

Thetshesani Luvhimbi

Hi FLY and fellow students, my name is Tash, I am a final year student at the University of Pretoria.

And, during this time of the Corona virus, I feel like my motivations still stand on what I've been taught from the school and through the FLY initiatives. I am studying as much as I can through the resources that I have, which the school has provided with the slides and work that they provided for us on ClickUp. I am able to keep my strengths up because of my family supporting me. And I read the little motivations that I got from FLY@UP. I am still keeping on and hoping and knowing that I will graduate on time, despite all the challenges that I am facing right now. I hope that everybody stays motivated and that you don't lose hope. We will finish this degree and we will get through this pandemic, because all of us deserve to shine and we will all deserve to graduate on time.
