The critical importance of **early auditory system stimulation**  
**and mother-infant communication interaction** for speech and language  
development is best understood by  
audiologists and speech-language therapists

## COURSE BROCHURE

### Course Contents and Target Audience

The annual CHRIB seminar focuses on the clinical practice of early communication intervention within the different South African contexts where audiologists and speech-language therapists work.

Early Communication Intervention is a trans-disciplinary field where audiologists and speech-language therapists not only share roles, but each discipline also contributes uniquely to services directed at families with infants and preschool children with feeding difficulties, hearing loss and disorders, established and emerging communication disorders, or those who are at risk of developing difficulties in these areas. Diagnostic assessments remain discipline-specific, but family-centred intervention requires shared expertise.

### Course Outcomes

This year's CHRIB seminar aims to enrich your knowledge base about:

- The characteristics of young children with ASDs, visual impairment and those with hearing loss and additional disabilities. Implications for clinical practice will be highlighted
- Introduce a group programme for mothers with babies in the NICU. The programme is available from the author in English and IsiZulu
- Discuss ethical dilemmas in ECI practice. **You may send in your questions now already or ask them at the seminar**

### Course Structure and Venue

This is a half day course presented at the Department of Communication Pathology, University of Pretoria Main Campus.

Free parking is available at the UP

## Assessment and Accreditation

A certificate of attendance with 6 CEUs (4 general, 2 ethics) will be issued to all delegates.

## Course Fee

The course fee is R600 per delegate and includes all course notes, tea and refreshments.

The course fee for early registration - before 25 AUGUST 2013 - is R550.
