

## Future Africa at the University of Pretoria

### A Dialogue on Informal Settlements *Designing for health and healthy people*

A health city is "one that continually creates and improves its physical and social environments and expands the community resources that enable people to mutually support each other in performing all the functions of life and developing to their maximum potential" World Health Organisation (WHO). Indicators of a healthy city include a commitment to health that encompasses policy, intersectoral collaboration; political activation, community participation, and industry involvement for innovation. This requires a multi-sectoral trans-disciplinary approach. This dialogue will explore the learnings from an inter and transdisciplinary urban and informal-settlement primary health care perspective presented by a team consisting of medical doctors, dieticians, architects, and agriculturalists. It will engage with communities, government, private sector, non-profit organisations, and other academic and national institutions to create a network for strategic planning and implementation towards a healthy city.

**DATE:** WEDNESDAY, 29 SEPTEMBER  
**TIME:** 8:30 AM - 14:00 PM SAST (UTC+2)  
**VENUE:** MAIN AUDITORIUM  
FUTURE AFRICA CAMPUS, EXPERIMENTAL FARM  
SOUTH STREET  
UNIVERSITY OF PRETORIA, HILLCREST CREST CAMPUS  
PRETORIA

## Program

Workshop number	Workshop time	Topic	Presenter	Affiliation
	8:30-8:45	Arrival/ Coffee		
	8:45-9:00	Welcoming, Introduction to Dialogue series and Future Africa	Prof. Markotter	The University of Pretoria, Future Africa
1	9:00-9:30	Healthy people, healthy cities: Presenting the community-orientated primary care inter and trans-disciplinary model for informal settlement health.	Ellenore Meyer Marion Beeforth Rebaone Molebatsi	The University of Pretoria Department Family Medicine, COPC (Community Orientated Primary Care Research Unit)
2	9:30-10:00	Architects as collaborative partners: An exploration of the leverage potential of mapping and built environment research undertaken in informal settlements.	Jan Hugo Jason Oberholster	The University of Pretoria, Department of Architecture
