogonolo Serumula**

Hi everyone, this is Letlhogonolo Serumula, a fellow student at the University of Pretoria.

I would like to encourage all students to stay calm, to stay focused and to stay safe. I would also like to emphasise on the importance to continue with school work while quarantined. Use the material already available to you to do your assignments and to study for your upcoming tests. This pandemic should not be seen as a threat to your future but as a motivation to keep on fighting. Please abide by the laws, study hard, communicate with your lecturers and tutors, if possible, because the finish line is still yours and you still can graduate on time. Let's do this the UP Way.

I sent all my love and prayers to you all and to your families.
