

INVITATION

WEBINAR: Mapping and scoping of innovations in social protection in Africa

Friday, 5 March 2021

The Partnership for African Social and Governance Research (PASGR), the University of Pretoria's School of Public Management and Administration (SPMA) and the Open Society Initiative for Eastern Africa (OSIEA) invite you to a webinar with the theme: Mapping and scoping of innovations in social protection in Africa.

The main objective of this webinar is to explore how social protection measures can be innovative in securing better welfare outcomes in a just and inclusive way. In this convening, participants will critique the different interpretations and applications of innovation in social protection. They will further discuss the evolution of social protection practice in the role it plays, beyond a social safety net, promoting those without sustainable livelihoods or whose integration in the labour markets is precarious. The aim is to discuss the extent to which civil society actors in Africa participate in understanding and shaping the future of social protection policies and programmes over the next decades.

Date: Friday, 5 March 2021

Time: 14:00-16:00 (South African time) 15:00-17:00 (East African time) 13:00-15:00 (West African time)

For more information, please contact **Charmaine Galante** and **Racheal Makokha** at charmaine.galante@up.ac.za and rmakokha@pasgr.org

The link for the webinar will be forwarded to all registered individuals.
