mHealth solutions in ear and hearing care

[symposium]

27 September 2016

12:00 PM - 16:30 PM

Innovation Hub Auditorium

Presented by Department of Speech-Language
Pathology and Audiology

Disabling hearing loss is an invisible epidemic with more than 3 million South Africans affected. mHealth solutions are demonstrating potential to dramatically increase early access to care at a fraction of current costs.

The University of Pretoria has been at the forefront with developments in mHealth solutions in hearing screening, audiometry, diagnosis of ear disease and new community-based models of care.

Leading international scholar, Prof Robert Eikelboom from the Ear Science Institute Australia and the University of Western Australia, will be the keynote presenter followed by a research showcase of mHealth solutions developed at the University of Pretoria. The impact of these solutions in community-based projects will be highlighted by our partners.

CPD 7 CPD Points

Speakers

- Prof Robert Eikelboom, ESIA, UWA, UP
- Prof De Wet Swanepoel, UP, ESIA, UWA
- Dr Herman Myburgh, UP
- Dr Faheema Mahomed-Asmail, UP
- Dr Marianne van Zyl, UP

Exhibit

hearScreen, hearTest, hearZA, hearScope, Peek Vision, Sivantos

Cost Free (only 80 seats available)
