FACULTIES OF THE UNIVERSITY OF PRETORIA

HUMANITIES
NATURAL AND AGRICULTURAL SCIENCES
LAW
THEOLOGY
ECONOMIC AND MANAGEMENT SCIENCES
VETERINARY SCIENCE
EDUCATION
HEALTH SCIENCES
ENGINEERING, BUILT ENVIRONMENT AND INFORMATION TECHNOLOGY

FACULTY OF HEALTH SCIENCES

School of Dentistry
• Community Dentistry
• Dental Management Sciences
• Maxillofacial and Oral Surgery
• Odontology
• Oral Pathology and Oral Biology
• Orthodontics
• Periodontics and Oral Medicine
• Prosthodontics

School of Healthcare Sciences
• Human Nutrition
• Nursing Science
• Occupational Therapy
• Physiotherapy
• Radiography

School of Health Systems and Public Health
• Aerospace Medicine
• Public Health Medicine

School of Medicine
• Anaesthesiology
• Anatomical Pathology
• Anatomy
• Cardiology
• Cardiothoracic Surgery
• Chemical Pathology
• Clinical Epidemiology
• Dermatology
• Family Medicine
• Forensic Medicine
• Haematology
• Immunology
• Internal Medicine
• Medical Microbiology
• Medical Oncology
• Medical Virology
• Neurology
• Neurosurgery
• Nuclear Medicine
• Obstetrics and Gynaecology
• Ophthalmology
• Orthopaedics
• Otorhinolaryngology
• Paediatrics
• Pharmacology
• Physiology
• Plastic Surgery
• Psychiatry
  – Nelson Mandela Chair in Philosophy and Ethics of Mental Health
• Radiation Oncology
• Radiology
• Sports Medicine
• Surgery
• Urology

**Note:** The four Schools in the Faculty, each with the regulations of their different programmes, appear in alphabetical order in this publication:
### School of Dentistry:

- **BChD**: 46
- **Bachelor of Oral Hygiene [BOH]**: 54
- **MScDent**: 57
- **MChD**: 59
- **PhD**: 68
- **DSc**: 69
- **University Diploma in Oral Hygiene [Replaced by Bachelor of Oral Hygiene]**: 69
- **Postgraduate Diploma in Dentistry**: 69
- **Advanced University Diploma in Oral Hygiene**: 70

### School of Healthcare Sciences:

- **BCur**: 75
- **BCur(I et A)**: 78
- **BCurHons**: 84
- **MCur**: 84
- **PhD in the field of Nursing Science**: 87
- **DCur**: 88
- **BRad**: 88
- **BRadHons**: 90
- **MRad**: 92
- **PhD in the field of Radiography**: 93
- **BOccTher**: 94
- **BOccTherHons [Suspended until further notice]**: 96
- **MOccTher**: 96
- **PhD in the field of Occupational Therapy**: 99
- **DPhysT**: 99
- **MPhysT**: 103
- **PhD in the field of Physiotherapy**: 109
- **BDietetics**: 110
- **BSc (Nutrition) – offered by the Faculty of Natural and Agricultural Sciences**: 114
- **BDieteticsHons**: 117
- **MDietetics**: 117
- **MSc (Applied Human Nutrition)**: 118
- **PhD in the field of Dietetics**: 119
- **DSc in the field of Dietetics**: 119
- **Postgraduate Diploma in Dietetics [Suspended until further notice]**: 120
- **Postgraduate Diploma in Occupational Therapy**: 121
- **Techniques in Occupational Therapy [Suspended until further notice]**: 121
- **Postgraduate Diploma in Group Activities**: 122
- **Postgraduate Diploma in the Handling of Childhood Disability**: 122
- **Postgraduate Diploma in Hand Therapy**: 123

### School of Health Systems and Public Health:

- **BScHons**: 124
- **MSc**: 125
- **MMed (Public Health Medicine)**: 129
- **Master of Public Health [MPH]**: 131
- **PhD**: 135
- **Postgraduate Diploma in Tropical Medicine and Health**: 136
School of Medicine:

GENERAL INFORMATION

1. Admission
Students who register at the University for the first time, or after an interruption of their studies, should apply for admission or readmission.

- **Undergraduate applications**
  Applications for admission to all undergraduate fields of study in the Faculty for which selection applies close on 31 May, as well as for new first-year students who apply for a transfer from BSc (Biological Sciences) or BSc (Medical Sciences) to MBChB I/BChD I. Applications for BCur(I et A) and Health Sciences Special (Undergraduate) close on 30 November.

- **Postgraduate applications**
The closing dates for the following schools are:

  **School of Dentistry:**
  30 November

  **School of Health Systems and Public Health:**
  BSChons, MSc and Master of Public Health (MPH): 30 June
  Diplomas: 30 June

  **School of Healthcare Sciences:**
  Honours and master’s: 30 September
  BRadHons: 30 September
  MPhysT and MOccTher: 31 October

2. Selection
A selection process takes place prior to admission to all the degree programmes in the Schools mentioned in the front part of this publication. For some of the undergraduate degree programmes a personal interview is required as part of the selection procedure. The National Benchmark Test (NBT) is compulsory for all applicants applying for admission to an undergraduate degree programme with the exception of the Bachelor of Clinical Medical Practice and students with previous tertiary exposure.

3. National Benchmark Test (NBT)
The National Benchmark Test is compulsory for applicants who are currently in Grade 12 or who have already completed Grade 12 and who wish to apply for admission to any field of study, with the exception of the Bachelor of Clinical Medical Practice as well as students with previous tertiary exposure, in the Faculty of Health Sciences. Applicants who fail to write this test will not be considered for selection. Academic Literacy, Quantitative Literacy and Mathematics are tested and applicants cannot specially prepare for the test. The test results will be used in addition to the Grade 12 marks for provisional selection and will not replace the Grade 12 marks.

4. Undergraduate study programmes with their additional requirements:
   - **MBChB:**
     The Faculty can accommodate 300 first-year MBChB students. Applicants for MBChB I are evaluated according to different categories, with the minimum admission requirements set according to the categories in question.
     (a) Applicants who apply for selection, should have passed English with at
least a 5 rating code (60-69%), as well as Mathematics and Physical Science.
A minimum APS of 35 and a pass symbol are prerequisites for the various selection categories.

(b) It is not possible for candidates to complete the first year of study for this study programme at another South African university.
(c) A candidate who has passed a full academic year at another university, with at least four first-year subjects, will be considered for selection, but only for admission to MBChB I.
(d) Admission of foreign candidates is limited. Preference will be given to students from SADC countries.
(e) Candidates will be notified per SMS and in writing of the outcome of the selection.
(f) Candidates who have not been admitted to MBChB I, may register for a first year of study in the BSc degree programme in Biological or Medical Sciences at the University of Pretoria, provided that they qualify for admission. If they pass the prescribed first-semester modules, they may apply before 31 May of their first year of study, for a transfer to MBChB I as from the second semester (this is only allowed for students without any previous tertiary education).
(g) Candidates who have not been admitted to the first year of study for the MBChB degree programme, may apply for admission to any other degree programme at this University, provided that they comply with the entrance requirements for the degree programme in question; and may, on the grounds of that achievement, reapply for selection (changing to MBChB I).

• BClinical Medical Practice:
Selection for BClinical Medical Practice is based on academic merit and is also subject to the general admission requirements of the University of Pretoria and the specific admission requirements for the BClinical Medical Practice degree as set out in Reg. M. 2A(a).

• BChD:
(a) Candidates are not allowed to complete their first year of study at another university.
(b) In terms of the selection procedure, candidates must pass English, Mathematics and Physical Science with at least a 5 rating code (60%-69%), and achieve an APS of at least 35, in order to be considered for selection and/or admission.
(c) At the conclusion of the selection process, candidates are informed in writing regarding the outcome.
(d) Admission of foreign students to the BChD degree programme is limited to one annually. Only applications of candidates from SADC countries are accepted.
(e) Candidates who are not admitted to the first year of study for the BChD degree programme may register for the BSc degree programme in medical sciences or biological sciences at the University, provided that they comply with the admission requirements for the programme in question. A candidate who completes the first semester of such a degree programme successfully, may apply for admission to the second semester of BChD I on the grounds of this achievement. If successful, the student may be admitted to the second semester of BChD I.
• **Bachelor of Oral Hygiene**: Regulation D.1A of this publication contains the minimum requirements for subjects passed in the final Grade 12 examination according to the selection procedure. A minimum APS is required.

• **BPhysT**: Regulation H.16(a) of this publication contains the minimum requirements for subjects passed in the Grade 12 final examination according to the selection procedure. A minimum APS is required for the various categories.

• **BCur**: The stipulations of the selection procedure with regard to the required Grade 12 subjects are set out in Regulation H.1(b)(ii) of this publication.

• **BCur(I et A)**: The admission requirements according to the selection procedure as well as the requirements with regard to registration with the South African Nursing Council are set out in Regulation H.2(b) and (c) of this publication. Additional admission requirements for Clinical Nursing Science also appear in par (c) of the regulation in question.

Only students who can submit proof that they are registered as student nurses at an approved hospital, will be considered for admission.

• **BRad**: The admission requirements according to the selection procedure and the required Grade 12 subjects are set out in Regulation H.7(a) in this publication. A minimum APS applies to the various categories.

• **BOccTher**: Regulation H.11(a) of this publication contains the minimum requirements for subjects passed in the final Grade 12 examination according to the selection procedure. A minimum APS requirement applies to the various categories.

• **BDietetics**: Regulation H.19(a) of this publication contains the minimum requirements for subjects passed in the final Grade 12 examination according to the selection procedure. A minimum APS applies to the various categories.

5. **Statement of symbols**

   When registering at this University for the first time, a candidate has to submit official proof of the symbols obtained in each subject in the final Grade 12 examination.

6. **National Senior Certificate**

   All undergraduate candidates who enrol at the University of Pretoria for the first time, must show their original National Senior Certificate at the Student Administration of their faculty before the end of the first semester.

7. **Language of tuition**

   In conducting its general business, the University uses two official languages, namely Afrikaans and English.

   In formal education, the language of tuition is either Afrikaans or English or both languages, taking the demand as well as academic justification and economic viability into consideration. However, it remains the student’s responsibility to determine in which language a module and any further level of that module is presented. This information is published annually in the Timetable. The University reserves the right to change the language of tuition on short notice, depending on the size of the groups and the availability of lecturers. In respect of administrative
and other services, a student may choose whether the University should communicate with him or her in Afrikaans or English.  

**Undergraduate:** The **language policy** is flexible to accommodate all students in Afrikaans and/or English.  
The use of English for all auditorium type lectures to large groups of students has been **phased in** from the first year of study, since 2002. The necessary support (e.g. visual teaching aids, study notes, tutorial sessions, repeating sections of the presentation during lectures) is provided to Afrikaans-speaking students as far as practically feasible.  
Small-group lectures/discussions/tutorials are presented in the language of choice (Afrikaans or English) of the group, provided that the lecturer is proficient in the language.  
All printed matter (study guides, block books, examination and test papers, notices etc.) is provided in the languages mentioned above.  
Textbooks are provided in Afrikaans and/or English only.  
Students can communicate orally as well as in writing, in Afrikaans and/or English, with lecturers and other members of staff. Tests and examinations may be written in Afrikaans or English.  

**Postgraduate:** Presentation takes place in Afrikaans and/or English, taking into account the student's preference, but also with due allowance for available and effective utilisation of resources within the University. The language in which a dissertation or thesis will be presented, must be discussed with the supervisor or with the faculty, at the commencement of studies.

8. **Bursaries and loans**  
Particulars of bursaries and loans are available on request.

9. **Accommodation**  
Applications for accommodation in university residences for a particular year may be submitted as from 1 March the preceding year. Applications will be considered as long as vacancies exist, and prospective students are advised to apply well in advance. Please note that admission to the University does not automatically imply that accommodation will also be available.

10. **Welcoming day, registration and start of the academic year**  
Details of the welcoming day to which all parents are cordially invited, and the subsequent programme for registration and start of the academic year during which all new first-year students **must** be present, are available on the web (www.up.ac.za).

11. **Prescribed books**  
Lists of prescribed books are available for all study programmes. However, regarding all study programmes, the lecturers concerned will supply information regarding prescribed books to students when lectures commence.

12. **Amendment of regulations and fees**  
The University retains the right to amend the regulations and to change study programme fees without prior notification.  
**NB** The fees advertised and thus levied in respect of a module or study programme presentation represents a combination of the costs associated with the formal services rendered (for example lectures, practicals, access to laboratories, consumables used in laboratories, etc.) as well as associated overheads such as
the provision of library and recreation facilities, security and cleaning services, electricity and water supply, etc. Therefore the fees in respect of a module or study programme presentation cannot simply be reconciled with the visible services that are rendered in respect of such module or study programme.

13. **Leave of absence**

If it is impossible for a registered student at the University of Pretoria to continue with his/her studies/research in a specific year, but he/she intends to continue in the following year, the student must apply in writing to the dean of the relevant faculty for leave of absence. The application must include: full names, student number, address, reasons and period for leave of absence, for example the whole year, first semester (January to June) or second semester (July to December), name of supervisor (where applicable), and the student’s intentions for the period after his/her leave of absence. However, in accordance with the policy of the University of Pretoria, leave of absence is not granted for more than two years. Any outstanding fees should be paid in full upon the student’s return from his/her leave of absence.

**DEFINITION OF TERMS**

Familiarise yourself with the meaning of the undermentioned terms. They are used generally in all faculties and in particular in this Faculty.

- **academic year**: the academic year as determined by the University Council
- **module**: a defined aspect of a subject that forms a unit and to which a module code has been allocated
- **core module**: a module that is compulsory for a specific programme or package
- **fundamental module**: a module that can be regarded as the academic basis of the learning activities in a specific programme or package
- **elective module**: a module that forms part of a package and can be taken by own choice, provided that adequate credits are obtained at the specified year level, according to the requirements for the qualification the student follows
- **hours of learning**: the calculated number of hours a student is perceived to use to master the learning content of a specified module or programme. The total number of learning hours of a module comprises the time taken up by lectures, practicals, self-tuition and any other activity required according to the training programme. Learning hours of modules are normally calculated on the basis of 40 working hours per week x 28 week = 1120 + 80 additional hours for evaluation = 1200. For undergraduate modules, the total number of learning hours for a module is calculated according to the formula: number of credits of the module x 10.
- **credits**: a number of credits allocated to each module that represents the amount of work and the extent of the module
- **curriculum**: a series of modules from different subjects grouped together over a specified period of time and in a certain sequence according to the regulations
- **block**: a module/modules presented as a block in a specified period of time during the academic year
- **block mark**: is calculated from the continuous evaluation opportunities during the course of the presentation of the relevant block
- **block examination**: examination on the total content of a block. This is scheduled at the end of a block/semester
- **final block mark**: is calculated from the block examination mark and the block mark (continuous evaluation) in a 50:50 or 60:40 ratio
- **package**: a group of modules with a specific coherence and focus, selected as a specialisation within a programme by students
**examination mark:** the mark a student obtains in the examination of a module, including practical and clinical examinations where applicable

**final mark:** is calculated from the examination mark as well as the mark compiled from the continuous evaluation during the presentation of the module

**GS:** a combined mark (semester/year mark plus examination mark) of at least 40% required for admission to a specific prescribed module

**module level or level:** an indication of the level of complexity of a module (e.g. first, second or further level), which also implies a particular credit value. The (year) level is indicated by the first digit of the module code (e.g. FLG 322 is a module at level three of the physiology discipline)

**anti-semester modules (for MBChB I and BChD I):** modules of a subject normally presented in the first semester, which can be repeated in the second semester and whereby students have another opportunity to attempt passing the modules in question in the same year. (NB: Only certain departments present modules on an anti-semester basis.)

**semester module:** a module that extends over one semester

**semester/year/continuous evaluation mark:** the mark awarded to a student on the grounds of continuous evaluation during the presentation of a module. Consult par.6 under GENERAL ACADEMIC INFORMATION in this publication for further details.

**subject:** a demarcated field of study of which one module or more may be selected for the study of a degree or diploma

**syllabus:** the arrangement of the study material for a specific module

**year module:** a module extending over one year

**extended study programme:** a study programme for a degree or diploma taken over a period longer than the minimum duration for the degree or diploma according to regulation.

**admission procedure:** also includes the selection procedure

**package coordinator:** the person responsible for organising, compiling and teaching as well as guidance in respect of a particular package

**programme manager:** the person responsible for the overall management, organisation and compilation of a particular programme plus the packages falling under that programme

**certificate of satisfactory preparation:** satisfactory preparation also implies satisfactory attendance of practical classes and clinical work.

**grade point average based on module credits:** an average mark that is calculated by multiplying the final mark achieved in a module with the credit value of that module and then dividing the sum of these values by the total of the credit values of all the modules for which a student was enrolled. The result of these calculations is a weighted average based on module credits.
GENERAL ACADEMIC INFORMATION

The regulations with regard to degrees, diplomas and certificates appearing in this publication, are subject to change and may change before the commencement of the academic year 2014.

1. Admission to undergraduate studies and diploma studies

1.1 General

1.1.1 To register for a first bachelor's degree at this University, a candidate must, in addition to the required National Senior Certificate with admission for degree purposes, also comply with the specific admission requirements for particular modules of a subject and study programmes as prescribed in the admission procedure and the departmental regulations of the various schools.

1.1.2 The following persons may also be considered for admission:

**Note:** A conditional exemption certificate does not grant admission to bachelor's degree studies. The School of Healthcare Sciences will, however, accept a certificate of conditional exemption by virtue of mature age (23 years and older) in the case of the BCur(I et A) degree study, provided that the applicant concerned complies with the minimum requirements set by the Matriculation Board and the School in question, in respect of Grade 12 subjects already completed. Candidates are advised to contact the Head of the Department of Nursing Science in this regard.

1.1.3 The Senate may limit the number of students allowed to register for a study programme, in which case the Dean concerned may, at his own discretion, select from the students who qualify for admission, those who may be admitted.

1.1.4 Subject to differently worded faculty regulations and the stipulations of General Regulations G.1.3 and G.62, a candidate will only be admitted to postgraduate bachelor's degree studies, if he or she is in possession of a recognised bachelor's degree.

1.2 Requirements for admission to specific modules

A student who has

(a) obtained at least 50% in the final Grade 12 examination in Mathematics as well as in Physical Science, will be admitted to Molecular and cell biology (MLB 111), and a module in the subjects Chemistry, Physics, Zoology and Entomology, Genetics, Microbiology or Botany;

(b) obtained at least 50% in the final Grade 12 examination in Mathematics as well as in Physical Science, will be admitted to a module in Radiation Physics (RFI);

(c) obtained at least 40% in the final Grade 12 examination in either Physical Science or Life Sciences, will be admitted to modules in Occupational Therapy and Therapeutic Media;

(d) obtained at least 60% in the final Grade 12 examination in Mathematics, will be admitted to the module WTW 158 in Mathematics; and

(e) obtained at least 50% in the final Grade 12 examination in Mathematics, will be admitted to the module WTW 134 in Mathematics.

1.3 Admission requirements for candidates with a National Senior Certificate

To be able to gain access to the faculty and specific programmes, prospective students require the appropriate combinations of recognised NSC subjects as well as certain levels of achievement in the said subjects. In this regard the determination of an admission point score (APS) is explained and a summary
of the faculty specific requirements, i.e. the admission point score (APS) per programme and the specific subjects required per programme is provided.

1.4 Determination of an Admission Point Score (APS)
The calculation is simple and based on a candidate’s achievement in six 20-credit recognised subjects by using the NSC ratings, that is the “1 to 7 scale of achievement”. Thus, the highest APS that can be achieved is 42.

Life Orientation is excluded from the calculation determining the APS required for admission.

Provisional selection is based on the results obtained in the final Grade 11 examination. Final admission in the following year is based on the final Grade 12 results, which will be the determining factor to actually commence with the studies.

1.5 Specific admission requirements for the Faculty of Health Sciences
1.5.1 A valid National Senior Certificate with admission for degree purposes.
1.5.2 General requirements and procedures (see University’s website for further information):
   • Applicants are considered in two categories, namely matriculants and university students.
   • Selection takes place in all programmes.
   • Selection for MBChB and BChD is based on academic merit, the National Benchmark Test and the Value-added Questionnaire.
   • Selection for BClinical Medical Practice is based on academic merit and a Biographical Information questionnaire. Also subject to the general admission requirements of the University of Pretoria and the specific admission requirements for the BClinical Medical Practice degree as set out in Reg. M. 2A(a).
   • Selection for BCur, BOccTher, BRad, BPhysT and BDietetics is based on academic merit, the National Benchmark Test and the Value-added Questionnaire.
   • Selection for BOH – Oral Hygiene – is based on academic merit and the National Benchmark Test.
1.5.3 Minimum subject and level requirements:

</table>

2. **Registration for a particular year of study**
   At the beginning of an academic year, a student registers for all the modules he or she intends taking in that particular year (whether these be first-semester, second-semester or year modules).

3. **Credit for modules passed by unregistered students**
   There are students who attend lectures, write tests and examinations and in this manner earn marks, but have either not registered for modules or have not registered as students at all. These marks will not be communicated to any student before he/she has provided proof of enrolment. A student cannot obtain any credits in a specific academic year for a module 'passed' in this manner during a previous academic year and for which he/she was not registered. This arrangement applies even where the student is prepared to pay the tuition fees.

4. **Academic Literacy Test**
   All new undergraduate students who register in the Faculty of Health Sciences, will be required to write an academic literacy test. On the grounds of this test, students will be required to follow compulsory academic literacy modules (ELH modules) which they must pass as one of the requirements for obtaining their degree.

5. **Academic information management**
   The University of Pretoria requires all undergraduate students to complete the module AIM 101 Academic information management 101. Details of the module can be found in the LIST OF SERVICE MODULES.
6. **Subminimum in examination papers**
Where applicable, the subminimum required in examinations appears in the regulations of the degree/diploma in question and in the syllabi of the modules in question.

**With regard to MBChB:**
A subminimum may be required in each module or practical component from which a specific block is compiled, in order to pass in the block in question.

7. **Examinations**
The examinations in first-semester modules take place in May/June, while all other examinations (second-semester modules, year modules and blocks of the MBChB degree programme) take place in October/November. Consult the study manual of a given block for details of the School requirements for examinations in the MBChB curriculum.

8. **Ancillary examinations**
After conclusion of an examination and before examination results are announced, the examiners may summon a student for an ancillary examination on particular aspects of a module. Details in respect of a School’s requirements for ancillary examinations are published in the study guide of a given block.

9. **Extraordinary examinations (including aegrotats)**
Subject to the stipulations of General Regulation G.12, the period during which an extraordinary examination will take place in the School of Medicine, will be determined by the lecturer concerned, in consultation with the relevant head of department or block chairperson, provided that the examination in a block should take place during the second examination period, if possible. If an examination consists of more than one evaluation modality, the examination as a whole must be repeated, even if part thereof has already been completed.

10. **Re-marking of examination scripts**
In accordance with the stipulations of General Regulation G.14, departments give feedback to students after an examination on the framework used by the examiners during the examination. The way in which feedback is given, is determined by the head of department. Students may, after perusal, and in the case of MBChB students, after the examination period (which includes the examination and the second examination), within 14 calendar days after commencement of the lectures in the next semester, and after payment of the prescribed fee, apply for the re-marking of an examination script, by an examiner (in the case of MBChB study an external examiner from outside of the University) appointed by the head of department concerned. The **School of Medicine furthermore defines the relevant regulation as follows:**

   (i) A student has the right of **perusal** of his or her examination script before applying for the re-marking of the examination script. 
   **The following is determined by perusal of the script:**
   - Whether all the answers have been marked.
   - Whether the marks awarded, have been calculated correctly.
   - Whether the student did in fact answer all the questions.

   (ii) During **perusal**, the student, the lecturer as well as a third person must be present.
If a discussion about the content of the answers in the script develops, the student must be referred to the administration of the School in question, where he or she applies for the re-marking of the examination script.

11. **Second examination opportunity**
   (i) A student may be admitted to a second examination in a module in the following instances [excepting specific faculty requirements in respect of second examinations in specific blocks for the first to the fifth year of study for the MBChB degree (consult Reg. M.1(b)) and the first and second year of study for BChD (consult Reg.D.1(b)):
      (aa) If a final mark of between 40% and 49% has been obtained.
      (bb) If a pass mark has been obtained but not the required subminimum of 40% in the examination as a whole; or
      (cc) If a pass mark has been obtained but not the required subminimum in subsections of the module.
   (ii) A student must obtain a minimum of 50% in the second examination to pass.
   (iii) The semester/year/continuous evaluation mark is taken into account only if a student did not obtain at least 50% in the second examination of a first-semester module at 100 level.
   (iv) The highest final mark (pass mark) that can be awarded to a student for a second examination, is 50%.

12. **Promotion**
In certain departments, students can be promoted to a next semester or level of a subject without writing the prescribed examination, provided that their preparation is satisfactory and a continuous evaluation mark of at least 65% has been obtained.
Departments where promotion as prescribed above is possible, will inform students in good time in this regard.
**Note:**
- Students obtain credit for a promoted module only after they have passed an examination in a consecutive module or modules of the subject in question at this University.
- Promotion as described above, does not refer to the option that medical students may exercise to have the block mark at the end of the year, validated as the final block mark for a relevant block (i.e. to be exempted from the block examination in the block), provided, inter alia, that a block mark of at least 60% has been obtained in the block in question.

13. **The examination moderating meeting**
13.1 **Students in Year 1 - 3:**
   (i) Students obtain class test, practical and block test marks in respect of each block and special activity (which are disclosed to students). These marks are processed into a block mark (which is not disclosed to students). Each block chairperson publishes a list of the registration numbers of students who have to sit the semester examination in his or her block. The block marks are submitted to Student Administration. Students with examination exemption, who nevertheless prefer to sit the block examination, may do so, but will then have to accept the final block mark (which is calculated from the block mark and the examination mark), even if it is less than the (original) block mark.
(ii) The final block mark of the students who have to sit the examination, is only determined at the end of the block examination, from the contributions of the block mark and the examination mark. This final block mark will reflect the real mark obtained. The EMM (Examination Moderating Meeting) now takes place with the following objectives:
- Identification of the students who pass;
- Identification of the students who fail and as a result, have to follow the remedial programme and sit the second block examination;
- Validation of the block marks of the students who have been exempted from the examination, as the final block marks for the blocks in question; and
- Identification of students who need study assistance.

(iii) Students who fail the examination, must follow the remedial programme and sit the second block examination at the end of the second semester. Only the second block examination mark will count and the maximum that can be obtained is "50H".

(iv) The performance of the students who have written the second examination, will be discussed at the second EMM, with the following objectives:
- Identification of the students who pass; and
- Identification of the students who fail. In terms of the MBChB selection criteria, first- and second-year students who fail, must apply again for selection.

13.2 Students in Year 4 and the first half of Year 5: MBChB

(i) During the blocks and special activities, students write the class tests as well as the block test. These marks are announced by the block chairperson.

(ii) Students also do morning rotations, each of which is evaluated. There are eight morning rotations in Year 4, and five in the first half of Year 5. These rotation marks are announced by the relevant departments.

(iii) The block mark is calculated from the different test marks, marks awarded for practical work and assignments, as well as the rotation(s) coupled to the specific block. In Year 4, this mark can only be calculated in middle September and in Year 5, only in middle May. These marks are not disclosed to students. A list of the registration numbers of students, who have not obtained examination exemption, is placed on the notice board by the block chairperson. These students are obliged to write the block examination. The block marks are submitted to Student Administration. Students who nevertheless choose to write the examination, even though they have been exempted from it, may do so, but will have to accept the final block mark, even if it is lower than the (original) block mark.

(iv) The final block mark of the students who sit the examination is only calculated at the end of the block examination, from the contributions from the block mark and the examination mark. This final block mark will reflect the real mark obtained. An EMM is now being held, with the following objectives:
- Identification of the students who pass;
- Identification of the students who fail and resultantly have to follow the remedial programme and sit the second block examination;
- Validation of the block marks of the students with examination exemption, as their final block marks; and
- Identification of the students who need study assistance.
(v) Students who fail the examination, must follow the remedial programme and sit the second block examination, which will take place at the end of the second semester in Year 4, and at the beginning of the second semester in Year 5. Only the second block examination mark will count and a maximum of “50H” can be obtained.

(vi) Students who sit the second examination, are discussed at the second EMM, with the following objectives:
- Identification of the students who pass; and
- Identification of the students who fail.

13.3 Student Interns: MBChB

13.3.1 All students
(i) At the conclusion of each seven-week rotation, an end-of-rotation evaluation (EORE) takes place in the different departments. The aim with the EORE is the identification of those students who obtain examination exemption (semester examination) and those who are not exempted and will have to sit the examination at the end of the semester. All EOREs are supported by external examiners.

(ii) The same process takes place in rotations with a duration of 3.5 weeks.

(iii) No marks are disclosed to students, only the names and/or registration numbers of the students who must sit the semester examination.

(iv) After conclusion of the semester examination (which extends over three days on dates determined beforehand), an EMM is held, with the following objectives:
- Validation of the rotation marks as the semester examination mark, of the students who have obtained examination exemption. The rotation mark and the EORE mark contribute to the final mark.
- Identification of the students who have passed the semester examination. The rotation mark and the semester examination mark contribute to the final mark;
- Identification of the students who have failed the semester examination. These students are referred to Student Administration, as a new rotation division must now be followed; and
- Identification of the students who need study assistance.

13.4 Students who repeat rotations: MBChB
(i) Students who repeat rotations, do the EORE at the conclusion of the rotation that has been repeated. The objective is to obtain a pass mark. The continuous evaluation marks and the EORE mark contribute to the final mark.

(ii) On the first Wednesday after the conclusion of the rotation, an EMM takes place at 13:00 (or a different timeslot as arranged), to evaluate the achievement of the students, who have repeated the rotation. The objectives of this EMM are:
- Identification of the students who pass the rotation that has been repeated (final mark of 50% or more) (maximum indicated on the form is "50H");
- Identification of the students who fail the rotation that has been repeated. These students are referred to Student Administration, as a new rotation division must now be followed; and
- Identification of the students who need study assistance.
(iii) The achievement of the students who have repeated a 3,5 week rotation, is discussed at the same EMM.

13.5 Students who are "finalists" at another time than the end of the sixth year of study: MBChB

13.5.1 Students who repeated previous rotations successfully, and who are now "finalists", but will be doing the current rotation for the first time:

(i) These students do the EORE just like all other students do, the objective being, as in the case with other students, to identify those who do or do not obtain, exemption from the semester examination.

(ii) Students who obtain examination exemption after the conclusion of the EORE, thus pass the rotation automatically.

(iii) Students who do not obtain exemption from the semester examination after the conclusion of the EORE, must therefore sit the examination at the end of the relevant semester.

(iv) In keeping with UP regulations, these students, who are completing their studies ("finalists"), who have only one course (rotation) to complete in order to comply with all the requirements for the MBChB degree, and who have not obtained examination exemption, may apply to sit a "special examination" the following week (at a time earlier than the semester examination where applicable). This examination (which will take place at an earlier time), must preferably be scheduled for the Monday or Tuesday of the following week. The department determines the format and due to the fact that the student has already been through the external evaluation process, the presence of an external examiner at the special examination is optional, although recommended. The final mark comprises the examination mark and must be 50% or more to pass. The marks must be available by the Wednesday in order that these students’ marks can be submitted to the EMM, which will be held on that day.

(v) The objectives of the EMM for this category of students are:

- Identification of the students who have passed the special examination. These students complete the programme, and a special mini oath-taking ceremony is arranged for them; and
- Identification of the students who have failed the special examination. These students fail the course, must repeat the relevant rotation and must therefore be referred to Student Administration.

13.6 Students who are "finalists", but who are repeating the current rotation (all circumstances – previously, or at a recent EMM, identified as having failed): MBChB

(i) These students do the EORE as all other students. The objective is to obtain a pass mark. The continuous evaluation marks and the EORE mark contribute to the rotation mark, which, in this case, is also the final mark. The mark must be 50% or more, but the maximum that will be indicated on the form, is “50H”.

(ii) On the first Wednesday after the conclusion of the rotation, an EMM will be held at 13:00 (or another time slot as arranged), to evaluate the achievement of these students who are repeating the current rotation. The objectives of this EMM are:

- Identification of the students who have passed the EORE/examination. These students thus complete the MBChB degree programme and a mini oath-taking ceremony will be arranged for them; and
- Identification of the students who have failed the EORE/examination. These students thus fail the rotation, must repeat the relevant rotation and must therefore be referred to Student Administration.

(iii) Students in this category, who are only repeating a 3,5 week rotation, will follow the exact same route, but a unique EMM will be arranged shortly after completion of the EORE/examination. The same objectives will apply.

14. **Conferment of the MBChB degree during graduation ceremonies**

Students who will comply with all the requirements for the MBChB degree by 28 February, will receive the degree in question officially during the Autumn graduation ceremonies in April of the particular year. Students who will only comply with all the requirements for the MBChB degree during or after March, will receive the degree in question officially during the Spring graduation ceremonies in September of the particular year.
The following degrees and diplomas are conferred/awarded in the Faculty of Health Sciences in respect of the Schools of Dentistry, Healthcare Sciences, Health Systems and Public Health and Medicine (minimum duration of study in brackets):

(a) Bachelor’s degrees:
   (i) Bachelor of Medicine and Surgery – [MBChB] (6 years)
   (ii) Bachelor of Clinical Medical Practice – [BClinical Medical Practice] (3 years)
   (iii) Bachelor of Dentistry – [BChD] (5 years)
   (iv) Bachelor of Oral Hygiene – [BOH] (3 years)
   (v) Bachelor of Nursing Science – [BCur] (4 years)
   (vi) Bachelor of Nursing Science (Education and Administration) – [BCur(I et A)] (3 years)
   (vii) Bachelor of Radiography – [BRad] (3 years) (Fields of specialisation: Consult Reg. H.7)
   (viii) Bachelor of Occupational Therapy – [BOccTher] (4 years)
   (ix) Bachelor of Physiotherapy – [BPhysT] (4 years)
   (x) Bachelor of Dietetics – [BDietetics] (4 years)

(b) Honours degrees:
   (i) Bachelor of Science Honours – [BScHons] (1 year full-time; 2 years part-time) [Fields of specialisation mentioned under the relevant schools]
   (ii) Bachelor of Radiography Honours – [BRadHons] (2 years part-time) [Fields of specialisation: Consult Reg. H.8(b)]
   (iii) Bachelor of Nursing Science Honours – [BCurHons] (1 year) (Suspended until further notice)
   (iv) Bachelor of Occupational Therapy Honours – [BOccTherHons] (2 years) (Suspended until further notice)
   (v) Bachelor of Dietetics Honours – [BDieteticsHons] (1 year full-time, or a maximum of 5 semesters part-time)

(c) Master’s degrees:
   (i) Master of Medicine – [MMed] (4 to 5 years) (The field of specialisation is indicated in brackets – consult Reg. M.3).
   (ii) Specific master’s degrees:
       (aa) Master of Medical Pharmacology – [MPharmMed] (3 years)
       (bb) Master of Military Medicine – [MMilMed] (3 years)
       (cc) Master of Philosophy in Philosophy and Ethics of Mental Health – [MPPhil (Philosophy and Ethics of Mental Health)] (1 year full-time or 2 years part-time – with choice of e-learning)
       (dd) Master of Philosophy in Pain Management – [MPPhil (Pain Management)] (2 years with 3 contact sessions per year)
       (ee) Master of Early Childhood Intervention – [MECI] (2 years part-time)
       (ff) Master of Public Health – [MPH] (2 years)
   (iii) Master of Science – [MSc] (1 year) [Fields of specialisation mentioned under the different schools.]
   (vi) Master of Occupational Therapy – [MOccTher] (2 years) [Fields of specialisation: consult Reg. H.13]
(vii) Master of Physiotherapy – [MPhysT] (2 years) [Fields of specialisation: consult Reg. H.17]
(viii) Master of Dietetics – [MDietetics] (1 year)
(ix) Master of Science Dentistry – [MScDent] (4 semesters part-time)
(x) Master of Dentistry – [MChD] (4 to 5 years) (Fields: See Reg. D.3)

d) Doctorates:
(i) Doctor of Philosophy – [PhD] (1 year) (Schools of Medicine, Healthcare Sciences, Dentistry and Health Systems and Public Health) [Fields mentioned under different schools]
(iii) Doctor of Nursing – [DCur] (by virtue of publications)
(iv) Doctor of Occupational Therapy – [DOccTher] (1 year)
(v) Doctor of Science – [DSc] (by virtue of publications)

e) Diplomas:
(i) Postgraduate Diploma in Family Medicine – (1 year)
(ii) Postgraduate Diploma in General Ultrasound – [PGDipGUS] (2 years)
(iii) Postgraduate Diploma in Dentistry – [PGDipDent] (2 semesters part-time)
(iv) University Diploma in Oral Hygiene – [UnivDipOH] (2 years)
(Replaced by Bachelor of Oral Hygiene)
(v) Advanced University Diploma in Oral Hygiene – [AdvUnivDipOH] (2 semesters part-time)
(vi) Postgraduate Diploma in Vocational Rehabilitation – [DVR] (1 year)
(vii) Postgraduate Diploma in Interpersonal Communication and Group Techniques in Occupational Therapy – [DCG] (1 year) (Suspended until further notice)
(viii) Postgraduate Diploma in Group Activities – [DGA] (1 year)
(ix) Postgraduate Diploma in the Handling of Childhood Disability – [DHCD] (1 year)
(x) Postgraduate Diploma in Hand Therapy – DHT (1 year)
(xi) Postgraduate Diploma in Dietetics – (1 year) (Suspended until further notice)
(xii) Postgraduate Diploma in Tropical Medicine and Health – [DTM&H] (1 year)
(xiii) Postgraduate Diploma in Public Health – [DPH] (2 years)
(xiv) Postgraduate Diploma in Health Systems Management – [DHSM] (2 years)
(xv) Postgraduate Diploma in Occupational Medicine and Health – [DOMH] (2 years)
(xvi) Postgraduate Diploma in Occupational Health – [DipOH] (2 years)
(xvii) Postgraduate Diploma in Clinical Evidence and Healthcare – [DipCEHM] (2 years) (Suspended)
(xviii) Postgraduate Diploma in Public Health Medicine – [DipPHM] (2 years)

Note: Students who take a module offered by another faculty, must familiarise themselves with the admission requirement and/or prerequisites for the module in question as well as subminimum in examinations, second examinations, etc.

General Regulations G.1 to G.15 apply to a bachelor’s degree.

Note: The four Schools in the Faculty, each with the regulations of their different programmes, appear in alphabetical order in this publication:
School of Dentistry
School of Healthcare Sciences
School of Health Systems and Public Health
School of Medicine
I. BACHELOR’S DEGREE

General Regulations G.1 to G.15 are applicable to bachelor’s degrees and *mutatis mutandis* to the undergraduate diploma.

D.1 Bachelor of Dentistry [BChD]
(Code 11130001)

**NB**
Selection of candidates takes place prior to admission.
Each student in Dentistry must apply to the Registrar of the Health Professions Council of South Africa for registration as a student in Dentistry, within two months after the commencement of the first year of study. Students, who have been granted exemption from the first or second year of study, must also comply with the registration requirements.

**NOTE: FOR STUDENTS WHO REGISTERED FOR THE BChD DEGREE PROGRAMME PRIOR TO 2014, THE RELEVANT REGULATIONS AS THEY APPEAR IN THE 2013 YEARBOOK WILL BE APPLICABLE**

(a) **Duration**
Five years of full-time study.

(b) **Passing a module**
A *module mark* is calculated from the continuous evaluation opportunities during the course of the presentation of the module in question. These evaluations shall include one or more of the following:
(i) Evaluations regarding theoretical knowledge.
(ii) Evaluations regarding clinical knowledge and skills.
(iii) Compulsory attendance at and active participation in prescribed activities.
(iv) A final comprehensive module examination moderated by external examiners.

(c) **Repeating modules (and thus the year of study)**
(i) Students must pass all the modules of a particular year of study in order to be admitted to the next year of study.
(ii) Students who repeat the first or second year of study are exempted from the modules which have been passed in the unsuccessful year. The examination moderating meeting, in conjunction with the Dean/Chairperson of the School of Dentistry, retains the right to only award a pass mark in the said modules, if the student complies with the following requirements regarding those modules:
• That the mark awarded to the relevant module was not awarded on the grounds of condonement;
• That the student attended the relevant module regularly and furthermore complied with all other requirements.

(d) **Examinations and pass requirements, subminima and continuous evaluation mark**
(i) In accordance with the stipulations of General Regulation G.10 (2), no minimum year or semester mark is required for admission to the examination:
Provided that the different year and semester modules in a School need not be handled in the same manner, although a great degree of uniformity is expedient. Any other requirements for admission to the examination are set out in the study manuals. A final mark of at least 50% is required to pass (see also Reg. D.1(b) (i)).

(ii) **Subminimum**
A subminimum of 40% is required in the written section of an examination, with a subminimum of 50% in the clinical section of a module. At the beginning of the academic year, the head of department informs the students of the required subminimum in subsections of the modules offered by the department in question. This information is also published in the study manual.

(iii) **Continuous evaluation mark**
A student obtains marks for practical and clinical work, for tests and also for assignments completed during the course of an academic year.

(iv) A student who repeats a year of study and who must acquire certificates of satisfactory preparation in failed modules, must comply with all the requirements set by the head of department.

(e) **Provisions regarding promotion modules**
The stipulations of General Regulation G.10.1 concerning satisfactory preparation and progress also apply to modules where a promotion test is required. Supplementary examination marks and pass marks in promotion modules are awarded according to the stipulations of General Reg. G.12: Provided that:

(i) Promotion is based on theoretical and/or practical and/or clinical evaluation throughout the year and a minimum of 50% is required to be promoted.

(ii) A student, who has obtained a year mark of less than 50% can be admitted by the examination moderating meeting to a supplementary promotion test in the relevant promotion module.

(iii) Students repeating a year of study retain credit for examination modules passed, unless determined otherwise, but a certificate of satisfactory preparation and progress must be obtained in all the promotion modules.

(iv) In order to comply with the requirements for (iii) and to maintain a specified level of clinical skills, the extent of involvement of students in successfully completed promotion modules is determined by the relevant module chairperson, at the commencement of the year, and agreed with the student(s) concerned.

(f) **Academic exclusion from further study**

(i) A student following a BChD degree will only be allowed two opportunities to repeat a year of study.

(ii) A student who does not comply with the abovementioned requirement but nevertheless wishes to be admitted to the School, may request the Dean/Chairperson of the School in writing, to consider his or her application for readmission in accordance with the prescribed procedure.

(iii) If a student fails one or more first-year modules (and therefore is not admitted to the second year of study), such a student forfeits his or her selection and must apply again for selection with a view to admission to the first year of study.

(iv) A student, who has failed a year of study for the second time before completing BChD II is excluded from the programme and must apply again for selection with a view to readmission to the second year of study.
(g) **BChD programme: five-year curriculum**

Total number of credits: 1038

**Note:**
(i) A new curriculum, as reflected below, is being phased in for the programme. The first year of study will be followed for the first time in 2014, the second year in 2015, the third year in 2016, the fourth year in 2017 and the fifth year in 2018.

(ii) The total credits and regulations for the degree programme in this publication are applicable to the new curriculum being phased in.

**Total credits:** 202

Note:

(i) In 2014 the second to fifth year of study will still be followed according to the old curriculum, as reflected below.

(ii) Students who fail a year in the existing curriculum immediately prior to the year of the implementation of the revised curriculum will have to repeat all the modules for that particular year in the revised curriculum.

(iii) The total credits and regulations for the old curriculum appear in the 2013 Yearbook and are applicable for students who registered for the BChD degree programme prior to 2014.

*Refer to par. 1.2 of GENERAL ACADEMIC INFORMATION in this publication.

IMPORTANT:

- Apart from the examination modules mentioned above, the following compulsory academic information management module must also be passed during the first semester of the first year of study: AIM 101.
- Consult also par 5 of GENERAL ACADEMIC INFORMATION in this publication.
- All new first-year students at the University must write an academic literacy test. On the grounds of the outcome of this test, students will either be exempted from the following academic literacy modules, or if they have failed the test mentioned above, will be required to pass in the relevant modules: ELH 111 and 112
- The first semester of the year module PHY 181 is the same as PHY 131 mentioned above.

(ii) Failed candidates/Admission to the second semester of BChD I

(aa) Selected first-year students, who have passed a sufficient number of prescribed first-semester modules at 100 level will, in accordance with the stipulations of General Regulation G.3, automatically be admitted to the second semester of the first year of study. During the second semester, the students will be admitted to an examination on an anti-semester basis in the first-semester module(s) still outstanding, if this can be accommodated in the timetable.

(bb) In the School of Dentistry, a student may not repeat more semester modules than the equivalent of eight lectures per week on an anti-semester basis in the second semester.

Failed candidates
A student, who has failed a year of study for the second time before completing BChD II, is excluded from the programme and will again be subjected to selection with a view to readmission to the second year of study. Also consult Reg. D.1 (c) concerning students who fail some modules of a year (and therefore the year of study).

(k) Admission to the third year of study
A student must pass all the modules of the second year of study for admission to the third year of study.

(l) Third year of study
(i) Curriculum
Examination modules
TGG 370 Applied medicine 370
FAR 370 Clinical pharmacotherapy 370
ANP 370 Anatomical pathology 370
GOM 370 General and oral microbiology 370
Attendance module
GPS 370 Generic procedural skills 370
Promotion modules
TBW 370 Comprehensive patient management 370
ODO 370 Odontology 370
PDL 370 Periodontology 370
ORD 370 Orthodontics 370
OFC 370 Orofacial surgery 370
PRD 370 Prosthodontics 370
RAD 370 Diagnostic Imaging 370
POH 370 Public oral health 370
(ii) Supplementary examinations
Concerning the examination modules:
As set out in GENERAL REGULATIONS G.12.4.1.
(iii) Supplementary examinations in promotion modules
Consult Reg. D.1(e).
(m) **Admission to the fourth year of study**
A student must pass all the modules of the third year of study for admission to the fourth year of study.

(n) **Fourth year of study**

(i) **Curriculum**

**Examination module**
- TMZ 470 Anaesthesiology 470
- RAD 470 Diagnostic imaging 470
- POH 470 Public oral health 470

**Promotion modules**
- ODO 470 Odontology 470
- PDL 470 Periodontology 470
- ORD 470 Orthodontics 470
- OFC 470 Orofacial surgery 470
- PRD 470 Prosthodontics 470
- MFP 470 Maxillofacial pathology 470
- TBW 470 Comprehensive patient management 470

(ii) **Supplementary examinations**
A student who obtains between 40-49% in examination and promotion modules, is admitted to supplementary examinations. Should he or she fail this supplementary examination/promotion test, the fourth year has to be repeated. When a year of study has to be repeated, the student retains credit for the examination modules passed. Consult Reg. D.1 (e) regarding the certificate of satisfactory preparation and progress, which must be obtained in the year of repetition in all promotion modules already passed, as well as the extent of involvement of students regarding promotion modules already passed, in order to maintain a specific level of clinical skills.

(o) **Admission to fifth year of study**
A student must pass all the modules of the fourth year of study for admission to the fifth year of study.

(p) **Fifth year of study**

(i) **Curriculum**

**Attendance module**
- RAD 570 Diagnostic imaging 570
- POH 570 Public oral health 570

**Examination modules**
- ODO 570 Odontology 570
- PDL 570 Periodontology 570
- ORD 570 Orthodontics 570
- OFC 570 Orofacial surgery 570
- PRD 570 Prosthodontics 570
- MFP 570 Maxillofacial pathology 570
- TBW 570 Comprehensive patient management 570

(ii) **Examinations**

(aa) A student who has failed the clinical part of any module in the final examination, will be required to repeat that module. The period which must elapse before the student may again sit an examination, is determined by the Dean, on the recommendation of the examination moderating committee. A student who repeats a module, must obtain
certificates of satisfactory preparation in all the other modules that
he/she has passed.

(bb) A student who has failed the theoretical part of any module or any
subsection thereof in the final examination, will be admitted to a
supplementary examination in that part of the module. A student who
fails the supplementary examination will be required to repeat the
module and may sit an examination at the end of the ensuing semester,
but must obtain certificates of satisfactory preparation in all the other
modules that he/she has passed.

(q) **Pass with distinction**
The degree is conferred with distinction on a student who has obtained at least
65% in all the examination modules of the final year of study, with an average of at
least 75% for all the modules.

| D.1A Bachelor of Oral Hygiene [BOH]
| Code 11130011 |

General Regulations G.1 to G.15 are applicable to bachelor’s degrees.

(a) **Admission requirements**
A valid National Senior Certificate (NSC) with admission for degree purposes.

**Admission Point Score (APS)**
Total of 25 rating points.
Candidates are selected for admission to this programme and application must be
made in the prescribed manner.

To be able to gain access to the Oral Hygiene degree programme, prospective
students require the appropriate combinations of recognised NSC subjects as well
as certain levels of achievement in the following minimum subjects:
- English (Home language level or First additional language level): rating 4 (50-59%)
- Mathematics: rating 4 (50-59%)
- Physical Science: rating 4 (50-59%)
- Life Orientation (excluded when calculating the APS).

(b) **Nature and duration of programme**
Three years of full-time study.

(c) **Curriculum**

(i) **First year of study**

- OFC 371  Orofacial surgery 371 (6)

**Elective modules (one of the following):**
- ORD 372  Orthodontics 372 (22)
- PDL 372  Periodontology 372 (22)
- POH 371  Public oral health 371 (22)

(d) **Admission to the second year of study**

(i) To be admitted to the second year of study, a student must pass in all the first-year modules.

(ii) Students who are repeating the first year of study, retain credit for examination modules passed, unless otherwise stipulated, but have to obtain a certificate of satisfactory preparation and progress in all the promotion modules. In order to comply with the requirements mentioned above, and to maintain a specific level of clinical skills, the extent of involvement of students in promotion modules passed, will be contracted by the module chairperson with the student(s) concerned, at the commencement of the academic year.
(iii) A pass mark of at least 70% is required in the promotion module VKM 171 Preventive oral health 171.

(e) Admission to the third year of study
(i) To be admitted to the third year of study, a student must pass in all the second-year modules.
(ii) Students who are repeating the second year of study, retain credit for examination modules passed, unless otherwise stipulated, but have to obtain a certificate of satisfactory preparation and progress in all the promotion modules. In order to comply with the requirements mentioned above, and to maintain a specific level of clinical skills, the extent of involvement of students in promotion modules passed, will be contracted by the module chairperson with the student(s) concerned, at the commencement of the academic year.
(iii) A pass mark of at least 70% is required in the promotion module VKM 271 Preventive oral health 271.

(f) Examinations of the first, second and third years of study
(i) A subminimum of 50% in the examination is required in respect of the examination modules, with a final mark of at least 50% to pass.
(ii) A pass mark of at least 70% is required in Preventive oral health.
(iii) A student who fails the clinical part of one or more of the modules of the third year must repeat those modules in the ensuing semester, with an examination at the end of the semester. The Dean on the recommendation of the examination moderating committee, will determine the time that must elapse before the student may again report for examination. Students, who are repeating the year of study, retain credit for modules passed, unless determined otherwise, but a certificate of satisfactory preparation and progress must be obtained in all modules passed.
(iv) A student who has failed the theoretical part of any module in the third year, final examination, will be admitted to a supplementary examination in that part of the module. A student who fails the supplementary examination may, subject to other faculty regulations, sit an examination at the end of the ensuing semester, but must obtain certificates of satisfactory preparation in all the other modules that he/she has passed.
(v) In order to comply with the requirements in (iii) above, and to maintain a specific level of clinical skills, the extent of students' involvement in modules passed, will be contracted with the students concerned, by the module chairperson, at the beginning of the year.
(vi) The requirement as stipulated in par.(f.)(i) above, will apply to students who, after repeating a semester, again fail some of the modules.

(g) Academic exclusion
(i) A student following the Oral Hygiene programme will only be allowed two opportunities to repeat a year of study. Refer to General Regulation G.3.2(b).
(ii) A student who does not comply with the abovementioned requirements but nevertheless wishes to be admitted to the School, may request the Dean/Chairperson in writing to consider his or her application for readmission in accordance with the prescribed procedure.
(iii) A student who fails the first year of study must apply for readmission to the programme.

(h) Degree with distinction
The degree is conferred with distinction on a student who obtains an average of at
least 75% in the examination modules of the third year of study, and at least 65% in all the examination modules of the final year of study.

II MASTER’S DEGREES

D.2 Master of Science Dentistry [MScDent]

Also consult General Regulations G.30 to G.44.

(a) Option 1: Main field of study: General
(Field of study code 11252001):

(i) Admission requirements
Subject to the stipulations of General Regulations G.9 and G.30, the BChD degree or an equivalent qualification is required, as well as the Postgraduate Diploma in Dentistry [PGDipDent]. The candidate may be exempted from the latter qualification at the discretion of the head of the department concerned and with the Dean’s approval.
Candidates in possession of an applicable bachelor honours degree or equivalent qualification may be admitted to study in certain specialised basic dental sciences at the discretion of the head of department concerned and according to General Regulation G.30.2, and with the Dean’s approval.

(ii) Duration
At least four semesters of part-time study.

(iii) Curriculum
   (aa) Attendance course TNM 800 Applied research methodology 800
   (bb) An examination (ODO 800) and dissertation (ODO 890)
       - An examination on an approved programme of advanced study and tuition in an applicable area of Dentistry.
       - A dissertation related to the major subject. In the final evaluation, the dissertation and the examination mentioned in (bb) will carry equal weight. A minimum pass mark of 50% is required for the dissertation, with a minimum of 50% as pass mark in the examination.

(b) Option 2: Main field of study: Oral Surgery
(Field of study code 11252004)

(i) Admission requirements
Subject to the stipulations of General Regulations G.9 and G.30, the BChD degree is required, as well as the Postgraduate Diploma in Dentistry [PGDipDent] with the main field of study Oral Surgery (Oral Surgery with a minimum pass mark of 65%).

(ii) Duration
A minimum of four semesters part-time study. Studies must be completed within six semesters and Part I and II of the study programme must extend over a maximum of four semesters.

(iii) Curriculum
   Part I
      Basic subjects (prerequisite for Part II):
      CBA 800  Anatomy and principles of surgery 800
      CBR 800  Maxillofacial radiology and principles of surgery 800
      ANA 870  Anatomy 870
      FSG 806  Physiology 806
FAR 809  Pharmacology 809  
(A minimum of any two of the above basic subjects is required. These basic 
subjects may be passed at the University of Pretoria or the College of 
Maxillofacial and Oral Surgery of the Colleges of Medicine of South Africa or 
may be part of the PGDipDent in Oral Surgery, or promoted/passed with a 
minimum pass mark of 65% from another tertiary institution (see also General 
Regulation G.10.3(b)).

**Attendance course:**
TNM 800  Applied research methodology 800

**Part II**
KGM 891  Clinical training 891  
Maxillofacial and oral surgery: 240 hours of clinical or theme-related practical 
training. 
Students who hold the Postgraduate Diploma in Dentistry [PGDipDent] with 
Oral Surgery as the main field of study, may apply in writing for credit for the 
basic subject, clinical training and the written final examination in Oral 
Surgery, provided that a minimum of 65% has been obtained in the basic 
subject at the University of Pretoria (see also General Regulation G.10.3 (b)).

**Part III**
MCH 800  Oral surgery 800
Part III comprises (i) an examination in Maxillofacial and Oral Surgery; 
(ii) five written seminars on a specific topic in Maxillofacial and Oral Surgery; 
and (iii) a mini-dissertation related to the topic mentioned in (ii) above.

(c) **Option 3: Main field of study: Maxillofacial and Oral Radiology**  
(Field of study code: 11252005)  
(i) **Admission requirements**
Subject to the stipulations of General Regulations G.9 and G.30, the BChD 
degree is required, as well as the Postgraduate Diploma in Dentistry 
[PGDipDent] in the main field of study (RAD) Radiography 700.

(ii) **Duration**
As for Option 1.

(iii) **Curriculum**
**Attendance course:**
TNM 800  Applied research methodology 800  
**Major subject:**
MPG 806 Maxillofacial and oral radiology 806  
**Basic subject:**
RAD 801 Radiography 801  
_A dissertation_ (RAD 890) related to the major subject.

(d) **Examination and supplementary examination**
The stipulations of the General Regulations apply to all the abovementioned 
options.

(e) **Degree with distinction**
**Regarding Option 1:** A student must obtain a minimum of 75% in both the 
examination and the dissertation.
**Regarding Option 2:** A student must obtain a minimum of 65% in Parts I and II, 
and a minimum of 75% in each of the subdivisions of Part III of the study 
programme.
**Regarding Option 3:** A student must obtain a minimum of 65% in the basic subject and at least 75% in the major subject of the study programme.

### D.3 Master of Dentistry [MChD]

Also consult General Regulations G.30 to G.44.

(a) The MChD degree is conferred in the following fields of study:
- Maxillofacial and Oral Surgery
- Orthodontics
- Oral Pathology
- Periodontics and Oral Medicine
- Prosthodontics
- Community Dentistry

(b) **Admission requirements**

(i) Each candidate for admission to the study for the MChD degree programme must:
   (aa) either hold the BChD degree of the University of Pretoria or an equivalent qualification, or be admitted to master’s degree studies in terms of the stipulations of General Regulations G.1.3 and G.62;
   (bb) be registered as a dentist with the Health Professions Council of South Africa.

(ii) For the MChD degree (endorsement Maxillofacial Surgery – Medical or Dental (Codes 11250091 and 11250011), a candidate
   (aa) is required, subject to the stipulations of General Regulations G.1.3 and G.62, to have obtained the BChD and/or MBChB degree or equivalent qualification at least one year previously, passed the Advanced Trauma Life Support Course (maximum three attempts), as well as the basic subjects Anatomy 870, Physiology 806 and Pharmacology 809 and the PGDipDent (Oral Surgery), with a minimum pass mark of 65% in the major subject. Students who hold the Postgraduate Diploma in Dentistry [PGDipDent(Oral Surgery)] and/or the Master of Science Dentistry [MScDent] with Oral Surgery as the main field of study, may apply in writing for credit for the basic subject(s) (see also General Regulation G.10.3(b)).
   (bb) is required to be registered as a dentist and/or physician with the Health Professions Council of South Africa.

(c) **Duration**

In order to qualify for the degree, a candidate must, for a period of four to eight years, depending on the specific requirements for a particular field of study, have held a full-time training position/registrarship successfully, at a training institution approved by the University. In the case of Maxillofacial and Oral Surgery, a candidate must hold a full-time registrarship for a minimum of four years (for a candidate with both a BChD degree and a MBChB degree), a minimum of seven years (for a candidate with a BChD degree), a minimum of six years years (for a candidate with a MBChB degree), or a minimum of five years (for MChD (ChirMaxFac-Dent)).
### CURRICULA

#### Maxillofacial and Oral Surgery

##### Maxillofacial and Oral Surgery (endorsement ChirMaxFac-Med)

- Total number of credits: 1 680

##### For students who hold both the BChD and the MBChB degrees (Code 11250091)

**Duration:** Four years of full-time study.

##### For students who hold the MBChB degree (Code 11250092)

**Duration:** A minimum of six years of full-time study

- **First year of study**
  - As in (aa) above, except for MPG 801 Oral pathology.

- **Second year of study**
  - Major subject: KGM 802 Maxillofacial and oral surgery 802
  - The student must also register for the BChD degree and apply for registration as a student in Dentistry with the Health Professions Council of South Africa.

- **BChD III (Code 11130001)**
  - As for BChD III with exemption from certain medical subjects.
  - Examination subject: BVC 806 Principles of surgery 806

- **Third year of study**
  - Major subject: KGM 802 Maxillofacial and oral surgery 802

- **BChD IV (Code 11130001)**
  - As for BChD IV.
Fourth year of study
Major subject: KGM 802 Maxillofacial and oral surgery 802

BChD V (Code 11130001)
As for BChD V.

Fifth year of study
Major subject: KGM 802 Maxillofacial and oral surgery 802
Subsidiary subject: MPG 801 Oral pathology 801

Sixth year of study
Major subject: KGM 802 Maxillofacial and oral surgery 802

Seventh year of study
Major subject: KGM 802 Maxillofacial and oral surgery 802

For students who hold the BChD degree (Code 11250093)

Duration: A minimum of seven years of full-time study.

First year of study
As in (aa) above, except for BVC 806 Principles of surgery.

Second year of study
Major subject: KGM 802 Maxillofacial and oral surgery 802
The student must also register for the MBChB degree and must apply for registration as a student in Medicine with the Health Professions Council of South Africa.

MBChB III (Code 10130001)
As for MBChB III.

Third year of study
Major subject: KGM 802 Maxillofacial and oral surgery 802

MBChB IV (Code 10130001)
As for MBChB IV.

Fourth year of study
Major subject: KGM 802 Maxillofacial and oral surgery 802

MBChB V (Code 10130001)
As for MBChB V.

Fifth year of study
Major subject: KGM 802 Maxillofacial and oral surgery 802

MBChB VI (Code 10130001)
As for MBChB VI.

Sixth year of study
Major subject: KGM 802 Maxillofacial and oral surgery 802
Subsidiary subject: BVC 806 Principles of surgery 806
Seventh year of study
Major subject: KGM 802 Maxillofacial and oral surgery 802

Eighth year of study
Major subject: KGM 802 Maxillofacial and oral surgery 802

Ninth year of study (first semester):
Examination subject: KGM 802 Maxillofacial and oral surgery 802

(1.2) Maxillofacial and Oral Surgery (endorsement ChirMaxFac-Dent)
(Code 11250011)

Total number of credits: 1 680

Duration: Five years of full-time study.

First year of study
As in 1.1 (aa) above.

Second year of study
Major subject: KGM 802 Maxillofacial and oral surgery 802
Examination subject: BVC 806 Principles of surgery 806

Third and fourth years of study
Major subject: KGM 802 Maxillofacial and oral surgery 802

Fifth year of study (Research)
Examination subject: KGM 802 Maxillofacial and oral surgery 802

General information

1. The content of the basic subjects, subsidiary subjects and attendance courses will be determined by the particular head of department in consultation with the head of the department at Dentistry or Medicine.

2. General information concerning content and extent of the basic and subsidiary subjects is available at the department in question.

3. Students have to ensure that certificates of satisfactory preparation are acquired in all the attendance courses.

1. Maxillofacial and Oral Surgery

Major subject:
Maxillofacial and oral surgery: Experience is acquired through practical and clinical training and supplemented by seminars, discussions, papers and research. Diagnosis, planning, surgical and secondary treatment of diseases, injuries and defects of the human mouth, jaws, face and related structures.

Subsidiary (intermediary) subject:
Principles of surgery: Instruction mainly by the Departments of Surgery (and its divisions), Neurosurgery, Otorhinolaryngology, Ophthalmology and Family Medicine. This training takes place over nine months.

Instruction in the subsidiary subject:
Principles of surgery:
**Endorsement ChirMaxFac-Med** BVC 806  
General Surgery (including Paediatric Surgery): 2 months  
Intensive Care: 2 months  
Neurosurgery: 2 months  
Ophthalmology: 1 month  
Otorhinolaryngology: 1 month  
Plastic Surgery: 1 month  
Applied Oral Pathology: 3 months

**Endorsement ChirMaxFac-Dent** BVC 807  
Distress Unit (Family Medicine): 1 month  
General Surgery (including Paediatric Surgery): 1 month  
Intensive Care: 2 months  
Neurosurgery: 2 months  
Ophthalmology: 1 month  
Otorhinolaryngology: 1 month  
Plastic Surgery: 1 month  
Applied Oral Pathology: 3 months

**Applied Oral Pathology:** Instruction by the Department of Oral Pathology and Oral Biology will be over a period equivalent to three months.

**General information concerning the endorsements ChirMaxFac-Med and ChirMaxFac-Dent**

1. A candidate with a BChD or BDS degree should preferably enrol for the MChD(ChirMaxFac-Med) programme.
2. Permission is granted to a student for (ChirMaxFac-Med) to register simultaneously for the postgraduate and undergraduate programmes as applicable. At the end of the programme the student will have complied with all the requirements for the BChD, MBChB and MChD degrees.
3. The content of the basic and subsidiary (intermediary) subjects and attendance courses will be determined by the particular head of department, in consultation with the Department of Maxillofacial and Oral Surgery.
4. Basic and subsidiary (intermediary) subjects: Acknowledgement of basic and/or subsidiary (intermediary) subjects may be granted if all the particular subjects have already been passed at an approved institution such as the Colleges of South Africa (College of Maxillofacial and Oral Surgery) as recommended by the Head of department.
5. Pharmacology as a basic subject has to be passed as a prerequisite before the first year of study, should all other basic subjects be acknowledged by an approved institution.
6. Instruction in the major subject extends over a minimum period of three years, of which the first year mainly concentrates on minor oral surgery.
7. A student for the endorsement ChirMaxFac-Med can only fulfil his or her clinical obligations in Principles of Surgery after he or she has complied with the requirements for the MBChB degree, as well as having completed the Certificate for Advanced Trauma Life Support (ATLS) (before commencing the registrarship).
8. The instruction in the last two years in the major subject takes place only after having successfully completed the subsidiary subjects.
9. The first year of registrarship is acknowledged as an additional year of experience for Medicine and Dentistry if the training in Maxillofacial and Oral Surgery is discontinued. However, a student who discontinues one of the subjects must resign from the registrarship immediately.
10. The basic subjects for Maxillofacial and Oral Surgery (endorsements ChirMaxFax-Med and ChirMaxFac-Dent) are identical.
11. The requirements for the major subject are: Submission of a mini-dissertation (endorsement ChirMaxFac-Med) and a dissertation (endorsement ChirMaxFac-Dent), a letter from an appropriate journal editor, acknowledging receipt of the draft manuscript, surgical portfolio (logbook) with minimum cases treated per surgical section, a prescribed summary of case reports, any publications, research abstracts, examination in a surgical procedure and examination in patient short cases conducted under examination conditions.
12. A student may only proceed with the final FC MFOS (SA) examination after fulfilling the requirements for the MChD(ChirMaxFac-Med or -Dent) as stipulated in 11. above.
13. The MChD(ChirMaxFac-Med or -Dent) may only be awarded after successfully passing the final examination for the FC MFOS (SA).
14. Costs or fees for any examination(s) and registration at the Colleges of Medicine of South Africa have to be met by the student.

(2) **Orthodontics (Code 11250021)**

| Major subject: | ORD 803 | Orthodontics 803 |
|----------------|---------|-----------------
| Basic subjects: | ANA 871 | Anatomy 871 |
|                 | FSG 806 | Physiology 806 |
| Subsidiary subjects: | MPG 801 | Oral pathology 801 |
| Attendance courses: | RAD 800 | Radiography 800 |
|                 | KGM 800 | Maxillofacial and oral surgery 800 |
|                 | PRD 801 | Prosthodontics 801 |
|                 | SKT 800 | Speech therapy 800 |
|                 | MGN 802 | Human genetics 802 |
|                 | TNM 800 | Applied research methodology 800 |
|                 | PMG 801 | Periodontics and oral medicine 801 |
|                 | PDD 801 | Pedodontics 801 |

**Duration:** Four years of full-time study.

(3) **Oral Pathology (Code 11250031)**

| Major subject: | MPG 802 | Oral pathology 802 |
|----------------|---------|-----------------
| Basic subjects: | ANP 808 | Anatomical pathology 808 |
|                 | MPX 800 | Molecular pathology 800 |
| Attendance course: | TNM 800 | Applied research methodology 800 |

**Duration:** Five years of full-time study.

(4) **Periodontics and Oral Medicine (Code 11250041)**

| Major subject: | PMG 802 | Periodontics and oral medicine 802 |

**Total number of credits:** 1 369
Basic subjects: ANA 873 Anatomy 873  
FSG 806 Physiology 806  
APA 808 General pathology 808  
MDB 800 Oral biology 800  
Subsidiary subjects: MPG 803 Oral pathology 803  
FAR 870 Pharmacology 870  
Attendance courses: ORD 800 Orthodontics 800  
TNM 800 Applied research methodology 800  
PRD 802 Prosthodontics 802

Duration: Four years of full-time study.

(5) Prosthodontics (Code 11250081)

Total number of credits: 1344

Major subject: PRD 803 Prosthodontics 803
Basic subjects: ANA 874 Anatomy 874  
FSG 806 Physiology 806  
MDB 800 Oral biology 800  
Subsidiary subjects: MPG 804 Oral pathology 804  
PMG 803 Periodontics and oral medicine 803  
Attendance courses: KGM 803 Maxillofacial and oral surgery 803  
ORD 800 Orthodontics 800  
RAD 870 Radiography 870  
KMP 871 Communication pathology 871  
TNM 800 Applied research methodology 800

Duration: Four years of full-time study.

(6) Community Dentistry (Code 11250071)

Total number of credits: 1056

Major subject: GTH 800 Community dentistry 800
Basic subjects: TMP 801 Applied oral pathology 801  
HME 870 Introduction to health measurement 870  
BOS 870 Biostatistics 870

Additionally, the Diploma in Health Systems Management must be attended and passed on a capita selecta basis, or any other management course as determined by the head of department and approved by the dean.

Practical training
Practical training is provided at recognised institutions

Duration: Four years of full-time study.

(e) Examinations (also consult General Reg. G.40)
(i) Examinations in the basic and subsidiary subjects (with the exception of KGM 803):
(aa) A student must pass these subjects prior to admission to the examination in the major subject. A minimum of at least 50% is required to pass.
(bb) Examinations in the basic and subsidiary subjects must be passed before the end of the third year of study, or at a time as determined by the head of department.

(ii) **Examinations in the major subject**
Admission to the examination in the major subject is determined by the head of department.

(iii) If a student fails one or more of the basic subjects, subsidiary subjects or the major subject, the head of department may recommend to the examination moderating meeting, that he or she be admitted to a supplementary examination. Supplementary examinations may only take place after a minimum period of six months has elapsed since the examination in which the student failed.

**NB:**
(aa) In view of the fact that a postgraduate student may repeat an examination in any subject only once, a student who fails a supplementary examination will have to discontinue the programme. In this event, a student who has been holding a registrarship, will have to vacate the position as soon as possible after one calendar month's notice to the University of Pretoria and/or other recognised training institution, where applicable.

(bb) If a student is admitted to a supplementary examination in the major subject, the head of department will determine whether he/she has to vacate the registrarship at the end of the training period, or immediately after the supplementary examination.

(iv) **Subminimum**
In order to pass in the major subject a student must obtain a subminimum of 50% in all the sections of the examination, with a final mark of at least 50%.

(v) The stipulations of General Regulation G.10.4 are applicable with regard to attendance courses.

**Please note:** The attendance courses in Prosthodontics consist of two parts, i.e. Prosthetics and Restorative dentistry.

(vi) In addition to the stipulations already mentioned, a dissertation on a topic related to the major subject must also be submitted. In order to pass in the final examination, a pass mark must also be obtained for the dissertation.

(vii) An MChD student, who has obtained at least 75% with the first attempt in both his major subject and the dissertation, will receive the degree with distinction.

1. **MChD degree (endorsement ChirMaxFac-Med and ChirMaxFac-Dent)**
   (i) **Examinations in the basic subjects**
A student must pass all the basic subjects (Anatomy [with Embryology], Physiology and Pharmacology [University of Pretoria or College of Maxillofacial and Oral Surgery of the Colleges of Medicine of South Africa] before he or she may be admitted to the first year of study. A minimum pass mark of at least 50% is required in all examinations for the University of Pretoria and College of Maxillofacial and Oral Surgery and a minimum pass mark of 65% from another tertiary institution (see also General Regulation G.10.3(b)).

(ii) **Examinations in the subsidiary (intermediary) subjects**
(The minimum pass mark is 50%.)

(aa) For the endorsement Maxillofacial Surgery-Medicus, a student has to
pass in Principles of surgery in the year of study as indicated, before he or she may continue with the programme.

(bb) A student has to pass in Applied oral pathology at least two and a half years prior to the examination in his or her major subject. These subsidiary subjects may be passed at the University of Pretoria or the College of Maxillofacial and Oral Surgery of the Colleges of Medicine of South Africa.

(iii) If a student fails any of the subsidiary subjects Principles of surgery or Applied oral pathology, the head of department may recommend that he or she be admitted to a supplementary examination (re-examination).

(iv) **Examination and evaluation in the major subject**

(aa) If a student fails his or her major subject, the student has to reapply for admission to the final examination of the College of Maxillofacial and Oral Surgery of the Colleges of Medicine of South Africa.

(bb) In the light of the fact that a postgraduate student may repeat an examination in any subject only once, a student who fails a supplementary examination, will have to discontinue the programme.

(cc) If a student has been admitted to a supplementary examination in the major subject, the head of department will determine whether he or she should vacate the registrarship at the end of the training period. The student has to vacate the registrarship immediately after the first supplementary examination has been completed.

(dd) **Subminimum:** A student must obtain a subminimum of 60% in the clinical section (operation and short cases) of the examination, with a subminimum of 50% in all the other sections for the master's degree. He or she must also comply with the requirements regarding the number of operation procedures performed in each section, as required by the head of department. A final mark of at least 50% is required in order to pass in a subject.

(ee) In addition to the stipulations already mentioned, the student must submit and pass a mini-dissertation (endorsement Maxillofacial Surgery-Med) or a dissertation (endorsement Maxillofacial Surgery-Dent), on an approved topic related to the major subject and submit a publication as required (see also General Regulation G.43). A complete record of operations (as a logbook) must also be submitted.

(ff) **Pass with distinction:** A student who obtains at least 60% in the basic and the subsidiary subjects, and a final mark of at least 75% (with the first attempt) in the major subject, including the final examination of the College of Maxillofacial and Oral Surgery of the Colleges of Medicine of South Africa when applicable, qualifies to obtain the degree with distinction.

(v) The master's degree can only be conferred after the National Professional Examination [FCMFOS(SA)] has been passed (as this master's degree and the Fellowship may be used as an interwoven final equivalence examination).

2. **MChD degree (Oral Pathology)**

   (i) **Examinations in the basic subjects**
   A student must pass the basic subject Molecular pathology (MPX 800) at the University of Pretoria. The basic subject, Anatomical pathology (ANP 808) will be examined by the College of Pathologists as their Part I examination.

   (ii) **Examination and evaluation in the major subject**
   (aa) The final exit examination of the major subject (MPG 802) will be
administered by the College of Pathologists. Only candidates who have met all the requirements for the MChD degree in Oral Pathology except for the major subject (final examination), i.e. passed all the prerequisite subjects; completed all applicable training as prescribed (continuous evaluation of the candidate in an approved registrar post by the Head of Department of the candidate); and completed the required research component for the degree, will be allowed to write the College examination (exit examination) after which they will obtain both the FCP and the MChD as specialist qualifications.

(bb) The student must submit and pass a dissertation on an approved topic related to the major subject and submit a manuscript for publication as required.

(cc) A student who obtains a final mark of at least 75% (with the first attempt) in the major subject qualifies to obtain the degree with distinction.

(dd) Costs or fees for any examination(s) and registration at the Colleges of Medicine of South Africa have to be met by the student.

(f) **Exemption**
Exemption by virtue of comparable training and/or experience in terms of the requirements of School Regulation D.3(c) and (d), may be granted by the Dean, on the recommendation of the Head of Department, with the proviso that exemption from the examination and evaluation in the major subject may not be granted.

*Please note:* The regulations of the Health Professions Council of South Africa, as published in the Government Gazette No. 4631 of 11 January 1991 – Notice No. R.40 (as amended), will be used as a criterion in determining the period of exemption.

### III DOCTORATES

<table>
<thead>
<tr>
<th>D.4 Doctor of Philosophy [PhD]</th>
</tr>
</thead>
<tbody>
<tr>
<td>(11261001)</td>
</tr>
</tbody>
</table>

Consult General Regulations G.45 to G.55.

(a) **Admission requirement**
Subject to the stipulations of General Regulations G.1.3 and G.62, a candidate will only be admitted to doctoral study, if he or she holds a master's degree. If Maxillofacial and Oral Surgery is chosen as main field of study, a minimum pass mark of 65% in either MScDent, or MChD (Maxillofacial and Oral Surgery), or an equivalent qualification will be required.

(b) **Curriculum**
Total number of credits: 270

The degree PhD is conferred by virtue of a thesis, with the proviso that the Faculty Board, on the recommendation of the examination panel, may require an oral examination which deals with the topic of the thesis.

The module codes to be used for the different academic departments are the following:

- GTH 990   Community dentistry 990
D.5 Doctor of Science [DSc]
(Code 10262000)

The DSc degree is conferred on the basis of publications (consult General Regulation G.56).

(i) The collective publications submitted must deal with a central theme.
(ii) The candidate must already hold a PhD degree or an equivalent qualification.

IV DIPLOMAS

D.6 University Diploma in Oral Hygiene [UnivDipOH]
(Code 11120012)

Note: This Diploma has been replaced by the Bachelor of Oral Hygiene degree.

D.7 Postgraduate Diploma in Dentistry [PGDipDent]

(a) Admission requirements
Subject to the stipulations of General Regulations G.1.3 and G.62, the BChD degree or an equivalent qualification is required.
For the main field of study Oral Surgery, a candidate must be in possession of the BChD degree or an equivalent qualification with at least 65% in the final examination in Orofacial surgery or a subject deemed equivalent by the head of department.

(b) Duration
At least two semesters with 120 contact hours. The contact time in the major field of study is determined by the head of the department concerned and approved by the Dean. It includes systematic tuition as well as clinical/practical assignments.

(c) Curriculum
(i) Main field of study – one of the following:

or another module as determined by the head of the department concerned and approved by the Dean.

(ii) Basic subject
MDB 710 Applied oral biology 710  
CBA 710 Anatomy and principles of surgery 710  
ANA 770 Anatomy 770  
FSG 706 Physiology 706  
FAR 709 Pharmacology 709  
THM 710 Dental materials 710  
RAD 710 Introductory radiography 710  
RLE 710 Ethics and jurisprudence 710

Note:
Oral Surgery: a prerequisite (a minimum of one basic subject is required – these basic subjects may be passed at the University of Pretoria or at the College of Maxillofacial and Oral Surgery of the Colleges of Medicine of South Africa) or any other module as determined by the department in question and approved by the Dean.

(d) Examinations
The examination in the basic subject and the main field of study may take place every semester. However, only one subject may be written per semester. In order to be admitted to the examination in the main field of study the student must pass the basic subject. A final mark of at least 50% is required to pass. Subject to exceptions approved by the Dean, on the recommendation of the head of department, a student may not enter for the postgraduate diploma’s examination in the same subject more than twice.

(e) Pass with distinction
The diploma is awarded with distinction to students who obtain at least 75% in both the main field of study and the basic subject.

D.8 Advanced University Diploma in Oral Hygiene [AdvUnivDipOH]  
(Code 11120013)

(a) Admission requirements
Candidates must be in possession of a Diploma in Oral Hygiene or in Dental Therapy or an equivalent qualification, and must be registered with the Health Professions Council of South Africa as an oral hygienist or a dental therapist.

(b) Duration
At least two semesters. The programme is only offered part-time, with contact time as determined by the head(s) of department concerned.
(c) **Curriculum**

The programme is integrated with and planned around one or more of the dental disciplines or any other topic as agreed on in consultation with the head(s) of department concerned and approved by the Dean.

(i) **Basic subject**

The basic subject is determined by the head of department and approved by the Dean.

(ii) **Major field of study – one of the following:**

- GTH 702 Community dentistry 702
- PRN 701 Periodontics 701
- ORD 701 Orthodontics 701
- KGM 701 Maxillofacial and oral surgery 701
- PRD 701 Prosthodontics 701
- MPG 702 Oral pathology 702
- PRS 701 Practice management 701

or

any other module as determined by the head of department and approved by the Dean.

(d) **Examinations**

(i) A year mark of at least 50% is required to be admitted to the examination. A subminimum of 50% is required in the examination in all modules, with a final mark of at least 50% to pass. A student who fails one or more module, must repeat such modules and the examinations in the ensuing semester. In modules that were passed, only practical and clinical work will be required.

(ii) The requirements as set out in par. (d)(i) apply to a student who, after repeating a semester, again fails some of the modules.

(e) **Diploma with distinction**

The diploma is awarded with distinction to a student who obtains an average of at least 75% in both the main field of study and the basic subject.
1. **Pass requirements**

In accordance with the stipulations of General Regulation G.10(2), no minimum year or semester mark is needed for admission to the examination, and all registered students are admitted to the examination automatically.

The **final mark** for a specific module in Nursing Science, Physiotherapy, Radiography, Occupational Therapy and Human Nutrition (at least 50% is required to pass) is calculated from the examination mark as well as the mark compiled from the evaluation of a student during continuous, objective and controlled assessment opportunities during the course of the quarter/semester/year. At least one formal assessment per module is set as the minimum norm, and students will be exposed on a continuous and regular basis to self-directed assignments in order to promote reflective learning.

In the case of modules with practical components, students are required to also comply with the applicable attendance requirements with regard to acquiring practical skills before a pass mark can be obtained for the module.

There are two main examination opportunities per annum, the first and second examination. In respect of first-semester modules, the first examination opportunity is in May/June and the second examination opportunity in July. In respect of second-semester modules, the first examination opportunity is in October/November and the second examination opportunity in November/December of the same year. Where students need to work additional clinical hours to be allowed to do a second examination, the Head of Department will determine the second examination opportunity.

Only two examination opportunities per module are allowed. If a student fails a module at the second examination opportunity, the module must be repeated. A second examination opportunity in a module is granted to students in the following cases:

- If a student obtains a final mark of less than 50% in the relevant module at the first examination opportunity and thus fails.
- If a student does not obtain the subminimum in the examination, as required for a specific module.
- If a student does not sit the examination in a module at the first examination opportunity due to illness or extraordinary circumstances.

Students intending to sit the second examination due to the reasons mentioned above, must register for the second examination opportunity 24 hours after the results have been made public.

If a student fails a module at the first examination opportunity, the examination mark obtained in the relevant module at the second examination opportunity will be calculated as the final mark. The marks obtained with continuous evaluation during the course of the quarter/semester/year will not be taken into calculation. If the student passes the module at the second examination opportunity, a maximum of 50% is awarded as a pass mark to the module in question.

If a student could not sit the examination in a module at the first examination opportunity due to illness or extraordinary circumstances, the continuous evaluation
mark, together with the examination mark obtained in the module in question at the second examination opportunity, will be calculated as the final mark obtained in the module.

The School of Healthcare Sciences applies Gen.Reg. G.12.6.1, according to which a student requiring a limited number of modules to complete his or her degree, may in terms of faculty regulations, be admitted to a special examination in the modules in question.

2. **Promotion to a subsequent year of study**
   - A student must pass in all the prescribed core modules of a specific year of study to be promoted to a subsequent year of study. A student can only be promoted to a subsequent year of study if the student has not failed more than two fundamental modules of seven weeks each per semester or one module of 14 weeks per semester. A non-negotiable prerequisite for admission to the final year of study is pass marks in all the core and fundamental modules of the preceding years of study.

Refer to the Yearbook for fundamental modules in each discipline.

   - A pass mark refers to a final mark of at least 50%.

   - Modules with practical and clinical training credits cannot be passed unless all the prescribed clinical hours and practical activities have been completed to the satisfaction of the head of department.

   - The Chairperson of the examination moderating meeting may, after assessing the student’s total profile, grant special approval to be promoted to the next year of study.

   - The exception is the Department of Human Nutrition, where the regulations as applicable in the Faculty of Natural and Agricultural Sciences regarding the modules presented by that Faculty, are relevant.

   - Modules can only be taken in advance or repeated if it can be accommodated in the existing examination timetable.

   - A student who must repeat a year of study may, with the approval of the Chairperson of the examination moderating meeting and the head of department concerned, be allowed to take fundamental modules of the subsequent year, if he/she complies with all the prerequisites for the relevant modules. No adjustment to existing timetables will be allowed. The following fundamental modules are relevant:

     • **Department of Nursing Science:**
       - SLK 110, 120;
       - SOH 254;
       - FSG 251, 252

     • **Department of Physiotherapy:**
       - SOH 254
       - FSG 251, 252, 261, 262
       - SLK 210
       - ANP 210
       - GMB 252, 253, 254
       - FAR 381, 382
3. Examination and pass requirements common to the Anatomy and Physiology modules for BCur, BPhysT, BRad, BOccTher and BDietetics

3.1 Passing modules in Anatomy and Physiology

(i) A module mark is calculated from the continuous evaluation opportunities during the course of the presentation of the relevant module. These evaluations will include one or more of the following:
   (aa) Evaluations in connection with theoretical knowledge.
   (bb) Evaluations in connection with practical knowledge and skills.
   (cc) Compulsory attendance at and active participation in prescribed activities.
   (dd) A final comprehensive module test.

(ii) Students may exercise the option that the module mark at the end of the semester be ratified as the final module mark for the relevant module (i.e. they are exempted from the module examination for this module), if they comply with the following requirements:
   (aa) The abovementioned module mark is more than 65%.
   (bb) Proven attendance of all applicable module-specific activities, namely:
       • All tests/continuous evaluations.
       • All practical work and skills development sessions.
   (cc) Attendance of the relevant module from Day 1.
   (dd) No convictions by the School's Preliminary Disciplinary Committee (Student Transgressions) of any form of transgression.

(iii) A module examination is granted to all registered students (even if the module mark is more than 65%).

(iv) The final module mark is calculated from the examination mark and the module mark (continuous evaluation) in the ratio 50:50.

(v) A second module examination is granted to all students who have obtained a final module mark of 40% to 49%. Students who have obtained a module mark of less than 40%, fail the module and will have to repeat the year of study.

(vi) The relevant second examination will take place in November/December of the current year or in January of the subsequent year. A minimum of 50% is required to pass in the second examination.

(vii) Aegrotats or extraordinary examinations, for students who could not sit the module examination due to health or other acceptable reasons, will take place during the second examination period. Students must apply formally for these examinations, and will be admitted by the Chairperson of the School or
his/her authorised person. Where applicable, the Chairperson of the School may first require the recommendation of the Faculty Health Committee before admission to an aegrotat.

All modalities of a final examination must be written jointly as an aegrotat or extraordinary examination, even if part of the relevant examination had already been written during the previous examination period.

The final module mark is calculated from the marks of all the sections/modalities of the aegrotat or extraordinary examination and the continuous evaluation mark. The same criteria as set for a pass mark in a module are applicable here. Students who could not sit the module examination in the examination period due to acceptable reasons, and who are consequently writing the module examination in the second examination period, forfeit the opportunity to be admitted to a further second examination.

4. Exemption from the examination in (FAR) Pharmacology 381, 382
Exemption from the examination can be granted if a student who obtained a module mark of at least 60%, exercises the option to accept it as the final mark.

5. Exemption from the examination in (ANP) Anatomical Pathology 210
Exemption from the examination may be granted if a student who obtained a module mark of at least 60%, exercises the option to accept it as the final mark.

6. Academic exclusion from further study
(a) In accordance with the stipulations of General Regulation G.3.2(b), a student must complete the degree programme for which he or she is registered within the prescribed minimum period of study plus two years.
(b) Subject to the stipulations mentioned in (a) above, a student in the School of Health Sciences, who fails a year of study for the second time, will only be allowed one opportunity to repeat a year of study, and will have to submit a written application for readmission to the programme in accordance with the prescribed procedure.

I. UNDERGRADUATE AND POSTGRADUATE DEGREES IN THE SCHOOL OF HEALTHCARE SCIENCES

1. DEGREES IN NURSING SCIENCE

H.1 Bachelor of Nursing Science [BCur]
(Code 10131011)

Note: Also consult the General Regulations.

(a) General information
(i) The Bachelor of Nursing Science [BCur] degree is a four-year, professional, career-oriented whole qualification that allows graduates to register with the South African Nursing Council (SANC) as:
- Nurse (General, Psychiatric and Community); and
- Midwife/Accoucheur
(ii) Successful completion of the degree programme will present graduates with the opportunity to further their studies in Nursing Science at postgraduate level.
(iii) Candidates who comply with the necessary admission requirements will follow the prescribed curriculum, as set out in paragraph (e) below.

(iv) The compulsory practical and clinical hours of training amount to a grand total of at least 4,000 hours over a four-year period.

(b) Admission requirements
(i) A special selection procedure applies. A limited number of places are available annually. Application forms must be submitted before 31 May to be considered for the selection for the subsequent academic year.

(ii) The admission requirements are:
   (aa) National Senior Certificate with admission for degree purposes.
   (bb) English passed with a rating code of 4 (50-59%).
   (cc) Life Orientation – excluded from APS calculation.
   (dd) The following subjects are recommended: Life Sciences, Mathematics and Physical Science.
   (ee) An APS of at least 25.
   (ff) Proof of registration as a student nurse with the South African Nursing Council (SANC).

(c) Practical and clinical training
(i) The curriculum includes compulsory practical and clinical training modules, comprising a percentage of the total credits required for the successful completion of the programme.

(ii) Students will be registered as student nurses at an approved teaching hospital (or hospitals) for the duration of their studies.

(iii) Students will be required to visit clinics outside of the hospital as well as institutions where health services are provided.

(iv) Clinical training will take place for the duration of studies at the facilities mentioned above.

(v) Students will be required to sign a contract of service with the approved teaching hospital (or hospitals) in question – information will be made available after successful application for admission.

(d) Duration
(i) The programme extends over a period of four years of full-time study in preparation of registration with the South African Nursing Council (SANC) as a Nurse (General, Psychiatric and Community) and Midwife/Accoucheur.

(ii) Due to the compulsory practical and clinical training component as well as professional development, the curriculum cannot be completed in less than four years.

(iii) The training institutions in question will grant vacation and sick leave according to the applicable requirements of the South African Nursing Council (SANC).

(e) Curriculum
(i) A grand total of 881 credits for the coursework is required for degree purposes.

(ii) Credit values of the different modules of the subjects of the first, second, third and fourth years of study appear in brackets after the module codes in the table on the next page:

(f) Exemption from the examination in (FAR) Pharmacology 381, 382
Consult the stipulations under the School of Healthcare Sciences in this publication.

(g) Promotion to a subsequent year of study:
(i) Consult the general requirements for promotion to a subsequent year of study of the School of Healthcare Sciences in this publication.
(ii) Consult also the general pass requirements of the School of Healthcare Sciences for the calculation of the final mark in a module, the continuous assessment mark, etc. in this publication.
(iii) Concerning a pass in modules with practical and/or clinical training credits, the general requirements of the School of Healthcare Sciences must be consulted in this regard.
(iv) Students who fail to comply with all the requirements for a specific year of study, and who have not obtained the required number of credits, will not be allowed to register for any modules of the subsequent year of study, with the exception of certain fundamental modules, which may be taken in advance – consult the School’s policy in this regard.

(v) Students in the abovementioned category must repeat the outstanding module(s) in question to acquire all the required credits for the relevant year of study and to be promoted to the following year of study.

(vi) Students who have to repeat specific modules, must also acquire a certificate of satisfactory attendance and progress in Nursing Practice Education (both modules of the year in question) in the year of repetition, even if the modules in question have already been passed in the unsuccessful year.

(vii) Examinations are compulsory in respect of all the modules presented by the Department of Nursing Science, as it is not possible to be promoted in any of these modules.

(viii) Each division of (NPE 461) Nursing practice education 461 must be passed individually with a subminimum of 50%.

(h) **Second examination opportunity**
Consult the requirements for a second examination opportunity in the School of Healthcare Sciences as set out in this publication.

(i) **Practical work**
Certain hospitals and healthcare facilities have been approved for the purposes of practical and clinical training in Fundamental Nursing Science, General Nursing Science, Psychiatric Nursing Science, Community Nursing Science and Midwifery.

(j) **Conferment of the degree**
The Bachelor of Nursing Science [BCur] is conferred on students who have fulfilled all the programme requirements as well as the prescribed practical and clinical training successfully.
Successful completion of the degree entitles the graduate to register with the South African Nursing Council as Nurse (General, Psychiatric and Community) and as Midwife/Accoucheur.

(k) **Degree with distinction**
The BCur degree is conferred with distinction on a student who has obtained:
(i) At least 75% in each of NPE 461, NPE 462 and NUR 456.
(ii) A joint average of at least 75% in NUR 451 and NUR 452.
(iii) A joint average of at least 75% in DNP 451 and DNP 452.

| H.2 Bachelor of Nursing Science (Education and Administration) [BCur(I et A)] |
| (Code 10131081) |
| Note: Also consult the General Regulations. |

(a) **General information**
(i) The Bachelor of Nursing Science (Education and Administration) [BCur(I et A)] provides professional nurses registered with the South African Nursing Council (SANC), with the opportunity of obtaining post-basic, professional qualifications in any of the following areas of specialisation (major speciality): (aa) Nursing Management
(bb) Nursing Education
(cc) Community Nursing Science
(dd) Clinical Nursing Science, with a selected subspeciality in the second year of study, namely:
- Advanced Midwifery and Neonatal Nursing Science
- Neonatal Nursing Science
- Child Nursing Science
- Medical and Surgical Nursing Science: Critical Care Nursing: General
- Medical and Surgical Nursing Science: Critical Care Nursing: Paediatric
- Medical and Surgical Nursing Science: Critical Care Nursing: Trauma and Emergency Nursing
- Medical and Surgical Nursing Science: Operating Theatre Nursing
- Clinical Nursing Science, Health Assessment, Treatment and Care.

(ii) Successful completion of the degree programme will also provide graduates with the opportunity to further their studies, in their chosen fields of specialisation at postgraduate level, provided there are sufficient applications.

(iii) Candidates who comply with the admission requirements must compile a suitable curriculum in the selected area of specialisation, in consultation with the head of department.

(iv) The curriculum mentioned in (iii) above, must be reviewed on an annual basis in consultation with the head of department.

(b) Requirements for admission
(i) A selection process applies, based on academic merit, experience in the workplace, compliance with the relevant admission requirements and the approval of the employer.

(ii) A National Senior Certificate with admission for degree purposes or a certificate of conditional exemption by virtue of mature age (prior to 2009).

(iii) Minimum requirements in respect of Grade 12 subjects are applicable in the case of conditional exemption (full details are available on request from Student Administration.)

(iv) Proof of registration with the South African Nursing Council as a General Nurse.

(v) Candidates who intend following Community Nursing Science must also be registered with the South African Nursing Council as Midwife/Accoucheur.

(vi) At least two years of appropriate experience in the workplace as registered nurse (excluding other nursing-related coursework) for Nursing Management and Nursing Education.

(vii) Candidates who intend following Clinical Nursing Science must also comply with the additional requirements for admission listed in paragraph (c) below.

(c) Additional admission requirements for Clinical Nursing Science
(i) At least one year of appropriate experience in the workplace, relevant to the area of specialisation and approved by the head of department; excluding other nursing-related coursework.

(ii) Students must have access, at least on a part-time basis, to clinical training facilities which are suitable for the proposed area of specialisation and approved by the head of department.
(iii) With the exception of the subspecialities Critical Care Nursing – General; Trauma and Emergency Nursing and Operating Theatre Nursing, students must also be registered with the South African Nursing Council as Midwife/Accoucheur.

(d) **Duration**
For degree purposes, the programme extends over a period of at least three academic years.

(e) **Grand total of credits required**
A minimum of 360 credits is required, subject to:
(i) The successful completion, at 100, 200 and 300 level, of two approved major subjects (core modules) within a given area of specialisation.
(ii) Successful completion of all prescribed fundamental modules.
(iii) Satisfactory performance and successful completion of the required practical work and/or clinical training specified for the field of specialisation in question.
(iv) Successful completion of an approved curriculum (degree programme) compiled of modules equivalent to ten year modules.

(f) **Curriculum**

(g) **Transitional measures**
Students will be exempted from corresponding modules passed in the preceding seven (7) years.

(h) **Promotion to a subsequent year of study**
(i) Consult the general requirements for promotion to a subsequent year of study in the School of Healthcare Sciences as set out in this publication.
(ii) KVG and VPT at 100 level are also prerequisites for VGK 201.
(iii) Consult the general pass requirements regarding the passing of modules with practical and/or clinical training credits in the School of Healthcare Sciences as set out in this publication.
(iv) A student who has failed modules presented in the first semester by the Department of Nursing Science, will be allowed to repeat the examination in question at the end of the second semester.

(v) Consult the general pass requirements of the School of Healthcare Sciences for the calculation of the final mark in a module, the continuous evaluation mark, etc. in this publication.

(vi) **Note:**
- In the following 100-level modules, only satisfactory progress and attendance are required: VPB 160, DNE 160 and GVP 160.
- For specific prerequisites for BDO modules at 200 and 300 level: Consult the Yearbook of the Faculty of Economic and Management Sciences.

(i) **Second examination opportunity**
Consult the requirements for a second examination opportunity under the general pass requirements of the School of Healthcare Sciences in this publication.

(j) **Practical work**
Certain hospitals and healthcare facilities have been approved for the purposes of practical and/or clinical training. Students will be required to complete their practical work and/or clinical training at these facilities.

(k) **Faculty certificates**
(i) Students who exit from the programme before completing the degree, and who fulfil all the requirements for registration of an additional qualification with the SANC, will be issued with an applicable Faculty Certificate.
(ii) Listing or registration with the SANC can be obtained in the following areas of specialisation, depending on the specific modules passed:
   (aa) **Listing:**
   - Handling of Medicine in Nursing and the Physical Evaluation of Patients
   (bb) **Registration:**
   - Nursing Administration
   - Nursing Education
   - Community Nursing Science
   - Advanced Midwifery and Neonatal Nursing Science
   - Neonatal Nursing Science
   - Child Nursing Science
   - Medical and Surgical Nursing Science: Critical Care Nursing – General
   - Medical and Surgical Nursing Science: Critical Care Nursing – Paediatric
   - Medical and Surgical Nursing Science: Critical Care Nursing – Trauma and Emergency Nursing
   - Medical and Surgical Nursing Science: Operating Theatre Nursing
   - Clinical Nursing Science, Health Assessment, Treatment and Care

(l) **Conferment of the degree**
The Bachelor of Nursing Science (Education and Administration) [BCur(I et A)] is conferred on students who comply with all the requirements for the degree programme and who have completed all required practical and/or clinical training.
(m) **Degree with distinction and applicable endorsement of the degree certificate**
   (i) The degree is conferred with distinction on a student who has obtained an average of at least 75% in the required 300-level modules.
   (ii) The degree certificate will be endorsed with the specific area of specialisation (and the relevant subspeciality, in the case of Clinical Nursing).

**H.3 Bachelor of Nursing Science Honours [BCurHons]**

Suspended until further notice.

**H.4 Master of Nursing Science [MCur]**

Also consult the General Regulations.

(a) **Fields of study**
   The Master of Nursing Science [MCur] degree is conferred in the following fields of study:
   (i) Clinical fields of study: (Code 10251151) Coursework: (Code 10251152)
   (ii) Nursing Management: (Code 10251111) Coursework: (Code 10251112)
   (iii) Nursing Education: (Code 10251051) Coursework: (Code 10251052)

(b) **Requirements for admission**
   **Option 1**
   **MCur with coursework**
   (i) Subject to the stipulations of General Regulation G.62, the Bachelor of Nursing Science degree is required for admission. In the case of the non-clinical fields, another approved bachelor’s degree may also be considered.
   (ii) Successful completion of an entrance examination, according to the discretion of the head of department.
   (iii) Additional admission requirements as listed below are required for each of the following fields of specialisation:
       **Clinical fields of specialisation:**
       (aa) A minimum of one year experience as registered nurse in the workplace, which is deemed appropriate by the head of department for the proposed field of study, other nursing science-related modules excluded.
       (bb) Students must, at least on a part-time basis, have access to clinical learning facilities suitable for the chosen field of specialisation, and approved by the head of department for the field of study in question.
       (cc) Registration with the South African Nursing Council (SANC) is required as follows:
           - For **Advanced Medical and Surgical Nursing Science** *(Critical Care Nursing: General)*, as general nurse.
           - For **Advanced Medical and Surgical Nursing Science** *(Critical Care: Trauma and Emergency Nursing)*, as general nurse.
           - For **Advanced Midwifery and Neonatal Nursing Science**, as general nurse and midwife/accoucheur.
- For **Advanced Psychiatric Nursing Science**, as general nurse and psychiatric nurse.
- For **Advanced Community Nursing Science**, as general nurse, midwife/accoucheur and community nurse.
- For **Advanced Paediatric Nursing Science**, as general nurse and midwife/accoucheur.
- For **Advanced Neonatal Nursing Science**, as general nurse and midwife/accoucheur.
- For **Advanced Women’s Health**, as general nurse, midwife/accoucheur and community nurse.
- For **Primary Curative Care**, as general nurse, midwife/accoucheur and community nurse.

**Non-clinical fields:**
Registration with the South African Nursing Council (SANC) is required as follows:
- For **Nursing Management**, as general nurse and in Nursing Administration (Nursing Management).
- For **Nursing Education**, as general nurse and lecturer.

**Option 2**
**MCur by virtue of a dissertation**
Subject to the stipulations of General Regulations G.30 and G.62, at least a Bachelor of Nursing Science degree and according to the discretion of the head of department, an applicable post-basic qualification. The master’s degree may only be awarded in the field of study of the prerequisite degree or equivalent qualification.

**(c) Duration of the programme and the grand total of credits required**

**Option 1: MCur with coursework**

(i) At least two academic years. Not all the different fields of study are presented every year. Commencement of studies must therefore be discussed beforehand with the head of department.

(ii) Total number of credits: **320-390** in a chosen field of study: provided that the prescribed curriculum is followed.

**Option 2: MCur by virtue of a dissertation**

(i) At least one academic year.

(ii) Total number of credits: **320**, of which 280 credits are allocated to the dissertation and 40 credits to (VNM 800) Nursing research methodology 800.

**Curricula**

**Option 1: MCur with coursework**

(i) The curriculum comprises the chosen field of specialisation in Advanced Nursing Science or Advanced Women’s Health or Primary Curative Nursing Science or Nursing Management or Nursing Education, Advanced Dynamics of Nursing Practice (DNP 800), Nursing research methodology 800 (VNM 800) and an essay (VGK 891). Consult par (iii) below regarding VNM 800 and VGK 891.

(ii) (VNM 800) Nursing research methodology 800 will exempt students who choose this option, from (TNM 800) Applied research methodology 800.
(iii) (VNM 800) Nursing research methodology 800 is a prerequisite for the successful completion of (VGK 891) Essay 891.
(iv) The modules prescribed for the fields of specialisation appear in the table below:

Option 2: MCur by virtue of a dissertation
(i) The degree is conferred on a student who has successfully completed (VNM 800) Nursing research methodology 800 and a dissertation (VGK 890).
(ii) VNM 800 is a prerequisite for the successful completion of the dissertation (VGK 890).

(e) Pass and pass with distinction

Option 1: MCur with coursework
(i) A final mark of at least 50% must be obtained in each of the prescribed modules in order to pass.
(ii) Modules with a practical and/or clinical training component can only be passed if the student has also completed all prescribed practical and/or clinical work to the satisfaction of the head of department.
(iii) The degree is conferred on a student who has complied with all the degree requirements.
(iv) Degree with distinction: The degree is conferred with distinction on a student who has maintained an average of at least 75% for the duration of his/her studies, with the exception of Nursing research methodology (VNM 800) and Advanced dynamics of nursing practice (DNP 800).
(v) Students who complete the degree in a clinical field of specialisation, will receive their degree certificates endorsed with the subspeciality in question.

Option 2: MCur by virtue of a dissertation
(i) A final mark of at least 50% is required in both VNM 800 and the dissertation in order to comply with all the requirements for the degree.
(ii) Degree with distinction: The degree is conferred with distinction on a student who has obtained at least 75% for the dissertation.

H.5 Doctor of Philosophy [PhD]
(Code 10260311)

Field of study: Nursing Science
Also consult the General Regulations
**Note:** All PhD students must register for, and attend (TNM 800) Applied research methodology 800 satisfactorily. (Exemption will be granted if (VNM 800) Nursing research methodology 800 has already been passed for the MCur degree.)

(a) Subject to the stipulations of General Regulations G.45 and G.62, a student will only be admitted to doctoral degree studies if he or she is in possession of a master’s degree.

(b) The PhD degree study in the field of Nursing Science is conferred by virtue of a thesis and, if the Dean decides otherwise, an examination (VGK 900) which deals with the field of study of the thesis.

(c) The thesis (VGK 990) deals with a problem from one or other field of Nursing Science, it must give an overview of the literature on the topic, and a description of the observations made and experiments done by the student, as well as a discussion of the conclusions reached. It must furthermore convince the promoter and examiners that it represents original research.

(d) A complete research protocol in respect of the proposed thesis must be submitted to an evaluation committee at the commencement of the doctoral studies, and if necessary, also to the Ethics Committee for approval.

(e) The evaluation committee is constituted by the head of department, in conjunction with the Chairperson of the School, and will consist of experienced persons in research in the proposed field of study of the candidate.

(f) At least two committee members will be appointed from other national and/or international tertiary institutions. Due to financial constraints, technological aids will be used in the case of committee members from foreign universities who will therefore not be able to attend the meeting. The report of the evaluation committee will be made available to the candidate in writing.

### II. DEGREES IN RADIOGRAPHY

<table>
<thead>
<tr>
<th>H.7 Bachelor of Radiography [BRad]</th>
</tr>
</thead>
<tbody>
<tr>
<td>Also consult General Regulations.</td>
</tr>
</tbody>
</table>

**Specialisation**

(i) Diagnostics (10137002)

(a) **Requirements for admission**

A National Senior Certificate with admission for degree purposes.

**Note:**

1. Grade 12 Mathematics, Physical Science and English passed with a minimum of 50% is a requirement.
2. Candidates must apply formally for admission to the first year of study, as all candidates are subjected to a selection procedure (consult General Academic Information in this publication).
3. Each student in Radiography must apply to the Registrar of the Health Professions Council of South Africa for registration as a student in Radiography immediately after admission to the first year of study.

(b) **Nature and duration of the programme**
The programme extends over three years’ full-time study, during which period a student radiographer will be attached to an institution approved by the Department of Radiography. Students must comply with the stipulations of the Health Professions Council of South Africa concerning the required number of practical hours and as determined by the Department of Radiography.

(c) **Curriculum**

**Total number of credits: 431**

(i) **First year of study**
The credit value per module is indicated in brackets after each module code in the table below:

(d) **Promotion to a subsequent year of study**
Consult the general requirements for promotion to a subsequent year of study under the School of Healthcare Sciences, in this publication.

(e) **Pass requirements**
(i) **Subminimum**: A subminimum of 40% is required in the written as well as the practical/clinical sections of the examination in Radiography at 100, 200 and 300 level.
(ii) Consult the general pass requirements of the School of Healthcare Sciences, for the calculation of the final mark in a module, the continuous assessment mark, obtaining a pass mark in modules with practical and/or clinical components, etc.

(f) **Second examination opportunities**
Second examinations are granted according to the stipulations of the general pass requirements of the School of Healthcare Sciences.

(g) **Degree with distinction**
The degree is conferred with distinction on a student who has obtained an average of at least 75% in the final-year modules.

**H.8 Bachelor of Radiography Honours [BRadHons]**

**Note:**
All students must register for NVB 700 Research principles.

(a) **Requirements for admission**
(i) Subject to the stipulations of General Reg. G.62, a candidate must hold the BRad degree, or an equivalent qualification in the relevant field of
specialisation for admission to honours degree study, and must be registered as a radiographer with the Health Professions Council of South Africa.

(ii) A student must be appointed in a full-time position at an institution approved by the Department for this purpose.

(b) **Fields of specialisation and duration**
- Diagnostics: Two years part-time
- Radiation Therapy: Two years part-time
- Nuclear Medicine: Two years part-time

(c) **Curriculum**

(i) **Diagnostics (Code 10247062)**
(The credit value of each module appears in brackets in the table below.)

(d) Second examinations
Second examinations may be granted in modules not passed, according to the stipulations of the School of Healthcare Sciences in this regard.

(e) Degree with distinction
The degree is conferred with distinction on a student who has obtained an average of at least 75% in all the modules for the degree.

H.9 Master of Radiography [MRad]
Also consult General Regulations.

Fields of specialisation
Diagnostics (Code 10257001)
Nuclear Medicine (Code 10257021)
Radiation Therapy (Code 10257012)
(a) **Requirements for admission**
Subject to the stipulations of General Regulation G.62, at least a bachelor honours degree in Radiography is required, as well as registration as a radiographer with the Health Professions Council of South Africa. The master's degree may only be taken in the field of study in which the foregoing degree or equivalent qualification has been obtained.

(b) **Duration**
The programme extends over one academic year.

(c) **Curriculum**
(i) A dissertation in the field of Diagnostics (RSD 890) or Nuclear medicine (KDE 890) or Radiation therapy (RSZ 890).
(ii) (TNM 800) Applied research methodology 800 or an equivalent module must be passed.

(d) **Degree with distinction**
A minimum of 75% must be obtained in the dissertation, to obtain the degree with distinction.

### H.10 Doctor of Philosophy [PhD]
(Code 10260571)

Also consult the General Regulations

**Note:** All PhD students must register for, and attend (TNM 800) Applied research methodology 800 satisfactorily. (Exemption will be granted if the module has already been passed for the MRad degree.)

**Field of study: Radiography**

(a) Subject to the stipulations of General Regulations G.45 and G. 62, a student will only be admitted to doctoral degree studies if he or she is in possession of a master's degree.

(b) The PhD degree study in the field Radiography is conferred by virtue of a thesis and, unless the Dean decides otherwise, an examination (RAD 900) which deals with the field of the thesis.

(c) The thesis (RAD 990) must deal with a problem from one or other field of Radiography, it must give an overview of the literature on the topic, and a description of the observations made and experiments done by the student, as well as a discussion of the conclusions reached, and furthermore convince the promoter and examiners that it represents original research.

(d) A complete research protocol in respect of the proposed thesis must be submitted to an evaluation committee at the commencement of the doctoral studies, and also to the Ethics Committee for approval.

(e) The evaluation committee is constituted by the head of department, in conjunction with the Chairperson of the School, and will consist of experienced persons in research in the proposed field of study of the candidate.

(f) At least two committee members will be appointed from other national and/or international tertiary institutions. Due to financial constraints, technological aids will be used in the case of committee members from foreign universities who will therefore be unable to attend the meeting. The report of the evaluation committee will be made available to the candidate in writing.
### III. DEGREES IN OCCUPATIONAL THERAPY

**H.11 Bachelor of Occupational Therapy [BOccTher]**

(No 10138001)

Also consult General Regulations.

#### (a) Requirements for admission

(i) A National Senior Certificate with admission for degree purposes with English, Physical Science and Mathematics.

(ii) In order to retain his or her selection, a student must obtain an APS of at least 30 in the final Grade 12-examination, as well as a 5 (60-69%) rating code in Physical Science and a 4 (50-59%) in Mathematics.

(iii) Formal application must be made for admission to the first year of study, as admission is subject to selection.

(iv) Students in the first year of study who do not qualify for admission to the second year of study are automatically subjected to selection again.

**Note:** Each student in Occupational Therapy must apply immediately after admission to the first year of study, to the Registrar of the Health Professions Council of South Africa for registration as a student in Occupational Therapy.

#### (b) Nature and duration

(i) The programme extends over four academic years, during which period a student receives clinical training as a student occupational therapist at an institution approved by the University.

(ii) Students must complete at least 1 000 hours’ clinical practical work over the four years of study in order to register as an occupational therapist with the Health Professions Council of South Africa.

(iii) Students may complete the first three years over four years. In such cases, the choice of modules for the different years is done at the commencement of studies, in conjunction with the head of department.

#### (c) Pass requirements and grand total of credits for degree purposes

(i) **Subminimum:** In modules with a written as well as a practical and/or clinical examination, a subminimum of 40% is required in the written as well as the practical and/or clinical sections of the examination.  
Also consult the general pass requirements of the School of Healthcare Sciences for the calculation of the final mark in a module, the continuous evaluation mark, obtaining a pass mark in modules with practical and/or clinical components, etc.

(ii) **Grand total of credits required to comply with degree requirements**  
At least 589.

#### (d) Second examination opportunity

Consult the requirements for a second examination opportunity under the general pass requirements of the School of Healthcare Sciences.

#### (e) Promotion to a subsequent year of study

Consult the general requirements for promotion to a subsequent year of study of the School of Healthcare Sciences.
(f) **First year of study**

</tbody>
</table>

Total number of credits required: 150

(m) **Examination after one semester**  
A final-year student who has failed one module but who has passed all other modules, may be admitted to a special examination in the module in question at the end of the first semester of the subsequent year, after satisfactory attendance at lectures and clinical work during the first semester.

(n) **Degree with distinction**  
The BOccTher degree is conferred with distinction on a student who has obtained an average of at least 75% in the core modules in the final year of study.

---

H.12 **Bachelor of Occupational Therapy Honours [BOccTherHons]**

Suspended until further notice.

H.13 **Master of Occupational Therapy [MOccTher]**

Also consult the General Regulations.  
**Note:** Students must register for, and attend (TNM 800) Applied research methodology 800 satisfactorily. (Exemption will be granted if the module, BSN 701 Biostatistics and research methodology, has been passed for the BOccTherHons degree.)
(a) **Admission requirements**

(i) Subject to the stipulations of General Regulation G.62, the Bachelor's degree in Occupational Therapy or an equivalent qualification is required for admission, as well as registration as occupational therapist with the Health Professions Council of South Africa.

(ii) A student must have at least one year clinical experience in the proposed field of study (Community service year excluded).

(iii) A student must hold at least a 15 hours per week position for the duration of study deemed applicable to the proposed field of study by the head of department.

(iv) Fields of specialisation for the MOccTher degree with coursework are offered on an annual basis if at least five applicants apply for admission to a particular field of specialisation. The closing date for new applications is 31 October annually. Applicants will be notified as soon as possible after this date, whether or not a particular field of specialisation will be presented in the subsequent year. Commencement of studies must, therefore, be discussed beforehand with the head of department.

(v) For the MOccTher degree by virtue of research, a written structured letter of motivation must be submitted with the application on 31 October.

(b) **Duration**

At least two academic years. Commencement of studies must first be discussed with the head of department, as not all the specialisations are offered each year.

(c) **Curricula**

(i) MOccTher with coursework:

The curriculum comprises a major subject and prerequisite subjects.

**Fields of specialisation**

(aa) **Hand Therapy (Code 10258011)**

| Major subject: | ART 801 Occupational therapy 801 |
| Essay: | ART 891 Essay: Occupational therapy 891 |
| Prerequisite subjects: | AAN 802 Occupational therapeutic anatomy 802 |
| | FSG 881 Physiology 881 |
| | ANP 891 Anatomical pathology 891 |
| | ATP 800 Theory in occupational therapy practice 800 |

(bb) **Neurology (Code 10258021)**

| Major subject: | ART 802 Occupational therapy 802 |
| Essay: | ART 891 Essay: Occupational therapy 891 |
| Prerequisite subjects: | AAN 803 Occupational therapeutic anatomy 803 |
| | FSG 881 Physiology 881 |
| | ANP 891 Anatomical pathology 891 |
| | ATP 800 Theory in occupational therapy practice 800 |

(cc) **Paediatrics (Code 10258031)**

| Major subject: | ART 803 Occupational therapy 803 |
| Essay: | ART 891 Essay: Occupational therapy 891 |
| Prerequisite subjects: | AAN 803 Occupational therapeutic anatomy 803 |
| | FSG 881 Physiology 881 |
| | ANP 891 Anatomical pathology 891 |
ATP 800 Theory in occupational therapy practice 800

(dd) Psychiatry (Code 10258141)
Major subject: ART 804 Occupational therapy 804
Essay: ART 891 Essay: Occupational therapy 891
Prerequisite subjects: PGP 800 Psychopathology 800
                       FSG 881 Physiology 881
                       AAN 803 Occupational therapeutic anatomy 803
                       GRA 800 Groups in occupational therapy 800
                       ATP 800 Theory in occupational therapy practice 800

(ee) Activity Theory (Code 10258051)
Major subject: ART 805 Occupational therapy 805
Essay: ART 891 Essay: Occupational therapy 891
Prerequisite subjects: FSG 881 Physiology 881
                     AAN 803 Occupational therapeutic anatomy 803
                     ATP 800 Theory in occupational therapy practice 800

(ii) MOccTher by virtue of research (Code 10258001)
Curriculum
(aa) A dissertation (ART 890) on an approved topic based on research.
(bb) Successful completion of (ART 800) Occupational therapy 800 (attendance module) and (ATP 800) Theory in occupational therapy practice 800.

(d) Examination
MOccTher with coursework
(i) A continuous evaluation mark of at least 50% is required for admission to the examination in the major subject.
(ii) The sequence of the examinations in the prerequisite subjects will be determined by the head of department according to the major subject followed by the student.
(iii) In order to pass, a subminimum of 40% in the written and/or practical and/or clinical sections of the examination, and a final mark of at least 50%, is required in the major as well as the prerequisite subject.

MOccTher by virtue of a dissertation
The minimum pass mark for the dissertation is 50%.

(e) Degree with distinction
(i) MOccTher with coursework
The degree is conferred with distinction on a student who has obtained at least 75% in the major subject, and an average of at least 65% in the prerequisite subjects.
(ii) MOccTher with dissertation
The degree is conferred with distinction on a student who has obtained at least 75% for the dissertation and at least 65% in the module (ATP 800) Theory in occupational therapy practice 800. (TNM 800) Applied research methodology 800 and (ART 800) Occupational therapy 800 must have been attended satisfactorily.
H.14 Doctor of Philosophy [PhD]
(Code 10260321)

Also consult General Regulations.

Note: All PhD students must register for, and attend (TNM 800) Applied research methodology 800 satisfactorily. (Exemption will be granted if (TNM 800) Applied research methodology 800 has been passed for the MOccTher degree.)

Field of study: Occupational Therapy

(a) Subject to the stipulations of General Regulations G.45 and G.62, a candidate for admission to doctoral degree studies must hold a master's degree.

(b) The PhD in Occupational Therapy is conferred by virtue of a thesis and, unless the Dean decides otherwise, an examination (code ART 900) pertaining to the field of study chosen for the thesis.

(c) The thesis (ART 990) must deal with a problem in a field of Occupational Therapy; it must give a synopsis of the literature on the topic and contain a description of the observations made and experiments done by the student as well as a discussion of the conclusions reached.

H.15 Doctor of Occupational Therapy [DOccTher]
(Code 10268001)

Also consult General Regulations.

Note: All DOccTher students must register for, and attend (TNM 800) Applied research methodology 800 satisfactorily. (Exemption will be granted if (TNM 800) Applied research methodology 800 has been passed for the MOccTher degree.)

The DOccTher degree is conferred by virtue of a thesis (ART 990) and, unless the Dean decides otherwise, an examination (ART 900) on the field of study pertaining to the thesis.

IV. DEGREES IN PHYSIOTHERAPY

H.16 Bachelor of Physiotherapy [BPhysT]
(Code 10138101)

Also consult General Regulations G.1 to G.15.

(a) Requirements for admission

(i) Only selected candidates will be admitted. A National Senior Certificate with admission for degree purposes is required, with at least a 4 (50-59%) in English, Mathematics and Physical Science in the final Grade 12 examination.

(ii) Selected first-year students who have passed in sufficient first-semester modules at 100 level will, according to the stipulations of General Regulation G.3, automatically be admitted to the second semester of the first year of study. During the second semester, students may follow the outstanding module(s) on an anti-semester basis and write the examination, on the condition that the modules in question are indeed presented on an anti-
semester basis in the second semester by the relevant department and can be accommodated in the class and examination timetables.

(iii) If a student fails one or more first-year modules, he or she forfeits selection and must apply again for selection for the first year of study.

(vi) **Note:** Each student in Physiotherapy must apply to the Registrar of the Health Professions Council of South Africa for registration as a student in Physiotherapy immediately after admission to the first year of study.

(b) **Nature and duration**

(i) The programme extends over four academic years, during which period a student receives clinical training as a student physiotherapist at an institution approved by the University.

(ii) Students may be allowed to extend the first two years of study over three years, in which case the modules per year must be selected in consultation with the head of department at the commencement of studies.

(c) **Pass requirements and grand total credits required for degree purposes**

Consult the general pass requirements of the School of Healthcare Sciences for the calculation of the final mark in a module, the continuous evaluation mark, obtaining a pass mark in modules with practical and/or clinical components, etc. The grand total of credits required to comply with degree requirements, is at least 636.

(d) **Second examination opportunity**

Consult the requirements for a second examination opportunity under the general pass requirements of the School of Healthcare Sciences.

(e) **Promotion to a subsequent year of study**

Consult the general requirements for promotion to a subsequent year of study in the School of Healthcare Sciences. Modules/subjects with practical and clinical training credits cannot be passed, unless all prescribed clinical hours and practical skills have been completed to the satisfaction of the head of department.

(f) **Curriculum**

(i) **First year of study**

(Credit values indicated below are per module)

**Total number of credits for the second year:** 169

(ii) **Basic Emergency Care (Code GNK 286)**  
- If students obtain 60% or more in Basic Emergency Care, this mark will be validated as the examination mark at the end of the year, and such students will be exempted from the examination in the module.  
- Students who obtain between 40% and 49% in the calculated mark for the module, will be admitted to a second examination in November/December of the same year, or in January of the following year. A minimum of 50% is required as a pass mark for the second examination.  
- This examination will also serve as an aegrotat or extraordinary examination for students who could not write the initial examination due to health or other acceptable reasons. A student must, however, apply formally to be admitted to such an examination, and the application must be approved by the Dean, on the recommendation of the head of department, and in some cases, also by the Faculty Health Committee.

(iii) **Subminimum**  
A subminimum of 40% is required in the theoretical and practical components in the examination in FTP 220 and 203 and in POL 251.

(iv) **Exemption from the examination in (ANP) Anatomical pathology 210**  
Consult the stipulations as set out under the School of Healthcare Sciences.

(h) **Admission to the third year of study**  
A student must pass all the modules of the second year of study for admission to the third year of study.

</table>

(ii) Subminimum

A subminimum of 40% is required in clinical/practical as well as theoretical components of the examination of (FTP 400,402) Physiotherapy 400 and 402 and (POL 400) Professional development and leadership 400.

(iii) Special examination: Fourth year of study

(aa) The student gets another opportunity to take part in the examination.

(bb) A special examination in (FTP 400) Physiotherapy 400, (FTP 402) Physiotherapy clinical practice 402 and (POL 400) Professional development and leadership 400 is conducted after six months have elapsed since the examination in which the student failed. If the
student failed in (FTP 402) Physiotherapy clinical practice 402, he or she must undergo further clinical instruction in the clinical training areas and obtain at least 50% in the examination.

(cc) A student who has not obtained a pass mark in the essay of (FTP 401) Physiotherapy 401, must submit an amended essay at a later date determined by the head of department.

(iv) Ancillary examination: Fourth year of study
After the conclusion of the examination in (FTP 400) Physiotherapy 400 and (FTP 402) Physiotherapy clinical practice 402 and before the results are announced, the examiners may, with a view to awarding a final mark, summon a student for an ancillary examination in the theory and/or clinical component of (FTP 400) Physiotherapy 400 and (FTP 402) Physiotherapy clinical practice 402.

(k) Degree with distinction
The degree is conferred with distinction on a student who has obtained at least 75% in (FTP 400) Physiotherapy 400 and (FTP 402) Physiotherapy clinical practice 402 and a joint average of at least 75% in (FTP 401) Physiotherapy research 401 and (POL 400) Professional development and leadership 400.

H.17 Master of Physiotherapy [MPhysT]
Also consult General Regulations.

(a) Requirements for admission
(i) Subject to the stipulations of General Regulation G.62, the BPhysT degree or an equivalent qualification is required, as well as registration as a physiotherapist with the Health Professions Council of South Africa.

(ii) For the MPhysT degree, students must also hold at least a part-time position, deemed applicable for master's degree studies by the head of department.

(iii) Candidates will be required to provide proof of having successfully completed applicable postgraduate modules in clinical fields of specialisation, e.g. Orthopaedic Manual Therapy 1, before the MPhysT degree will be conferred.

(iv) A candidate who applies for admission to the MPhysT degree studies by virtue of research (Code 10258101), must comply with the following requirement:
Complete applicable continued training courses presented at national level, in the field of research, as accredited with the Professional Board of Physiotherapy, Biokinetics and Podiatry.

(v) During the MPhysT studies, students must participate in formal departmental instruction and/or research programmes of at least 60 hours per year.

(vi) Postgraduate modules for all the fields of specialisation for the MPhysT degree with coursework, are offered on a biennial basis, if at least five applicants apply for admission to a particular field of specialisation. The closing date for new applications is 31 October annually. Applicants will be notified as soon as possible after this date, whether or not a particular field of specialisation will be presented in the subsequent year. Commencement of studies must, therefore, be discussed beforehand with the head of department.

(vii) The closing date for applications is 31 October annually.

(b) Duration
At least two academic years.
(c) **Curricula**

(i) **MPhysT with coursework**

The basic curriculum consists of a number of fundamental modules which are prerequisites for the core modules in the field of specialisation.

### Fields of specialisation

**Note:** The credit value of each module is indicated in brackets in the table below.

(aa) **Surgery (Code 10258132)**

*Candidates who have passed with at least 60% in corresponding modules to those indicated with * above during the four-year BPhysT degree studies or an equivalent degree programme must, in consultation with the head of department, select relevant modules from any faculty of the University of Pretoria, instead of the modules in question to the value of at least 69 credits, provided it can be accommodated in the class and examination timetables.

(ii) **MPhysT by virtue of research (Code 10258101)**

**Note:** All MPhysT students must register for, and attend (TNM 800) Applied research methodology 800 satisfactorily.

(aa) **Dissertation**

The master's degree is conferred by virtue of a dissertation (FTP 890), on an approved topic based on research.

(bb) **Publication**

All students must submit a publication that has been accepted for publication by an accredited journal before the degree will be conferred.

(d) **Examinations**

**MPhysT with coursework**

(i) The examinations in the prerequisite modules will take place prior to or concurrently with that of the major subject as determined by the head of department.

(ii) The examination consists of a written and a clinical as well as an oral component.

(iii) A subminimum of 50% is required in each section of the examination, with a final mark of at least 50% to pass.

(iv) A student will be granted a second opportunity to take part in the examination in the major subject after at least six months have elapsed since the original examination took place.

(v) Students must submit a publication that has been accepted by an accredited journal for publication before the degree will be conferred.

(vi) Candidates who submit certificates of successful completion of modules in
the Continued Professional Development programme with a view to admission to the MPhysT with coursework, must pass in an open examination in the module in question in order to retain credits.

(e) **Degree with distinction**

(i) **MPhysT with coursework**

The degree is conferred with distinction on a student who has obtained an average of at least 75% in the major subject and the prerequisite subjects, and at least 60% in all other prescribed modules.

(ii) **MPhysT by virtue of research**

To obtain the degree with distinction, at least 75% is required for the dissertation.

### H.18 Doctor of Philosophy [PhD]

(Code 10260451)

Also consult General Regulations.

**Note:** All students must register for, and attend (TNM 800) Applied research methodology 800 satisfactorily. (Exemption will be granted if (TNM 800) Applied research methodology 800 has been passed for the MPhysT degree.)

**Specialisation: Physiotherapy**

(a) **Requirements for admission**

Subject to the stipulations of General Regulations G.54 and G.62, a candidate must be in possession of a master’s degree in Physiotherapy or an equivalent qualification for admission to doctoral studies. The PhD is conferred by virtue of a thesis (FTP 990) and, unless the Dean decides otherwise, an examination on the field of study covered by the thesis (FTP 900).

(b) A complete research protocol with regard to the thesis must be submitted to an evaluation committee and, if necessary, also to the Ethics Committee for approval. The evaluation committee is constituted by the head of department in conjunction with the Chairperson of the School and will consist of experienced persons in research in the proposed field of study of the candidate. At least two committee members will be appointed from other national and/or international tertiary institutions. Due to financial constraints, technological aids will be used in the case of committee members from foreign universities, who will for this reason be unable to attend the meeting. The report of the evaluation committee will be made available to the candidate in writing.

(c) The thesis must deal with a problem from one or other field of Physiotherapy and must be proof to the promoter and examiners that it represents original research.

(d) The maximum period for the completion of a doctoral degree is five years. However, in accordance with the stipulations of General Regulation G. 32.4 and in extraordinary circumstances, the Chairperson of a School may, on the recommendation of the head of department, approve a fixed, limited extension of the period.
V. DEGREES IN DIETETICS

H.19 Bachelor of Dietetics [BDietetics]  
(Code 10139001)

Also consult General Regulations G.1 to G.15.

(a) **Requirements for admission**  
A National Senior Certificate with admission for degree purposes with at least a rating code of 4 (50-59%) in Mathematics, Physical Science and English. Only selected candidates are admitted.

(b) **Nature and duration**  
The programme extends over four academic years during which period a student receives practical training as a student dietician at an institution or institutions approved for this purpose by the University.

(c) **Pass requirements, internship training and grand total of credits required for degree purposes**

(i) Consult the general pass requirements of the School of Healthcare Sciences, for the calculation of the final mark in a module, the continuous assessment mark, obtaining a pass mark in modules with practical and/or clinical components, etc.

(ii) **Internship training (second semester of the final year of study):**  
The three compulsory semester modules (CNT 480, MNX 480 and FSS 480) jointly form the internship training and must be taken simultaneously.

(iii) The grand total credits required to comply with degree requirements is at least **853**. (Five credits are allowed for examination purposes in the final year.)

(iv) **Degree with distinction**  
The degree is conferred with distinction on a student who has obtained an average of at least 75% in the following modules: CNT 411, 480 jointly, as well as MNX 411, 480 jointly, and VDS 322, VDB 321 and FSS 480 jointly.

(d) (i) After admission to the first year of study, each student in Dietetics must register as a student in Dietetics with the Health Professions Council of South Africa.

(ii) Students are required to complete at least four weeks applicable elective training (Code DTT 380) under the supervision of a dietician at an institution approved for this purpose by the University, after the first semester of the third year of study and prior to the commencement of the fourth year of study.

(e) **Second examination opportunity**  
Consult the requirements for a second examination opportunity under the general pass requirements in the School of Healthcare Sciences.

(f) **Promotion to a subsequent year of study**

(i) Consult the general requirements for promotion to a subsequent year of study under the School of Healthcare Sciences.

(ii) Each paper (Paper 1 and 2) of the written examination for Medical nutrition therapy 323, 411 and 480 (MNX 323, 411, 480) as well as the practical examination for MNX 411 must be passed individually with a subminimum of 40%.
(iii) Each paper written for the second examination opportunity in Medical nutrition therapy 323, 411 and 480 (MNX 323, 411, 480) as well as the practical examination for MNX 411 (second examination opportunity) must be passed individually with a subminimum of 50%.

(g) **Exemption from the examination in (FAR) Pharmacology 381, 382**
Consult the stipulations set out under the School of Healthcare Sciences.

(h) **Curriculum**
(i) The table below comprises the fundamental, core and elective modules as well as credit value of each module prescribed for the curriculum, and an indication of the compulsory parallel modules and module prerequisites opposite each module.

(ii) In a module in the prerequisite column followed by the symbol GS, a joint mark of at least 40% must be obtained prior to admission to the module in the first column. A module without any symbol must, however, be passed with at least 50%. A parallel module must be followed prior to, or simultaneously with the module in the first column.

Also consult General Regulations G.1 to G.15.

Note:
The BSc (Nutrition) degree programme is offered by the Faculty of Natural and Agricultural Sciences. Students are, however, enrolled for modules in both the Faculty of Natural and Agricultural Sciences and the Faculty of Health Sciences.

It is expected of students following the Public Health Nutrition option to undergo internship training. The module FNH 480 will be administered by the Department of Human Nutrition in the Faculty of Health Sciences.

A minimum of 636 credits are required to obtain the degree with the Option: Public Health Nutrition

A minimum of 625 credits are required to obtain the degree with the Option: Nutritional Science

Please note:
For further programme details and prerequisites for modules, please consult the Faculty of Natural and Agricultural Sciences yearbook on the web.
The prerequisites for some of the modules can be found in the alphabetical list of modules in this yearbook from pp 182–379.
H.21 Bachelor of Dietetics Honours [BDieteticsHons]  

Code (10240001)  

Also consult General Regulations.  

(a) **Requirements for admission**  
A BDietetics degree.  

(b) **Duration**  
One year of full-time study or a maximum of 5 semesters of part-time study.  

(c) **Curriculum**  
A student chooses honours modules to a total of credits determined by the head of the Department of Human Nutrition, in addition to (NME 713, 714) Research methodology 713, 714 (or a similar module) and other subsidiary requirements, in consultation with the head of the division, and depending on the prerequisites and field of specialisation. Before the degree is conferred, (STK 110) Statistics 110 or a similar module must be passed.  

(d) **Degree with distinction**  
The degree is conferred with distinction on a student who has obtained a weighted average of at least 75% in the programme.  

H.22 Master of Dietetics [MDietetics]  

Also consult General Regulations.  

(a) **Admission requirements**  
(i) Subject to the stipulations of General Regulation G.62, the minimum requirement is a Bachelor's degree in Dietetics, as well as registration as a dietician with the Health Professions Council of South Africa.  
(ii) At least one year of full-time practical experience after acquiring the qualification in terms of which admission to master's degree study is sought.  
(iii) Students are selected on the grounds of previous academic achievement.  

(b) **Duration**  
A maximum period of four years.  

(c) **Curriculum**  
**MDietetics by virtue of research (Code 10259001)**  
(i) Students must hold a recognised honours degree in Dietetics/Human Nutrition.  
(ii) (TNM 800) Applied research methodology 800 or an equivalent module must be passed.  
(iii) The master's degree is conferred by virtue of a dissertation (DEK 890) on an approved topic based on research. A minimum pass mark of 50% is required for the dissertation.  
(iv) **Degree with distinction**  
The degree is conferred with distinction on a student who obtains at least 75% in the dissertation.  

**MDietetics by virtue of coursework (Code 10259002)**  
(i) Students must hold a recognised Bachelor's degree in Dietetics/Human Nutrition.
(ii) (TNM 800) Applied research methodology 800 or an equivalent module must be passed satisfactorily.

(iii) For the coursework component, a student has to take compulsory modules to a total of 80 credits and choose modules (from elective modules) to a total of 120 credits. Any specific module is offered on condition that a minimum number of students is registered for the module, as determined by the Head of the department and the Dean. Students must consult the head of the division in order to compile a meaningful programme, as well as for information on the syllabi of the modules. The departmental postgraduate brochure should also be consulted.

(iv) A final mark of at least 50% is required to pass in the coursework. A minimum of 50% is required to pass in the essay.

(v) **Degree with distinction**

The degree is conferred with distinction on a student who has obtained an average of at least 75% in the coursework as well as a minimum of 75% in the essay.

---

**H.23 Master of Science [MSc] in Applied Human Nutrition**

Also consult General Regulations.

**Note:**

All MSc students must register for, and attend (TNM 800) Applied research methodology 800 satisfactorily. (Exemption may be granted if the module has already been passed for the BScHons degree.) However, MSc(Pharmacology) students must register for FAR 872 instead of TNM 800.
(a) **Admission requirements**
A recognised bachelor's degree in Medicine or in a supplementary health service profession; or a recognised and applicable bachelor honours degree of equivalent status as the BDietetics degree with regard to Physiology and Biochemistry.

(b) **Duration**
The maximum period for completion of the master's degree is four years. Subject to the stipulations of General Regulation G.32, the Chairperson of the School in question may, in consultation with the head of department, approve a fixed limited extension of the period on the grounds of extraordinary circumstances.

(c) **Curriculum**

The degree is conferred by virtue of publications. Consult General Regulation G.56.

Degree code for Dietetics: 10262001
Degree code for other fields: 10262000
A. Postgraduate Diploma in Dietetics

Suspended until further notice.

B. Postgraduate Diploma in Vocational Rehabilitation [DVR] (Code 10220141)

(a) Admission requirements
   (i) Subject to the stipulations of General Regulation G.62, the BOccTher degree or an equivalent qualification as well as registration as an Occupational Therapist with the Health Professions Council of South Africa is required for admission.
   (ii) A student must fill at least a part-time post regarded by the head of department as appropriate for the field of study in question.

(b) Duration
   At least one academic year, with presentation of the curriculum in four block weeks.

Note:
Commencement of studies must be discussed with the head of department, as the programme is presented every second year.

(c) Curriculum
   The curriculum consists of a major subject and prerequisite subjects:
   Major: BRH 700 Vocational rehabilitation 700 (30 credits)
   Prerequisite subjects: GRA 701 Groups in occupational therapy C.S. 701 (30 credits)
                       WSD 701 Work study 701 (30 credits)
                       FIA 702 Financial administration 702 (30 credits)

(d) Total number of credits required
   120

(e) Examinations
   The sequence of the examinations in the prerequisite subjects will be determined by the head of the department, depending on the candidate's choice of a major subject.

(f) Diploma with distinction
   The diploma is awarded with distinction to a student who has obtained an average of at least 75% in all the subjects.

C. Postgraduate Diploma in Interpersonal Communication and Group Techniques in Occupational Therapy (Code 10220131)

Discontinued until further notice.
D. Postgraduate Diploma in Group Activities [DGA]
(Code 10220151)

(a) Admission requirements
   (i) Subject to the stipulations of General Regulation G.62, the BOccTher degree or equivalent qualification as well as registration with the Health Professions Council of South Africa is required.
   (ii) A student must fill at least a part-time post regarded by the head of department as appropriate for the field of study in question.

(b) Duration
   At least one academic year, with presentation of the curriculum in question in four block weeks.

(c) Curriculum
   (i) IKX 700 Interpersonal communication 700 (60 credits)
   (ii) GRT 700 Group techniques in occupational therapy 700 (60 credits)

(d) Total number of credits required
   120

(e) Examinations
   (i) Admission
      A continuous evaluation mark of at least 50% as well as satisfactory class attendance is required for admission to the examination.
   (ii) Pass requirement
      A subminimum of 50% must be obtained in both the written and the oral/practical sections of the examination, with a final mark of at least 50% to pass.
   (iii) Second examination
      Students will be admitted to any second examination granted, six months after the original examination has taken place.

(f) Diploma with distinction
   The diploma is issued with distinction to a student who obtains an average of at least 75% in all prescribed modules.

---

E. Postgraduate Diploma in the Handling of Childhood Disability [DHCD]
(Code 10220171)

(a) Admission requirements
   (i) A career-oriented bachelor’s degree or an equivalent qualification which is regarded as applicable for admission to study by the head of department.
   (ii) At least one year professional experience after the degree or equivalent qualification has been obtained, in an area that is regarded as applicable by the head of department.
   (iii) A student must fill at least a part-time post regarded as appropriate by the head of department for the field of study in question.

(b) Nature and duration
   The programme is presented in four block weeks during one academic year.
Note:
Commencement of studies must be cleared with the head of department as the programme is presented every second year.

(c) Curriculum
DCD 701 Normal development 701 (20 credits)
DCD 702 Identification 702 (30 credits)
DCD 703 Intervention for developmental disabilities 703 (35 credits)
DCD 704 Intervention for disabilities 704 (35 credits)

(d) Total number of credits required
120

(e) Examinations
Students are required to attend all lectures and practical work to the satisfaction of the head of department, for admission to the examination.
Examination in the written, oral and/or practical components of an examination must be passed with a final mark of at least 50%, to pass in the module in question.

(f) Diploma with distinction
The Diploma is awarded with distinction to a student who obtains an average of at least 75% in all the prescribed modules.

F. Postgraduate Diploma in Hand Therapy [DHT]
(Code 10220161)

(a) Admission requirements
(i) Subject to the stipulations of General Regulation G.62, the BOccTher degree or an equivalent qualification, or the BPhysT degree or an equivalent qualification, is required for admission, as well as registration as an occupational therapist/physiotherapist with the Health Professions Council of South Africa.
(ii) A student must fill at least a part-time position that is deemed by the head of department to be appropriate for the field of study in question.

(b) Duration
The programme extends over one academic year and is presented in four blocks.
(The number of blocks and duration may be adjusted after consultation between the lecturers and students.)

Note:
Commencement of studies must be discussed with the head of department, as the programme is presented every second year.

(c) Curriculum
AAN 701 Anatomy 701 (10 credits)
FIP 701 Physiology and patho-physiology 701 (10 credits)
BEX 701 Biomechanics and ergonomics 701 (10 credits)
KVH 701 Clinical skills in hand therapy 701 (40 credits)
ADM 701 Advanced clinical management in hand therapy 701 (50 credits)

(d) Total number of credits required
120
(e) **Examinations**

(i) **Pass requirements**
In the case of a written and oral/practical examination, a subminimum of 50% is required in each of the written as well as the oral/practical sections of the examination, with a final mark (continuous evaluation mark and examination mark) of at least 50% to pass in a module.

(ii) **Admission to the examination**
Students must have attended all practicals and submitted all assignments, failing which admission to the examination will not be granted.

(iii) **Second examination**
The dates for second examinations are arranged in consultation with the head of department, with the proviso that this will take place not later than the next examination period.

(f) **Diploma with distinction**
The diploma is awarded with distinction to a student who obtains at least 75% in (ADM 701) Advanced clinical management in hand therapy 701, and an average of at least 75% in the other modules.
I. POSTGRADUATE DEGREES

P.1 Bachelor of Science Honours [BScHons]

Also consult General Regulations.

(a) Requirements for admission
   (i) A candidate must hold a bachelor's degree deemed acceptable by the head
       of department for the proposed field of study, or an equivalent qualification
       deemed acceptable by the Senate of the University for the proposed field of
       study, with at least one applicable biological subject as major subject.
   (ii) Admission to the study for an honours degree is subject to the approval of the
       head of department: with the proviso that a candidate who has obtained an
       average of less than 60% in the modules of his or her major subject in the
       final year of the bachelor's degree study, may only be admitted with the
       Dean's approval, on the recommendation of the head of department.
       Additional requirements may be set by the head of department.
   (iii) Admission requirements for the honours degree programme in the field of
       Biostatistics:
       In order to be eligible to enrol for the BScHons in Biostatistics, candidates
       must have a bachelor's degree with Statistics as a major subject on 100, 200
       and 300 level.
   (iv) Admission requirements for the honours degree programme in the field of
       Aerospace Medicine:
       - Candidates must have an MBChB or equivalent degree deemed
         acceptable by the head of the department.
       - Candidates must be registered Aviation Medical Examiners.

(b) Duration
   One year of full-time study (not applicable to the field of Aerospace Medicine)
   Two years of part-time study

(c) Curriculum
   (i) In the School of Health Systems and Public Health, the BScHons degree is
       conferred in the following fields of study:

       | Field of study            | Degree code | Module code |
       |---------------------------|-------------|-------------|
       | Biostatistics             | 10244010    | See par. (ii) |
       | *Aerospace Medicine       | 10244021    | LRG 700     |

   (ii) The following requirements are set:
       - Advanced instruction by means of self-tuition and four compulsory
         seminars of which at least one must be read to and defended before the
         department in question, on topics assigned to the student.
       - Attendance at the compulsory faculty module (TNM 800) Applied
         research methodology 800.
       - Taking part in a research project and presentation of an independent
         research report.
       - Satisfactory attendance at a library-user course.
For the field of study Aerospace Medicine, the module, HME 772 Epidemiology primer also forms part of the curriculum and must be passed successfully.

For the field of study, Biostatistics the following curriculum applies:

<table>

</tr>
</tbody>
</table>

Minimum total credits 125

(d) Examinations
(i) The honours examination consists of two written papers of three hours each (only one written paper in the case of Aerospace Medicine) as well as an oral examination of 30 minutes. One written examination in Biostatistics of three hours must be passed with at least 60%.
(ii) To comply with the pass requirements for the degree, a student must obtain a final mark of at least 50% in each division as indicated, as well as a pass mark of at least 50% for the essay/work assignment (if applicable). The stipulations regarding pass requirements for dissertations in General Regulation G.60.2.1.2(a) apply mutatis mutandis to essays.

(e) Degree with distinction
The degree is conferred with distinction on a student who has obtained an average of at least 75% in the examination (written, oral, practical, etc.).

P.2 Master of Science [MSc]

Also consult General Regulations.

(a) Admission requirements
Subject to the stipulations of General Regulation G.62, a four-year bachelor's degree is required, or an honours degree, or in the case of a three-year bachelor's degree, also applicable practical (work) experience as prescribed by the University, plus any other additional work deemed necessary by the head of department: With the proviso that the head of department will have the discretion to decide whether the prerequisite qualification, or the qualification plus work experience would be acceptable for admission to the proposed field of study.

For admission to the field of study of Aerospace Medicine, an honours degree in Aerospace Medicine or another applicable honours degree is required.

In the case of the field of study Biostatistics, an applicable honours degree is required, with Statistics at honours level.
Note:
All MSc students must register for, and attend (TNM 800) Applied research methodology 800 satisfactorily. (Exemption may be granted if the module has already been passed for the BScHons degree.)

(b) Duration
The maximum period for completion of the master's degree is four years. Subject to the stipulations of General Regulation G.32, the Chairperson of the School may, in consultation with the head of department, approve a fixed limited extension of the period on the grounds of extraordinary circumstances.

(c) Research protocol
After registration, a student is required to submit a complete research protocol regarding the proposed dissertation to the Academic Advisory Committee and if necessary, also to the Ethics Committee for approval.

(d) Fields of specialisation
The MSc degree is conferred in the following fields of study in the School of Health Systems and Public Health:

<table>
<thead>
<tr>

Subtotal elective modules required: 20
Minimum total coursework required: 80

(f) Pass requirements
(i) The minimum pass mark for a module is 50%.
(ii) The prescribed modules must be passed independently of each other.
(iii) Second examinations in the modules are arranged by the head of department, within a period of time specified by him or her.
(iv) No second examinations will be granted in modules in which less than 40% has been obtained. Instead, the module must be repeated in its entirety.
(v) Only with the approval of the Chairperson of the School, on the recommendation of the head of department, will a student be allowed to continue his or her studies after having failed two modules (or the same module twice).

(g) Dissertation
A dissertation on an approved research project must be passed in addition to the coursework. The stipulations of General Regulation G.57.3 regarding the preparation and submission of a dissertation apply; also the stipulations of General Regulation G.58 regarding the technical editing of the dissertation; and G.59 regarding the résumé of the dissertation.
A systematic literature review (Cochrane type) on an approved subject, which is undertaken in such a manner that bias in minimised, may be presented as an alternative to the dissertation for awarding the MSc in Clinical Epidemiology. It requires, inter alia, a research protocol with clearly formulated objectives and methods. Inclusion and exclusion methods for the study must be determined. Where applicable, the data must be summarised (meta analysis), with applicable statistical methods.

(h) Evaluation and degree with distinction
The average mark of the modules, weighted in respect of the number of credits acquired for each individual module, will be the final mark (%) of the coursework.
The degree is conferred with distinction on a student who obtains an average mark of at least 75% in the coursework, as well as a final mark of at least 75% for the dissertation.

P.3 Master of Medicine [MMed]

Regulations and curriculum

Please note:
All MMed students must register for, and attend (TNM 800) Applied research methodology 800 satisfactorily.
The MMed degree in the School of Health Systems and Public Health is conferred in the following field:

Public Health Medicine – [MMed (Public Health Medicine)]

(a) Requirements for admission
A prospective student for the MMed degree programme must be in possession of the MBChB degree of this University, or a qualification deemed by the University to be equivalent to the MBChB degree, for at least two years. In addition, such a student must be registered as a physician with the Health Professions Council of South Africa for at least one year.

(b) Duration
(i) The training for the degree extends over four years in accordance with the requirements of the Department of Public Health Medicine.
(ii) “Major subject” refers to the recognised field of study in Medicine in which the student specialises. The study of the major subject extends over four years, as prescribed by the Department of Public Health Medicine.

(c) Each student must prove to the University that he or she
(i) has successfully filled the required full-time training post for a period of four years according to the requirements of the Department of Public Health Medicine.
(ii) has completed the theoretical and practical applicable training as stipulated in Reg. P.3 (b) above; and
(iii) has passed the prescribed written, oral and/or practical university examinations or equivalent primary Colleges of Medicine of South Africa examinations.

(d) Exemption
(i) The Faculty Board may grant partial exemption from the training and work mentioned under par. (b) and (c)(i) and (ii) above on the grounds of comparable training and experience completed in another post or at another recognised institution – with the proviso that exemption from a maximum period of 18 months may be granted in the case of a four-year programme such as the MMed (Public Health Medicine) degree programme.
(ii) Exemption from a maximum of two years’ Public Health Medicine training may be granted in the Department of Public Health Medicine in respect of the MMed(Public Health Medicine) degree, to a candidate already in possession of a Fellowship of the College of Public Health Medicine or a Fellowship of the College of Occupational Health Medicine of the Colleges of Medicine of South Africa. Such a candidate must have completed a period of at least 24 months of registrar training in Public Health Medicine or in Occupational Health Medicine that is recorded as such by the HPCSA.

(e) Curriculum
The curriculum consists of the major subject, its prerequisites and a dissertation

(i) Public Health Medicine (Code 10250372)
   Major subject: GGS 800 Public health medicine 800
   Prerequisites: ASW 800 Heath legislation, health policy and health systems (paper 1), social and behavioural science (paper 2) 800, EBD 800 Epidemiology, biostatistics and demography 800, ONO 800 Communicable
and non-communicable health-related conditions 800. The prerequisites can be passed either at the University or as primary examinations at the Colleges of Medicine of South Africa.

(iii) GGS 890 Dissertation 890
A dissertation on an approved research project must be passed in addition to the major subject and prerequisites. The stipulations of General Regulation G.57.3 regarding the preparation and submission of a dissertation apply, also the stipulations of General Regulation G.58 regarding the technical editing of the dissertation and G.59 regarding the résumé of the dissertation.

(f) Examinations
(i) The sequence of the examinations in the prerequisite subjects will be determined by the head of the department of Public Health Medicine.
(ii) The final exit examination for the major subject will be conducted by the Colleges of Medicine of South Africa. Only candidates who have met all the requirements for the MMed(Public Health Medicine) degree except for the major subject, i.e. passed all prerequisite subjects, completed all applicable training as prescribed in Reg. P.3(c) and completed the required research component for the degree in accordance with the Faculty Yearbook regulations, i.e. TNM 800 and the dissertation (GGS 890) will be allowed to write the Colleges of Medicine of South Africa exit examination.
(iii) A minimum final mark of 50% is required to pass in a subject.
(iv) A student is not admitted to the examination in a prerequisite subject (second examinations excluded) more than twice, nor is he or she admitted to the examination in the major subject more than twice.

(g) Second examinations
Second examinations in the prerequisite subjects will only be held after at least six months have elapsed since the conclusion of the examination in which the student had failed.

(h) Conferment of the degree/Degree with distinction
The degree is conferred at the end of the prescribed training period, i.e. four years. The degree is conferred with distinction on a student who has obtained a final mark of at least 75% in his or her major subject.

(i) General
Registrars in Public Health Medicine are expected to undergo rotational attachment to a number of designated health service organisations during their period of training.

### P4 Master of Public Health [MPH]
(Code 10256501)

Also consult General Regulations

(a) Admission requirements
A candidate for admission to the study for the Master's degree in Public Health must be in possession of:
- a four-year bachelor’s degree; plus at least two years’ applicable practical (work) experience; or
- an honours degree; or
- a three-year bachelor's degree plus at least five years’ applicable practical (work) experience.
(b) **Registration as a special student in the Faculty in order to pass a status examination**

(i) Candidates will be required to first register as a special student in the Faculty, in order to pass in a status examination, in the following instances:
- A three-year bachelor's degree with less than five years’ applicable practical (work) experience; or
- A four-year bachelor's degree with less than two years’ applicable practical (work) experience; or
- Any applicant in possession of an approved bachelor’s degree, who the School's Selection Committee deems fit to register as a special student.

**NB:**
- In accordance with the criteria of the Senate of the University, the applications for admission of all such candidates must, apart from any Faculty requirements, also be submitted to the University Senate for approval.
- All candidates accepted for postgraduate study (MPH or the Postgraduate Diplomas) must be in possession of a National Senior Certificate with admission for degree purposes.

(ii) **Pass requirements for the status examination**
- At least 60% must be obtained in the status examination.
- The status examination will be written in June.

(iii) The application of a student who has passed the status examination must be submitted to the Senate of the University for approval. Successful students may then enrol for the degree programme in the following academic year.

(c) **Other selection criteria**
(Each on a scale of one to five.)
- Academic merit
- National/International need for public health
- Under-represented groups in public health
- Public health related employment
- Track record – e.g. employment, academic, community-building, etc.

(d) **Duration of programme**
(i) Two years of full-time, or a maximum of four years part-time study.
(ii) In exceptional cases the Dean, on the recommendation of the Chairperson: School of Health Systems and Public Health, may allow a student to complete the degree programme in one year.

(e) **Curriculum and general information**
(i) The MPH programme comprises the following three components:
- Core modules
- Track modules (compulsory and elective)
- Mini-dissertation

(ii) **The credits are divided between the different components of the MPH as follows:**

<table>
<thead>
<tr>
<th>MPH component</th>
<th>Credits</th>
<th>%</th>
</tr>
</thead>
<tbody>
<tr>
<td>Core modules</td>
<td>65</td>
<td>32,5</td>

<td><strong>Total</strong></td>
<td><strong>65</strong></td>
</tr>
</tbody>
</table>

*Week 1 and 2 form one module of 10 credits, and cannot be taken separately.

(iv)  **Track modules (compulsory and elective)**

The following areas are available:

- Biostatistics and epidemiology
- Biostatistics and epidemiology – Monitoring and evaluation
- Disease control
- Disease control – field Epidemiology and Laboratory Training programme
- Disease control – Public Health Laboratory programme
- Environmental and occupational health
- Environmental and occupational health – Occupational hygiene
- Environmental and occupational health – Aerospace medicine
- Health policy and management
- Health promotion

Information regarding the content of each track is available on the website of the School of Health Systems and Public Health (http://shsph.up.ac.za)

(f)  **Mini-dissertation**

(i) The MPH degree consists of coursework (70%) and a research component (30%). The mini-dissertation contributes 60 credits (the equivalent of 600 notional hours of learning according to SAQA criteria).

(ii) The expected outcome of the mini-dissertation is that the student will be able to identify and investigate health and health systems problems in a comprehensive manner, and that he or she will be able to (i.e. begin to) formulate appropriate interventions.

(iii) The student’s research protocol is submitted for approval to the MPH track head, prior to submission to the Health Sciences Research Ethics Committee.

(g)  **Examinations and pass requirements**

(i)  **Examination of modules**

(aa) Each module has its individual (own) evaluation, which may consist of more than one mode of evaluation. **To pass in a module, a student must obtain a minimum pass mark of 50%***.

(bb) If a student fails a module but obtains 40% to 49%, a second examination in the module in question must be written. The student...
must arrange with the lecturer who presents the module, in consultation with the Academic Programme Coordinator, in this regard.

(cc) If a student fails a module but obtains a mark of less than 40%, the module must be repeated in full in the following year.

(dd) If a core module is still not passed after two attempts, the student will not be allowed to continue with the MPH programme.

(ee) A compulsory module in the student’s track can only be repeated once. If it is not passed after the second attempt, the student will be requested to change the track. If the student fails after two attempts in the second track, he or she will not be allowed to continue with the MPH programme.

(ff) If an elective module is failed after two attempts, the student will have to select another elective module.

(ii) Final examinations for the MPH

(aa) Other than summarising the total of marks obtained for modules, the MPH has an additional evaluation of its coursework, consisting of two comprehensive examinations. The decision as to whether these examinations will be written or conducted orally, lies with the examiners.

(bb) The first examination will take place after completion of all the compulsory core modules and covers basic knowledge in Public Health. This examination will consist of two papers, each two hours long. Paper I will cover material learned during the core modules HME 870, DEG 870 and BOS 870. Paper II will cover material learned during the remaining core modules with the exception of material learned during the Scientific writing 871 module (HMS 871).

(cc) The second examination will take place at the end of the MPH programme and covers the modules taken as part of a track.

(dd) The minimum pass mark for each examination is 50% and for the first core examination a subminimum of 40% is required for each of the two papers. The final mark for the first core examination will be a simple average of the percentage marks obtained in each of the two constituent papers. If a student fails either of the examinations, he or she will be required to rewrite in the next examination period. If a student fails for the second time he/she may not continue with the MPH programme.

(iii) Examination of mini-dissertation

The mini-dissertation must be passed independently with at least 50%.

(h) Concurrent registration for two study programmes

(i) In accordance with the stipulations of General Regulation G.6, which is mutatis mutandis applicable in the case of postgraduate diploma study, the permission of the Dean is required for concurrent registration, subject to the regulations applicable to the fields of study in question and to any other stipulations the Dean may prescribe. Such a concession may be withdrawn by the Dean if the student does not perform satisfactorily – all assignments and coursework must be completed on time. Concurrent registration will not be accepted as a reason for poor performance or not meeting deadlines for both study programmes.

(ii) In the case of registering concurrently for two study programmes in the School of Health Systems and Public Health and elsewhere, students must obtain the written consent of both the coordinator of their current programme...
and the coordinator of the second programme (or the track co-ordinator in the case of the MPH), and submit it with a substantiating letter to the School's Academic Programme Committee, for recommendation by the Chairperson of the School, after which the application is submitted to the Dean for approval.

(iii) The School of Health Systems and Public Health states that concurrent registration for two study programmes is a privilege and not a right. Concurrent registration must be applied for annually and is granted based on academic performance in the primary degree/diploma programme.

(iv) If the current field of study is a master's degree, then the second field of study can be a postgraduate diploma.

(v) If the current field of study is a postgraduate diploma, then the second field of study can be another postgraduate diploma.

(i) **Degree with distinction**
The degree will be conferred with distinction on a student who has a final mark of at least 75% for the mini-dissertation and an average of at least 75% for the combination of coursework and examinations.

<table>
<thead>
<tr>
<th>P.5 Doctor of Philosophy [PhD]</th>
</tr>
</thead>
</table>

Also consult General Regulations.

**Please note:** All PhD students must register for, and attend TNM 800 Applied research methodology 800 satisfactorily. (Exemption will be granted if Applied research methodology 800 had been passed for the master's degree.)

(a) Subject to the stipulations of General Regulations G.45 and G.62, a candidate will only be admitted to the studies for the doctoral degree if he or she holds a MBChB or a master's degree or has been granted the equivalent status.

(b) **A PhD student must**
(i) under the supervision of a supervisor at the University or another institution approved by the Senate, undertake original research to the satisfaction of the examiners; and
(ii) submit a thesis which will prove, according to the opinion of the examiners, that he or she has, on the grounds of independent critical judgement, made a distinct contribution towards the enrichment of knowledge in the chosen subject.

(c) A student for the PhD degree must be registered for the doctoral degree study at the University for at least one academic year before the degree can be conferred.

(d) The PhD degree is conferred by virtue of a thesis and, should the Dean deem it necessary, an examination on the field of study of the thesis.

(e) A complete research protocol regarding the proposed thesis (as well as the curriculum vitae of the candidate) must be submitted to the Academic Advisory Committee and, if necessary, also to the Ethics Committee for approval. The thesis must deal with a problem from a field of study in Health Systems and Public Health and must satisfy the supervisor and the examiners that it represents advanced original research and/or creative work in the field of Health Systems and Public Health. It must give an overview of the literature that was used on the topic and
contain a description of the observations made and experiments done by the
student, as well as a discussion of the conclusions reached.

(f) The doctoral examination will be oral and/or written and will deal with the content of
the thesis as well as those subdivisions of the field of study on which the thesis is
based, if requested.

(g) The maximum period for completion of a doctoral degree is five years. Under
exceptional circumstances, a student may apply to the head of the department, in
writing, for a fixed, limited extension of this period.

(h) The following additional requirements are set in respect of the PhD degree
 completed in the School of Health Systems and Public Health:
(i) All PhD students in the School are required to register as a Health Sciences
 Special (Postgraduate) student for the first year. This will allow the student time
to complete any additional coursework the head of department and/or
supervisor may require to be completed and which is deemed applicable to the
particular research field, and to prepare a pre-final research protocol.
(ii) A review will be done by a school committee and only students who have made
adequate progress will be allowed to register as a PhD student in the following
year.

(i) The PhD degree can be obtained in the following fields of study in the School of
Health Systems and Public Health:

II. POSTGRADUATE DIPLOMAS

P.6
A. Postgraduate Diploma in Tropical Medicine and Health [DTM&H]
   (Code 10220063)

B. Postgraduate Diploma in Public Health [DPH]
   (Code 10220093)

C. Postgraduate Diploma in Public Health Medicine [DipPHM]
   (Code 10220094)

D. Postgraduate Diploma in Health Systems Management [DHSM]
   (Code 10220073)
   Option 1: Executive Leadership (Code 10220075)
   Option 2: General Operations (Code 10220076)

E. Postgraduate Diploma in Occupational Medicine and Health [DOMH]
   (Code 10220083)
F. **Postgraduate Diploma in Occupational Health [DipOH]**  
(Code 10220084)

G. **Postgraduate Diploma in Clinical Evidence and Healthcare [DipCEH]** *  
(Code 10220074)  
*This Diploma has been suspended.*

Also consult General Regulations.

**Requirements and regulations common to all these diplomas**

(a) **Requirements for admission**

For admission to the Postgraduate Diplomas in Tropical Medicine and Health, Occupational Medicine and Health, and Public Health Medicine, the MBChB degree or an equivalent qualification with a completed internship of at least one year, plus professional (work) experience (post-internship) of at least one year that is regarded as applicable by the Head of the Department of Public Health Medicine or the Chairperson of the School of Health Systems and Public Health, is required. For admission to the non-medical Postgraduate Diplomas in Health Systems Management and in Public Health, the following is required:

- A four-year bachelor's degree, plus at least two years’ applicable work experience; or
- A three-year bachelor’s degree plus at least five years’ applicable work experience.

(b) **Duration**

The diploma programmes can only be taken on a part-time basis and the training will extend over at least two academic years, except for the DTM&H which will extend over at least one academic year. Students may, with the approval of the Head of the Department of Public Health Medicine or the Chairperson of the School of Health Systems and Public Health, register simultaneously for Part I and Part II of a diploma which extends over two academic years.

(c) **Registration as a special student in the Faculty in order to pass a status examination**

The stipulations of Reg. P.4(b)(i) (with relevant footnote), and (ii)-(iii) apply *mutatis mutandis* to the postgraduate diplomas in question.

(d) **Other selection criteria**

The stipulations of Reg. P.4(c) apply *mutatis mutandis* to the postgraduate diplomas in question.

(e) **Concurrent registration for two study programmes**

The stipulations of Reg. P.4(h)(i)-(v) apply *mutatis mutandis* to the postgraduate diplomas in question.

(f) **Curriculum**

A curriculum comprises prescribed modules and/or a research report compiled in conjunction with the head of department or Chairperson of the School. Details regarding the curriculum and syllabuses are published in a brochure which is available on request from the department or School.
(g) **Examinations**
Students must attend all lectures and practical classes to the satisfaction of the head of department or the Chairperson of the School before they will be admitted to the examinations. Written, oral and/or practical examinations must be passed in all the modules.

(h) **Pass requirements**
(i) The minimum pass mark for prescribed modules is 50%.
(ii) Only with the approval of the Chairperson of the School, on the recommendation of the head of department, will a student be allowed to continue his or her studies after having failed two modules (or the same module twice).
(iii) A second examination in a module is arranged in conjunction with the head of department.

(i) **Diploma with distinction**
A diploma is awarded with distinction to a student who has obtained an average of at least 75% in all the modules.
M.1 Bachelor of Medicine and Surgery [MBChB]  
(Code 10130001)

Also consult General Regulations.

Note:

1. A National Senior Certificate with admission for degree purposes is required, with Mathematics, Physical Science, and English (at Home Language level or First Additional Language level) with minimum pass marks in these subjects as required according to the different categories of the selection procedure.

2. A selection of candidates takes place (consult General Information).

3. Each student in Medicine must apply to the Registrar of the Health Professions Council of South Africa for registration as a student in Medicine, immediately after admission to the first year of study.

4. After obtaining the degree, a student must register with the Health Professions Council of South Africa as an intern, and complete at least one year of training at an institution approved by the abovementioned Council for this purpose. (Students who qualify after July 2006, will have a compulsory two-year internship.) After this, he or she must register with the Council as a physician and complete one year of community service before he or she may work in private practice.

5. Total number of credits required for degree purposes (AIM and ELH modules excluded):
   - Fundamental modules: 246
   - Core modules: 905
   - Elective modules: 59
   Total: 1210

(a) Duration and programme design

Six years of full-time study. The integrated outcomes-based problem-oriented programme consists of theoretical blocks, special activities (SAs) and clinical rotations. During the final 18 months, referred to as the Student Intern Complex (SIC), all the programme activities take place in the clinical settings.

(b) Passing a block/special activity in the MBChB degree programme

(i) A block mark is calculated from the continuous evaluation opportunities during the course of the presentation of the block or special activity in question. These evaluations shall include one or more of the following:
   - Evaluations regarding theoretical knowledge.
   - Evaluations regarding clinical knowledge and skills.
   - Compulsory attendance of, and active participation in prescribed activities.
   - A final comprehensive block test moderated by external examiners.

(ii) Students may exercise the option to have the block mark at the end of the year validated as the final block mark for the block in question (i.e. they are exempted from the block examination for this block), provided that they comply with the following requirements:
   - The abovementioned block mark is more than 60%.
(bb) Proven attendance of all applicable block-specific activities, namely:
- All tests/continuous evaluations.
- All practicals and morning ward-round activities.
- All relevant skills laboratory activities.
- All relevant community-based education activities.
- All clinical rotations.

(cc) A pass mark in the clinical rotation test.
(dd) Attendance of the block in question from day 1.
(ee) No conviction by the Faculty Preliminary Disciplinary Committee (Student offences), of any form of dishonesty or fraud.

(iii) A block examination is granted to all registered students regardless of the block mark.
(iv) The final block mark is calculated from the block examination mark and the block mark (continuous evaluation) in a 50:50 or 60:40 ratio, depending on the year of study and/or block-specific regulations. The formula according to which the final block mark is calculated will be set out in the block book (study guide) and communicated to students at the commencement of the programme.
(v) In order to pass in a block/special activity in which a clinical component is included, a subminimum of 50% is required for the block examination mark, implying that a student who obtains a block mark of more than 50% and a block examination mark of less than 50%, with a final block mark of more than 50%, fails the block and will thus be admitted to a second examination.
(vi) Regarding the Longitudinal Clinic Attachment Programme (L-CAS activities) of an academic year (module code LCP 180, 280, 380, 480 and 580), students must hand in a portfolio at the end of the academic year which will be assessed. Satisfactory attendance will furthermore be required regarding this module to pass the year.
(vii) A second examination in a block will be granted to all students who fail the block.
(viii) As a rule, the second examination in question will take place in November/December of the same year, or in January of the following year. However, this regulation is not applicable to the end of the first semester of MBChB V (refer par (o) (iii)). A minimum of 50% is required in order to pass in the second examination.
(ix) An aegrotat or extraordinary examination granted to a student who could not participate in the block examination due to illness or other acceptable reasons, will take place during the second examination period. Students must apply formally for such an examination, and admission to the examination is approved by the Chairperson of the School or his/her authorised person. Where applicable, the Chairperson of the School may first require a recommendation from the Faculty Health Committee before approving an application for admission to an aegrotat.
All modalities of a final examination must be completed jointly as an aegrotat or an extraordinary examination, even if part of it has already been completed as part of the examination sat in the previous examination period. The final block mark is calculated from the marks of all the divisions/modalities of the aegrotat or extraordinary examination and the block mark in question (continuous evaluation mark). The same criteria set for a final mark in a block, are applicable in this case.
Note: No special dates will be arranged for an aegrotat/extraordinary examination. These examinations will only take place on the scheduled dates for regular first/second examinations.

(x) Aegrotat/extraordinary tests are not allowed for the MBChB degree programme. Students who have acceptable reasons for being absent from tests, will of course have no block mark, and a pass in the block(s) will depend totally upon the block examination mark.

(c) Repeating blocks and/or special activities (and thus the year of study) in the MBChB degree programme

A student who has failed one or more blocks and/or special activities in a year of study, must repeat the year of study. However, such a student will be exempted from the blocks and/or special activities passed in the previous (failed) year.

The Examination Moderating Meeting and/or the Chairperson of the School of Medicine, reserves the right to only award a pass mark to the said blocks and/or special activities should the student comply with the following requirements in respect of the blocks and/or special activities in question:

- That the mark awarded to the said block or special activity was not awarded on the grounds of condonement.
- That the student’s attendance of the said block and/or special activity was satisfactory, that he or she participated in all other activities and complied with all other requirements.

(d) Examinations and pass requirements

In accordance with the stipulations of General Regulation G.10(2), no minimum year or semester mark is required for admission to the examination: Provided that the different year and semester modules in a School need not be handled in the same manner, although a considerable degree of uniformity is advisable.

The stipulation that students be admitted to the examination without reservation, is supported. A final block mark in the relevant module is, however, calculated from the block examination mark as well as the block mark compiled from continuous evaluation during the presentation of the module (i.e. the semester, year, module or block mark). The latter is calculated from the marks obtained in one or more of the undermentioned:

(i) Evaluations of theoretical knowledge.
(ii) Evaluations of clinical knowledge and skills.
(iii) Compulsory attendance of and participation in prescribed activities.

The contribution of each modality in the calculation of the abovementioned mark is set out in the regulations and published in the study guides. The details are explained in detail to the students concerned before commencement of the modules. Likewise, also the weight allocated to the abovementioned marks and the various examination marks when calculating the final block mark awarded to the student, which varies between 50:50 and 40:60 according to the field of study, year of study and programme-specific compilation.

The importance of continuous evaluation in the assessment of students is non-negotiable, and therefore the marks awarded in these type of evaluations will form part of the final pass mark of all modules/subjects.

The pass mark for essays is at least 50%. The stipulations of General Regulation G.60.2.1.2(a) regarding requirements for dissertations apply mutatis mutandis to essays.

For requirements regarding the abovementioned, consult Reg. M.1(b), as well as the study manual of a given block.
(e) **Academic exclusion from further study**

(i) In accordance with the stipulations of General Regulation G.3.2(b), re-registration of a student is permitted only if the student completes the degree programme for which he or she is registered within the prescribed minimum period of study plus two years.

(ii) In the case of the MBChB degree offered by the School of Medicine, a student who fails a year of study for a second time, must apply, in writing, to the Readmission Committee of the School chaired by the Chairperson of the School, for readmission to the programme.

(iii) The Committee in question will take all factors into consideration and its decision and conditions will be final.

(f) **First year of study**

*Consult foregoing par. 5 under GENERAL ACADEMIC INFORMATION in this publication.

**Consult foregoing par. 4 under GENERAL ACADEMIC INFORMATION in this publication.

***Consult foregoing par. 1.2 under GENERAL ACADEMIC INFORMATION in this publication, for the minimum achievement required in certain matriculation subjects in the final Grade 12 examination, with a view to admission to these modules.

**NB:**
The first semester of the syllabus for the year module PHY 181, is identical to that of PHY 131 mentioned above.

(ii) **Failed candidates/Admission to the second semester of MBChB I**

Selected first-year students, who have passed in sufficient prescribed first-semester modules at 100 level will, in accordance with the stipulations of General Regulation G.3, automatically be admitted to the second semester of the first year of study.

During the second semester, the students may be admitted to an examination on an anti-semester basis in the first-semester modules still outstanding, if this can be accommodated in the timetables.

In the School of Medicine, a student may not repeat first-semester modules comprising more than 8 lectures per week on an anti-semester basis in the second semester.

(iii) **Block examinations and second examinations**
Consult Reg. M.1(b).

(iv) **Failed candidates/Admission to MBChB II**

(aa) A student must pass all the modules prescribed for MBChB I, for admission to MBChB II.

(bb) Students who take the maximum allowable number of first-semester modules on an anti-semester basis in the second semester, must pass a second examination in the modules in question prior to commencement of the second year of study. Should a student pass in these modules, the fact that the modules were failed in the first semester, will not affect his or her admission to MBChB II.

(cc) None of the second-semester blocks and special activities of MBChB I are presented on an anti-semester basis.

(dd) ALL students who fail the first year of study for the MBChB degree, forfeit their selection and must apply, in writing, for readmission to the MBChB degree programme. Also consult Reg.M.1(c) regarding students who fail certain blocks in a year and therefore the year of study.

(g) **Admission to the second year of study**
A student must pass all the modules prescribed for the first year of study before admission to the second year of study.

(h) **Second year of study**

(ii) **Block examinations and second examinations**
Consult Reg. M.1(b).

(iii) **Failed candidates/Admission to MBChB III**
(aa) Students must pass in all the prescribed modules for MBChB II for admission to MBChB III.
(bb) Students who fail one block, may repeat the MBChB II year* without forfeiting his/her selection.
(cc) Students who fail two blocks, but who have not failed a block before, may repeat the MBChB II year*, without forfeiting his/her selection.
(dd) Students who fail three or more blocks, are automatically excluded from the programme.
(ee) Students who have failed MBChB I and subsequently also MBChB II (notwithstanding the number of blocks involved), are automatically excluded from the programme.
(ff) Students who are excluded from the programme, will again be subjected to selection with a view to readmission to MBChB II.

*Consult Reg. M.1(c) regarding students who fail certain blocks and therefore have to repeat the year of study.

(i) **Admission to the third year of study**
A student must pass all the modules prescribed for the second year of study for admission to the third year of study.

Block 18 (GNK 585) Pharmacotherapy 585 is preceded by two study weeks, namely Block 18a in the 2nd year, 2nd semester and Block 18b in the 4th year, 2nd semester.

**Note:** Marks obtained in the morning rotations are taken into account with the relevant block marks.

**Second semester**
Consult par. (o) regarding the commencement of the Student Intern Complex (SIC) at the beginning of the second semester of the fifth year of study.

(ii) **Block examinations and second examinations**
Consult par. (iii) below.

(iii) **Failed candidates**

(aa) At the end of the first semester of the fifth year of study, students will sit examinations in each block in which they have not been promoted. A second examination will take place immediately after commencement of the SIC. Successful students obtain SIC status and may continue with the SIC.

(bb) Students who fail the examination as well as the second examination in one block or more (and therefore fail the semester) may not continue with the SIC but participate in a remedial programme, which will take place during the first seven weeks of the second semester.

(cc) A second examination will be granted in the outstanding blocks at the end of the seven-week period.

(dd) Unsuccessful completion of the morning rotations during the first semester of the fifth year of study prevents a student from promoting the relevant block(s) and examination will become compulsory.

(ee) If the students pass in the second examination, they may join the SIC as from the second seven-week rotation period.

(ff) If a student again fails the second examination, the rest of the year of study will be used as remediation. In January of the subsequent year, students may commence provisionally with the SIC, but will have to interrupt the SIC for the duration of the unsuccessful block when it is presented in the first semester. Students will then have to repeat the block. Successful students then continue with the SIC.

(o) **Admission to the Student Intern Complex (SIC):**

Second half of the fifth year of study, and the sixth year of study

(i) For admission to the SIC, a student is required to pass in all the examination modules and morning rotations of the first semester of the fifth year of study.

(ii) **Rotations and end-of-rotations examinations (first examinations) and end-of-semester examinations (second examinations)**

(aa) Training in the SIC extends over 18 months. Rotations take place over a period of 63 weeks in three semesters.

(bb) All students who are involved, will enjoy the same rank of seniority and will be known as **student interns**; i.e. no differentiation will in this case be made between the status of the fifth-year and sixth-year student concerned.

(cc) A rotation extends over seven weeks, and every three rotations are grouped together in a logical manner in the three semester divisions of the SIC.

(dd) The semester rotations are divided as follows:
## Student Intern Complex (SIC) (18 months)

*SA13 Diagnostic laboratory medicine is followed by two study days, namely SA13a in the 6th year, 2nd semester.

(ee) End-of-rotation examinations are held at the end of every seven-week rotation. Students who obtain a final mark of at least 60%, are promoted in the rotation and need not sit the end-of-semester examination in that rotation.

- In the first semester, this examination will be held three times (22-23 students in the first semester of their sixth year of study).
- In the second semester, this examination will also be held three times (approximately 45 students), i.e. students in the second semester of both the fifth and the sixth year of study.

(ff) End-of-semester examinations are held in the relevant rotations of the semester of a SIC in which students have performed unsatisfactorily (i.e. less than 60%).

Students who fail these examinations, will not be admitted to the rotations of the subsequent semester and will be required to repeat and pass the unsuccessful rotation(s). (Further details in this regard appear in par. (p))

(gg) During the first semester of the sixth year of study, two lecturing periods of two weeks each will be devoted to the following:

**GNK 689:** Diagnostic laboratory medicine
- Image-forming medicine
- Evidence-based medicine
- Bioethics

(p) **Rotation(s) failed or not promoted in**

(i) A student intern who fails a seven-week rotation or rotations for the first time (i.e. the end-of-rotation examination) or is not promoted in the rotation(s) in question, sits the end-of-semester examination in the rotation(s) in question. If successful in the second examination, he or she continues with the rotations of the following semester. If unsuccessful, the relevant rotation(s) must be repeated at the first opportunity in the next semester. The nature of such repetition must be regarded as remedial and it ends with the next end-of-rotation examination.

(ii) The end-of-rotation examination for such student interns serves as the next official examination and must, as such, be monitored by external examiners. A pass mark of at least 50% is required.

(iii) Student interns who pass the end-of-rotation examination, continue with the next “semester rotations” and may rejoin their original group for the duration of the rest of the SIC. The third rotation of the semester will then again be out of phase.

(iv) Student interns who fail the end-of-rotation examination again (i.e. first
Health Sciences 2014

examination), routinely continue with the next rotations or semester activity as applicable according to the number of rotations failed. Such student interns will complete the unsuccessful rotations at the end of the training period, after all other rotations have been passed.

(v) The sixth year of study may be failed twice, provided that no previous year has been failed. This means that there is a total of seven semesters available for the sixth year of study to a student intern who has not failed any previous year of study.

(q) **Degree with distinction**
The degree is conferred with distinction on a student who has obtained an average of at least 75% in the Student Intern Complex rotations.

<table>
<thead>
<tr>
<th>M.2 Bachelor of Science in Medical Sciences [BSc (Medical Sciences)]</th>
</tr>
</thead>
</table>

**Note:**
As from 2004, the BSc (Medical Sciences) degree programme was transferred to the Faculty of Natural and Agricultural Sciences. The subjects Anatomy and Physiology are, however, still presented by the Faculty of Health Sciences.

<table>
<thead>
<tr>
<th>M.2A Bachelor of Clinical Medical Practice [BClinical Medical Practice] (Code 10130011)</th>
</tr>
</thead>
</table>

Also consult the General Regulations.

**Note:**
- A selection of candidates takes place (see General Information).
- Each student must apply to the Registrar of the Health Professions Council of South Africa for registration as a student in Clinical Medical Practice, immediately after admission to the first year of study.
- After obtaining the degree, graduates must also register with the Health Professions Council of South Africa.

(a) **Requirements for admission**
A National Senior Certificate with admission for degree purposes, with English and Mathematics, passed with at least a rating of 4 (50%-59%).

(b) **Duration and programme design**
Three years of full-time study. The integrated outcomes-based, problem-oriented degree programme consists of theoretical modules and clinical rotations.

(c) **Passing a module in the BClinical Medical Practice degree programme**
(i) A **module mark** is calculated from the continuous evaluation opportunities during the course of the presentation of the module in question. These evaluations shall include one or more of the following:
   (aa) Evaluations regarding theoretical knowledge.
   (bb) Evaluations regarding clinical knowledge and skills.
   (cc) Compulsory attendance at and active participation in prescribed activities.
   (dd) Compulsory attendance at all academic support activities for the first two years of study.

(ii) Students may exercise the option to have the module mark at the **end of the year** validated as the **final module mark** for the module in question (i.e. they
are exempted from the module examination for this module), provided that they comply with the following requirements:

(aa) The abovementioned module mark is more than 60% in all the different module assessments (with the exception of the Anatomy module that is more than 65%).

(bb) Proven attendance at all applicable module-specific activities, namely:
   • All tests/continuous evaluations.
   • All practicals and morning ward-round activities.
   • All relevant skills laboratory activities.
   • All relevant community-based education activities.
   • All clinical rotations.

(cc) A pass mark in the clinical rotation test.

(dd) Attendance at the module in question from day 1.

(ee) No conviction by the Faculty Preliminary Disciplinary Committee (Student offences) of any form of dishonesty or fraud.

(iii) A module examination is granted to all registered students regardless of the module mark, subject to adequate attendance at and active participation in prescribed clinical activities as set out in Reg. M.2A.4.

(iv) The final module mark is calculated from the module examination mark and the module mark (continuous evaluation) in a 50:50 ratio, depending on the year of study and/or module-specific regulations. The formula according to which the final module mark is calculated will be set out in the study guide and communicated to students at the commencement of the programme.

(v) In order to pass in a module, a subminimum of 40% is required in the written section of the module examination. In order to pass in a module in which a clinical component is included, a subminimum of 50% in the clinical component of the module examination is also required.

(vi) A second examination in a module will be granted to all students who fail the module in question.

(vii) As a rule, the second examination in question will take place in November/December of the same year, or in January of the following year. A minimum of 50% is required in order to pass in the second examination.

(viii) An aegrotat or extraordinary examination granted to a student who could not participate in the module examination due to illness or other acceptable reasons, will take place during the second examination period. Students must apply formally for such an examination, and admission to the examination is approved by the Chairperson of the School or his/her authorised representative. Where applicable, the Chairperson of the School may first require a recommendation from the Faculty Health Committee before approving an application for admission to an aegrotat. All modalities of a final examination must be completed jointly as an aegrotat or an extraordinary examination, even if part of it has already been completed as part of the examination sat in the previous examination period. The final module mark is calculated from the marks of all the divisions/modalities of the aegrotat or extraordinary examination and the module mark in question (continuous evaluation mark). The same criteria set for a final mark in a module, are applicable in this case.

Note: No special dates will be arranged for an aegrotat/extraordinary examination. These examinations will only take place on the scheduled dates for regular first/second examinations.

(ix) Aegrotat/extraordinary tests are not allowed for the BClinical Medical Practice degree programme. However, students who have acceptable
Health Sciences 2014

reasons for being absent from no more than one test will have a module mark calculated from the other continuous assessment opportunities. Students who have acceptable reasons for being absent from more than one test will, of course, have no module mark, and a pass in the module(s) will depend totally upon the module examination mark.

(d) Examinations and pass requirements

(i) In accordance with the stipulations of General Regulation G.10(2), no minimum year or semester mark is required for admission to the examination. Adequate attendance at (more than 90%) and active participation in prescribed clinical activities as recorded in the clinical logbook are required for admission to the examination.

(ii) A final module mark in the relevant module is, however, calculated from the module examination mark as well as the module mark compiled from continuous evaluation during the presentation of the module (i.e. the semester, year or module mark). The latter is calculated from the marks obtained in one or more of the undermentioned:

(aa) Evaluations of theoretical knowledge.
(bb) Evaluations of clinical knowledge and skills.
(cc) Compulsory attendance at and participation in prescribed activities.
(dd) Compulsory attendance at all academic support activities for the first two years of study.

(iii) The contribution of each modality in the calculation of the abovementioned mark is set out in the regulations and published in the study guides. The details are explained in detail to the students concerned before commencement of the modules. Likewise, also the weight (50:50) allocated to the abovementioned marks and the various examination marks when calculating the final module mark awarded to the student. The importance of continuous evaluation in the assessment of students is non-negotiable, and therefore the marks awarded in this type of evaluations will form part of the final pass mark of all modules.

(iv) A student repeating the first or second year of study will retain credit for Clinical Medical Practice modules passed previously, subject to the following:

(aa) The student will be required to participate adequately in the current year in the clinical component of all Clinical Medical Practice modules in order to maintain a specified level of clinical skills and be required to record such activities in an appropriate clinical logbook.

(bb) Compliance with (aa) is a requirement for the admission to subsequent CMP modules.

(cc) In order to comply with the requirements for (aa), the extent of involvement of students in successfully completed modules is determined by the relevant course coordinator, at the commencement of the year, and agreed with the student(s) concerned.

(e) Academic exclusion from further study

(i) In accordance with the stipulations of General Regulation G.3.2(b), re-registration of a student is permitted only if the student completes the degree programme for which he or she is registered within the prescribed minimum period of study plus two years.

(ii) In the case of the BClinical Medical Practice degree offered by the School of Medicine, a student who fails a year of study for a second time must apply, in
writing, to the Readmission Committee of the School, chaired by the chairperson of the School, for readmission to the programme.

(iii) The committee in question will take all factors into consideration and its decision and conditions will be final.

(i) **Module examinations and second examinations**

As set out in Reg. M.2A.3.

(ii) **Failed candidates/Academic exclusion from further study**

Consult Reg. 2A.5 in respect of a student who does not complete the degree programme within the prescribed minimum period of study plus two years.

(g) **Degree with distinction**

The degree is conferred with distinction on a student who has obtained an average of at least 75% in the clinical modules of the second and third years of study.
M3 Master of Medicine [MMed]

Regulations and curricula

Please note:
(i) All MMed students must register for, and attend (TNM 800) Applied research methodology 800 satisfactorily.
(ii) All MMed students must submit an essay (MMS 800) which must be assessed as satisfactory by an external examiner, or an article that has been accepted for publication in a subsidised periodical. An ordinary literature review will not be accepted.
(iii) A systematic literature review (Cochrane type) on an approved subject, which is undertaken in such a manner that bias is minimised, may be presented as an alternative to the dissertation for awarding the MMed (Public Health Medicine) degree. It requires, inter alia, a protocol with clearly formulated objectives and methods. Inclusion and exclusion methods for the study must be determined. Where applicable, the data must be summarised (meta analysis), with applicable statistical methods. This alternative is in special cases applicable to other MMed degrees.

The MMed degree is conferred in the following fields:
(i) Anaesthesiology – [MMed(Anaes)]
(ii) Surgery – [MMed(Sur)]
(ii)(a) Option: Paediatric Surgery
(iii) Dermatology – [MMed(Derm)]
(iv) Physical Medicine – [MMed(MedPhys)] [Discontinued until further notice]
(v) Emergency Medicine – [MMed(Emergency Med)] – see Note below
(vi) Family Medicine – [MMed(Family Medicine)]
(vii) Geriatrics – [MMed(Geriat)]
(viii) Internal Medicine – [MMed(Int)]
(ix) Medical Oncology – [MMed(MedOnc)] – see Note below
(x) Nuclear Medicine – [MMed(NuclMed)]
(xi) Paediatrics – [MMed(Paed)]
(xii) Neurosurgery – [MMed(NeurSur)]
(xiii) Neurology – [MMed(Neur)]
(xiv) Obstetrics and Gynaecology – [MMed(O et G)]
(xv) Ophthalmology – [MMed(Ophth)]
(xvi) Otorhinolaryngology – [MMed(ORL)]
(xvii) Orthopaedics – [MMed(Orth)]
(xviii) Pathology – [MMed(Path)]
(xix) Plastic Surgery – [MMed(PlastSur)]
(xx) Psychiatry – [MMed(Psych)]
(xxi) Radiological Diagnostics – [MMed(Rad-D)]
(xxii) Radiation Oncology – [MMed(Rad-Onc)]
(xxiii) Thoracic Surgery – [MMed(ThoracSur)]
(xxiv) Urology – [MMed(Urol)]

Note:
• Inquire at the Head of Department regarding the availability of registrarships for the specialisation Medical Oncology.
• Inquire at the Head of the Department of Family Medicine regarding the availability of registrarships for the specialisation Emergency Medicine.
(a) **Requirements for admission**

A prospective student for the MMed degree programme must be in possession of the MBChB degree of this University, or a qualification deemed by the University to be equivalent to the MBChB degree, for at least two years. In addition, such a student must be registered as a physician with the Health Professions Council of South Africa for at least one year.

(b) **Duration**

(i) The training for the degree extends over four or five years in accordance with the requirements of the department under which the chosen major subject falls.

(ii) “Major subject” refers to the recognised field of study in Medicine in which the student specialises. The study of the major subject extends over four or five years, as prescribed by the department in question.

(c) **Each student must prove to the University that he or she**

(i) has successfully filled the required full-time training post for a period of four or five years according to the requirements of the department in question at the Steve Biko Academic Hospital or Kalafong Hospital or at an institution recognised by the University as equivalent;

(ii) has completed the theoretical, practical, clinical and applicable training as stipulated in Reg. M.3 (b) above; and

(iii) has passed the prescribed written, oral, practical and/or clinical university examinations.

(d) **Exemption**

(i) The Faculty Board may grant partial exemption from the training and work mentioned under par. (b) and (c)(i) and (ii) above on the grounds of comparable training and experience completed in another post or at another recognised institution – with the proviso that exemption from a maximum period of 18 months may be granted with regard to four-year and five-year programmes.

(ii) Exemption from a maximum of three years may be granted by the Department of Medical Oncology for the MMed in Medical Oncology [MMed(MedOnc)] on the grounds of the MMed(Int) or MMed(Paed) degree of this University, or experience recognised by the University as equivalent.

(iii) All prerequisite subjects, indicated with an asterisk (*), must be passed within 24 months after commencement of the programme.

(iv) Exemption from a maximum of two years’ clinical training may be granted in the Department of Forensic Medicine in respect of the MMed(Path) degree with specialisation Forensic Pathology, to a candidate already in possession of an MMed degree (or a degree deemed equivalent by the University) with specialisation in Anatomical Pathology.

(e) **Rules governing the writing of the examinations of the College of Medicine of South Africa [CMSA]**

(i) Only candidates who have met all requirements for the MMed degree except for the major subject (final examination), i.e. passed all prerequisite subjects (the latter to be interchangeable; can be passed either at the University or as primary and intermediary examinations at the College of Medicine of South Africa [CMSA], completed all practical, clinical and applicable training of four or five years as prescribed by the relevant academic department (continuous
evaluation of the candidate, in an approved registrar post, by the Head of department of the candidate); and completed the required research component for the degree in accordance with the Faculty Yearbook regulations, i.e. Applied research methodology 800 (TNM 800) and the essay (MMS 800) or an article (not an ordinary literature review) that has been accepted for publication in a subsidised periodical, will be allowed to write the college examination (exit examination), after which they will obtain both the FCP and the MMed as specialist qualifications.

(ii) The rules will be effective as from 1 January 2012. As a transitional measure, cases will be considered on an individual basis where necessary.

(f) **Curricula**

The curriculum consists of a major subject and its prerequisites:

(i) **Anaesthesiology (Code 10250011)**

Major subject: ANE 801 Anaesthesiology 801.
Prerequisites: FSG 801 Physiology 801*; CHP 805 Chemical pathology 805*; FAR 802 Pharmacology 802*; FSK 808 Physics 808*.
Duration of training: Four years.

(ii) **Surgery (Code 10250021)**

Major subject: CHR 800 Surgery 800
Prerequisites: ANA 802 Anatomy 802*; FSG 801 Physiology 801*; ANP 802 Anatomical pathology 802*; BVC 800 Principles of surgery 800 (Neurosurgery, Orthopaedics, Plastic surgery, Thoracic surgery, Urology).
Duration of training: Five years.

**Option: Paediatric Surgery (Code 10250023)**

Major subject: CHR 805 Paediatric surgery 805
Prerequisites: ANA 802 Anatomy 802*; FSG 801 Physiology 801*; ANP 802 Anatomical pathology 802*; BVC 800 Principles of surgery 800 (Neurosurgery, Orthopaedics, Plastic surgery, Thoracic surgery, Urology, Paediatric ICU).
Duration of training: Five years.

(iii) **Dermatology (Code 10250031)**

Major subject: DER 800 Dermatology 800.
Prerequisites: PAG 804 Pathology 804 (Anatomical, Microbiological, simultaneously with the major subject); ANA 807 Anatomy 807*; FSG 801 Physiology 801*.
Duration of training: Four years.

(iv) **Physical Medicine (Code 10250081)**

Discontinued until further notice.

(v) **Emergency Medicine (10250392)**

Major subject: NGK 801 Emergency medicine 801
Prerequisites: ANA 802 Anatomy 802, FSG 801 Physiology 801, FAR 880 Pharmacology 880, PAG 880 Pathology 880.
Duration of training: Four years.

**Note:** Inquire at the Head of the Department of Family Medicine regarding the availability of registrarships.
(vi) **Family Medicine (10250401)**
Major subject: HAK 800 Family medicine 800
Prerequisites: AEH 801 Anatomy, embryology and histology 801; FSG 809 Physiology 809; DLM 807 Diagnostic laboratory medicine 807.
Duration of training: Four years.

(vii) **Geriatrics (Code 10250041)**
Major subject: GER 800 Geriatrics 800.
Prerequisites: PAG 806 Pathology 806 (Chemical, Anatomical, Microbiological); ANA 893 Anatomy 893*; FSG 801 Physiology 801*; FAR 804 Pharmacology 804.
Duration of training: Four years.

(viii) **Internal Medicine (Code 10250051)**
Major subject: IGK 800 Internal medicine 800
Prerequisites: ANA 800 Anatomy 800*; FSG 801 Physiology 801*
Attendance courses: (simultaneously with the major subject); FAR 806 Pharmacology 806; PAG 808 Pathology 808 (Anatomical, Chemical, Haematological, Microbiological).
A certificate issued by the Head of Department must be submitted as proof that the student is well qualified in research methodology before the degree is conferred.
Duration of training: Four years.

(ix) **Medical Oncology (Code 10250163)**
Major subject: MDN 801 Medical oncology 801
Prerequisites: ANA 800 Anatomy 800, FSG 801 Physiology 801, FAR 806 Pharmacology 806, PAG 808 Pathology 808 (Anatomical, Chemical, Haematological, Microbiological).
Duration of training: 5 years, or
3 years MMed(Int) + 2 years MMed(MedOnc) = 5 years
Inquire at the Head of Department regarding the availability of registrarships for this specialisation.

(x) **Nuclear Medicine (Code 10250381)**
Major subject: KDE 801 Nuclear medicine 801
Prerequisites: ANA 809 Anatomy, 809 FSG 801 Physiology 801*; KDE 802 Nuclear physics 802*; PAG 801 Pathology 801* (Chemical and Haematological), RCF 800 Radiobiology, chemistry and pharmacology 800.
Duration of training: Four years (of which at least six months’ ward rounds in Radiological Diagnostics). If a student specialises in Nuclear Medicine after having obtained the MMed in Radiological Diagnostics, Radiation Oncology or Internal Medicine, the duration will be three years.

(xi) **Paediatrics (Code 10250121)**
Major subject: KGE 800 Paediatrics 800

The degree requirements consist of the following components:
(aa) Successful completion of the primary subjects for the MMed(Paed):
- Successful completion of the College of Paediatricians Fellowship Examination Part 1

or
- ANA 805 Anatomy 805*; FSG 801 Physiology 801*; PAG 802 Pathology 802* (Chemical pathology, Anatomical pathology, Haematology, Microbiology).

(bb) Final Professional Theoretical and Clinical Examination: Provided that a student may be exempted from writing this examination if he/she has passed the Final Fellowship Examination of the College of Paediatricians of South Africa [FC Paed (SA)] within the previous two years
Duration of training: Four years.

(xii) **Neurosurgery (Code 10250191)**
Major subject: NCR 800 Neurosurgery 800
Prerequisites: ANA 894 Anatomy 894*; FSG 801 Physiology 801*; ANP 875 Anatomical pathology 875*; BVC 801 Principles of surgery 801* (Surgery, Urology, Neurosurgery, Orthopaedics, Plastic surgery, Thoracic surgery).
Duration of training: Five years.

(xiii) **Neurology (Code 10250091)**
Major subject: NRE 800 Neurology 800.
Prerequisites: PAG 805 Pathology 805* (Anatomical, Chemical, Microbiological); ANA 891 Anatomy 891*; FSG 801 Physiology 801*.
Duration of training: Four years.

(xiv) **Obstetrics and Gynaecology (Code 10250101)**
Major subject (Final examination): OEG 800 Obstetrics and gynaecology 800.
Prerequisite subjects (Primary examination): ANA 803 Anatomy 803*; FSG 801 Physiology 801*.
In addition to the prerequisite subjects mentioned, also (OEG 801) Additional examination: Basic sciences 801 (examination on aspects from the basic sciences, as applicable to Obstetrics and Gynaecology).
Prerequisite subject (Intermediary examination): ANP 803 Anatomical pathology 803*.
Duration of training: Four years.

(xv) **Ophthalmology (Code 10250111)**
Major subject: OHK 800 Ophthalmology 800.
Prerequisites: ANP 871 Anatomical pathology 871*; ANA 876 Anatomy 876*; FSG 801 Physiology 801*; GMO 800 Geometrical optics 800*.
Duration of training: Four years.

(xvi) **Otorhinolaryngology (Code 10250361)**
Major subject: ONK 800 Otorhinolaryngology 800.
Prerequisites: ANP 870 Anatomical pathology 870*; ANA 875 Anatomy 875*; FSG 801 Physiology 801*; BVC 807 Principles of surgery 807.
Duration of training: Four years.

(xvii) **Orthopaedics (Code 10250201)**
Major subject: ORT 800 Orthopaedics 800.
Prerequisites: ANA 895 Anatomy 895*; FSG 801 Physiology 801*; ANP 879 Anatomical pathology 879; BVC 802 Principles of surgery 802 (Surgery, Urology, Neurosurgery, Orthopaedics, Plastic surgery, Thoracic surgery).
Duration of training: Five years.
(xviii) **Pathology**

(1) **Clinical Pathology (Code 10250241)**
Major subject: MBG 800 Microbiology 800; CHP 802 Chemical pathology 802; HEM 801 Haematology 801.
Prerequisites: APA 800 General pathology 800 (of which six months in each of Microbiology, Chemical pathology and Haematology).
Duration of training: Five years with at least 18 months in each major subject.

(2) **Anatomical Pathology (Code 10250251)**
Major subject: ANP 800 Anatomical pathology 800.
Prerequisites: ANP 801 Anatomical pathology 801, ANA 800 Anatomy 800.
Satisfactory progress after 18 months of training is required, as evaluated by the applicable examination panel.

(3) **Medical Microbiology (Code 10250261)**
Major subject: GMB 800 Medical microbiology 800
Prerequisites: GMB 801 Medical microbiology 801, or capita selecta from Anatomical pathology (APY 871), Chemical pathology (CHP 871), Haematology (HEM 871), Medical virology (GVR 871) – as approved in consultation with the heads of department in question.
Satisfactory progress after one year of training is required, as evaluated by the applicable examination panel.

(4) **Chemical Pathology (Code 10250271)**
Major subject: CHP 800 Chemical pathology 800.
Prerequisites: FSG 801 Physiology 801, CHP 801 Chemical pathology 801, or capita selecta from Anatomical pathology (APY 871), Haematology (HEM 871), Medical microbiology (GMB 871), Medical virology (GVR 871) – as approved in consultation with the heads of department in question.
Satisfactory progress after one year of training is required, as evaluated by the applicable examination panel.

(5) **Haematology (Code 10250281)**
Major subject: HEM 800 Haematology 800.
Prerequisites: FSG 801 Physiology 801, HEM 801 Haematology 801, or capita selecta from Anatomical pathology (APY 871), Chemical pathology (CHP 871), Medical microbiology (GMB 871), Medical virology (GVR 871) – as approved in consultation with the heads of department in question.
Satisfactory progress after one year of training is required, as evaluated by the applicable examination panel.

(6) **Medical Virology (Code 10250391)**
Major subject: GVR 800 Medical virology 800.
Prerequisites: GVR 801 Medical virology 801, or capita selecta from Anatomical pathology (APY 871), Chemical pathology (CHP 871), Haematology (HEM 871), Medical microbiology (GMB 871) – as approved in consultation with the heads of department in question.
Satisfactory progress after one year of training is required, as evaluated by the applicable examination panel.

Duration of training: Four years, of which at least three years must be in the major field of study. The fourth year can either be in the major subject or in any combination of the other Pathology specialisations.
(7) **Forensic Pathology (Code 10250272)**
Major subject: GGK 800 Forensic medicine 800
Prerequisites: ANA 800 Anatomy 800, FSG 801 Physiology 801, FAR 803 Pharmacology 803, ANP 874 Anatomical pathology 874.
Duration of training: Four years.

(xix) **Plastic Surgery (Code 10250211)**
Major subject: PCR 800 Plastic surgery 800.
Prerequisites: ANA 896 Anatomy 896*; FSG 801 Physiology 801*; ANP 876 Anatomical pathology 876*; BVC 803 Principles of surgery 803 (Neurosurgery, Orthopaedics, Plastic surgery, Thoracic surgery, Urology, Surgery).
Duration of training: Five years.

(xx) **Psychiatry (Code 10250141)**
Major subject: PSI 800 Psychiatry 800.
Prerequisites: ANA 804 Anatomy 804*; FSG 801 Physiology 801*; ANP 872 Anatomical pathology 872*; MTS 801 Medical applied psychology 801*; NRE 801 Neurology 801.
Duration of training: Four years.

(xx) **Radiological Diagnostics (Code 10250151)**
Major subject: RDD 800 Radiological diagnostics 800.
Prerequisites: ANP 807 Anatomical pathology 807 (simultaneously with the major subject at the end of the fourth year); ANA 808 Anatomy 808*; FSG 801 Physiology 801*; MFK 800 Medical physics 800*.
Duration of training: Five years.
If this specialisation is followed after having obtained the MMed (Radiation Oncology), the duration of the programme will be three years.

(xx) **Radiation Oncology (Code 10250162)**
Major subject: SOZ 800 Radiation oncology 800 (including Medical oncology).
Prerequisites: ANP 809 Anatomical pathology 809; ANA 809 Anatomy 809*; FSG 801 Physiology 801*; MFK 801 Medical physics 801* (must be completed within 18 months), RBG 801 Radiobiology 801 (must be finalised within 30 months).
Duration of training: Four years. If this specialisation is followed after having obtained the MMed in Radiological Diagnostics, the duration of the programme will be three years.

(xxiii) **Thoracic Surgery (Code 10250231)**
Major subject: TCR 800 Thoracic surgery 800.
Duration of training: Five years.

(xxiv) **Urology (Code 10250221)**
Major subject: URO 800 Urology 800.
Prerequisites: ANA 897 Anatomy 897*; FSG 801 Physiology 801*;
ANP 877 Anatomical pathology 877*; BVC 804 Principles of surgery 804
Duration of training: Five years.

(g) Examinations
(i) The sequence of the examinations in the prerequisite subjects will be
determined by the head of the department under which the major subject falls.
(ii) The nature, duration and time of the examinations in the prerequisite subjects
are determined in cooperation with the heads of the departments under which
the prerequisite subjects fall – with the proviso that, except in cases where
stipulated otherwise, the examinations in the prerequisite subjects may be
held at any time prior to or concurrently with the major subject. The
examinations in the major subjects are held as follows:
• In the case of four-year programmes: not before the end of the third year.
• In the case of five-year programmes: not before the end of the fourth
year.
(iii) A minimum final mark of 50% is required by all departments to pass in a
subject and in the clinical section of the examination, a subminimum of 50%.
General Regulation G.12 applies.
(iv) A student is not admitted to the examination in a prerequisite subject (second
examinations excluded) more than twice, nor is he or she admitted to the
examination in the major subject more than twice.

Note: Certificates of satisfactory preparation and progress are required in respect
of the fourth year of four-year programmes in which an examination is held at the
end of the third year.

(h) Second examinations
Second examinations for MMed students will only be held after at least six months
have elapsed since the conclusion of the examination in which the student had
failed.

(i) Conferment of the degree/Degree with distinction
The degree is conferred at the end of the prescribed training period (i.e. three, four
or five years, respectively). The degree is conferred with distinction on a student
who has obtained a final mark of at least 75% in his or her major subject.

(j) General
Departments expect registrars to participate increasingly in the examining and
treatment of patients in the hospital, both in-patients and out-patients; initially under
supervision and later increasingly at their own responsibility. Lectures/symposia
with closely related departments are organised, as well as discussions of literature,
etc.

M.4 Master of Medicine in Family Medicine [MMed (Family Medicine)]
Consult Reg.M.3 in this publication.

M.5 Master of Military Medicine [MMilMed]
(Code 10255001)
Also consult the General Regulations.
(a) **Requirement for admission**
Candidates must be in possession of the MBChB degree for at least two years.

(b) **Duration**
Three years, of which the first two years will be part-time study, and the final year full-time study as a registrar in the relevant main discipline.

(c) **Curriculum**
Major subject: Military medicine (specialising in either MIG 800 Internal medicine 800 or CHR 800 Surgery 800).
Prerequisites: FSG 801 Physiology 801; VGN 800 Preventive medicine 800; IGK 804 Internal medicine 804; CHR 801 Surgery 801; and RAT 800 Radiotherapy 800.

(d) **Examinations**
(i) The sequence of the examinations in the prerequisite subjects is determined by the head of the department under which the major subject falls.
(ii) The nature, duration and time of the examinations are determined in cooperation with the heads of the departments under which the prerequisite subjects fall – with the proviso that, except in cases indicated differently, the examinations in the prerequisite subjects will be held at any time prior to, or concurrently with the examinations in the major subject.
(iii) To pass in a module, a minimum final mark of 50% is required.
(iv) A student will not be admitted to the examinations in a prerequisite module, or to the examination in the major subject, more than twice (second examinations excluded).

(e) **Second examinations**
Second examinations will take place only after at least six months have elapsed since the conclusion of the examination in which the student failed.

(f) **Degree with distinction**
The degree is conferred with distinction on a student who has obtained a final mark of at least 75% in his or her major subject.

---

**M.6 Master of Medical Pharmacology [MPharmMed]**
(Code 10256001)

Also consult General Regulations.

(a) **Requirements for admission**
A candidate for admission to the study for the MPharmMed degree must be in possession of the MBChB degree of this University or a qualification deemed equivalent by the University, for at least one year. Additionally, the candidate must be registered as a medical practitioner with the Health Professions Council of South Africa.

(b) **Duration**
Three years of part-time study.

(c) **Curriculum**
(i) **First year of study**
   MFM 801 Medical pharmacology 801
MBS 800 Medical biostatistics 800
FFD 801 Pharmacokinetics and pharmacodynamics 801
WKT 881 Practical work and work assignments 881

(ii) **Second year of study**
MFM 802 Medical pharmacology 802
FFD 802 Pharmacokinetics and pharmacodynamics 802
WKT 882 Practical work and work assignments 882
NAV 882 Research report (Preparation) 882

(iii) **Third year of study**
MFM 803 Medical pharmacology 803
FFD 803 Pharmacokinetics and pharmacodynamics 803
WKT 883 Practical work and work assignments 883
NAV 883 Research report 883

(d) **Examinations**
(i) The examinations for each year of study will take place during the summer examination period.
(ii) To pass in a module, a minimum final mark of 50% is required.
(iii) In addition to the examination, a student will be required to complete all practical work and work assignments satisfactorily, as well as (NAV 882) Research report (Preparation) 882 and pass (NAV 883) Research report 883 (minimum pass mark 50%), in order to comply with all the requirements for the degree.
(iv) Second examinations will not be held before at least six months have elapsed since conclusion of the examination in which the student failed.

(e) **Degree with distinction**
The degree will be conferred with distinction on a student who has obtained a final mark of at least 75% in the following modules:
(i) Medical pharmacology 802 and 803
(ii) Pharmacokinetics and pharmacodynamics 802 and 803, as well as a final mark of at least 75% for (NAV 883) Research report 883 in the final year of study.

Also consult General Regulations.

(a) **Requirements for admission**
A bachelor honours degree or equivalent in a field of relevance to either mental health or philosophy eg MBChB; BPsych; BAHons; LLB; BCur; BOccTher, is the minimum admission requirement.
Practical experience and/or a relevant master’s degree is strongly recommended e.g. MMed (Psych); MA (Philosophy); MA (Psychology); MA (Sociology) MA (Social Work); MMus (Music Therapy); LLM; MCur, MOccTher.

(b) **Duration**
One year full-time or two years part-time study (with choice of e-learning)

(d) **Examinations and pass requirements**

(i) Students must complete the assignments of each of the core modules and obtain a minimum mark of 50% to pass in the respective core modules.

(ii) The dissertation must consist of five sections of which the first four will respectively address a topic from the core modules. The fifth section will be on an appropriate topic of the student’s choice.

(iii) The first four sections of the dissertation should each be between 5 000 and 6 000 words and the fifth section should be approximately 10 000 words in length.

(iv) A minimum mark of 50% will be required in each section of the dissertation to pass.

(v) A student will be disqualified from further study towards this degree when he or she fails any one of the sections for the third time.

(e) **Degree with distinction**

The degree will be conferred with distinction on a student who obtains a mark of 75% or more for the dissertation.

---

M.8 Master of Philosophy in Pain Management [MPhil (Pain Management)]

(10250501)

Please consult the programme director with regard to commencement of programme.
(Prof HP Meyer tel 012 373 1018)

(a) **Requirements for admission**

Prospective students must have an applicable professional qualification and must be registered with his or her relevant professional board. Appropriate qualifications, together with the required professional board registration, include the following, but are not limited to these qualifications:

MBChB, MMed, BPhysT, BCur, BOccTher and BChD (according to the discretion of the Dean).

The number of students will be restricted to 40 or 50 and selection will take place according to the specific guidelines of the selection procedure.

(b) **Duration**

The programme extends over two academic years with three contact sessions per year, each consisting of 2½ days. A one-day orientation will take place on the day before the first module in year one.
(c) **Curriculum**

(d) **Examination and pass requirements**

(i) An average of at least 50% must be achieved in both the assignments and/or case study presentations to pass a core module. At least 50% must be obtained in the critical evaluation of the elective modules.

(ii) If a student fails to pass or to attend a particular module, a second examination in the form of a written case study assignment based on the relevant module, will have to be submitted within four weeks of the completion of the module, and an oral examination on the content of the module will also take place within these four weeks.

(iii) If this second attempt is also failed, a final re-examination in the form of a written case study assignment and an oral examination will take place within four weeks of the second examination. If this re-examination is failed, the student will not be allowed to continue with the programme.

(iv) If a student cannot fulfil these requirements within eight weeks for valid reasons, he/she may enrol for the module again at the next available opportunity when the module will be presented.

(v) For a student to progress to Year 2, at least two of the three core modules of the first year have to be passed and the protocol of the research project has to be accepted.

(vi) To qualify for the degree, a student has to:
- Attend at least five of the six core modules.
- Pass all six core modules.
- Attend and pass four of the six elective modules.
- Submit and pass the research report.
Degree with distinction
The degree is conferred with distinction on a student who obtains a final mark of at least 75% for his/her research report and has passed all modules at the first attempt.

M.9 Master of Early Childhood Intervention [MECI]
(Code 10258240)

Also consult General Regulations.

(a) Admission requirements
A candidate must be in possession of an applicable four-year professional bachelor’s degree or an equivalent qualification.

(b) Duration
Two years of part-time study through distance education.

(c) Curriculum
Year 1
(The credit value of each module appears in brackets after the module code.)

(d) Promotion to the second year of study
A student must pass the first year of study for admission to the second year of study. Participation as described in the study guide is a requirement for promotion to the second year of study.

(e) Examination and pass requirements
(i) A minimum of 50% is required to pass in a module, and all modules must be passed before the degree will be conferred.
(ii) The nature and frequency of examinations will be determined by the head of department in conjunction with the programme supervisor.

(f) **Second examinations**

Second examinations or regrouping of work assignments will take place within two weeks or a month after conclusion of the examination in which the student failed.

(g) **Degree with distinction**

The degree is conferred with distinction on a student who has obtained an average of at least 75% in all the modules.

M.10 Bachelor of Science Honours [BScHons]

Also consult General Regulations.

(a) **Requirements for admission**

- A candidate must hold a bachelor's degree deemed acceptable by the head of department for the proposed field of study, or an equivalent qualification deemed acceptable by the Senate of the University for the proposed field of study, with at least one applicable biological subject as major subject.
- Admission to the study for an honours degree is subject to the approval of the head of department: with the proviso that a candidate who has obtained an average of less than 60% in the modules of his or her major subject in the final year of the bachelor's degree study, may only be admitted with the Dean's approval, on the recommendation of the head of department. Additional requirements may be set by the head of department.
- The prerequisites for admission to the honours degree in certain fields of study are indicated in the syllabuses of the specific department, e.g. Physiology.
- Consult par (c)(vi) below with regard to special admission requirements for candidates who intend specialising in Physical Anthropology.

(b) **Duration**

- One year of full-time study
- Two years of part-time study

(c) **Curriculum**

(i) The BScHons degree is conferred in the following fields of study:

<table>
<thead>
<tr>
<th>Field of study</th>

</tbody>
</table>
(ii) The following requirements are set:
- Advanced instruction by means of self-tuition and four compulsory seminars of which at least one must be read to and defended before the department in question, on topics assigned to the student.
- Practical experience of the laboratory techniques used in the particular subsections of the subject.
- Attendance at the compulsory faculty module (TNM 800) Applied research methodology 800.
- Attendance at the prescribed module (MBS 800) Medical biostatistics 800.
- Taking part in a research project and presentation of an independent research report.
- Satisfactory attendance at a library-user course.

(iii) The following additional requirements are set for the specialisation Human Physiology:
- Admission requirements
  A minimum average of 60% in the final year (undergraduate) in Physiology.
- Pass requirements
  An average of at least 50% in all the sections of the module MFG 777 is required in order to pass (see syllabi). A minimum continuous evaluation mark of 40% is required for admission to the examination. The continuous evaluation mark is compiled from an average of 3 tests (50%), seminars and discussions on journals (25%), and project and presentation (25%). TNM 800 and MBS 800 must be completed successfully before the degree will be conferred.

(iv) The following additional requirements are set for the specialisation Medical Physics:
- Modules to be taken in the Department of Physics, Faculty of Natural and Agricultural Sciences:
  FSK 710 Mathematical methods 710
  FSK 711 Classical dynamics 711
  FSK 713 Quantum mechanics 713
  FSK 714 Electrodynamics 714
- Modules to be taken in the School of Medicine:
  GNF 700 Medical physics: Practical work 700
  GNF 701 Medical physics: Nuclear medicine 701
  GNF 702 Medical physics: Diagnostic radiology 702
The following additional requirements are set for the specialisation Pharmacology:

Admission requirements
- A minimum average of 60% in Pharmacology at undergraduate level.
- In addition, the modules (FAR 381, 382) Pharmacology 381*, 382* must be completed at the Department of Pharmacology, if not completed at undergraduate level.
*Exemption from the examination in FAR 381, 382 may be granted if a student, who obtained a module mark of at least 60%, exercises the option to accept this as the final mark.

The following additional requirements are set for the specialisation Anatomy, specifically with regard to Physical Anthropology:
- Only students who intend to specialise in Physical Anthropology may, in addition to the requirements set in M.14(a) above, also apply for admission, provided that they are in possession of a BA degree with Archaeology as major subject.
- A minimum average of 60% in the modules of the major subjects in the final year of study, is required.
- The module (ANA 122) Human osteology 122 must be taken additionally.

Examinations
(i) The examination at the end of the programme will consist of two written papers of three hours each as well as an oral examination of 30 minutes.
(ii) For the field of specialisation Medical Physics, one examination of three hours is required in each of the theoretical modules. The mark awarded to the practical work will also be taken into account when the final mark is calculated.
(iii) The maximum period for completion of the honours degree, is two years in the case of full-time students and three years in the case of part-time students. In exceptional circumstances, a student may apply, in writing, to the head of department for an extension of the period of study.
(iv) To comply with the pass requirements for the degree, a student must obtain a final mark of at least 50% in each division as indicated, as well as a pass mark of at least 50% for the essay/work assignment (if applicable). The stipulations regarding pass requirements for dissertations in General Regulation G.60.2.1.2(a) apply mutatis mutandis to essays.

Degree with distinction
The degree is conferred with distinction on a student who has obtained an average of at least 75% in the examination (written, oral, practical, etc).

M.11 Master of Science [MSc]

Also consult General Regulations.

Note:
All MSc students must register for, and attend (TNM 800) Applied research methodology 800 satisfactorily. (Exemption may be granted if the module has already been passed for the BScHons degree.) However, students who follow the
specialisation Pharmacology for the MSc degree, register for (FAR 872) Pharmacology: Introduction to laboratory research and techniques 872, instead of TNM 800.

(a) **Admission requirements**
Subject to the stipulations of General Regulation G.62, a four-year bachelor’s degree is required, or an honours degree, or in the case of a three-year bachelor’s degree, also applicable practical (work) experience as prescribed by the University, plus any other additional work deemed necessary by the head of department: With the proviso that the head of department will have the discretion to decide whether the prerequisite qualification, or the qualification plus work experience would be acceptable for admission to the proposed field of study.

(b) **Duration**
The maximum period for completion of the master's degree is four years. Subject to the stipulations of General Regulation G.32, the Chairperson of the School in question may, in consultation with the head of department, approve a fixed limited extension of the period on the grounds of extraordinary circumstances.

(c) **Research protocol**
After registration, a student is required to submit a complete research protocol regarding the proposed dissertation to the MSc Committee of the School and if necessary, also to the Ethics Committee for approval.

(d) **Dissertation**
A dissertation must be submitted via Student Administration at least three months prior to the date of a particular graduation ceremony. A manual on the editing of dissertations is available on request from the head of the department in question.

(e) **Compliance with degree requirements**
In accordance with the stipulations of General Regulation G.40.1, the MSc degree is conferred by virtue of an examination, or an examination and a dissertation, or an examination and an essay, or a dissertation.

(f) **Degree with distinction**
The degree is conferred with distinction on a student who has obtained an average of at least 75% in the examination, or in the examination and the dissertation, or in the examination and the essay, or in the dissertation.

(g) **Fields of specialisation**
The MSc degree is conferred in the following fields of study:

<table>

* The head of department has the discretion to decide whether the specialisation Radiation Oncology will be presented in a particular year (the number of prospective students applying must justify the presentation of the specialisation in question in a given year).
** Candidates must first consult the Head of the Department of Psychiatry in connection with the offering of this field of specialisation.

(h) The following additional requirements are set for the MSc in Sports Medicine:

(i) **Admission**
A candidate for admission to studies for the MSc in Sports Medicine, must be in possession of the MBChB degree of this University, or a qualification deemed equivalent by the University, for at least one year. Additionally, the candidate must be registered as a physician with the Health Professions Council of South Africa.

(ii) **Curriculum**

</tr>
</tbody>
</table>
(iv) **Degree with distinction**
The MSc in Sports Medicine is conferred with distinction on a student who has obtained at least 75% in (SGN 800) Sports medicine 800 and has completed the work assignment at cum laude level.

(i) The following additional requirements are set for the degree programme **MSc in Medical Applied Psychology** (candidates must, however, first consult with the Head of the Department of Psychiatry as regards the presentation of the specialisation in question):

(i) **Admission requirements**
An appropriate bachelor honours degree. In certain cases, additional modules may be prescribed by the head of department. Only a limited number of students are admitted annually.

(ii) **Curriculum**
- MTS 802 Transcultural practice 802
- MTS 803 Personality theory 803
- MTS 804 Human development 804
- MTS 805 Research methodology 805
- MTS 806 Pathology 806
- MTS 807 Communication theory 807
- MTS 808 Practical work: Medical applied psychology 808
- MTS 890 Dissertation: Medical applied psychology 890

**NB:** Students with previous academic training in Psychology may apply for exemption from certain sections of the programme by virtue of equivalent modules passed at postgraduate level.

---

**M.12 Doctor of Medicine [MD]**

Also consult General Regulations.

**Please note:** All MD students must register for, and attend (TNM 800) Applied research methodology 800 satisfactorily. (Exemption may be granted if Applied research methodology 800 has already been passed for the master's degree.)

(a) For admission to the study for the MD degree, a candidate must be in possession of the MMed or the PhD degree, or a qualification of equivalent status following a MBChB degree – in the case of Family Medicine, the MMed in Family Medicine; and in the case of Pharmacology, the MPharmMed degree of the University of Pretoria. Alternatively, the student must comply with the stipulations as set out in General Reg. G.45.

(b) The MD degree is conferred by virtue of a thesis and, if the Dean deems it necessary, an examination on the field of study of the thesis.

(c) A complete research protocol regarding the proposed thesis (as well as the curriculum vitae of the candidate) must be submitted for approval to the Postgraduate Committee and if necessary, also to the Ethics Committee. The thesis must deal with a problem from any field of study in Medicine and must satisfy the supervisor and the examiners that it represents advanced original research and/or creative work in the field of Medicine. It must give an overview of the literature that was used on the topic and contain a description of the observations made and experiments done by the student, as well as a discussion of the conclusions reached.
(d) The maximum period for completion of the degree is five years. Under exceptional circumstances, a student may apply to the head of department, in writing, for a fixed, limited extension of this period.

(e) The MD degree can be obtained in the following fields of study:

M.13 Doctor of Philosophy [PhD]

Also consult General Regulations.

**Please note:** All PhD students must register for, and attend TNM 800 Applied research methodology 800 satisfactorily. (Exemption will be granted if Applied research methodology 800 had been passed for the master's degree.) However, students following the specialisation Pharmacology for this degree, register for (FAR 872) Pharmacology: Introduction to laboratory research and techniques 872, instead of TNM 800.
(a) Subject to the stipulations of General Regulations G.45 and G.62, a candidate will only be admitted to the studies for the doctoral degree if he or she holds a MBChB or a master's degree or has been granted the equivalent status.

(b) A PhD student must

(i) under the supervision of a supervisor at the university or another institution approved by the Senate, undertake original research to the satisfaction of the examiners; and

(ii) submit a thesis which will prove, according to the opinion of the examiners, that he or she has, on the grounds of independent critical judgement, made a distinct contribution towards the enrichment of knowledge in the chosen subject.

(c) A student for the PhD degree must be registered for the doctoral degree study at the University for at least one academic year before the degree can be conferred.

(d) The PhD degree is conferred by virtue of a thesis and, should the Dean deem it necessary, an examination on the field of study of the thesis.

(e) A complete research protocol regarding the proposed thesis (as well as the curriculum vitae of the candidate) must be submitted to the Postgraduate committee of the School in question and if necessary, also to the Ethics Committee for approval. The thesis must deal with a problem from any field of study in the Health Sciences and must satisfy the supervisor and the examiners that it represents advanced original research and/or creative work in the field of the Health Sciences. It must give an overview of the literature that was used on the topic and contain a description of the observations made and experiments done by the student, as well as a discussion of the conclusions reached.

(f) The doctoral examination will be oral and/or written and will deal with the content of the thesis as well as those subdivisions of the field of study on which the thesis is based, if requested.

(g) The maximum period for completion of a doctoral degree is five years. Under exceptional circumstances, a student may apply to the head of the department, in writing, for a fixed, limited extension of this period.

(h) The PhD degree can be obtained in the following fields of study:

II. POSTGRADUATE DIPLOMAS

M.14

A. Postgraduate Diploma in Family Medicine
   (Code 10220122)

(a) Admission requirements
   Prospective students must be in possession of a MBChB degree or equivalent qualification. South African candidates must be registered as a medical doctor with the Health Professions Council of South Africa and non-South Africans as a medical doctor with the Licensing authority in their country of origin, and present acceptable documentary proof to this effect.

(b) Duration
   At least one academic year, or a maximum of five years part-time study by means of distance education.

(c) Curriculum
   (i) Compulsory modules
       HAK 780 Philosophy and principles of family medicine 780
       FFM 780 Family-orientated patient care 780
       FMX 780 Practice management 780
       FEM 780 Emergency medicine 780
   (ii) Elective modules
       Choose four of the following:
       FMD 781 Chronic diseases 781
       FMG 781 Geriatrics 781
       FMS 781 Sports medicine 781
       FMI 781 Infectious diseases 781
FMP 781  Physiology 781  
FMA 782  Clinically-applied anatomy 782  
FMF 781  Psychiatry 781  
FMU 781  Rheumatology 781  

**(Note):**  
Physicians who wish to complete only one (or a few) of the module(s), will be allowed to register for only those modules.

(d) **Assessment**
Assignments as prescribed by the head of department, must be submitted for each of the eight modules. If a student does not achieve at least 50%, one resubmission is permitted for each module.

(e) **Pass requirement**
A minimum final mark of 50% is required as a pass mark for each module.

(f) **Pass with distinction**
An average of at least 75% in the four compulsory modules and the four elective modules is required to obtain the diploma with distinction.

B. **Postgraduate Diploma in General Ultrasound [PGDipGUS]**  
(Code 10220096)

(a) **Admission requirements**
Prospective students must be in possession of an MBChB degree. All candidates must be registered as a medical doctor with the Health Professions Council of South Africa. Due to limited resources a selection procedure might need to be applied.

(b) **Duration**
Two academic years.

(c) **Curriculum**
(i) **Year 1**

</tbody>
</table>

Select one of the following at the end of the first semester:
- Cardiac ultrasound
- Obstetrics
- General
- Vascular

(d) **Total number of credits required**

120

(e) **Examinations and pass requirements**

(i) Students must obtain a minimum mark of 50% in all the practical assessments and assignments assigned every semester.

(ii) A practical examination (ULT 751) will take place at the end of the two-year programme.

(iii) The final written examination (ULT 750) takes the form of a portfolio of the continuous written assessments completed during each module.

(iv) A minimum final mark of 50% is required in both the portfolio and the practical examination to pass.

(f) **Pass with distinction**

An average of at least 75% in all modules is required to obtain the diploma with distinction.

**Special refresher course for medical practitioners**

A one-week course for medical practitioners is presented annually by the School of Medicine with clinical presentations by various departments in the afternoons and evenings. The School also offers an annual intensive two-day course in one main field of study.

A medical practitioner who wishes to update his or her knowledge, may register as a special postgraduate student in the School of Medicine (Medicine Special). He or she will then have the opportunity to attend demonstrations and discussions and to participate in work as determined by the head of the department concerned.
Visiting postgraduate students (Code 10290001)

A medical practitioner or specialist physician may apply to register as a postgraduate visiting student for non-examination purposes for a period/s of one month or longer as preferred, during which period he or she may work in a department of his/her choice. The nature of this work will be determined by each head of department. Periods of time completed in this way, will not be recognised as periods of formal training for the purposes of specialisation.

Medicine Special (Undergraduate)

Individual modules – not for degree purposes.

Medicine Special (Postgraduate) (Code 10280001)

Registration as a postgraduate candidate with a view to complete examinations in prerequisite subjects for MMed (with approval of the Chairperson of the School and heads of departments in question), until such time as a registrarship becomes available. Neither the University of Pretoria nor the province is under any obligation whatsoever, to appoint such a student as a registrar or to give him or her precedence over other candidates to be appointed.

ACO 171 Academic competency in oral health 171
Academic organisation: Community Dentistry
Contact time: 5 lpw 5 ppw
Period of presentation: Semester 1
Language of tuition: Double medium  Credits: 12
Module content:
This module will introduce the new oral hygiene student to the dental and university environment. It will also serve as the foundation for the total oral hygiene programme and will assist the student to feel more comfortable and settled in the new environment. This module entails the following:
• Professionalism and ethics
• Group work and communication
• Use of the library and correct referencing in assignments
• Academic skills such as academic writing and reading, effective studying and how to do assignments
• Dental terminology
• Dental specialities
• Dental instruments, equipment and materials
• Dental charting
• Infection control
• Occupational health and safety
• Brushing and flossing

ADB 700 Administration and management 700
Academic organisation: Community Dentistry
Period of presentation: Year
Language of tuition: Both Afr and Eng  Credits: 24
ADM 701 Advanced clinical management in hand therapy 701
Academic organisation: Occupational Therapy
Period of presentation: Year
Language of tuition: Double medium Credits: 50
Module content:
Advanced study of hand injuries and conditions and their management. The design and application of treatment programmes in clinical practice. Study and application of evaluation methods and instruments.

ADX 700 Aesthetic dentistry 700
Academic organisation: Odontology
Period of presentation: Year
Language of tuition: Double medium Credits: 100

AHM 771 Research report 771
Academic organisation: School of Health Systems and Public Health
Contact time: 50 hours per week
Period of presentation: Year
Language of tuition: English Credits: 30
Module content:
Executive/Emerging Leadership
Participants will be required to write up a project which can consist of a Strategic Plan for Leadership at the workplace which they will be required to implement and monitor over a period of 6 months and then write up the strengths and weaknesses of whether this plan made a difference and to what extent they have been able to influence and change the approach of decision-making at their workplaces. A report from supervisors will be required and the project will include a literature review and a detailed analysis of what was achieved, what value-added difference the project made at the workplace, what were the sustainability factors built into the plan and how it had improved service delivery. The health leadership strategies that arise out of the project will be discussed and how its broader application can be implemented towards transforming healthcare delivery at district or hospital level.
AHM 870 Reproductive health epidemiology 870
Academic organisation: School of Health Systems and Public Health
Prerequisite: HME 870
Period of presentation: Year
Language of tuition: English  
Credits: 10

AKU 100 Occupational science 100
Academic organisation: Occupational Therapy
Contact time: 2 lpw 8 ppw
Period of presentation: Year
Language of tuition: Double medium  
Credits: 25
Module content:
The science and application of food preparation, painting and printing, games and sport, predetermined time standards (MODAPTS), biomechanics, normal development and various elective activities to promote engagement in meaningful occupation. Includes the facilitation of occupational performance as used in development in occupational therapy.

AKU 200 Occupational science 200
Academic organisation: Occupational Therapy
Prerequisite: ANA 151, ANA 152, ANA 161, ANA 162, FSG 161, AKU 100, ART 100, MTL 180, GNK 286
Contact time: 4 ppw 1 lpw
Period of presentation: Year
Language of tuition: Double medium  
Credits: 10
Module content:
The science and application of functional mobility (Activities of Daily Living), woodwork, needlework, appropriate paper technology (APT), gardening, music and dance to promote engagement in meaningful occupation. Includes the design and manufacture of assistive devices and adaptive equipment.

AKU 303 Occupational science 303
Academic organisation: Occupational Therapy
Prerequisite: FSG 251, FSG 252, FSG 261, FSG 262, AKU 200, RPD 200, ART 281, ART 282, ART 283, ART 284
Contact time: 1 ppw 1 dpw 1 lpw 1 spw
Period of presentation: Year
Language of tuition: Both Afr and Eng  
Credits: 25
Module content:
The study of normal development and the effect of ill health and disability in the areas of play, school/education and leisure. The science and application of occupational therapy principles to promote engagement in meaningful occupation taking into consideration personal and environmental contexts. Includes the pathology, causes, clinical picture and prognosis of selected conditions.

AKU 381 Occupational science 381
Academic organisation: Occupational Therapy
Prerequisite: FSG 251, FSG 252, FSG 261, FSG 262, AKU 200, ART 282, ART 284, RPD 200, ART 281, ART 283
Contact time: 2 spw 2 ppw 5 dpw
Period of presentation: Semester 1
Language of tuition: Double medium  
Credits: 25
Module content:
The study of the effect of ill health and disability in the area of Activities of Daily Living
Health Sciences 2014

(ADL). The science and application of occupational therapy principles to promote engagement in meaningful occupation, taking into consideration personal and environmental contexts. Includes the pathology, causes, clinical picture and prognosis of selected conditions.

**AKU 382 Occupational science 382**

**Academic organisation:** Occupational Therapy  
**Prerequisite:** FSG 251, FSG 252, FSG 261, FSG 262, AKU 200, RPD 200, ART 281, ART 282, ART 283, ART 284  
**Contact time:** 2 ppw 4 lpw  
**Period of presentation:** Semester 2  
**Language of tuition:** Double medium  
**Credits:** 25  
**Module content:**  
The study of the effect of ill health and disability in the area of work. The science and application of occupational therapy principles to promote engagement in meaningful occupation within the context of South African Disability Equity Legislation. Includes the pathology, causes, clinical picture and prognosis of selected conditions.

**AKU 400 Occupational science 400**

**Academic organisation:** Occupational Therapy  
**Prerequisite:** ANP 210, RPD 380, AKU 381, AKU 382, ART 381, ART 382, ART 303, AIM 101, ELH 121, ELH 122 and [SEP 110 or ZUL 110]  
**Contact time:** 2 other per week 1 spw 1 dpw  
**Period of presentation:** Year  
**Language of tuition:** Double medium  
**Credits:** 45  
**Module content:**  
Continued study in occupational science with emphasis on the areas of occupation. Integration and application of knowledge and skills in a community fieldwork setting, an elective vocational rehabilitation fieldwork setting and in an elective paediatric fieldwork setting.

**AMN 860 Advanced midwifery and neonatal nursing science 860**

**Academic organisation:** Nursing Science  
**Contact time:** 2 ppw  
**Period of presentation:** Year  
**Language of tuition:** English  
**Credits:** 50  

**AMN 861 Advanced midwifery and neonatal nursing science 861**

**Academic organisation:** Nursing Science  
**Contact time:** 1 lpw 2 dpw  
**Period of presentation:** Semester 1  
**Language of tuition:** English  
**Credits:** 30  

**AMN 862 Advanced midwifery and neonatal nursing science 862**

**Academic organisation:** Nursing Science  
**Contact time:** 2 dpw 1 lpw  
**Period of presentation:** Semester 2  
**Language of tuition:** English  
**Credits:** 30  

**AMN 870 Advanced midwifery and neonatal nursing science 870**

ANA 151 Introduction to anatomy 151  
Academic organisation: Anatomy  
Contact time: 3 lpw 1 dpw 1 ppw  
Period of presentation: Quarter 1  
Language of tuition: English  
Credits: 6  
Module content:  
A systematic approach to Anatomy, including general terminology, embryology and osteology, with the use of wet specimens. Introductory histology includes cytology, the nucleus and cell division, epithelial tissue, general connective tissue, cartilage and bone.

ANA 152 Anatomy of the limbs 152  
Academic organisation: Anatomy  
Contact time: 1 ppw 1 dpw 3 lpw  
Period of presentation: Quarter 2  
Language of tuition: English  
Credits: 6  
Module content:  
Anatomy of the appendicular skeleton  
A systematic approach to the anatomy of the muscles, blood vessels, nerve supply, lymph drainage and joints of the upper and lower limbs, as well as surface anatomy, with the use of wet specimens. Introductory histology includes muscle tissue, nerve tissue, and blood and haemopoietic tissue.

ANA 161 Anatomy of the torso 161  
Academic organisation: Anatomy  
Contact time: 3 lpw 1 dpw 1 ppw  
Period of presentation: Quarter 3  
Language of tuition: English  
Credits: 6  
Module content:  
A systematic approach to the anatomy of the thorax and its contents, the abdomen and its contents and the pelvis and its contents (organs, vascular systems, nerve supply, lymph drainage, muscles and joints), as well as surface anatomy, with the use of wet specimens. Introductory histology includes the histology of the lungs, liver and kidneys.

ANA 162 Anatomy of the head and neck 162  
Academic organisation: Anatomy  
Contact time: 3 lpw 1 dpw 1 ppw  
Period of presentation: Quarter 4  
Language of tuition: English  
Credits: 6  
Module content:  
Anatomy of the head and neck, and neuroanatomy  
A systematic approach to the anatomy of the head and neck regions, the senses and the central and peripheral nervous system (cranial nerves, autonomic nervous system), as well as surface anatomy, with the use of wet specimens.

ANA 171 Anatomy 171  
Academic organisation: Anatomy  
Contact time: 3 lpw 1 dpw  
Period of presentation: Semester 1  
Language of tuition: Double medium  
Credits: 8  
Module content:  
The emphasis of the study in anatomy is particularly focused on all aspects of the oral cavity, but certain aspects of the anatomy of the head and neck is also included. This
involves aspects of the osteology of the skull and jaw bones, the anatomy of the temporomandibular joint, salivary glands, nose, paranasal sinuses, pharynx, larynx and specific muscle groups as well as the cranial nerves, vascular supply and lymphatic drainage of the head and neck, as well as the radiographic features of some of the above.

**ANA 185 Anatomy 185**  
**Academic organisation:** Anatomy  
**Contact time:** 8 lpw 1 dpw 3 ppw  
**Period of presentation:** Semester 1  
**Language of tuition:** English  
**Credits:** 21  
**Module content:**  
Systemic clinical anatomy: cardiovascular, respiratory, digestive, urogenital, eye, ear, nose and throat, nervous, musculoskeletal, skin and endocrine systems.  
Surface and regional anatomy confined to specific diagnostic, therapeutic and emergency procedures.

**ANA 700 Anatomy 700**  
**Academic organisation:** Anatomy  
**Contact time:** 1 dpw 2 ppw 1 lpw  
**Period of presentation:** Year  
**Language of tuition:** Double medium  
**Credits:** 96  
**Module content:**  
A complete synopsis of all anatomy modules at postgraduate level is published in the study guide for postgraduate Anatomy modules, which is available on request from the Department of Anatomy.

**ANA 711 Developmental biology 711**

ANP 210 Anatomical pathology 210
Academic organisation: Anatomical Pathology
Prerequisite: [PHY 131, CMY 151, FSG 161, FSG 162, FTP 100, ANA 152, ANA 162] or [FSG 251, FSG 252, FSG 261, FSG 262, AKU 200, ART 282, ART 284, RPD 200, ART 281, ART 283] or [RAN 280, RAW 281, RAW 282, RAW 283]
Contact time: 1 spw 2 lpw
Period of presentation: Semester 1
Language of tuition: Both Afr and Eng
Credits: 10

Module content:
General principles of pathology, including necroses, reversible cell damage, reparation and abnormalities of growth, circulation disturbances, acute and chronic infections, classification of the spreading of tumours and carcinogenesis. Directed course in systematic pathology, with specific reference to cardiovascular system, respiratory system, locomotor system and neurophathology.
ANP 370 Anatomical pathology 370 (offered as from 2016)
Academic organisation: Oral Pathology and Oral Biology
Contact time: 4 lpw (first semester) 2 lpw (second semester)
Period of presentation: Year
Language of tuition: English  Credits: 22
Module content:
General pathology:
Cell injury, death and adaptation; Acute and chronic inflammation; Repair: Cell regeneration, fibrosis and wound healing; Hemodynamic disorders, thrombosis and shock; Disorders of the immune system; Neoplasia; Environmental diseases; General pathology of infectious diseases.
Diseases of the following organ systems:
Blood vessels; Heart; Haemopoietic and lymphoid systems; Respiratory tract; Urinary tract; Gastrointestinal tract; Liver and biliary tract; Pancreas; Male genital system; Female genital system and breast; Endocrine system; Musculoskeletal system; Skin; Nervous system.

ANP 700 Anatomical pathology 700
Academic organisation: Anatomical Pathology
Period of presentation: Year
Language of tuition: Both Afr and Eng  Credits: 24

ANP 702 Anatomical pathology 702
Academic organisation: Anatomical Pathology
Contact time: 2 dpw 1 lpw
Period of presentation: Year
Language of tuition: Both Afr and Eng  Credits: 24

ANP 703 Anatomical patholoy 703
Academic organisation: Anatomical Pathology
Contact time: 1 dpw
Period of presentation: Semester 1
Language of tuition: Both Afr and Eng  Credits: 5

ANP 800 Anatomical pathology 800
Academic organisation: Anatomical Pathology
Prerequisites: ANP 801, ANA 800
Contact time: 10 dpw 20 other per week 2 spw
Period of presentation: Year
Language of tuition: Both Afr and Eng  Credits: 300

ANP 801 Anatomical pathology 801
Academic organisation: Anatomical Pathology
Period of presentation: Year
Language of tuition: Both Afr and Eng  Credits: 36

ANP 802 Anatomical pathology 802
Academic organisation: Anatomical Pathology
Contact time: 1 other per week 1 dpw
Period of presentation: Year
Language of tuition: Both Afr and Eng  Credits: 36
ANP 803 Anatomical pathology 803
Academic organisation: Anatomical Pathology
Contact time: 1 dpw 1 other per week
Period of presentation: Year
Language of tuition: Both Afr and Eng
Credits: 36

ANP 807 Anatomical pathology 807
Academic organisation: Anatomical Pathology
Contact time: 1 other per week 1 dpw
Period of presentation: Year
Language of tuition: Both Afr and Eng
Credits: 36

ANP 808 Anatomical pathology 808
Academic organisation: Anatomical Pathology
Period of presentation: Year
Language of tuition: Both Afr and Eng
Credits: 48

ANP 809 Anatomical pathology 809
Academic organisation: Anatomical Pathology
Contact time: 1 dpw
Period of presentation: Year
Language of tuition: Both Afr and Eng
Credits: 36

ANP 870 Anatomical pathology 870
Academic organisation: Anatomical Pathology
Contact time: 1 dpw
Period of presentation: Year
Language of tuition: Both Afr and Eng
Credits: 36

ANP 871 Anatomical pathology 871
Academic organisation: Anatomical Pathology
Period of presentation: Year
Language of tuition: Both Afr and Eng
Credits: 36

ANP 872 Anatomical pathology 872
Academic organisation: Anatomical Pathology
Contact time: 1 dpw 1 lpw
Period of presentation: Year
Language of tuition: Both Afr and Eng
Credits: 36

ANP 874 Anatomical pathology 874
Academic organisation: Anatomical Pathology
Contact time: 2 spw
Period of presentation: Year
Language of tuition: Both Afr and Eng
Credits: 36

ANP 875 Anatomical pathology 875
Academic organisation: Anatomical Pathology
Contact time: 1 dpw
Period of presentation: Year
Language of tuition: Both Afr and Eng
Credits: 36
ANP 876 Anatomical pathology 876  
**Academic organisation:** Anatomical Pathology  
**Contact time:** 1 dpw  
**Period of presentation:** Year  
**Language of tuition:** Both Afr and Eng  
**Credits:** 36

ANP 877 Anatomical pathology 877  
**Academic organisation:** Anatomical Pathology  
**Period of presentation:** Year  
**Language of tuition:** Both Afr and Eng  
**Credits:** 36

ANP 878 Anatomical pathology 878  
**Academic organisation:** Anatomical Pathology

Module content:
Sensory-motor and cognition: The study of occupational therapy evaluation and intervention of sensory-motor and cognitive disorders in all age groups. Includes the pathology, causes, clinical picture and prognosis of selected disorders.

ART 381 Occupational therapy 381
Academic organisation: Occupational Therapy
Prerequisite: FSG 251, FSG 252, FSG 261, FSG 262, AKU 200, ART 282, ART 284, RPD 200, ART 281, ART 283
Contact time: 5 dpw 2 spw 2 ppw 20 other per week
Period of presentation: Semester 1
Language of tuition: Double medium
Credits: 20
Module content:
Continued study of occupational therapy for patients/clients with physical and neurological conditions. Facilitation of occupational performance through the application of assistive technologies and adaptations. Includes therapeutic apparatus, control interfaces, prosthesis and the selection, design and manufacture of splints.

ART 382 Occupational therapy 382
Academic organisation: Occupational Therapy
Prerequisite: FSG 251, FSG 252, FSG 261, FSG 262, AKU 200, ART 282, ART 284, RPD 200, ART 281, ART 283
Contact time: 5 dpw 4 other per week 2 ppw
Period of presentation: Semester 2
Language of tuition: Double medium
Credits: 20
Module content:
The application of therapeutic group techniques, stress management and interpersonal techniques in counselling. Includes the study of occupational therapy evaluation and intervention of psychiatric disorders in childhood.

ART 401 Occupational therapy 401
Academic organisation: Occupational Therapy
Prerequisite: ANP 210, RPD 380, SEP 110/ZUL 110, AKU 303, AKU 381, AKU 382, ART 381, ART 382, ELH 121, ELH 122, AIM 101.
Contact time: 2 spw 4 other per week 1 dpw
Period of presentation: Year
Language of tuition: Double medium Credits: 45
Module content:
Continued study of occupational therapy for patients/clients with physical and neurological conditions. Integration and application of knowledge and skills in a physical/neurological fieldwork setting.

ART 402 Occupational therapy 402
Academic organisation: Occupational Therapy
Prerequisite: ANP 210, RPD 380, SEP 110/ZUL 110, AKU 303, AKU 381, AKU 382, ART 381, ART 382, ELH 121, ELH 122, AIM 101.
Contact time: 1 dpw 4 other per week
Period of presentation: Year
Language of tuition: Double medium Credits: 45
Module content:
Continued study of occupational therapy for mental healthcare users. Integration and application of knowledge and skills in a mental health fieldwork setting.

ART 800 Occupational therapy 800
Academic organisation: Occupational Therapy
Contact time: 1 other per week
Period of presentation: Year
Language of tuition: Double medium Credits: 28
Module content:
*Attendance module only
-participation in discussion classes, ward rounds and clinics.

ART 801 Occupational therapy 801
Academic organisation: Occupational Therapy
Period of presentation: Year
Language of tuition: Double medium Credits: 100
Module content:
An in-depth study of upper limb biomechanics and ergonomics, evaluation and treatment techniques for hand and upper limb injuries and conditions; advanced clinical management.

ART 802 Occupational therapy 802
Academic organisation: Occupational Therapy
Period of presentation: Year
Language of tuition: Double medium Credits: 100
Module content:
An in-depth study of occupational therapy as applicable to neurological conditions in adults.
ART 803 Occupational therapy 803
Academic organisation: Occupational Therapy
Period of presentation: Year
Language of tuition: Double medium
Credits: 100
Module content:
An in-depth study of determining and treatment of children with different diagnoses.

ART 804 Occupational therapy 804
Academic organisation: Occupational Therapy
Period of presentation: Year
Language of tuition: Double medium
Credits: 100
Module content:
An in-depth study of occupational therapy as applicable to psychiatric disturbances in adults and/or children.

ART 805 Occupational therapy 805
Academic organisation: Occupational Therapy
Contact time: 4 lpw 5 dpw
Period of presentation: Year
Language of tuition: Double medium
Credits: 100
Module content:
An in-depth study of (i) classification, development of activity participation and its influence on health; (ii) biopsychosocial perspectives on activity participation.

ART 890 Dissertation: Occupational therapy 890
Academic organisation: Occupational Therapy
Period of presentation: Year
Language of tuition: Double medium
Credits: 200

ART 891 Essay: Occupational therapy 891
Academic organisation: Occupational Therapy
Period of presentation: Year
Language of tuition: Double medium
Credits: 38

ART 900 Occupational therapy 900
Academic organisation: Occupational Therapy
Period of presentation: Year
Language of tuition: Double medium
Credits: 1

ART 990 Thesis: Occupational therapy 990
Academic organisation: Occupational Therapy
Period of presentation: Year
Language of tuition: Double medium
Credits: 480

ASW 800 Administrative theory and health-related social sciences 800
Academic organisation: Public Health Medicine
Period of presentation: Year
Language of tuition: English
Credits: 70

ATN 860 Advanced medical and surgical nursing science (Critical care: Trauma and emergency nursing science) 860
Academic organisation: Nursing Science
ATN 861 Advanced medical and surgical nursing science 861
Academic organisation: Nursing Science
Contact time: 2 ppw
Period of presentation: Year
Language of tuition: English
Credits: 50

ATN 862 Advanced medical and surgical nursing science 862
Academic organisation: Nursing Science
Contact time: 2 dpw 1 lpw
Period of presentation: Semester 1
Language of tuition: English
Credits: 30

ATN 870 Advanced medical and surgical nursing science (Critical care: Trauma and emergency nursing science) 870
Academic organisation: Nursing Science
Contact time: 2 ppw
Period of presentation: Year
Language of tuition: English
Credits: 40

ATN 871 Advanced medical and surgical nursing science (Critical care: Trauma and emergency nursing science) 871
Academic organisation: Nursing Science
Contact time: 2 dpw 1 lpw
Period of presentation: Semester 1
Language of tuition: English
Credits: 40

ATN 872 Advanced medical and surgical nursing science (Critical care: Trauma and emergency nursing science) 872
Academic organisation: Nursing Science
Contact time: 2 dpw 1 lpw
Period of presentation: Semester 2
Language of tuition: English
Credits: 40

ATP 800 Theory in occupational therapy practice 800
Academic organisation: Occupational Therapy
Contact time: 8 lpw
Period of presentation: Year
Language of tuition: Double medium
Credits: 28
Module content:
(i) Perspectives on activity participation and the study of man as multi-level system.
(ii) Models for activity choices.
(iii) Activity evaluation.

Language of tuition: English
Credits: 40

BEX 701 Biomechanics and ergonomics 701
Academic organisation: Occupational Therapy
Contact time: 14 lpw 1 ppw
Period of presentation: Year
Language of tuition: Double medium
Credits: 10
Module content:
Biomechanics of the upper limb and disturbance thereof; the biomechanics of splints. Environmental factors for effective posture and handgrip; relationship between man and environment; disturbance of this relationship.

BFP 700 Industrial physiology and pathology 700
Academic organisation: Physiology
Period of presentation: Year
Language of tuition: Both Afr and Eng
Credits: 24

BKA 700 Biokinetics 700
Academic organisation: Centre for Sports Sciences
Period of presentation: Year
Language of tuition: Both Afr and Eng
Credits: 96

BMC 701 Hand biomechanics and ergonomics 701
Academic organisation: Occupational Therapy
Period of presentation: Quarter 2
Language of tuition: Double medium
Credits: 30

BOK 121 Molecule to organism 121
Academic organisation: Anatomy
Contact time: 7 lpw
Period of presentation: Semester 2
Language of tuition: English
Credits: 40
Module content:
(a) Molecule to cell (2 weeks)
The principles of physiology, chemistry and genetics applicable to man. Macro molecules, lipids, carbohydrates and protein. Introductory genetics: molecular

(b) Cell to tissue (4 weeks)
Gametogenesis, embryogenesis, embryopathy, histology and incidence of tissue types. The immune system and its components. Tissue specificity, genetic control of expression and factors influencing gene expressions.

(c) Tissue to organism (2 weeks)

BOK 280 Homeostasis 280
Academic organisation: Forensic Health Sciences
Prerequisite: CMY 151, GNK 120, GNK 127, MLB 111, PHY 131, GNK 128, BOK 121, MGW 112, FIL 155, MTL 180, SMO 121, AIM 101, ELH 111, ELH 112
Contact time: 18 lpw
Period of presentation: Semester 1
Language of tuition: Both Afr and Eng
Credits: 42
Module content:
(a) Intermediary metabolism (3 weeks)
Carbohydrate and lipid metabolism; protein and energy metabolism; vitamins and minerals. Integration of metabolism. Practical work: Protein electrophoresis.
(b) Control (3 weeks)
Nerve control; endocrine control.
(c) Internal milieu (3 weeks)

BOK 281 Pathological conditions and infectious diseases 281
Academic organisation: Anatomical Pathology
Prerequisite: CMY 151, GNK 120, GNK 127, MLB 111, PHY 131, GNK 128, BOK 121, MGW 112, FIL 155, MTL 180, SMO 121, AIM 101, ELH 111, ELH 112
Contact time: 12 lpw
Period of presentation: Semester 2
Language of tuition: English
Credits: 45
Module content:
(a) General pathology and immunology (4 weeks)
Cell damage; growth and repair; infection; disturbances in circulation; HLA system; immune response; hypersensitivity; auto-immunity and transplant immunology. Anatomy of the lymphatic system.
(b) Principles of malignancies (1 week)
Oncogenesis; terminology and biological behaviour of tumours; principles of therapy.
(c) Principles of infectious diseases (3 weeks)
This module deals with the basic principles and systematic classification and clinical picture of bacteria, viral parasitic and fungal infections of importance to man. The pharmacological aspects of antibacterial and antiviral chemotherapy will also be dealt with. A short introduction to epidemiology will also be presented. The practical aspects of the microbiology which includes virology, will be demonstrated in the practical sessions.
(d) Infectious diseases (2 weeks)
This comprehensive module covers all aspects of the most prominent infectious diseases in man, such as tuberculosis, immuno-deficiency syndrome, malaria, gastroenteritis, haemorrhagic fever, typhoid, bilharzia and sexually transmitted diseases.
The module is problem-orientated, multidisciplinary and presented in the form of case studies and group discussions. The module also deals with certain important topics such as surgical infections, nosocomial infections, opportunistic infections, trauma and associated infection. The microbiology of special environments will also be discussed.

**BOK 283 People and their environment 283**

**Academic organisation:** Psychiatry

**Prerequisite:** CMY 151, GNK 120, GNK 127, MLB 111, PHY 131, GNK 128, BOK 121, MGW 112, FIL 155, MTL 180, SMO 121, AIM 101, ELH 111, ELH 112

**Contact time:** 5 spw 5 ppw 8 lpw

**Period of presentation:** Semester 1

**Language of tuition:** English

**Credits:** 31

**Module content:**
People and their environment (4 weeks)

Interpersonal skills; contextual and environmental aspects within which patients develop and live with their specific problems; medical ethics with regard to the community, patients and the medical profession; the role and duties of the medical practitioner within the South African legal system, especially with regard to interpersonal violence in society, injuries, the process of dying and death; genetic disability in the South African society; public health and health research in the community.

**BOK 284 People and their environment 284**

**Academic organisation:** Forensic Health Sciences

**Prerequisite:** CMY 151, GNK 120, GNK 127, MLB 111, PHY 131, GNK 128, BOK 121, MGW 112, FIL 155, MTL 180, SMO 121, AIM 101, ELH 111, ELH 112

**Contact time:** 12 lpw

**Period of presentation:** Semester 1

**Language of tuition:** Both Afr and Eng

**Credits:** 31

**Module content:**
(a) People and their environment (4 weeks)
Interpersonal skills; contextual and environmental aspects within which patients develop and live with their specific problems; medical ethics with regard to the community, patients and the medical profession; the role and duties of the medical practitioner within the South African legal system, especially with regard to interpersonal violence in society, injuries, the process of dying and death; genetic disability in the South African society; public health and health research. This section of the module can only be taken by medical students.

(b) Forensic medicine (Pathology) (2 weeks)
Medicine and law: points of tangency; medical law; thanatology; forensic pathology and forensic medicine.

**BOK 285 Pathological conditions 285**

**Academic organisation:** Anatomical Pathology

**Prerequisite:** CMY 151, FIL 155, MGW 112, MLB 111, MTL 180, PHY 131, AIM 101, BOK 121, GNK 120, GNK 127, GNK 128, ELH 111, ELH 112, LCP 180, SMO 121

**Contact time:** 18 lpw 1 dpw 3 ppw

**Period of presentation:** Semester 2

**Language of tuition:** English

**Credits:** 22

**Module content:**
Basic principles of pathology and immunology applicable to disease processes. The principles of tumour genetics, pathology and dissemination of tumours.
BOK 287 Infectious diseases 287
Academic organisation: Medical Microbiology
Prerequisite: CMY 151, FIL 155, MGW 112, MLB 111, MTL 180, PHY 131, AIM 101, BOK 121, GNK 120, GNK 127, GNK 128, ELH 111, ELH 112, LCP 180, SMO 121
Contact time: 15 lpw 8 ppw 8 dpw
Period of presentation: Semester 2
Language of tuition: English
Credits: 23
Module content:
The study of micro organisms which cause disease in the human body. This module entails the study of the interaction of micro-organisms with the human host which results in disease.

BOK 380 Abdomen and mamma 380
Academic organisation: Surgery
Prerequisite: BOK 280, GNK 288, BOK 284, GPS 280, BOK 281, GNK 283, GNK 286
Contact time: 12 lpw
Period of presentation: Semester 1
Language of tuition: Double medium
Credits: 50
Module content:
(a) Abdomen and abdominal problems
(b) Mamma
   A study of the anatomy and functions, as well as the diseases of the different organs in the abdominal cavity including conditions of the abdominal wall. Furthermore, lectures on the clinical conditions of the mamma will be presented.

BOK 382 Pregnancy and neonatology 382
Academic organisation: Obstetrics and Gynaecology
Prerequisite: BOK 280, GNK 288, BOK 284, GPS 280, GNK 283, GNK 286, (BOK 281 or (BOK 285, BOK 287)), LCP 280.
Contact time: 12 lpw
Period of presentation: Semester 2
Language of tuition: Both Afr and Eng
Credits: 55
Module content:
(a) Pregnancy
(b) Neonatology
   The study of the natural physiological complexes and pathological conditions concerning pregnancy and birth. Different learning opportunities and situations are used, including prenatal clinics, labour wards and neonatal units. Emphasis is placed on acquiring scientifically-based information, as well as important practical and clinical skills. The behavioural sciences are also included in the block, as well as the social, family and community-related aspects.
(c) Growth and development (2 weeks)
   A study of the unique aspects of the physical growth and neuro-development of a normal child. Learning opportunities are presented to the student to identify problems concerning growth and development, as well evaluating and handling children with abnormal growth and development. Emphasis is placed on the prevention, evaluation and handling, as well as the effective treatment with a decided result. This block integrates with the previous block in order to enable the student to understand the continuum of growth and neuro-development from the prenatal to the post-natal milieu.
BOK 480 Genital and urinary tract diseases 480
Academic organisation: Obstetrics and Gynaecology
Prerequisite: GNK 381, GNK 383, BOK 380, GNK 386, GPS 380, BOK 382, SMO 380, SMO 311, SMO 382
Contact time: 12 lpw
Period of presentation: Semester 1
Language of tuition: Both Afr and Eng  
Credits: 62
Module content:
Module 1: Genital conditions
Module 2: Urinary tract disease
A study of the disorders of the urinary tract and genital systems in males and in females. Theoretical and practical instruction is used to integrate basic science and clinical medicine. Important clinical skills must be mastered.

BOK 482 Nervous system 482
Academic organisation: Neurology
Prerequisite: GNK 381, GNK 383, BOK 380, GNK 386, GPS 380, BOK 382, GNK 488#, SMO 311, SMO 380, SMO 382
Contact time: 5 lpw
Period of presentation: Semester 1
Language of tuition: English  
Credits: 28
Module content:
Discussion of the important diseases of the central, peripheral and autonomic nervous system with a view to obtaining a total overview of the specific diseases, which will include anatomy, physiology, pathology, pharmacology, clinical neurology, clinical Neurosurgery and neuropaediatrics.

BOS 770 Principles of biostatistics 770
Academic organisation: School of Health Systems and Public Health
Contact time: 5 lpw 10 ppw
Period of presentation: Year
Language of tuition: English  
Credits: 10
Module content:
Basic introduction to biostatistical theory and use of Stata software to perform basic data analysis.

BOS 774 Seminars in biostatistics 774
Academic organisation: School of Health Systems and and Public Health
Contact time: 1 spw
Period of presentation: Year
Language of tuition: English  
Credits: 5
Module content:
Seminar to be written up on a selected topic in biostatistics and presented before the Epidemiology and Biostatistics track staff.

BOS 775 Biostatistics project 775
Academic organisation: School of Health Systems and and Public Health
Contact time: None
Period of presentation: Year
Language of tuition: English  
Credits: 30
Module content:
A project agreed to with the head of the sub-track: Biostatistics. This project should be
written up in the format described in the School’s postgraduate brochure. It will be subject to external moderation.

BOS 870 Biostatistics (1) 870
Academic organisation: School of Health Systems and Public Health
Prerequisite: HME 870
Contact time: 1 ppw 16 lpw
Period of presentation: Year
Language of tuition: English
Credits: 10

BOS 871 Biostatistics (2) 871
Academic organisation: School of Health Systems and Public Health
Prerequisite: BOS 870
Contact time: 16 lpw 1 ppw
Period of presentation: Year
Language of tuition: English
Credits: 10

BOS 873 Survival analysis 873
Academic organisation: School of Health Systems and Public Health
Prerequisite: BOS 871
Contact time: 1 ppw 3 dpw
Period of presentation: Year
Language of tuition: English
Credits: 5

BPB 800 Principles of practice management 800
Academic organisation: Community Dentistry
Period of presentation: Year
Language of tuition: Both Afr and Eng
Credits: 24

BRH 700 Vocational rehabilitation 700
Academic organisation: Occupational Therapy
Contact time: 2 spw 4 lpw 2 ppw
Period of presentation: Year
Language of tuition: Double medium
Credits: 30
Module content:
Continued training in the vocational rehabilitation process applied to various diagnostic groups.

BSN 801 Biostatistics and research methodology 801
Academic organisation: Dentistry General
Period of presentation: Year
Language of tuition: Both Afr and Eng
Credits: 24

BVC 800 Principles of surgery 800
Academic organisation: Surgery
Period of presentation: Year
Language of tuition: Double medium
Credits: 36

BVC 801 Principles of surgery 801
Academic organisation: Surgery
Period of presentation: Year
Language of tuition: Double medium
Credits: 36
BVC 802 Principles of surgery 802  
Academic organisation: Surgery  
Period of presentation: Year  
Language of tuition: Double medium  
Credits: 36

BVC 803 Principles of surgery 803  
Academic organisation: Surgery  
Period of presentation: Year  
Language of tuition: Double medium  
Credits: 36

BVC 804 Principles of surgery 804  
Academic organisation: Surgery  
Period of presentation: Year  
Language of tuition: Double medium  
Credits: 36

BVC 805 Principles of surgery 805  
Academic organisation: Surgery  
Period of presentation: Year  
Language of tuition: Double medium  
Credits: 36

BVC 806 Principles of surgery 806  
Academic organisation: Surgery  
Period of presentation: Year  
Language of tuition: Double medium  
Credits: 52

BVC 807 Principles of surgery 807  
Academic organisation: Surgery  
Period of presentation: Year  
Language of tuition: Double medium  
Credits: 52

BVC 810 Principles of surgery 810  
Academic organisation: Surgery  
Period of presentation: Semester 1  
Language of tuition: Double medium  
Credits: 36

BVC 811 Principles of surgery 811  
Academic organisation: Surgery  
Period of presentation: Semester 1  
Language of tuition: Double medium  
Credits: 36

BVC 820 Principles of surgery 820  
Academic organisation: Surgery  
Period of presentation: Semester 2  
Language of tuition: Double medium  
Credits: 36

BVP 800 Principles of pathology 800  
Academic organisation: Oral Pathology and Oral Biology  
Contact time: 1 dpw  
Period of presentation: Year  
Language of tuition: Both Afr and Eng  
Credits: 24
CBA 710 Anatomy and principles of surgery 710
Academic organisation: Maxillofacial and Oral Surgery
Period of presentation: Semester 1 and/or Semester 2
Language of tuition: Both Afr and Eng  Credits: 12

CBA 800 Anatomy and principles of surgery 800
Academic organisation: Maxillofacial and Oral Surgery
Period of presentation: Year
Language of tuition: Both Afr and Eng  Credits: 24

CBR 710 Maxillofacial radiology and principles of surgery 710
Academic organisation: Dental Management Sciences
Contact time: 1 dpw 1 ppw
Period of presentation: Semester 1
Language of tuition: English  Credits: 12

CBR 800 Maxillofacial radiology and principles of surgery 800
Academic organisation: Dental Management Sciences
Period of presentation: Year
Language of tuition: English  Credits: 24

CCC 770 Complex problem-solving and negotiating, coherence and coordination 770
Academic organisation: Public Health Medicine
Contact time: 50 hours per week
Period of presentation: Year
Language of tuition: English  Credits: 10
Module content:
The public health leader will be equipped with strategies to address difficult and intractable problems at the workplace and assist health workers to become part of the solution by utilising newly acquired problem-solving skills which will have lasting impact in workplace settings. Negotiating techniques will be analysed for different workplace challenges and its application for greater coherence and coordination in the implementation of policy and effective management of its outcomes to improve service delivery.

CDC 770 Introduction to disease prevention and control 770
Academic organisation: Public Health Medicine
Contact time: 1 ppw 16 lpw
Period of presentation: Year
Language of tuition: English  Credits: 5

CDC 771 Principles: Communicable disease control 771
Academic organisation: Public Health Medicine
Prerequisite: CDC 772 CDC 773 CDC 774
Contact time: 18 spw 3 lpw 1 ppw
Period of presentation: Year
Language of tuition: English  Credits: 10

CDC 772 Seminars in tropical health (Agent) 772
Academic organisation: Public Health Medicine
Contact time: 18 spw 3 lpw 1 ppw
CDC 773 Seminars in tropical health (Environment) 773
Academic organisation: Public Health Medicine
Contact time: 18 spw 3 lpw 1 ppw
Period of presentation: Year
Language of tuition: English
Credits: 10

CDC 774 Seminars in tropical health (Host) 774
Academic organisation: Public Health Medicine
Contact time: 18 spw 3 lpw 1 ppw
Period of presentation: Year
Language of tuition: English
Credits: 10

CDC 775 Tropical health examination 775
Academic organisation: School of Health Systems and Public Health
Period of presentation: Year
Language of tuition: English
Credits: 0

CDC 870 Introduction to disease control 870
Academic organisation: School of Health Systems and Public Health
Contact time: 1 ppw 16 lpw
Period of presentation: Year
Language of tuition: English
Credits: 5

CDC 871 Principle: Communicable disease control 871
Academic organisation: School of Health Systems and Public Health
Contact time: 18 spw 3 lpw 1 ppw
Period of presentation: Year
Language of tuition: English
Credits: 10

CDC 872 Seminars in tropical health (Agent) 872
Academic organisation: School of Health Systems and Public Health
Contact time: 18 spw 3 lpw 1 ppw
Period of presentation: Year
Language of tuition: English
Credits: 10

Health Sciences 2014

Period of presentation: Semester 1
Language of tuition: English
Credits: 17
Module content:
Introduction to the Faculty of Health Sciences, curriculum and cultural differences. Basic theory and skills in respect of health assessment and physical examination, health promotion and disease prevention by means of group discussions, self-tuition and practical sessions in the hospital and skills laboratory. A problem-oriented and interdisciplinary approach is emphasised.

CMP 182 Clinical medical practice 182
Academic organisation: Family Medicine
Contact time: 5 ppw 2 dpw
Period of presentation: Semester 2
Language of tuition: English
Credits: 56
Module content:
Basic theory and skills in respect of health assessment and physical examination, health promotion and disease prevention of the cardio/peripheral, reticulo-endothelial, respiratory, gastro-intestinal, genito-urinary, central nervous system, head, neck, eye, ear, nose, throat, musculo-skeletal, endocrine, dermatological systems by means of group discussion, self-tuition and practical sessions in the hospital and skills laboratory. A problem-oriented and interdisciplinary approach is emphasised.

CMP 281 Clinical medical practice 281
Academic organisation: Family Medicine
Prerequisite: CMP181, CMP 182
Contact time: 2 dpw 5 ppw
Period of presentation: Semester 1
Language of tuition: English
Credits: 68
Module content:
Basic theory and skills in respect of the health promotion, disease prevention, diagnosis and treatment of diseases of cardio/peripheral, vascular, reticulo-endothelial, endocrine, respiratory and gastro-intestinal systems by means of group discussions, self-tuition and practical sessions in the hospital and skills laboratory. A problem-oriented and interdisciplinary approach is emphasised. Emphasis is placed on the diagnosis and treatment of the most prominent conditions as well as the acquiring of practical and clinical skills.

CMP 282 Clinical medical practice 282
Academic organisation: Family Medicine
Prerequisite: CMP 281
Contact time: 2 dpw 5 ppw
Period of presentation: Semester 2
Language of tuition: English
Credits: 68
Module content:
Basic theory and skills in respect of the health promotion, disease prevention, diagnosis and treatment of diseases of genito-urinary, central nervous system, head, neck, eye, ear, nose, throat, skin and musculo-skeletal systems by means of group discussions, self-tuition and practical sessions in the hospital and skills laboratory. A problem-oriented and interdisciplinary approach is emphasised. Emphasis is placed on the diagnosis and treatment of the most prominent conditions as well as the acquiring of practical and clinical skills.
CMP 380 Healthcare systems 380
Academic organisation: Family Medicine
Prerequisite: CMP 281, CMP 282, FAR 280
Contact time: As needed for assignment
Period of presentation: Semester 1
Language of tuition: English Credits: 10
Module content:
Study of healthcare systems with emphasis on district health systems.

CMP 381 Women's health 381
Academic organisation: Family Medicine
Prerequisite: CMP 281, CMP 282, FAR 280
Contact time: 2 dpw 5 ppw
Period of presentation: Semester 1 and/or 2
Language of tuition: English Credits: 24
Module content:
Theory and skills in respect of the health promotion, disease prevention, diagnosis and treatment of diseases affecting women by means of group discussions, self-tuition and practical sessions in the hospital and skills laboratory. A problem-oriented and interdisciplinary approach is emphasised. Emphasis is placed on the diagnosis and treatment of the most prominent conditions as well as the acquiring of practical and clinical skills.

CMP 382 Child health 382
Academic organisation: Family Medicine
Prerequisite: CMP 281, CMP 282, FAR 280
Contact time: 2 dpw 5 ppw
Period of presentation: Semester 1 and/or 2
Language of tuition: English Credits: 24
Module content:
Basic theory and skills in respect of the health promotion, disease prevention, diagnosis and treatment of diseases of children by means of group discussions, self-tuition and practical sessions in the hospital and skills laboratory. A problem-oriented and interdisciplinary approach is emphasised. Emphasis is placed on the diagnosis and treatment of the most prominent conditions as well as the acquiring of practical and clinical skills.

CMP 383 Emergency care 1 383
Academic organisation: Family Medicine
Prerequisite: CMP 281, CMP 282, FAR 280
Contact time: 2 dpw 1 ppw
Period of presentation: Semester 1
Language of tuition: English Credits: 12
Module content:
Theory and skills training in basic emergency care.

CMP 384 Infectious and chronic diseases 384
Academic organisation: Family Medicine
Prerequisite: CMP 281, CMP 282, FAR 280
Contact time: 2 dpw 5 ppw
Period of presentation: Semester 1 and/or Semester 2
Language of tuition: English Credits: 36
Module content:
Theory and skills in respect of the disease prevention, diagnosis and treatment of infectious and chronic diseases by means of group discussions, self-tuition and practical sessions in the hospital and skills laboratory. A problem-oriented and interdisciplinary approach is emphasised. Emphasis is placed on the diagnosis and treatment of the most prominent conditions as well as the acquiring of practical and clinical skills.

CMP 385 Anaesthetics 385
Academic organisation: Family Medicine
Prerequisite: CMP 281, CMP 282, FAR 280
Contact time: 3 dpw 5 ppw
Period of presentation: Semester 1 and/or 2
Language of tuition: English
Credits: 12
Module content:
An introduction to the underlying principles of the theory and practice of anaesthesiology applicable to the clinical associate practice.

CMP 386 Mental health 386
Academic organisation: Family Medicine
Prerequisite: CMP 281, CMP 282, FAR 280
Contact time: 5 ppw 2 dpw
Period of presentation: Semester 1 and/or 2
Language of tuition: English
Credits: 16
Module content:
Theory and skills in respect of the disease prevention, diagnosis and treatment of mental health problems by means of group discussions, self-tuition and practical sessions in the hospital and skills laboratory. A problem-oriented and interdisciplinary approach is emphasised. Emphasis is placed on the diagnosis and treatment of the most prominent conditions as well as the acquiring of practical and clinical skills.

CMP 387 Orthopaedics 387
Academic organisation: Family Medicine
Prerequisite: CMP 281, CMP 282, FAR 280
Contact time: 2 dpw 5 ppw
Period of presentation: Semester 1 and/or 2
Language of tuition: English
Credits: 12
Module content:
Theory and skills in respect of the disease prevention, diagnosis and treatment of orthopaedic diseases and problems by means of group discussions, self-tuition and practical sessions in the hospital and skills laboratory. A problem-oriented and interdisciplinary approach is emphasised. Emphasis is placed on the diagnosis and treatment of the most prominent conditions as well as the acquiring of practical and clinical skills.

CMP 389 Emergency care 2 389
Academic organisation: Family Medicine
Prerequisite: CMP 281, CMP 282, CMP 383, FAR 280
Contact time: 5 ppw 2 dpw
Period of presentation: Semester 2
Language of tuition: English
Credits: 12
Module content:
Theory and practical training in emergency care. A problem-oriented and inter-disciplinary
approach is emphasised. Emphasis is placed on the diagnosis and treatment of the most prominent conditions as well as the acquiring of practical and clinical skills.

CNT 310 Community nutrition 310
Academic organisation: Human Nutrition
Prerequisites: 3rd-year status
Contact time: 2 lpw
Period of presentation: Semester 1
Language of tuition: English
Module content:
Community nutrition practice within the larger public health realm. Nutrition within primary healthcare. Nutrition and community development as well as project planning and management

CNT 320 Community nutrition 320
Academic organisation: Human Nutrition
Prerequisites: 3rd-year status
Contact time: 1 dpw
Period of presentation: Semester 2
Language of tuition: English
Module content:
A project on community profiling and primary healthcare nutrition services in South Africa.

CNT 411 Community nutrition 411
Academic organisation: Human Nutrition
Prerequisite: Fourth-year status
Contact time: 4 lpw 1 dpw
Period of presentation: Semester 1
Language of tuition: Double medium
Module content:
Community nutrition in the South African context, food security, nutrition needs assessments, analysis of cause, intervention with regard to programme planning for nutrition education, food supplementation, various micro-nutrient approaches, application to vulnerable groups.

CNT 480 Community nutrition 480
Academic organisation: Human Nutrition
Prerequisite: CNT 411
Contact time: 5 other per week for 7 weeks
Period of presentation: Semester 2
Language of tuition: Double medium
Module content:

COU 371 Counselling 371
Academic organisation: Community Dentistry
Prerequisites: ODO 271, OFC 271, RAD 271, PDL 271, ORD 271, GAP 271, VKM 271, TBW 271
Contact time: 1 lpw
Period of presentation: Year
Language of tuition: English
Module content:
This module will equip the oral hygiene student with the theoretical underpinning for behavioural change and the necessary skills to counsel a patient on lifestyle behavioural
change. This would include, but not limited to promoting a healthy diet and smoking cessation. This would consist of both lectures and practical sessions with clients/patients.

DBG 795 Essay 795
Academic organisation: Public Health Medicine
Period of presentation: Year
Language of tuition: English Credits: 24

DCD 701 Normal development 701
Academic organisation: Occupational Therapy
Contact time: 10 ppw 5 dpw 15 lpw
Period of presentation: Quarter 1
Language of tuition: Double medium Credits: 20
Module content:

DCD 702 Identification 702
Academic organisation: Occupational Therapy
Contact time: 5 spw 5 dpw 15 lpw 10 ppw
Period of presentation: Quarter 2
Language of tuition: Double medium Credits: 30
Module content:
Early identification and the clinical picture of developmental delay of the somato-sensory system. Early identification and the clinical picture of developmental delay of the motor system. Early identification and the clinical picture of developmental delay of the visual system including pre-perceptual and perceptual skills.

DCD 703 Intervention for developmental disabilities 703
Academic organisation: Occupational Therapy
Contact time: 5 dpw 5 spw 15 lpw 10 ppw
Period of presentation: Quarter 3
Language of tuition: Double medium Credits: 35
Module content:
Intervention strategies within the school setting. Adaptation of activity programmes. Facilitation of social interaction.

DCD 704 Intervention for disabilities 704
Academic organisation: Occupational Therapy
Contact time: 15 lpw 5 dpw 10 ppw 5 spw
Period of presentation: Quarter 4
Language of tuition: Double medium Credits: 35
Module content:

DNE 110 Didactics of nursing education 110
Academic organisation: Nursing Science
Contact time: 2 lpw 1 other per week
Period of presentation: Semester 1
Language of tuition: English  
Credits: 20
Module content:
Learning strategies and educational media
Developing teaching strategies and designing audiovisual aids and evaluation tools.
Theory of didactics
Cognitive and intellectual functioning of adults. Educational relations.

DNE 120 Didactics of nursing education 120
Academic organisation: Nursing Science
Contact time: 2 lpw 1 other per week
Period of presentation: Semester 2
Language of tuition: English  
Credits: 20
Module content:
Curriculum and programme development.
Application of the principles of curriculum building. Management of curricula, programmes and nursing schools.
Student guidance.
Learning problems and remedial practices. Student support systems. Learning theories.

DNE 160 Didactics of nursing education 160
Academic organisation: Nursing Science
Contact time: 1 ppw
Period of presentation: Year
Language of tuition: English  
Credits: 10
Module content:
*Attendance modules only
Nursing education practical work.
Compulsory practical work, including the preparation and presentation of at least ten (10) lectures and five (5) clinical teaching sessions.

DNP 151 Dynamics of nursing practice 151
Academic organisation: Nursing Science
Contact time: 4 lpw 2 ppw
Period of presentation: Quarter 1
Language of tuition: English  
Credits: 13
Module content:
Intra and interpersonal dimensions of the nurse.

NB: Only for selected BCur students.

**DNP 152 Dynamics of nursing practice 152**

**Academic organisation:** Nursing Science  
**Contact time:** 2 ppw 4 lpw  
**Period of presentation:** Quarter 2  
**Language of tuition:** English  
**Credits:** 13  
**Module content:**
Assessment skills (including the assessment interview, assessment of mental needs, basic examination skills and vital signs), compilation of a database and needs list and the prioritisation of needs. Application of the scientific approach to nursing.  
NB: Only for selected BCur students.

**DNP 153 Dynamics of nursing practice 153**

**Academic organisation:** Nursing Science  
**Contact time:** 3 lpw 2 ppw  
**Period of presentation:** Quarter 3  
**Language of tuition:** English  
**Credits:** 13  
**Module content:**
NB: Only for selected BCur students.

**DNP 154 Dynamics of nursing practice 154**

**Academic organisation:** Nursing Science  
**Contact time:** 2 ppw 3 lpw  
**Period of presentation:** Quarter 4  
**Language of tuition:** English  
**Credits:** 13  
**Module content:**
NB: Only for selected BCur students.
DNP 251 Dynamics of nursing practice 251
Academic organisation: Nursing Science
Prerequisite: ANA 151, ANA 152, ANA 161, ANA 162, FSG 161, FSG 162, NUR 151, NUR 152, NUR 153, NUR 154, AIM 101, ELH 121 and 122
Contact time: 2 ppw 3 lpw
Period of presentation: Quarter 1
Language of tuition: English
Credits: 9
Module content:
Nurse-therapeutic contexts.
Ethical-legal aspects and health policy regarding mental illness. Organisation and institutions in psychiatric healthcare. Theoretical foundations of psychiatric nursing practice. The DSM classification system of mental disorders.
NB: Only for selected BCur students.

DNP 252 Dynamics of nursing practice 252
Academic organisation: Nursing Science
Prerequisite: ANA 151, ANA 152, ANA 161, ANA 162, FSG 161, FSG 162, NUR 151, NUR 152, NUR 153, NUR 154, AIM 101, ELH 121 and 122
Contact time: 3 lpw 2 ppw
Period of presentation: Quarter 2
Language of tuition: English
Credits: 9
Module content:
Acute and chronic mental disorders.
Nursing process applied in the psychiatric context. Psychopathology, abnormal and deviant behaviour. Common mental disorders: schizophrenia, affective, cognitive and anxiety disorders.
NB: Only for selected BCur students.

DNP 253 Dynamics of nursing practice 253
Academic organisation: Nursing Science
Prerequisite: ANA 151, ANA 152, ANA 161, ANA 162, FSG 161, FSG 162, NUR 151, NUR 152, NUR 153, NUR 154, AIM 101, ELH 121 and 122
Contact time: 2 lpw 2 ppw
Period of presentation: Quarter 3
Language of tuition: English
Credits: 9
Module content:
Nurse-therapeutic conversations, group therapy and comprehensive care.
Individual therapy: Facilitative communication and the one-to-one relationship.
Group: the group process, group dynamics, leadership and leadership functions and relevant assessment skills. Mental health education. Therapeutic milieu.
NB: Only for selected BCur students.

DNP 254 Dynamics of nursing practice 254
Academic organisation: Nursing Science
Prerequisite: ANA 151, ANA 152, ANA 161, ANA 162, FSG 161, FSG 162, NUR 151, NUR 152, NUR 153, NUR 154, AIM 101, ELH 121 and 122
Contact time: 2 ppw 2 lpw
Period of presentation: Quarter 4
Language of tuition: English
Credits: 9
Module content:
Therapeutic skills, mentally challenged and cultural issues.
DNP 351 Dynamics of nursing practice 351
Academic organisation: Nursing Science
Prerequisite: NUR 251, NUR 252, NUR 253, NUR 254, DNP 251, DNP 252, DNP 253, DNP 254, NPE 261, NPE 262
Contact time: 4 lpw 1 ppw
Period of presentation: Quarter 1
Language of tuition: English
Credits: 15
Module content:
Comprehensive family nursing. Family life and family dynamics. Alternative families and lifestyles. Perspectives and approaches to comprehensive nursing care and support of families. Family violence and pathology. Marriage counselling and family therapy. Families in the perinatal period: unique needs and support (including basic antenatal and postnatal care).
NB: Only for selected BCur students.

DNP 352 Dynamics of nursing practice 352
Academic organisation: Nursing Science
Prerequisite: NUR 251, NUR 252, NUR 253, NUR 254, DNP 251, DNP 252, DNP 253, DNP 254, NPE 261, NPE 262
Contact time: 4 lpw 1 ppw
Period of presentation: Quarter 2
Language of tuition: English
Credits: 15
Module content:
Comprehensive community nursing. Perspectives and approaches to comprehensive nursing care and support of communities. Relevant statutory control over primary healthcare (PHC) practices in South Africa. Relevant assessment skills. Sexually transmitted infections and communicable diseases. Therapeutic support of the community. Rehabilitative support of communities in need. Emphasis is placed on the facilitation and support of self-care related to physical, mental and environmental health and well-being.
NB: Only for selected BCur students.

DNP 353 Dynamics of nursing practice 353
Academic organisation: Nursing Science
Prerequisite: NUR 251, NUR 252, NUR 253, NUR 254, DNP 251, DNP 252, DNP 253, DNP 254, NPE 261, NPE 262
Contact time: 3 lpw 1 ppw
Period of presentation: Quarter 4
Language of tuition: English
Credits: 15
Module content:
NB: Only for selected BCur students.

DNP 354 Dynamics of nursing practice 354
Academic organisation: Nursing Science
Prerequisite: NUR 251, NUR 252, NUR 253, NUR 254, DNP 251, DNP 252, DNP 253, DNP 254, NPE 261, NPE 262
Contact time: 3 lpw 1 ppw  
Period of presentation: Quarter 3  
Language of tuition: English  
Credits: 15  
Module content:  
Note: DNP 354 must be completed prior to DNP 353.  
Primary curative nursing for common and uncomplicated disease conditions.  
NB: Only for selected BCur students.  

DNP 451 Dynamics of nursing practice 451  
Academic organisation: Nursing Science  
Prerequisite: NUR 351, NUR 352, NUR 353, NUR 354, DNP 351, DNP 352, DNP 353, DNP 354, NPE 361, NPE 362  
Contact time: 2 ppw 3 lpw  
Period of presentation: Quarter 1  
Language of tuition: English  
Credits: 10  
Module content:  
NB: Only for selected BCur students.  

DNP 452 Dynamics of nursing practice 452  
Academic organisation: Nursing Science  
Prerequisite: NUR 351, NUR 352, NUR 353, NUR 354, DNP 351, DNP 352, DNP 353, DNP 354, NPE 361, NPE 362

END 700 Endodontics 700
Academic organisation: Odontology
Contact time: 1 dpw 1 spw 5 ppw
Period of presentation: Year
Language of tuition: Both Afr and Eng  Credits: 100
EOC 770 Ethics and values in healthcare, organisational behaviour change and strategy in health 770
**Academic organisation:** Public Health Medicine  
**Contact time:** 50 hours per week  
**Period of presentation:** Year  
**Language of tuition:** English  
**Credits:** 10

**Module content:**
The delivery of healthcare services requires high ethical values and standards to promote quality of life which improve patient outcomes. The innovative and creative leader in the health sector will be provided with skills in dealing with organisational behaviour patterns which influence behaviour change and policy strategy. The module will focus on the difficulties in changing workplace behaviour and mechanisms of how to sustain change strategies which are workable and enabling.

EOH 770 Introduction to environmental and occupational health 770
**Academic organisation:** Public Health Medicine  
**Contact time:** 1 ppw 1 other per week 16 lpw  
**Period of presentation:** Year  
**Language of tuition:** English  
**Credits:** 10

EOH 870 Introduction to environmental and occupational health 870
**Academic organisation:** School of Health Systems and Public Health  
**Contact time:** 16 lpw 1 ppw  
**Period of presentation:** Year  
**Language of tuition:** English  
**Credits:** 10

EOH 871 Introduction to toxicology 871
**Academic organisation:** School of Health Systems and Public Health  
**Prerequisite:** HME 870  
**Contact time:** 1 ppw 16 lpw  
**Period of presentation:** Year  
**Language of tuition:** English  
**Credits:** 5

EOM 870 Environmental epidemiology 870
**Academic organisation:** School of Health Systems and Public Health  
**Prerequisite:** EHM 871  
**Contact time:** 16 lpw 1 ppw  
**Period of presentation:** Year  
**Language of tuition:** English  
**Credits:** 10

EPI 800 Epidemiology 800
**Academic organisation:** Public Health Medicine  
**Period of presentation:** Year  
**Language of tuition:** Both Afr and Eng  
**Credits:** 24

**Module content:**
- The following epidemiology modules are compulsory:
- Introduction to health measuring and informatics
- Basic epidemiology and biostatistics
- Analytical epidemiology
- Taking of surveys
- Introduction to health informatics
- Basic quality assurance
• Intermediary biostatistics
• Introduction to health system research
• Research ethics
• Obtaining research awards
• Scientific writing and reporting
• Introduction to quantitative research
• Community participation in research
• Experimental epidemiology: clinical experiments

EPI 890 Dissertation: Epidemiology 890
Academic organisation: Public Health Medicine
Period of presentation: Year
Language of tuition: Both Afr and Eng  Credits: 100

EPI 900 Epidemiology 900
Academic organisation: Public Health Medicine
Period of presentation: Year
Language of tuition: English  Credits: 1

EPI 990 Thesis: Epidemiology 990
Academic organisation: Public Health Medicine
Period of presentation: Year
Language of tuition: English  Credits: 480

EPM 870 Analytical epidemiology 870
Academic organisation: School of Health Systems and Public Health
Prerequisite: BOS 871 and EPM 871
Contact time: 1 ppw 3 dpw
Period of presentation: Year
Language of tuition: English  Credits: 5

EPM 871 Epidemiological study design 871
Academic organisation: School of Health Systems and Public Health
Contact time: 3 dpw 1 ppw
Period of presentation: Year
Language of tuition: English  Credits: 5

EPM 873 Conducting surveys 873
Academic organisation: School of Health Systems and Public Health
Prerequisite: BOS 870
Contact time: 12 lpw 1 ppw
Period of presentation: Year
Language of tuition: English  Credits: 10

EPM 874 Disease surveillance 874
Academic organisation: School of Health Systems and Public Health
Contact time: 1 ppw 3 dpw
Period of presentation: Year
Language of tuition: English  Credits: 5

FAR 171 Pharmacology 171
Academic organisation: Pharmacology
Contact time: 2 lpw
Period of presentation: Semester 2  
Language of tuition: Double medium  
Credits: 5  
Module content:  
The module will provide the oral hygiene student with appropriate pharmacological knowledge and understanding of drugs that necessitate treatment modification to the patient’s treatment plan. The oral hygiene student will be equipped with a practical understanding of pharmaco-therapeutic concepts which are essential for prescribing medicaments used for oral hygiene, and to make an informed choice of a safe suitable local anaesthetic drug for the administering thereof to a patient. He/she must be able to apply knowledge of pharmacology in the clinical setting and in performing procedures pertaining to the scope of oral hygiene.

FAR 180 Pharmacology 180  
Academic organisation: Pharmacology  
Contact time: 1 lpw  
Period of presentation: Semester 2  
Language of tuition: English  
Credits: 2  
Module content:  
Introductory principles to clinical pharmacotherapy. Core pharmacotherapy and applicable clinical aspects of the most general and prominent diseases and conditions.

FAR 280 Pharmacology 280  
Academic organisation: Pharmacology  
Prerequisite: FAR 180  
Contact time: 1 lpw  
Period of presentation: Semester 2  
Language of tuition: English  
Credits: 2  
Module content:  
Introductory principles to clinical pharmacotherapy. Core pharmacotherapy and applicable clinical aspects of the most general and prominent diseases and conditions.

FAR 370 Clinical pharmacotherapy 370  
Academic organisation: Pharmacology  
Prerequisite: BOK 280, (BOK 281 or (BOK 285,287)), BOK 283, GNK 286, GNK 288, GPS 280, IKT 200, SMO 211, SMO 281  
Contact time: 2 lpw 1 dpw  
Period of presentation: Year  
Language of tuition: Double medium  
Credits: 8  
Module content:  
Introductory principles of clinical pharmacotherapy in view of applicable patient problems, receptors for medicines, principles of structure activity relationships, dynamic and kinetic principles to bring pharmacological principles and clinical therapy together in a problem-based curriculum.

FAR 380 Dispensing 380  
Academic organisation: Pharmacology  
Prerequisite: CMP 281, CMP 282, FAR 280  
Contact time: 2 lpw  
Period of presentation: Semester 2  
Language of tuition: English  
Credits: 4  
Module content:  
To attain the necessary knowledge and skills needed to successfully apply for a license
Health Sciences 2014

to dispense, the module focuses on the minimum criteria set by the South African Pharmacy Council. Particular focus is placed on practical dispensing skills, integration of knowledge and skills, appropriate prescribing, legally sound prescription methods and proper communication.

FAR 381 Pharmacology 381
Academic organisation: Pharmacology
Prerequisite: FLG 211, FLG 212, FLG 221, FLG 222 GS
Contact time: 2 lpw
Period of presentation: Semester 1
Language of tuition: Double medium
Credits: 18
Module content:
Introduction, receptors, antagonism, kinetic principles, drugs that impact upon the autonomic and central nervous system, pharmacotherapy of hypertension, angina pectoris, myocardial infarction, heart failure, arrhythmias, and epilepsy. Diuretics, glucocorticosteroids, local anaesthetics, anaesthetic drugs, analgesics, iron and vitamins, oncostatics and immuno suppressants.

FAR 382 Pharmacology 382
Academic organisation: Pharmacology
Prerequisite: FAR 381, FLG 211, FLG 212, FLG 221, FLG 222 GS
Contact time: 2 lpw
Period of presentation: Semester 2
Language of tuition: Double medium
Credits: 18
Module content:
Hormones, drugs that act on the histaminergic, serotonergic, and dopaminergic receptors. Pharmacotherapy of diabetes mellitus, schizophrenia, depression, obesity, anxiety, insomnia, gastro-intestinal diseases. Anticoagulants, antimicrobial drugs.

FAR 705 Pharmacology 705
Academic organisation: Pharmacology
Prerequisite: As per yearbook
Contact time: 6 lpw 16 ppw 2 spw
Period of presentation: Year
Language of tuition: English
Credits: 96
Module content
Covers the following topics: Immunology, pain and inflammation, pharmacokinetics, wound healing, proteomics, isotopes in medicine, pharmacogenetics, law, pharmaceutics, traditional medicines, plant-based medicines, lifestyle disorders, drug/drug interactions, drug adverse effects, malaria, cancer and malignancies and psycho/neuropharmacology, Good Clinical Practice (GCP), Good Laboratory Practice (GLP), Therapeutic Drug Monitoring (TDM), Overview of dispensing medicine. Practicals are as per study guide.

FAR 802 Pharmacology 802
Academic organisation: Pharmacology
Contact time: 1 dpw
Period of presentation: Year
Language of tuition: Double medium
Credits: 36

FAR 803 Pharmacology 803
Academic organisation: Pharmacology

FEG 881 Core concepts in philosophy and mental health 881
Academic organisation: Psychiatry
Contact time: 2 other per week 1 web-based period per week 2 spw 2 lpw
Period of presentation: Semester 1 and Semester 2
Language of tuition: Double medium Credits: 10

FEG 882 Philosophy of science and mental health 882
Academic organisation: Psychiatry
Contact time: 2 other per week 1 web-based period per week 2 lpw 2 spw
Period of presentation: Semester 1 and Semester 2
Language of tuition: Double medium Credits: 10

FEG 883 Philosophy of mind and mental health 883
Academic organisation: Psychiatry
Contact time: 2 lpw 1 web-based period per week 2 spw 2 other per week
Period of presentation: Semester 1 and Semester 2
Language of tuition: Double medium Credits: 10

FEG 884 Ethics, values and mental health 884
Academic organisation: Psychiatry
Contact time: 2 lpw 1 web-based period per week 2 other per week 2 spw
Period of presentation: Semester 1 and Semester 2
Language of tuition: Double medium Credits: 10

FEG 890 Dissertation: Philosophy and ethics of mental health 890
Academic organisation: Psychiatry
Period of presentation: Year
Language of tuition: Both Afr and Eng Credits: 140

FEG 900 Health ethics 900
Academic organisation: Psychiatry
Period of presentation: Year
Language of tuition: Both Afr and Eng  Credits: 1

FEG 990 Thesis: Health ethics 990
Academic organisation: Psychiatry
Period of presentation: Year
Language of tuition: Both Afr and Eng  Credits: 480

FEM 780 Emergency medicine 780
Academic organisation: Family Medicine
Period of presentation: Semester 1
Language of tuition: Both Afr and Eng  Credits: 20
Module content:
Study of airway; airway ventilation breathing; circulation; disorientation and evaluation.

FFD 801 Pharmacokinetics and pharmacodynamics 801
Academic organisation: Pharmacology
Period of presentation: Year
Language of tuition: Double medium  Credits: 30

FFD 802 Pharmacokinetics and pharmacodynamics 802
Academic organisation: Pharmacology
Period of presentation: Year
Language of tuition: Double medium  Credits: 30

FFD 803 Pharmacokinetics and pharmacodynamics 803
Academic organisation: Pharmacology
Period of presentation: Year
Language of tuition: Double medium  Credits: 30

FFM 780 Family-oriented patient care 780
Academic organisation: Family Medicine
Period of presentation: Semester 1
Language of tuition: Both Afr and Eng  Credits: 20
Module content:
Study of the family as the object of care; family systems theory; tools for family-oriented care; family life-cycle; ethics of treating families; family conference; the family and chronic illness; family violence and alcohol abuse in the family.

FIA 702 Financial administration 702
Academic organisation: Occupational Therapy
Contact time: 4 dpw 2 lpw 1 spw
Period of presentation: Year
Language of tuition: Double medium  Credits: 30
Module content:
Financial statements; budget; decision-making; behaviour of costs; cost-volume relation; allocation of costs; manufacturing costs, process of costs; activity costs; overhead costs; business planning.

FIP 701 Physiology and patho-physiology 701
Academic organisation: Physiology
Contact time: 1 dpw 1 ppw 3 lpw
Period of presentation: Year
Language of tuition: Both Afr and Eng Credits: 10
Module content:
Physiology of the integration of hand function; brain plasticity, pain. Regeneration of skin, bone, muscle and nerve tissue; infection; inflammation.

FLG 171 Physiology 171
Academic organisation: Physiology
Contact time: 1 ppw 2 lpw
Period of presentation: Semester 1
Language of tuition: English Credits: 8
Module content:
Physiology is the study of organisms at a cellular and system level. Physiology will provide the oral hygiene student with the necessary knowledge to understand functioning and abnormalities of the human body, the vital organs necessary for normal functioning and the systems that provide essential communication for the control of the body functions and homeostasis. The module content will serve as preknowledge for clinical subjects.

FLG 211 Introductory and neurophysiology 211
Academic organisation: Physiology
Prerequisite:
Contact time: 2 lpw 1 ppw
Period of presentation: Semester 1
Language of tuition: English Credits: 12
Module content:
Orientation in physiology, homeostasis, cells and tissue, muscle and neurophysiology, cerebrospinal fluid and the special senses. Practical work: Experimental physiology to complement the theory.

FLG 212 Circulatory physiology 212
Academic organisation: Physiology
Prerequisite: CMY 117 GS, CMY 127 GS, MLB 111 GS, PHY 131 GS
Contact time: 2 lpw 1 ppw
Period of presentation: Semester 1
Language of tuition: English Credits: 12
Module content:
Body fluids; haematology; cardiovascular physiology and the lymphatic system. Practical work: Practical exercises and experimental physiology.

FLG 221 Lung and renal physiology, acid-base balance and temperature 221
Academic organisation: Physiology
Prerequisite: FLG 211, FLG 212
Contact time: 2 lpw 1 ppw
Period of presentation: Semester 2
Language of tuition: English Credits: 12
Module content:
Structure, gas exchange and secretory functions of the lungs; build, excretory and non-urinary functions of the kidneys, acid-base balance, as well as the skin and body temperature control. Practical work: Practical exercises and experimental physiology.
FLG 222 Digestion, endocrinology and reproductive system 222
Academic organisation: Physiology
Prerequisite: FLG 211, FLG 212
Contact time: 1 ppw 2 lpw
Period of presentation: Semester 2
Language of tuition: English
Credits: 12
Module content:
Nutrition, digestion and metabolism; hormonal control of the body functions and the reproductive system.
Practical work: Experimental physiology.

FLG 312 Developmental physiology 312
Academic organisation: Physiology
Prerequisite: BCM 251 GS, BCM 252 GS, BCM 261 GS, BCM 262 GS and FLG 221 AND FLG 222
Contact time: 1 lpw
Period of presentation: Semester 1
Language of tuition: English
Credits: 9
Module content:
Study of the physiological development and adaptations from the foetus through to the aged.

FLG 314 Immunology 314
Academic organisation: Physiology
Prerequisite: BCM 251 GS, BCM 252 GS, BCM 261 GS, BCM 262 GS and FLG 221 AND FLG 222
Contact time: 1 lpw
Period of presentation: Semester 1
Language of tuition: English
Credits: 9
Module content:
Introduction to basic, applied and integrated immunological mechanisms.

FMA 781 Clinically applied anatomy 781
Academic organisation: Family Medicine
Period of presentation: Semester 1
Language of tuition: Both Afr and Eng
Credits: 12
Module content:
Study of the upper limb, including the breast; head and neck; thorax; abdomen; pelvis; lower limb; embryology and histology.

FMA 782 Clinically applied anatomy 782
Academic organisation: Family Medicine
Contact time: 1 spw
Period of presentation: Semester 1
Language of tuition: Both Afr and Eng
Credits: 10

FMC 781 Cardiovascular diseases 781
Academic organisation: Family Medicine
Period of presentation: Semester 1
Language of tuition: Both Afr and Eng
Credits: 12
FMD 781 Chronic diseases 781
Academic organisation: Family Medicine
Period of presentation: Semester 1
Language of tuition: Both Afr and Eng Credits: 10
Module content:
Study of diabetes mellitus, asthma, epilepsy, hypertension, cardiac failure, obesity and chronic pain.

FME 781 Medical ethics 781
Academic organisation: Family Medicine
Period of presentation: Semester 1
Language of tuition: Both Afr and Eng

FMF 781 Psychiatry 781
Academic organisation: Family Medicine
Period of presentation: Semester 1
Language of tuition: Both Afr and Eng Credits: 10
Module content:
Psychiatry in family practice
Study of depression, anxiety; suicide; the difficult adolescent; substance use and abuse; schizophrenia; dementia and delirium.

FMG 781 Geriatrics 781
Academic organisation: Family Medicine
Period of presentation: Semester 1
Language of tuition: Both Afr and Eng Credits: 10
Module content:
Study of theories of ageing; physiology of ageing; demography; presentation of disease in the aged; cardiovascular system; conditions of the joints; respiratory system; central and peripheral nervous system; digestive tract; urinary tract; endocrine system; haematology; skin and sense organs; psycho-geriatrics; falls in the elderly; infections; cancer; terminal care; nutrition; rehabilitation; drugs and preventive geriatrics.

FMI 781 Infectious diseases 781
Academic organisation: Family Medicine
Period of presentation: Semester 1
Language of tuition: Both Afr and Eng Credits: 10
Module content:
Introduction; study of contagious disease important to the traveller; contagious diseases in the tropical regions; viral illnesses in children; fever of unknown origin; sexually transmitted diseases; haemorrhagic fever; infective diarrhoea; meningitis; leprosy; HIV/Aids; tuberculosis; rabies; school attendance and infectious diseases; community-acquired pneumonia (GVP); acute virus hepatitis; rational use of antibiotics and other exogenous infections.

FMP 781 Physiology 781
Academic organisation: Family Medicine
Period of presentation: Semester 1
Language of tuition: Double medium Credits: 10
Module content:
Study of the nervous system; muscle physiology (skeletal, smooth and heart muscle); endocrine physiology; physiology of reproduction (age-related); cardiovascular
physiology; thermoregulation; nutrition and digestion; acid-base balance; kidney, salt and water balance; blood and respiration.

FMS 781 Sports medicine 781
Academic organisation: Family Medicine
Period of presentation: Semester 1
Language of tuition: Both Afr and Eng  Credits: 10
Module content:
An approach to sports injuries: concepts of training and fitness; energy systems and transfer of energy, nutrition, health and training; special investigations; injury; strapping and wrapping; stress fractures; examination and clinical conditions of different areas, upper limb, lower limb, pelvis; trunk and head; special considerations of age and gender – the child, the female athlete and the elderly exerciser; exercising under certain conditions – heat, cold, underwater altitude and time zones; sport and medical conditions – diabetes mellitus; HIV/AIDS; drugs, alcohol; the tired athlete; concussion/boxing; exercise induced headache and medical coverage of sports events.

FMU 781 Rheumatology 781
Academic organisation: Family Medicine
Period of presentation: Semester 1
Language of tuition: Both Afr and Eng  Credits: 10
Module content:
Study of rheumatoid arthritis; osteoarthritis; gout; ceronegative spondilo-arthritis; collagen diseases; lower back pain; fibromyalgia and osteoporosis.

FMX 780 Practice management 780
Academic organisation: Family Medicine
Period of presentation: Semester 1
Language of tuition: Both Afr and Eng  Credits: 20
Module content:
Study of human resource management; financial management; auditing of management and services management.

FOT 700 Forensic odontology 700
Academic organisation: Oral Pathology and Oral Biology
Period of presentation: Year
Language of tuition: Both Afr and Eng  Credits: 100

FSA 806 Physiotherapeutic anatomy 806
Academic organisation: Anatomy
Contact time: 1 dpw 1 spw 4 lpw
Period of presentation: Year
Language of tuition: Double medium  Credits: 15

FSA 807 Physiotherapeutic anatomy 807
Academic organisation: Anatomy
Period of presentation: Year
Language of tuition: Double medium  Credits: 15

FSA 808 Physiotherapeutic anatomy 808
Academic organisation: Anatomy
Period of presentation: Year
Language of tuition: Double medium  Credits: 15
FSA 809 Physiotherapeutic anatomy 809  
Academic organisation: Anatomy  
Period of presentation: Year  
Language of tuition: Double medium  
Credits: 15

FSA 870 Physiotherapeutic anatomy 870  
Academic organisation: Anatomy  
Period of presentation: Year  
Language of tuition: Double medium  
Credits: 15

FSA 871 Physiotherapeutic anatomy 871  
Academic organisation: Anatomy  
Period of presentation: Year  
Language of tuition: Double medium  
Credits: 15

FSA 872 Physiotherapeutic anatomy 872  
Academic organisation: Anatomy  
Period of presentation: Year  
Language of tuition: Double medium  
Credits: 24

FSA 873 Physiotherapeutic anatomy 873  
Academic organisation: Anatomy  
Period of presentation: Year  
Language of tuition: Double medium  
Credits: 24

FSA 875 Physiotherapeutic anatomy 875  
Academic organisation: Anatomy  
Contact time: 4 lpw 1 dpw 1 spw  
Period of presentation: Year  
Language of tuition: Double medium  
Credits: 15

FSA 876 Physiotherapeutic anatomy 876  
Academic organisation: Anatomy  
Period of presentation: Year  
Language of tuition: Double medium  
Credits: 24

FSG 161 Physiology 161  
Academic organisation: Physiology  
Contact time: 4 lpw 1 ppw  
Period of presentation: Quarter 3  
Language of tuition: Double medium  
Credits: 12  
Module content:  
Introduction and neurophysiology: homeostasis, eytology and histology, muscles and neurophysiology, cerebrospinal fluid, the special senses.

FSG 162 Physiology 162  
Academic organisation: Physiology  
Contact time: 4 lpw 1 ppw  
Period of presentation: Quarter 4  
Language of tuition: Double medium  
Credits: 12  
Module content:  
Circulatory physiology: Body fluids, haematology, body defence mechanisms, cardio-vascular physiology, lymphatic system.
FSG 185 Physiology 185
Academic organisation: Physiology
Contact time: 8 lpw 1 dpw
Period of presentation: Semester 1
Language of tuition: English
Credits: 12
Module content:
Introduction to Physiology, homeostasis and body fluids, cell physiology, haematology and immunology, cardiovascular system, respiration, neurophysiology and senses, gastrointestinal physiology and nutrition, kidneys, endocrinology, reproduction, skin and body temperature.

FSG 251 Physiology 251
Academic organisation: Physiology
Prerequisite: RAN 100, RFI 110, FSG 161, FSG 162, MTL 180, RAW 180, RAW 182
Contact time: 1 dpw 1 ppw 4 lpw
Period of presentation: Quarter 1
Language of tuition: Double medium
Credits: 6
Module content:
Structure, gas exchange and secretory functions of the lungs; build, excretory and non-urinary functions of the kidneys, acid-base balance, as well as the skin and body temperature control.

FSG 252 Physiology 252
Academic organisation: Physiology
Prerequisite: RAN 100, RFI 110, FSG 161, FSG 162, RAW 180, RAW 182, MTL 180
Contact time: 1 dpw 4 lpw
Period of presentation: Quarter 2
Language of tuition: Double medium
Credits: 6
Module content:
Nutrition, digestion and metabolism, hormonal control of body functions and the reproductive systems.
Practical work: endocrine system, reproductive system, pregnancy test.

FSG 261 Physiology 261
Academic organisation: Physiology
Prerequisite: PHY 131, CMY 151, ANA 151, ANA 152, ANA 161, ANA 162, FSG 161, FSG 162, FTP 100
Contact time: 2 lpw
Period of presentation: Quarter 3
Language of tuition: Double medium
Credits: 6
Module content:
Special neuro and muscle physiology.

FSG 262 Physiology 262
Academic organisation: Physiology
Prerequisite: RAN 100, RFI 110, FSG 161, FSG 162, RAW 180, RAW 182, MTL 180
Contact time: 3 lpw
Period of presentation: Quarter 4
Language of tuition: Double medium
Credits: 6
Module content:
Applied pathophysiology.
FSG 270 Physiology 270 (offered as from 2015)
Academic organisation: Physiology
Contact time: 5 lpw 1 ppw
Period of presentation: Year
Language of tuition: English Credits: 72
Module content:
Metabolism; neurophysiology; the somatic sensory system, pain and special senses; muscle physiology; haematology; cardiovascular system; respiratory system; the urinary system; the gastro intestinal system; the endocrine system; the reproductive system; temperature homeostasis, sickness behaviour and skin; immunology; bone and cartilage metabolism and fracture healing; and pathophysiology.

FSG 370 Applied physiology 370
Academic organisation: Physiology
Prerequisite: BOK 280, (BOK 281 or BOK 285,287)), BOK 283, GNK 286, GNK 288, GPS 280, IKT 200, SMO 211, SMO 281
Contact time: 1 dpw 4 lpw
Period of presentation: Semester 1
Language of tuition: Both Afr and Eng Credits: 12
Module content:
Consult the Department of Physiology.

FSG 710 Research methodology: Physiology 710
Academic organisation: Physiology
Period of presentation: Semester 1
Language of tuition: Both Afr and Eng Credits: 12

FSG 712 Cellular physiology 712
Academic organisation: Physiology
Period of presentation: Semester 1
Language of tuition: Both Afr and Eng Credits: 12

FSG 720 Applied physiology 720
Academic organisation: Physiology
Period of presentation: Semester 2
Language of tuition: Both Afr and Eng Credits: 12

FSG 771 Basic physiology 771
Academic organisation: Physiology
Period of presentation: Year
Language of tuition: Both Afr and Eng Credits: 24

FSG 773 Research physiology 773
Academic organisation: Physiology
Period of presentation: Year
Language of tuition: Both Afr and Eng Credits: 24

FSG 774 Physiology: Practical 774
Academic organisation: Physiology
Period of presentation: Year
Language of tuition: Both Afr and Eng Credits: 24

Credits: 52

Module content:  
The problem-based learning approach to the principles of human movement science manual therapy for soft tissue and electro-biomechanics. This approach is applied by using selected clinical conditions of the thorax, pelvis and hip-joint over the total life spectrum.  
The problem-based approach to the treatment of selected clinical conditions of the knee, ankle and foot complex, the pectoral girdle and gleno-humeral joint, the elbow, forearm  

253
and wrist and hand complex over the total life-cycle, through the application of the principles of human movement science manual therapy for soft tissue and electro-biomechanic.

**FTP 220 Physiotherapy clinical practice 220**

**Academic organisation:** Physiotherapy  
**Prerequisite:** PHY 131, CMY 151, FSG 161, FSG 162, ANA 151, FTP 100, ANA 152, SLK 110, ANA 161, ANA 162, AIM 101, ELH 121 and 122  
**Contact time:** 1 lpw 1 other per week  
**Period of presentation:** Semester 2  
**Language of tuition:** Both Afr and Eng  
**Credits:** 20  
**Module content:**
Study of the epidemiology, prevalence and incidence of selected clinical conditions. Students acquire clinical experience through the treatment of selected clinical conditions in various healthcare institutions, practices and clinics. A theoretical and clinical examination will take place after conclusion of the module.

**FTP 300 Physiotherapy 300**

**Academic organisation:** Physiotherapy  
**Prerequisite:** FSG 251, FSG 252, FSG 261, FSG 262, ANP 210, GMB 252, GMB 253, FTP 241, POL 251, FTP 231  
**Contact time:** 2 lpw 3 web-based periods per week 2 other per week 3 ppw 1 dpw  
**Period of presentation:** Year  
**Language of tuition:** Both Afr and Eng  
**Credits:** 40  
**Module content:**
Theory of comprehensive physiotherapeutic management (prevention, promotion, restoration, and rehabilitation) of notifiable, non-notifiable and infectious conditions. Diseases of lifestyle, chronic disease, the impact of HIV on disability and on patients with trauma, mental health. Impact of physical/economic/political/psychosocial environment on health and well-being, health promotion and development and sports science. Comprehensive physiotherapy management is applied to infant health, during childhood, adolescent health, women's and men's health, health and disease in middle age and geriatrics.

**FTP 301 Physiotherapy clinical practice 301**

**Academic organisation:** Physiotherapy  
**Prerequisite:** FSG 251, FSG 252, FSG 261, FSG 262, ANP 210, GMB 252, GMB 253, FTP 231, FTP 241, POL 251  
**Contact time:** 2 web-based periods per week 2 ppw 1 dpw 3 lpw  
**Period of presentation:** Year  
**Language of tuition:** Both Afr and Eng  
**Credits:** 60  
**Module content:**
Comprehensive clinical management of patients with communicable and non-communicable diseases and conditions, patients with an impairment or disability as a result of the impact of physical/economic/political and psychosocial environment on health and well-being, health promotion, and development and sports science. Comprehensive clinical management is applied where relevant on infant health, during childhood, adolescence, in women's and men's health, and health and disease in middle age and geriatrics, diseases of lifestyle, chronic disease, impact of HIV on disability, victims of trauma, and/or a mental health condition.
FTP 400 Physiotherapy 400
Academic organisation: Physiotherapy
Prerequisite: MRZ 310, RHC 451, RHC 452, FAR 381, FAR 382, FTP 300, FTP 301, POL 300
Contact time: 1 web-based period per week 2 ppw 1 lpw 1 dpw
Period of presentation: Year
Language of tuition: Both Afr and Eng
Module content:
Advanced comprehensive physiotherapeutic management of communicable and non-communicable diseases and conditions. This includes diseases of lifestyle, chronic disease, impact of HIV on disability, victims of trauma, and mental health. Impact of physical/economic/political/psychosocial environment of health and well-being, health promotion and development, and sports science. The comprehensive physiotherapeutic management is applied to patients of all ages where relevant: in infant health, childhood, adolescent health, women’s and men’s health, health and disease in middle age and geriatrics and is based on the epidemiology of disease. The module includes 800 hours clinical experience in a variety of healthcare scenarios.
Examination period: October/November.

FTP 401 Physiotherapy research 401
Academic organisation: Physiotherapy
Prerequisite: MRZ 310, RHC 451, RHC 452, FAR 382, FAR 381, FTP 300, FTP 301, POL 300
Contact time: 1 web-based period per week 3 lpw 1 dpw
Period of presentation: Year
Language of tuition: Both Afr and Eng
Module content:
The theoretical and practical application of research principles in physiotherapy and submission of an article based on research.
Examination period: October/November.

FTP 402 Physiotherapy clinical practice 402
Academic organisation: Physiotherapy
Prerequisite: MRZ 310, RHC 451, RHC 452, FAR 381, FAR 382, FTP 300, FTP 301, POL 300

GAP 271 Community as patient 271
Academic organisation: Community Dentistry
Prerequisite: ELH 121, ELH 122, AIM 101, ACO 171, ANA 171, FAR 171, FLG 171, GMB 171, MDB 171, ODO 171, ORD 171, PDL 171, TBW 171, VKM 171, NHS 171
Contact time: 1 lpw (24 weeks) 1 ppw (2 h) (30 weeks)
Period of presentation: Year
Language of tuition: Double medium  Credits: 14
Module content:
The module will enable the oral hygiene student to diagnose the oral health problems of any given community. Application of the knowledge gained from the module will enable him/her to participate in relevant primary and secondary preventive programmes to improve the oral health of that community in accordance with the Public Oral Health Policy of the RSA. Oral hygiene students will visit special schools, nursery schools and hospitals where oral health programmes are implemented and maintained.

GAP 371 Community as patient 371
Academic organisation: Community Dentistry
Prerequisite: ODO 271, OFC 271, RAD 271, PDL 271, ORD 271, GAP 271, VKM 271, TBW 271
Contact time: 2 ppw (30 week period) 2 practical sessions

Period of presentation: Year
Language of tuition: Double medium  Credits: 13
Module content:
This module consists of practical work in the community only and is a continuation of GAP 271 Community as patient 271.

GAP 470 Community as patient 470
Academic organisation: Community Dentistry
Prerequisite: GNK 388, MDB 370, TGG 370, FSG 370, FAR 370, RAD 370, TBW 370, ODO 370, PDL 370, DFA 370
Contact time: 1 lpw

Period of presentation: Year
Language of tuition: English  Credits: 4
Module content:
The modules in this subject consist of theoretical and practical training in oral epidemiology, community based primary and secondary prevention and the application of the principles of public oral health in his/her working environment.

GAP 570 Community as patient 570
Academic organisation: Community Dentistry
Prerequisite: TBW 470, ODO 470, MFP 470, PDL 470, DFA 470, OFC 470, PTK 470, GAP 470, TMZ 470
Contact time: 3 other per week 1 lpw

Period of presentation: Year
Language of tuition: English  Credits: 6
Module content:
The modules in this subject consist of theoretical and practical training in oral epidemiology, community-based primary and secondary prevention and the application of the principles of public oral health in his/her working environment.

**GMB 171 Microbiology and immunology 171**  
**Academic organisation:** Medical Microbiology  
**Contact time:** 3 lpw  
**Period of presentation:** Semester 1  
**Language of tuition:** English  
**Credits:** 8

**Module content:**  
This module will provide the oral hygiene student with a thorough basic knowledge of:  
- basic microbiology  
- applied oral microbiology  
- basic immunological principles  
- applied immunology  
- principles of hypersensitivity, auto-immune disease and immunisation  
The module content will serve as pre-knowledge for clinical subjects.

**GMB 252 Medical microbiology 252**  
**Academic organisation:** Medical Microbiology  
**Contact time:** 2 lpw  
**Period of presentation:** Quarter 2  
**Language of tuition:** Both Afr and Eng  
**Credits:** 6

**Module content:**  
Infection, immunity and basic bacteriology.  
Introduction and basic principles of infection, sterilisation and the immune system.  
Bacterial cells and the classification of disease-causing bacteria.

**GMB 253 Medical microbiology 253**  
**Academic organisation:** Medical Microbiology  
**Prerequisite:** FLG 211 GS, FLG 212 GS  
**Contact time:** 2 lpw  
**Period of presentation:** Quarter 3  
**Language of tuition:** Both Afr and Eng  
**Credits:** 6

**Module content:**  
Systemic bacteriology.  
Commonly occurring bacterial infections and the bacteria that cause them.

**GMB 254 Medical microbiology 254**  
**Academic organisation:** Medical Microbiology  
**Prerequisite:** FLG 211 GS, FLG 212 GS  
**Contact time:** 2 lpw  
**Period of presentation:** Quarter 4  
**Language of tuition:** Both Afr and Eng  
**Credits:** 6

**Module content:**  
Fungi, parasitology and virology.  
Commonly occurring fungal, viral and parasite infections and infestations, and the organisms that cause them.

**Module content:**  
The biopsychosocial approach to healthcare; patients in their family and community  
environment; the role of psychology in the work of a generalist; how patients adapt to  
sickness and cope with stress; the healthcare system in rural South Africa; health  
promotion and health education; the use of electronic databases.

GNK 128 Introduction to clinical pharmacotherapy 128  
**Academic organisation:** Pharmacology  
**Contact time:** 5 dpw 5 lpw  
**Period of presentation:** Semester 2  
**Language of tuition:** Double medium  
**Credits:** 10  
**Module content:**  
Introductory principles to clinical pharmacotherapy on the grounds of applicable patient  
problems/disease processes; receptors for medicines; principles of structure activity  
relationships; dynamic and kinetic principles to bring pharmacological principles and  
clinical therapy together in a problem-based curriculum.

GNK 188 Anatomy 188  
**Academic organisation:** Anatomy  
**Contact time:** 18 lpw 2 ppw  
**Period of presentation:** Semester 2  
**Language of tuition:** English  
**Credits:** 56  
**Module content:**  
Systemic anatomy and embryology:  
An introduction to anatomical terminology, the musculoskeletal system, nervous system,  
surface anatomy, cardiovascular system, respiratory system, urogenital system, gastro-  
intestinal system, and the endocrine system and human embryology.  
Human osteology:
Introduction to osteology, bone function and classification, humerus, radius, ulna, femur, tibia, fibula, clavicle, scapula, ribs, sternum, vertebrae, pelvis, hand and foot bones, sesamoid bones, skull, mandible, joints.

Human histology:
General introduction to cells and tissue, terminology, the cell and cytoplasm, organelles and inclusions, surface and glandular epithelium, general connective tissue, specialised connective tissue, namely cartilage, bone, blood and haemopoietic tissue, muscle and nervous tissue.

GNK 283 Introduction to clinical medicine 283
Academic organisation: Obstetrics and Gynaecology
Prerequisite: CMY 151, FIL 155, MGW 112, MLB 111, PHY 131, MTL 180, GNK 120, BOK 121, GNK 127, GNK 128, AIM 101, ELH 121 and 122.
Contact time: 2 lpw
Period of presentation: Semester 2
Language of tuition: Both Afr and Eng

Module content:
The biopsychosocio model of illness; the SIAMS framework for the consultation; surface anatomy: the integrated management of childhood illness (IMCI); general physical examination skills and introduction to clinical departments.

GNK 285 Blood 285
Academic organisation: Family Medicine
Prerequisite: CMY 151, GNK 121, GNK 122, MLB 111, PHY 131, GNK 126, BOK 120, MTL 180, MGW 111, FIL 182, AIM 101, ELH 121 and 122.
Contact time: 2 lpw
Period of presentation: Year
Language of tuition: Both Afr and Eng

Module content:

GNK 286 Basic emergency care 286
Academic organisation: Health Sciences Dean’s Office
Prerequisite: CMY 151, FIL 155, MGW 112, MLB 111, PHY 131, MTL 180, GNK 120, BOK 121, GNK 127, GNK 128, AIM 101, ELH 121 and 122.
Contact time: 1 other per week 8 ppw
Period of presentation: Semester 1 and/or 2
Language of tuition: Both Afr and Eng

Module content:
Theory and practical training in basic emergency care.

GNK 288 Anatomy (Dissection) 288
Academic organisation: Anatomy
Prerequisite: CMY 151, GNK 120, GNK 127, MLB 111, PHY 131, GNK 128, BOK 121, MGW 112, FIL 155, MTL 180, AIM 101, ELH 121 and 122.
Contact time: 14 lpw
Period of presentation: Semester 1
Language of tuition: English

Module content:
Clinically applied regional dissection of the upper limb, neck and back, head, brain, thorax, abdomen, pelvis and lower limb.

GNK 289 Anatomy 289 (offered as from 2015)
Academic organisation: Anatomy
Contact time: 15 lpw
Period of presentation: Semester 1
Language of tuition: English  
Credits: 40

Module content:  
Clinically applied regional approach to human anatomy. Detailed cadaveric dissection of the head and neck, brain and spinal cord, axilla, upper limb, thorax, back and abdomen. Particular emphasis will be given to the head and neck region. The perineum, pelvis and lower limb will not be dissected, but taught with the aid of prosected specimens.

GNK 381 Heart and blood vessels 381
Academic organisation: Internal Medicine
Prerequisite: BOK 280, GNK 288, BOK 284, GPS 280, (BOK 281 or (BOK 285, BOK 287)), GNK 283, GNK 286, LCP 280, SMO 281, SMO 211
Contact time: 16 lpw
Period of presentation: Semester 1
Language of tuition: Both Afr and Eng  
Credits: 25

Module content:  
Discussion of the important diseases in order to obtain a complete overview of the disease, which will include anatomy, physiology, pathology, pharmacology and clinical medicine.

GNK 383 Lungs and chest 383
Academic organisation: Internal Medicine
Prerequisite: BOK 280, GNK 288, BOK 284, GPS 280, (BOK 281 or (BOK 285, BOK 287)), GNK 283, GNK 286, LCP 280, SMO 281, SMO 211.
Contact time: 12 lpw
Period of presentation: Semester 1
Language of tuition: Both Afr and Eng  
Credits: 20

Module content:  
Lungs and chest.
Discussion of the significant diseases in order to obtain a complete overview of the disease, which will include anatomy, physiology, pathology, pharmacology and clinical medicine.

GNK 385 Preceptorship 385
Academic organisation: Family Medicine
Prerequisite: BOK 280, GNK 288, BOK 284, GPS 280, (BOK 281 or (BOK 285, BOK 287)), GNK 283, GNK 286, LCP 280, SMO 281, SMO 211
Contact time: 2 lpw
Period of presentation: Semester 2
Language of tuition: Both Afr and Eng  
Credits: 10

Module content:  
A learning opportunity for the undergraduate student to:
(i) experience in practice, the general practitioner or family physician;
(ii) meet the unselected patient; and
(iii) observe first-hand, the problems which have to be contended within primary care. The problems comprise biomedical, psycho-social and managerial challenges.

GNK 386 Haematological malignancies 386
Academic organisation: Paediatrics
Prerequisite: BOK 280, GNK 288, BOK 284, GPS 280, (BOK 281 or (BOK 285, BOK 287)), GNK 283, GNK 286, LCP 280, SMO 281, SMO 211
Contact time: 1 lpw
Period of presentation: Semester 1  
Language of tuition: Both Afr and Eng  
Credits: 5

Module content:
Haematological malignant neoplasia: Basic and clinical information with regard to this group of diseases, including healing ability with regard to lymphoma, leukaemia, myeloproliferative diseases; and immunoproliferative diseases.

GNK 388 Head and neck anatomy 388  
Academic organisation: Anatomy  
Prerequisite: GNK 288, BOK 283, (BOK 281 or (BOK 285, 287)), GNK 286, GPS 280, IKT 200, BOK 280, SMO 211, SMO 281, LCP 280  
Contact time: 12 ppw 16 dpw 4 lpw 8 spw  
Period of presentation: Semester 1  
Language of tuition: English  
Credits: 12

Module content:
A relevant head-and-neck anatomy module for dental students, detailing essential information applicable to the practice of clinical dentistry.

GNK 481 Disorders of childhood 481  
Academic organisation: Paediatrics  
Prerequisite: GNK 381, GNK 383, BOK 380, GNK 386, GPS 380, BOK 382, GNK 488, SMO 311, SMO 380, SMO 382  
Contact time: 6 lpw  
Period of presentation: Semester 1  
Language of tuition: Both Afr and Eng  
Credits: 31

Module content:
The module is designed to help students gain knowledge, skills and attitudes in order to understand and respond to the special needs and vulnerability of children in relation to development, nutrition, environment and adaptation; recognise by means of history and examination, common and important abnormalities of development, nutrition, environment and adaptation and be able to deal with them effectively; recognise by means of history and examination, common and important health problems of infancy and childhood and be able to deal with them effectively.
The mornings are devoted to direct contact with paediatric patients and their problems by means of small-group activities at a variety of experimental learning sites. The afternoon periods are used for representative case studies with regard to a series of general or important themes, illustrated by multidisciplinary symposia, lectures, problem-solving exercises and self-tuition.

GNK 483 Musculoskeletal conditions 483  
Academic organisation: Orthopaedics  
Prerequisite: GNK 381, GNK 383, BOK 380, GNK 386, GPS 380, BOK 382, SMO 380, SMO 311, SMO 382  
Contact time: 7 lpw  
Period of presentation: Semester 2  
Language of tuition: Both Afr and Eng  
Credits: 28

Module content:
A study of the build and functions as well as the diseases of the musculo-skeletal movement apparatus in adults and children. Emphasis is placed on the diagnosis and treatment of the most prominent conditions as well as the acquiring of practical and clinical skills.
GNK 484 Endocrinology 484
Academic organisation: Health Sciences Dean’s Office
Prerequisite: GNK 381, GNK 383, BOK 380, GNK 386, GPS 380, BOK 382, SMO 380, SMO 311, SMO 382
Contact time: 1 lpw
Period of presentation: Semester 2
Language of tuition: Both Afr and Eng
Credits: 6
Module content:
An opportunity for the student to become familiarised with the most common endocrinology problems in practice, including diabetes and obesity. The focus is on the recognition of these conditions and their practical handling.

GNK 485 Head and neck 485
Academic organisation: Otorhinolaryngology
Prerequisite: GNK 381, GNK 383, BOK 380, GNK 386, GPS 380, BOK 382, SMO 311, SMO 380, SMO 382
Contact time: 5 lpw
Period of presentation: Semester 2
Language of tuition: Double medium
Credits: 33
Module content:
An opportunity for the undergraduate student to acquire knowledge and skills in respect of the prevention, diagnosis and treatment of diseases of the head and neck region by means of lectures, seminars, self-tuition and practical sessions in the clinic, ward, theatre as well as the skills laboratory. A problem-based and interdisciplinary approach is emphasised.

GNK 486 Ageing 486
Academic organisation: Psychiatry
Prerequisite: GNK 381, GNK 383, BOK 380, GNK 386, GPS 380, BOK 382, SMO 311, SMO 380, SMO 382
Contact time: 2 lpw
Period of presentation: Semester 2
Language of tuition: English
Credits: 8
Module content:
Discussion of the physiology and psychology of ageing and an overview of diseases commonly found in the elderly, with a biomedical psycho-social approach.

GNK 487 Skin 487
Academic organisation: Internal Medicine
Prerequisite: GNK 381, GNK 383, BOK 380, GNK 386, GPS 380, BOK 382, SMO 311, SMO 380, SMO 382
Contact time: 1 lpw
Period of presentation: Semester 2
Language of tuition: English
Credits: 5
Module content:
Clinical manifestations and management.

GNK 488 Elective 488
Academic organisation: Health Sciences Dean’s Office
Prerequisite: BOK 280, BOK 284, GNK 286, GPS 280, SMO 281, (BOK 281 or (BOK 285, 287)), GNK 283, GNK 288, SMO 211, LCP 280
Contact time: 1 lpw
Period of presentation: Semester 2
Language of tuition: Both Afr and Eng
Credits: 23
Module content:
An opportunity for the undergraduate student to acquire knowledge, skills and experience in the medical practice environment.

GNK 581 Psychiatry and social dysfunction 581
Academic organisation: Psychiatry
Prerequisite: GNK 481, BOK 480, BOK 482, GNK 485, GNK 483, GNK 487, GNK 486, GNK 484, GNK 385, SMO 411
Contact time: 18 lpw 5 ppw
Period of presentation: Semester 1
Language of tuition: English
Credits: 34
Module content:
The module will help students to acquire knowledge, skills and attitudes that will enable them to diagnose and manage certain psychiatric conditions. Preventive and promotive aspects of management are also emphasised. These psychiatric conditions include the following: mood disorders, anxiety disorders, alcohol and substance-related disorders, sexual disorders, schizophrenia and other psychotic disorders, mental disorders due to general medical conditions, personality disorders, eating disorders and sleep disorders. These topics will be handled as applicable to children, adolescents and adults. Additional topics include: legal aspects, aggression, child abuse, child development, mental retardation and interpersonal skills.
During morning lectures, students are directly exposed to psychiatric patients and their problems by means of small-group activities.
The afternoon lectures are used for the solution of problem-orientated case studies and accompanied exploration of the themes mentioned above. The module is student-oriented, with the emphasis on self-tuition.

GNK 582 Health and healthcare 582
Academic organisation: Family Medicine
Prerequisite: BOK 480, BOK 482, GNK 481, GNK 483, GNK 484, GNK 485, GNK 486, GNK 487, GNK 385, SMO 411
Contact time: 2 dpw 15 lpw
Period of presentation: Semester 1
Language of tuition: Both Afr and Eng
Credits: 27
Module content:
This module aims to integrate the concepts of Family Medicine and Community Medicine for the delivery of healthcare in South Africa. The module content covers medico-legal aspects of practice, ethical issues, as well as approaches to common problems in practice, with emphasis on the application of the biopsychosocial model of care in the South African district health system.

GNK 583 Traumatology 583
Academic organisation: Surgery
Prerequisite: BOK 480, BOK 482, GNK 481, GNK 483, GNK 484, GNK 485, GNK 486, GNK 487, GNK 385, SMO 411
Contact time: 3 dpw 1 ppw 1 other per week 10 lpw 1.5 spw
Period of presentation: Semester 1
Language of tuition: Double medium
Credits: 25
Module content:
The block consists of two modules, one practical and the other theoretical.
The objective of the trauma practicals is to introduce students to clinical recognition of trauma emergencies, institution of emergency resuscitation, application of life saving and life support manoeuvres and emergency treatment of the trauma victim. Using actors/models, students are taught the application of the Advanced trauma life support (ATLS) (ABCDE) type approach to trauma.

The trauma theory comprises the introduction to the full spectrum of trauma as a disease. Epidemiology of trauma, mechanisms of wounding, including ballistics, the biological response to trauma, wound healing and complications of trauma will be taught. Emergency treatment, resuscitation and intensive care treatment of the trauma victim will be covered. A systematic course on a thematic basis will be given to cover the major organ systems prioritised according to the ATLS type approach of life threatening, limb threatening or disfiguring injuries.

Thus, thoracic, cardiovascular, abdominal, head and neck trauma will be dealt with as potential life threatening injuries, orthopaedic as limb threatening trauma and skin injuries are mainly disfiguring. Thermal, electrical and chemical burns and hypothermia will be covered. Introduction to physical and psychological rehabilitation and nutrition of the trauma victim will be taught.

GNK 585 Pharmacotherapy 585

Academic organisation: Pharmacology
Prerequisite: BOK 480, BOK 482, GNK 481, GNK 483, GNK 484, GNK 485, GNK 486, GNK 487, GNK 385, SMO 411
Contact time: 1 dpw 8 lpw 1 ppw
Period of presentation: Semester 1
Language of tuition: Double medium
Credits: 7

Module content:
Core pharmacotherapy and applicable clinical aspects of the most general and prominent diseases and conditions, principles of toxicology and medical-forensic aspects of substance abuse, court proceedings and iatrogenic deaths.

GNK 586 Anaesthesiology 586

Academic organisation: Anaesthesiology
Prerequisite: BOK 480, BOK 482, GNK 481, GNK 483, GNK 484, GNK 485, GNK 486, GNK 487, GNK 385, SMO 411
Contact time: 8 lpw 1 dpw 1 ppw
Period of presentation: Semester 1
Language of tuition: Both Afr and Eng
Credits: 13

Module content:
A basic introduction to the underlying principles of the theory and practice of anaesthesiology applicable to the generalist. Learning experiences comprise practical residency (prior to Block 18), formal interactive lectures, workshops and case studies (during Block 18).

GNK 587 Forensic medicine morning rotation 587

Academic organisation: Forensic Medicine
Prerequisite: LCP 480, BOK 480, BOK 482, GNK 385, GNK 481, GNK 483, GNK 484, GNK 485, GNK 486, GNK 487, SMO 411
Contact time: 4 lpw 5 ppw
Period of presentation: Semester 1
Language of tuition: Both Afr and Eng
Credits: 4

Module content:
Forensic medicine morning rotation.
GNK 680 Surgery 680
Academic organisation: Surgery
Prerequisite: GNK 581, GNK 582, GNK 583, GNK 585, GNK 586, SMO 511, SMO 512
Contact time: 40 ppw
Period of presentation: Semester 1
Language of tuition: Double medium
Module content: Surgery (7 weeks) in the Student Intern Complex: General surgery, vascular surgery, plastic surgery, paediatric surgery, cardiothoracic surgery.

GNK 681 Orthopaedics 681
Academic organisation: Surgery
Prerequisite: GNK 581, GNK 582, GNK 583, GNK 585, GNK 586, SMO 511, SMO 512
Contact time: 40 ppw
Period of presentation: Semester 1
Language of tuition: Double medium
Module content: Orthopaedics (three weeks) in the Student Intern Complex.

GNK 682 Anaesthesiology 682
Academic organisation: Anaesthesiology
Prerequisite: GNK 581, GNK 582, GNK 583, GNK 585, GNK 586, SMO 511, SMO 512
Contact time: 40 ppw
Period of presentation: Semester 1
Language of tuition: Both Afr and Eng
Module content: Anaesthesiology (3½ weeks) in the Student Intern Complex.

GNK 683 Internal medicine 683
Academic organisation: Internal Medicine
Prerequisite: GNK 581, GNK 582, GNK 583, GNK 585, GNK 586, SMO 511, SMO 512
Contact time: 40 ppw
Period of presentation: Semester 1
Language of tuition: Both Afr and Eng
Module content: Internal medicine (7 weeks) in the Student Intern Complex.

GNK 684 Internal medicine-related subdisciplines 684
Academic organisation: Internal Medicine
Prerequisite: GNK 581, GNK 582, GNK 583, GNK 585, GNK 586, SMO 511, SMO 512
Contact time: 40 ppw
Period of presentation: Semester 1
Language of tuition: Both Afr and Eng
Module content: Psychiatry (7 weeks) in the Student Intern Complex.
GNK 686 Obstetrics and gynaecology 686
Academic organisation: Obstetrics and Gynaecology
Prerequisite: GNK 581, GNK 582, GNK 583, GNK 585, GNK 586, SMO 511, SMO 512
Contact time: 40 ppw
Period of presentation: Semester 1
Language of tuition: Both Afr and Eng
Credits: 40
Module content:
Obstetrics and gynaecology (7 weeks) in the Student Intern Complex.

GNK 687 Paediatrics 687
Academic organisation: Paediatrics
Prerequisite: GNK 581, GNK 582, GNK 583, GNK 585, GNK 586, SMO 511, SMO 512
Contact time: 40 ppw
Period of presentation: Semester 1
Language of tuition: Both Afr and Eng
Credits: 40
Module content:
Paediatrics (7 weeks) in the Student Intern Complex.

GNK 688 Community-based education 688
Academic organisation: Obstetrics and Gynaecology
Prerequisite: GNK 581, GNK 582, GNK 583, GNK 585, GNK 586, SMO 511, SMO 512
Contact time: 40 ppw
Period of presentation: Semester 1
Language of tuition: Both Afr and Eng
Credits: 20
Module content:
Community-based education (3½ weeks) in the Student Intern Complex.

GNK 689 Diagnostic laboratory medicine 689
Academic organisation: Health Sciences Dean’s Office
Contact time: 40 ppw
Period of presentation: Semester 1
Language of tuition: Both Afr and Eng
Credits: 11
Module content:
Diagnostic laboratory medicine (2 weeks); image-forming medicine; evidence-based medicine and bioethics (two days) in the Student Intern Complex.

GNK 690 Urology 690
Academic organisation: Urology
Prerequisite: GNK 581, GNK 582, GNK 583, GNK 585, GNK 586
Contact time: 40 ppw
Period of presentation: Semester 1
Language of tuition: English
Credits: 11
Module content:
Urology (2 weeks) in the Student Intern Complex.

GNK 691 Family medicine 691
Academic organisation: Family Medicine
Prerequisite: GNK 581, GNK 582, GNK 583, GNK 585, GNK 586
Contact time: 40 ppw
Period of presentation: Semester 1
Language of tuition: Both Afr and Eng
Credits: 20
Module content:
Family medicine (3½ weeks) in the Student intern complex.
GNK 692 Community obstetrics 692
Academic organisation: Obstetrics and Gynaecology
Prerequisite: GNK 581, GNK 582, GNK 583, GNK 585, GNK 586
Contact time: 40 ppw
Period of presentation: Semester 1
Language of tuition: Both Afr and Eng
Module content: Community obstetrics (3½ weeks) in the Student Intern Complex.

GNK 693 Neurology 693
Academic organisation: Neurology
Prerequisite: GNK 581, GNK 582, GNK 583, GNK 585, GNK 586, SMO 511, SMO 512
Contact time: 40 ppw
Period of presentation: Semester 1 or Semester 2
Language of tuition: Both Afr and Eng
Module content: Neurology (3½ weeks) in the Student Intern Complex.

GOM 370 General and oral microbiology 370 (offered as from 2016)
Academic organisation: Medical Microbiology
Contact time: 1 lpw (involves lectures, tutorials, practical sessions and symposia)
Period of presentation: Year
Language of tuition: English
Module content: Infectious diseases in the various body systems:
This module is an introduction to infectious diseases occurring in the various body systems. The block will cover diseases caused by the organisms, pathogenesis, specimen collection, laboratory diagnosis as well as management (treatment, prevention and control) of these infections.
Oral microbiology:
This module will provide knowledge to dental students about clinical microbiology and infectious diseases as well as basic principles for the recognition and identification of infectious agents relevant to the discipline of dentistry. Furthermore, the role of relevant organisms that are associated with the oral cavity in health and disease and understand diagnosis and be able to recognise patients with infections related to dentistry.

GPS 280 Generic procedural skills 280
Academic organisation: Health Sciences Dean’s Office
Prerequisite: CMY 151, GNK 127, GNK 128, MLB 111, PHY 131, GNK 120, BOK 121, MGW 112, FIL 155, MTL 180
Contact time: 3 ppw
Period of presentation: Semester 1
Language of tuition: Both Afr and Eng

GPS 370 Generic procedural skills 370
Academic organisation: School of Dentistry
Contact time: 1 ppw
Period of presentation: Semester 1
Language of tuition: Double medium
GPS 380 Generic procedural skills 380
Academic organisation: Health Sciences Dean’s Office
Prerequisite: BOK 280, GNK 283, GNK 288, GPS 280, BOK 281, SMO 211, GNK 286, BOK 284, SMO 281
Contact time: 1 ppw
Period of presentation: Semester 1
Language of tuition: Both Afr and Eng  Credits: 5

GRA 701 Groups in occupational therapy 701
Academic organisation: Occupational Therapy
Contact time: 3 ppw 1 dpw 2 lpw 1 spw
Period of presentation: Year
Language of tuition: Double medium  Credits: 30
Module content:
Emphasis will be placed on role-playing and groups in learning employment acquisition behaviour.

GRA 800 Groups in occupational therapy 800
Academic organisation: Occupational Therapy
Contact time: 5 dpw 10 lpw 5 spw 15 ppw
Period of presentation: Year
Language of tuition: Double medium  Credits: 28

GRT 700 Group techniques in occupational therapy 700
Academic organisation: Occupational Therapy
Contact time: 5 ppw 8 spw
Period of presentation: Year
Language of tuition: Double medium  Credits: 60
Module content:
The group process. Group leadership. Problem clients and intervention strategies. Group activities with clients on different levels of motivation and action.

GVP 110 Community nursing science 110
Academic organisation: Nursing Science
Contact time: 2 lpw 1 other per week
Period of presentation: Semester 1
Language of tuition: English Credits: 25
Module content:
The community nursing context.
Community health, community-based nursing care and primary healthcare (PHC).
Processes in community nursing.
Assessment, diagnosis, intervention and evaluation. Health education and home healthcare nursing.

GVP 120 Community nursing science 120
Academic organisation: Nursing Science
Prerequisite: GVP 110
Contact time: 1 other per week 2 lpw
Period of presentation: Semester 2
Language of tuition: English Credits: 25
Module content:
Care of individuals, families and communities in the community nursing context.
Comprehensive approach to the care of infants, children, women, men and those within unique settings or circumstances (e.g. the elderly, the homeless, marginalised communities, emergency situations and reproductive health). Common community health problems.
Communicable diseases and immunisation, HIV/AIDS. Chronic physical and mental health problems. Social pathology in the community.

GVP 160 Community nursing science 160
Academic organisation: Nursing Science
Contact time: 2 ppw
Period of presentation: Year
Language of tuition: English

Module content:
*Attendance module only
Community nursing science practical work.
Compulsory practical work, which includes mother and child health, school health, occupational health and safety, geriatric care, the prevention and control of communicable diseases, rehabilitation services and community resources, environmental safety, physical and nursing assessment of patients, diagnosis and care and health education.
Family study and community profile.

GVP 250 Community nursing science 250
Academic organisation: Nursing Science
Prerequisite: GVP 110, GVP 120
Contact time: 2 lpw
Period of presentation: Semester 1
Language of tuition: English

Credits: 18
Module content:
The community nursing process.
Assessment, planning, implementation and evaluation within the community health nursing context. Epidemiology and demography in community health nursing.

GVP 260 Community nursing science 260
Academic organisation: Nursing Science
Prerequisite: GVP 250
Contact time: 2 lpw
Period of presentation: Semester 2
Language of tuition: English

Credits: 18
Module content:
Community involvement.
Community empowerment, development and participation. Quality assurance and change in the community context.

GVP 300 Community nursing science 300
Academic organisation: Nursing Science
Prerequisite: GVP 250, GVP 260
Contact time: 2 dpw 2 lpw
Period of presentation: Year
Language of tuition: English

Credits: 44
Module content:
Application of relevant nursing theories.
Quality assurance. Nursing care planning and applicable nursing interventions in individual group, family and community contexts. Family care.

HET 870 Public health, ethics and human rights 870
Academic organisation: School of Health Systems and Public Health
Contact time: 3 dpw 1 ppw
Period of presentation: Year
Language of tuition: English
Credits: 5

Module content:
This module enables students to understand ethical and human rights reasoning in health interventions and research, and provides competence in ethical review of public health research and interventions. The module covers ethical and human rights approaches and applies them to public health. Students deal with threats to ethics or human rights in
public health action, and with some specific areas: resource allocation, gender and research, environmental justice, international collaborative research.

Period of presentation: Semester 2
Language of tuition: English Credits: 24
Module content:
Human nutrition in the life cycle: Nutritional screening, nutritional needs, nutrition problems and prevention thereof, growth monitoring and meal/menu planning.

HNT 411 Advanced human nutrition 411
Academic organisation: Human Nutrition
Prerequisite: Fourth-year status
Contact time: 1 dpw 3 lpw
Period of presentation: Semester 1
Language of tuition: Double medium Credits: 18
Module content:
Seminars and case studies (theory and practical application): Eating behaviour, eating disorders, nutrient/nutrition supplementation, sports nutrition, vegetarianism, food safety, nutrition of the disabled, prevention of non-communicable disease of lifestyle; nutrition and immunity; nutrition and genetics.

HPF 770 Health system and transformation policy (political analysis, strategy and finance options) 770
Academic organisation: Public Health Medicine
Contact time: 50 hours per week
Period of presentation: Year
Language of tuition: English Credits: 10
Module content:
Reform in SA – What is the problem? To include variations among provinces and districts, measurement issues, etc. Financing NHI: Revenue sources (general taxes, payroll taxes, etc.) the role of private insurance, fiscal space and the public finance situation in SA, covering the informal sector, etc.
Pay for performance as a policy tool: practical difficulties and the critical role for
management in implementation. Overview of payment: Options for paying doctors and hospitals, the role of contracting, likely consequences and implementation issues. Politics and the reform process: Stakeholder analysis and mobilising support for reform. Financing NHI: Revenue sources (general taxes, payroll taxes, etc.) the role of private insurance, fiscal space and the public finance situation in S.A., covering the informal sector, etc. Organising NHI: national vs. provincial, public vs. quasi-public, roles for private administrators, choices about fiscal autonomy, relationship to various ministries. Government and market failures and the role of the public and private sectors – including corruption issues in both areas. Benefit package and targeting: Introduction to the ‘step pyramid’. What should be covered and for whom? What role for co-payments as incentive and revenue source. The developmental transformation of the healthcare system is informed by the political context and the constitutional imperatives for access to care, which is, the main purpose of the healthcare system. This module will provide the participant with analytical tools to interpret the political economy of health and to develop strategies which can respond to the health needs on the ground in a practical manner so that the impact of the health policy is understood and how it informs the type of executive leader required to deliver the results of effective and efficient healthcare delivery. Participants will be trained in costing the pooling, provisioning and procurement of health services as District or Hospital Managers to allow for the effective and efficient running of the services over which they have authority. Training will focus on their Units becoming a Cost Centre for the management of the finances allocated by the Provincial Health Authority as well as capacity building in the event that delegations for autonomy is devolved of their level of employment. The importance of performance management will be the focus in relation to optimal budget performance, allocation within the institution as well as meeting performance targets and outcome measures.

HRM 770 Principles of human resource management 770

HRM 771 Strategic human resources and management performance 771
Academic organisation: Public Health Medicine
Contact time: 50 hours per week
Period of presentation: Year
Language of tuition: English                  Credits: 10

Module content:
Participants will be taught the critical importance of human resource development and management strategies required for an effective district healthcare system which is required for an effective NHI-based healthcare system. HR planning, forecasting, analysis, implementation and evaluation processes will be integrated into service delivery target achievement. The different types of human resources and their roles for effective service delivery in working in an integrated healthcare system will be used in case studies developed in the SA health context.

HSR 770 Health systems re-engineering including public sector centralisation and decentralisation 770

Academic organisation: Public Health Medicine
Contact time: 50 hours per week
Period of presentation: Year
Language of tuition: English

Credits: 10

Module content:
(District) Health systems (and hospital) re-engineering including public sector centralisation and decentralisation.
The re-engineering of the health system is one of the key pillars of the SAELPH programme with focus on improvement of services in the DHS. The new thrust of the national DOH with PHC as a key focus requires a new type of health leader who can understand the central role of PHC in a future equitable and efficient healthcare system. This module will assist to reshape the thinking of public health leaders towards building sound foundation strategies for the delivery of essential healthcare services primarily at the DHS level and its impact on the overall healthcare system. Development of a decentralisation case – a South African example focused on a district as the ‘man in the middle’ of the decentralisation process including the need for information, problems of supervision. Understand the international experience in re-engineering public sector providers, with special emphasis on PHC and how they will function in a future NHI.

**Module content:**
Theory of specialised nursing practice. In one of the following clinical nursing speciality areas: critical care, emergency nursing, advanced midwifery, neonatal nursing science, child nursing science or operating theatre nursing science. Contemporary problems and practice issues.

**KVG 300 Clinical nursing science 300**
**Academic organisation:** Nursing Science  
**Prerequisite:** KVG 250, KVG 260  
**Contact time:** 2 lpw 2 dpw  
**Period of presentation:** Year  
**Language of tuition:** English  
**Credits:** 40  
**Module content:**
Role and functions of clinical nursing specialists in their area of specialisation. Contemporary trends, issues and dilemmas in clinical nursing practice.
**K VH 701 Clinical skills in hand therapy 701**  
**Academic organisation:** Occupational Therapy  
**Contact time:** 12 ppw  
**Period of presentation:** Year  
**Language of tuition:** Double medium  
**Credits:** 40  
**Module content:**  
Study and application of:  
- Evaluation methods and instruments for hand and upper limb injuries  
- Current techniques in hand therapy.

**LCP 180 Longitudinal clinic attachment programme 180**  
**Academic organisation:** Health Sciences Dean’s Office  
**Contact time:** 1 ppw  
**Period of presentation:** Year  
**Language of tuition:** Both Afr and Eng  
**Credits:** 0  
**Module content:**  
The longitudinal clinic attachment programme will link students to one of about 40 clinics in Pretoria and its surrounds. Each student is allocated to a specific clinic in Tshwane, Hammanskraal or Metsweding for a four-year period – medical students from the middle of the first year to the middle of the fifth year, and dentistry students from the middle of the first year to the end of the second year. Students will visit these clinics during the course of each block and special activity as negotiated with each block and rotation chair. The activities they do at the clinic will be the practical application of the theory they acquired in class with the added benefit of the experience of the context of the patient and the healthcare system.

**LCP 280 Longitudinal clinic attachment programme 280**  
**Academic organisation:** Health Sciences Dean’s Office  
**Contact time:** 1 ppw  
**Period of presentation:** Year  
**Language of tuition:** Both Afr and Eng  
**Credits:** 0

LHE 770 Executive leadership in health (including responsible leadership) 770
Academic organisation: Public Health Medicine
Contact time: 50 hours per week
Period of presentation: Year
Language of tuition: English
Credits: 10
Module content:
The application of the principles of Executive Leadership in the health sector will be
examined with focus on several modalities of leadership including meta-leadership with a
focus on examining why its application by health leaders are met with so much difficulty.
The challenges which prevail in the pilot districts for the National Health Insurance will be
analysed. Participants will be expected to do pre-course reading in preparation for the
module as well as a post-module assignment which may include the writing up and
development of a strategic plan with a focus on executive leadership principles.
Application of responsible leadership strategies in to the public health sector. The focus
on contemporary views of responsible leadership in South Africa and measures to redress the shortcomings in taking responsibility and being accountable for your actions. What is the vision for responsible leadership on the horizon in the next 5 to 15 years and how can a health manager reposition his/her thinking to meet the demands and the role they are to play in the new NHI-funded system in the position they presently occupy. What does it mean to lead in a responsible manner be it at district, provincial or national level. This will include the call for courageous scholarship and strategies to lead collectively in a responsible manner.

**LMX 700 Laboratory management 700**  
**Academic organisation:** Chemical Pathology

**LRG 700 Aerospace medicine 700**  
**Academic organisation:** School of Health Systems and Public Health  
**Contact time:** 3 contact weeks per year, each consisting of 8 hours per day for 5 days, including group discussions, problem feedback, class presentations, specialised lectures and visits to industry.  
**Period of presentation:** Year  
**Language of tuition:** English  
**Credits:** 85  
**Module content:**  
The purpose of this module is to teach the fundamentals of aerospace medicine. Topics addressed in this module include:  
Aviation physiology (The aviation working environment, cognition, decision making, communication, sleep and fatigue, physics of the atmosphere, hypobarism, hypoxia, vision, spatial disorientation, acceleration, radiation, noise, vibration hyper/hypothermia.)  
Clinical aviation medicine (Incapacitation during flight, aging, cardiology, neurology, ophthalmology, ENT, pulmonology, psychiatry, metabolic/endocrine, malignancy, digestive system, haematology, urinary, renal, gynaecological/obstetric, musculoskeletal, infective, medication.)  
Aviation medical regulations (Regulations of the International Civil Aviation Organisation and the South African Civil Aviation Authority.)

MDB 171 Oral biology 171  
Academic organisation: Oral Pathology and Oral Biology  
Contact time: 2 lpw 1 dpw  
Period of presentation: Semester 1  
Language of tuition: Double medium  
Credits: 8

Module content:  
This module will provide the oral hygiene student with a broad basic knowledge on the development, normal macroscopic and microscopic structure and functions of the oral cavity, teeth and related structures. The module content will serve as preknowledge for clinical subjects and oral pathology in the oral hygiene programme.

MDB 270 Oral biology 270 (offered as from 2015)  
Academic organisation: Oral Pathology and Oral Biology  
Contact time: 2 lpw 2 dpw  
Period of presentation: Year  
Language of tuition: English  
Credits: 11

Module content:  
This module is the study of the development, macroscopic and microscopic structure and function of tissue of the mouth and related structures with emphasis on the application in clinical dentistry. This module also includes the study of relevant molecular biology.

MDB 370 Oral biology 370  
Academic organisation: Oral Pathology and Oral Biology  
Prerequisite: BOK 280, BOK 281 or (BOK 285,287), BOK 283, GNK 286, GNK 288, GPS 280, IKT 200, SMO 211, SMO 281  
Contact time: 2 lpw 2 dpw  
Period of presentation: Year

MEH 771 Health informatics, monitoring and evaluation 771
Academic organisation: Public Health Medicine
Contact time: 50 hours per week
Period of presentation: Year
Language of tuition: English Credits: 10
Module content:
Participants will be taught the importance of evidence-based public health and how to use health data, interpret the data, use the data for planning and for evaluation. The critical importance of how strategically to monitor and evaluate all programmes and systems and
how practical leadership requires in-depth knowledge of how to use review systems for forward planning. The use of knowledge management modalities will be used in health planning and participants will be required to design a Monitoring and Evaluation system that can be used at their workplace for better results in healthcare delivery.

**MFG 777 Human physiology 777**  
**Academic organisation:** Physiology  
**Period of presentation:** Year  
**Language of tuition:** Double medium  
**Credits:** 96  
**Module content:**  
[BScHons with specialisation in Human Physiology]  
- Basic physiology: Self-tuition  
- Applied physiology: 22 lectures and self-tuition  
- Research techniques: 11 lectures and demonstrations  
- Seminars: Two per student: approved topics  
- Journal discussions: Two per student  
- Research project: Submission of protocol, execution of project under supervision and presentation of results required. Final results are submitted in the form of an essay.

MFP 371 Maxillofacial pathology 371
Academic organisation: Oral Pathology and Oral Biology
Prerequisites: ODO 271, OFC 271, RAD 271, PDL 271, ORD 271, GAP 271, VKM 271, TBW 271
Contact time: 1 lpw for 30 weeks
Period of presentation: Year
Language of tuition: Double medium
Credits: 8
Module content:
This module introduces the oral hygiene student to the Maxillofacial pathology commonly encountered in general practice. It will enable the student to differentiate between variants of normal and pathological lesions. A basic knowledge of the etiology, pathogenesis, and clinical appearance of the lesions will be acquired. Selected treatment modalities relevant to the oral hygienist will also be discussed in this module.

MFP 470 Maxillofacial pathology 470
Academic organisation: Oral Pathology and Oral Biology
Prerequisite: GNK 388, MDB 370, TGG 370, FSG 370, FAR 370, RAD 370, TBW 370, ODO 370, PDL 370, DFA 370
Contact time: 1 lpw 1 ppw 1 dpw 1 other per week
Period of presentation: Year
Language of tuition: English
Credits: 11
Module content:
The modules in this subject will empower the student with knowledge of the embryology, anatomy, physiology and pathology of the oral mucosa, the salivary glands, intra- and extraoral soft tissue and bone in order to diagnose and manage lesions, diseases and conditions of the oral mucosa, salivary glands, intra and extraoral soft tissue and bone.

MFP 570 Maxillofacial pathology 570
Academic organisation: Oral Pathology and Oral Biology
Prerequisite: TBW 470, ODO 470, MFP 470, PDL 470, DFA 470, OFC 470, PTK 470, GAP 470, TMZ 470
Contact time: 1 dpw 1 lpw
Period of presentation: Year
Language of tuition: English
Credits: 10
Module content:
The modules in this subject will empower the student with knowledge of the embryology, anatomy, physiology and pathology of the oral mucosa, the salivary glands, intra- and extraoral soft tissue and bone in order to diagnose and manage lesions, diseases and conditions of the oral mucosa, salivary glands, intra and extraoral soft tissue and bone.

MNX 310 Medical nutrition therapy 310
Academic organisation: Human Nutrition
Prerequisites: 3rd-year status
Contact time: 2 lpw 1 dpw
Period of presentation: Semester 1
Language of tuition: English
Credits: 9
Module content:
Introduction to the origin of diseases as a consequence of programmed changes that occur during impaired intrauterine growth and development. Aetiology and clinical manifestations of under-nutrition/PEM; principles and practices of medical nutrition therapy in under-nutrition/PEM; impact and influence of worm infestation. Congenital heart disease and special problems related to children with congenital heart disease. Relationship between malnutrition and AIDS; role of nutrition in immunity within the context of HIV/Aids; clinical signs, symptoms and problems associated with AIDS and guidelines for the alleviation of these symptoms; nutritional related problems of medication used by AIDS patients. Appropriate practical assignments and case studies.

MNX 322 Medical nutrition therapy 322
Academic organisation: Human Nutrition
Prerequisite: FLG 221, FLG 222, BCM 261, BCM 262, VDS 221, HNT 220, AGV 413, BCM 251, BCM 252, DTT 222
Contact time: 3 dpw 4 lpw
Period of presentation: Semester 2
Language of tuition: Double medium
Credits: 50
Module content:

MNX 323 Medical nutrition therapy 323
Academic organisation: Human Nutrition
Prerequisites: 3rd-year status
Contact time: 4 lpw 2 dpw
Period of presentation: Semester 2
Language of tuition: English
Credits: 36
Module content:
Relationships between obesity, hypertension, cardiovascular disease, insulin resistance and concomitant health risks. Aetiology, pathophysiology and manifestation(s) of type 1 and type 2 diabetes mellitus, gestational diabetes and impaired glucose tolerance; principles and practices of medical nutrition therapy of diabetes mellitus integrated with medical/pharmacological treatment; dietary treatment/prevention of complications; dietary adaptations when exercising and lifestyle modification. Aetiology and clinical manifestations of cardiovascular; principles and practices of medical nutrition therapy in CVD. Aetiology and clinical manifestation(s) of renal disease conditions; principles and practices of medical nutrition therapy in renal conditions (nephritic syndrome, nephrotic syndrome, acute and chronic renal failure, nephrolithiasis). Nutrient-drug interactions. Metabolic response to acute and chronic stress. Principles of special nutritional care, special feeding methods and products required for injured/critically ill patients. Appropriate practical assignments and case studies.
MNX 411 Medical nutrition therapy 411
Academic organisation: Human Nutrition
Prerequisite: Fourth-year status
Contact time: 3 dpw 6 lpw
Period of presentation: Semester 1
Language of tuition: Double medium
Credits: 35
Module content:
The role of diet and nutrition in the aetiology and treatment of diseases of the gastrointestinal tract and related organs, metabolic disorders and gout, diseases of neurological origin, prematurity and paediatric disease conditions. Nutritional care of physiological trauma and cancer. Nutrient-drug interactions. Appropriate practical assignments and case studies (practising the nutrition care process).

MNX 480 Medical nutrition therapy 480
Academic organisation: Human Nutrition
Prerequisite: MNX 411
Contact time: 5 dpw
Period of presentation: Semester 2
Language of tuition: Double medium
Credits: 50

NHS 171 First aid 171  
**Academic organisation:** Community Dentistry  
**Contact time:** 2.5 days of lectures  
**Period of presentation:** Semester 1  
**Language of tuition:** Double medium  
**Credits:** 5

**Module content:**  
The practical-orientated first-aid training will empower the oral hygiene student with a working knowledge of day-to-day emergencies, both in the workplace and at home. At this entry-level training the student will partake in the practical aspects of bleeding and wound management, cardio pulmonary resuscitation, care for unconscious patients and choking to name a few. The module content will assist the oral hygiene student in managing medical emergencies in the dental surgery.

NTA 313 Nutritional assessment 313  
**Academic organisation:** Human Nutrition  
**Prerequisite:** Third-year status  
**Contact time:** 1 ppw 4 lpw 1 dpw  
**Period of presentation:** Semester 1  
**Language of tuition:** Double medium  
**Credits:** 46

**Module content:**  
Evaluation of nutritional assessment.  
Nutrition care process, overview of evaluation of nutritional status. Scientific principles of evaluation of nutritional status; nutritional screening; clinical, biochemical and dietary evaluation of nutritional status.  
Practice training: practising of theoretical principles of nutrition status evaluation in hospital/clinic and/or skills laboratory.

NUR 151 Nursing studies 151  
**Academic organisation:** Nursing Science  
**Contact time:** 3 lpw 2 ppw  
**Period of presentation:** Quarter 1  
**Language of tuition:** English  
**Credits:** 12

**Module content:**  
Fundamentals of nursing science  
NB: Only selected BCur students may register for this module.

NUR 152 Nursing studies 152  
**Academic organisation:** Nursing Science  
**Contact time:** 3 lpw 2 ppw
Period of presentation: Quarter 2
Language of tuition: English
Credits: 12
Module content:
Human needs and development in health and illness.
Humans as biological, psychological and spiritual beings within socio-economic and cultural contexts. Basic needs: nutrition, comfort and activity, rest and sleep, elimination, hygiene, oxygen, learning, sensory and interpersonal, pain management, safety, homeostasis, growth and development, medication needs, spiritual needs and the need for a dignified death. Self-image, own identity and self-actualisation. Relevant aspects of human nutrition. Human developmental stages and the unique needs associated with each stage.
NB: Only selected BCur students may register for this module.

NUR 153 Nursing studies 153
Academic organisation: Nursing Science
Contact time: 2 ppw 3 lpw
Period of presentation: Quarter 3
Language of tuition: English
Credits: 12
Module content:
Environment, society and communities and its influence on nursing science.
NB: Only selected BCur students may register for this module.

NUR 154 Nursing studies 154
Academic organisation: Nursing Science
Contact time: 3 lpw 2 ppw
Period of presentation: Quarter 4
Language of tuition: English
Credits: 12
Module content:
Provision of healthcare to communities and the nursing management of minor ailments.
Comprehensive healthcare and the multidisciplinary team approach. Community involvement and participation in the provision of health services. Community empowerment. Introduction to public health and systems of healthcare. Care of the elderly. Selected minor ailments of the upper respiratory tract, oral cavity and skin: earache, sore throat, colds and flu, sinusitis, tonsillitis, halitosis and oral and integumentary health.
NB: Only selected BCur students may register for this module.

Module content:
Nursing elective.
An approved elective, chosen in consultation with the head of the department.
• Themes from community nursing science and primary healthcare
• Themes from psychiatric nursing science and therapeutic conversations
• Themes from general medical nursing science
• Themes from general surgical nursing science
• Themes from hospital-based midwifery science
The availability of electives will depend on student interest and the availability of staff and training facilities. Students need to enquire about prospective electives before registering for this module.
Ten (10) credits of the above elective should include content on research-based practice (or a research project), contemporary practice issues, international nursing studies and ethical and legal aspects of healthcare practice within the chosen elective.
NB: Only selected BCur students may register for this module.

NVB 700 Research principles 700
Academic organisation: Radiography

ODO 171 Odontology 171
Academic organisation: Odontology
Contact time: 2 ppw 1 other per week 1 spw 1 lpw 1 dpw
Period of presentation: Semester 2
Language of tuition: Double medium
Credits: 12
Module content:
This module will enable the oral hygiene student to be competent in the evaluation of the oral health status of the child, adolescent, adult and geriatric patient in terms of diseases related to the hard tissues of the oral cavity plus the pulpa and peri-apical tissues, and be able to:
• correctly diagnose the diseases
• correctly diagnose the patient's risk profile
• instruct a patient to be capable of exercising self-protective measures
• change the behavioral pattern of the patient through motivation
• create resistant and optimally maintainable dental hard tissues for oral health
• reverse early lesions where possible
• refer patients for restorative and rehabilitative treatment.

ODO 270 Odontology 270 (offered as from 2015)
Academic organisation: Odontology
Contact time: 1 clinical session per week
Period of presentation: Year
Language of tuition: English
Credits: 6
Module content:
Chair-side assisting: This clinical training entails the chair-side assisting of senior dental students during the treatment of patients.

ODO 271 Odontology 271
Academic organisation: Odontology
Prerequisite: ELH 121, ELH 122, AIM 101, ACO 171, ANA 171, FAR 171, FLG 171, GMB 171, MDB 171, ODO 171, ORD 171, PDL 171, TBW 171, VKM 171, NHS 171
Contact time: 2 lpw 15 weeks, 20 p (2 h) over 30 weeks
Period of presentation: Year
Language of tuition: English
Credits: 7
Module content:
This module is a continuation of ODO 171 Odontology 171. It will enable the oral hygiene student to be competent in the evaluation of the oral health status of the child, adolescent, adult and geriatric patient in terms of diseases related to the hard tissues of the oral cavity plus the pulpa and peri-apical tissues, and be able to:
• correctly diagnose the diseases.
• correctly diagnose the patient's risk profile.
• instruct a patient to be capable of exercising self-protective measures.
• change the behavioural pattern of the patient through motivation.
• create resistant and optimally maintainable dental hard tissues for oral health.
• reverse early lesions where possible.
• refer patients for restorative and rehabilitative treatment.

ODO 370 Odontology 370
Academic organisation: Odontology
Prerequisite: BOK 280, BOK 281, BOK 283, GNK 286, GNK 288, GPS 280, IKT 200, SMO 211, SMO 281
Contact time: 1 dpw 2 lpw 2.6 ppw
Period of presentation: Year
Language of tuition: Both Afr and Eng    Credits: 42

Module content:
The modules in the subject odontology form an integrated curriculum that is structured and presented by various lecturers from different departments of the school. The modules consist of theoretical, practical and clinical training. The theoretical training includes anatomy, embryology, histology, microbiology and pathology of the teeth and teeth structure, while the clinical training is focused on the preventive, curative, and minor rehabilitative treatment of teeth development and eruption malformations, dental caries, pulpal and peri-radicular pathology, unerupted and impacted teeth, and tooth wear as part of the ageing process.

ODO 470 Odontology 470
Academic organisation: Odontology
Prerequisite: GNK 388, MDB 370, TGG 370, FSG 370, FAR 370, RAD 370, TBW 370, ODO 370, PDL 370, DFA 370
Contact time: 4.67 ppw 1 dpw 2 lpw

OFC 271 Orofacial surgery 271  
**Academic organisation:** Maxillofacial and Oral Surgery  
**Prerequisite:** ELH 121, ELH 122, AIM 101, ACO 171, ANA 171, FAR 171, FLG 171, GMB 171, MDB 171, ODO 171, ORD 171, PDL 171, TBW 171, VKM 171, NHS 171  
**Contact time:** 1 lpw (20 weeks) 1p (2 h) (28 weeks)  
**Period of presentation:** Year  
**Language of tuition:** English  
**Credits:** 11

**Module content:**  
This module is designed to provide the oral hygiene student with knowledge and skills regarding:  
- local anaesthetics  
- oral surgery procedures  
- traumatology  
- basic knowledge regarding advanced Maxillofacial surgery.
OFC 370 Orofacial surgery 370
Academic organisation: Maxillofacial and Oral Surgery
Prerequisite: BOK 280, BOK 281, BOK 283, GNK 286, GNK 288, GPS 280, IKT 200, SMO 211, SMO 281
Contact time: 3 lpw 1 ppw
Period of presentation: Year
Language of tuition: Both Afr and Eng Credits: 12
Module content:
(a) Surgical anatomy: Applied surgical anatomy.
(b) Examination, anaesthesia, distress: Examination of a surgical patient, stress control and sedation, local anaesthetics, local anaesthetic techniques, applied pharmacology and prescription (synoptic), emergency procedures.
(c) Basic oral surgery: Sterilisation and disinfection, oral surgical armamentarium, exodontia and related complications, bleeding problems, antrum.
(d) Advanced oral surgery: Apaicecctomy, impactions, electro and cryosurgery, soft tissue infections and osteomyelitis, pre-prosthodontic surgery (review).
(e) Basic Maxillofacial surgery: Traumatology, surgical pathology, neuralgias, temporomandibular joint derangements.
(f) Advanced Maxillofacial surgery: Micro surgery (review), orthognathic surgery, facial cleft deformities, cranio-facial surgery (review).

OFC 371 Orofacial surgery 371
Academic organisation: Maxillofacial and Oral Surgery
Prerequisite: ODO 271, OFC 271, RAD 271, PDL 271, ORD 271, GAP 271, VKM 271, TBW 271
Contact time: 1 p (2 h) (30 weeks)
Period of presentation: Year
Language of tuition: Double medium Credits: 6
Module content:
This module is a continuation of (OFC 271) Orofacial surgery 271 and consists of clinical work only.

OFC 470 Orofacial surgery 470
Academic organisation: Maxillofacial and Oral Surgery
Prerequisite: GNK 388, MDB 370, TGG 370, FSG 370, FAR 370, RAD 370, TBW 370, PDL 370, ODO 370, DFA 370
Contact time: 2 ppw 1 lpw 1 dpw
Period of presentation: Year
Language of tuition: Both Afr and Eng Credits: 41
Module content:
(a) Surgical anatomy: Applied surgical anatomy.
(b) Examination, anaesthesia, distress: Examination of a surgical patient, stress control and sedation, local anaesthetics, local anaesthetic techniques, applied pharmacology and prescription (synoptic), emergency procedures.
(c) Basic oral surgery: Sterilisation and disinfection, oral surgical armamentarium, exodontia and related complications, bleeding problems, antrum.
(d) Advanced oral surgery: Apaicecctomy, impactions, electro and cryosurgery, soft tissue infections and osteomyelitis, pre-prosthodontic surgery (review).
(e) Basic Maxillofacial surgery: Traumatology, surgical pathology, neuralgias, temporomandibular joint derangements.
(f) Advanced Maxillofacial surgery: Micro surgery (review), orthognathic surgery, facial cleft deformities, cranio-facial surgery (review).

OHS 873 Postgraduate seminars in occupational hygiene 1 873  
**Academic organisation:** School of Health Systems and Public Health  
**Prerequisite:** FLG 322 or equivalent occupational hygiene coursework with two years practical experience in the field of occupational hygiene  
**Contact time:** 1 dpw 1 ppw  
**Period of presentation:** Year  
**Language of tuition:** English  
**Credits:** 10  
**Module content:**  
Introduction to the basic concepts of occupational hygiene. Topics addressed in this module include occupational hygiene principles, legislation, risk management (including risk assessment), measuring environmental factors, ergonomics, biological environmental factors, psychological environmental factors, control of environmental factors, communication and report writing and toxicology. Problem-based assignments and practical work.

OHS 874 Postgraduate seminars in occupational hygiene 2 874  
**Academic organisation:** School of Health Systems and Public Health  
**Prerequisite:** Satisfactory progress with submissions of OHS 873 assignments (Unit Standards 1–9)  
**Contact time:** 1 eight-hour contact session per month that includes group discussions and case studies. Practical work forms part of assignments. Assignments need to be submitted one month after the contact session.  
**Period of presentation:** Year  
**Language of tuition:** English  
**Credits:** 10  
**Module extent:**  
Introduction to laboratory practice, occupational health education, research and statistical methods, integrated management systems, quality systems, audits and occupational hygiene management. Problem-based assignments and practical work need to be completed and submitted after each unit standard.

OHS 875 Individual studies in occupational hygiene 875  
**Academic organisation:** School of Health Systems and Public Health  
**Prerequisite:** FLG 322 or equivalent occupational hygiene coursework with two years’ practical experience, satisfactory progress in OHS 873.  
**Contact time:** 1 dpw  
**Period of presentation:** Year  
**Language of tuition:** English  
**Credits:** 10  
**Module content:**  
In-depth knowledge and competency in occupational hygiene measuring and surveying techniques concerning legislative requirements related to different occupational hygiene strategies and stressors, i.e. risk assessment, occupational stress, illumination, extreme thermal conditions, noise, airborne contaminants, ventilation and ergonomics. Students need to compile template reports and submit it for grading. Students must also complete practical coursework in the air quality laboratory or at an approved inspection occupational hygiene laboratory to obtain competency in occupational hygiene equipment, calculations and interpretation of occupational hygiene survey results. Students will have to take a competency test after completing all practical coursework.
OHT 770 Principles of occupational hygiene and toxicology 770
Academic organisation: School of Health Systems and Public Health

ORD 171 Orthodontics 171
Academic organisation: Orthodontics
Contact time: 1 ppw
Period of presentation: Semester 2
Language of tuition: Double medium Credits: 9
Module content:
This module will empower the oral hygiene student to recognise and refer limited developmental and structural abnormalities of the growing and mature dento-craniofacial structures. It will furthermore provide the student with the knowledge and skills to perform orthodontic procedures pertaining to the scope of oral hygiene. This module will comprise lectures only.

ORD 271 Orthodontics 271
Academic organisation: Orthodontics
Contact time: 1 p (2 h) (30 weeks)
Period of presentation: Year
Language of tuition: English Credits: 6
Module content:
This module will empower the oral hygiene student to recognise and refer limited developmental and structural abnormalities of the growing and mature dento-craniofacial structures. It will furthermore provide the student with the knowledge and skills to perform orthodontic procedures pertaining to the scope of oral hygiene. The module consists of lectures and clinical work.

ORD 370 Orthodontics 370
Academic organisation: Orthodontics
Contact time: 1 spw 1 lpw 1 dpw
Period of presentation: Year
Language of tuition: Both Afr and Eng Credits: 6
Module content:
The modules in this subject extend over the third, fourth and fifth years of study. Lectures, practical and clinical work, seminars and discussions on the following:
• Basic principles and therapeutic measures.
• Occlusion: development and morphology.
• Development and growth: cranium.
• Stainless steel: properties and uses.
• Orthodontic devices: requirements and types.
• Changes in tissue.
• Malocclusion: classification and aetiology.
• Examination, aids, diagnosis and planning.
• Bad habits.
• Preventive and interceptive orthodontics.
• Treatment: principles, problems with space, methods.
• The role of extraction.
• Retention.

ORD 372 Orthodontics 372
Academic organisation: Orthodontics
Prerequisite: ODO 271, OFC 271, RAD 271, PDL 271, ORD 271, GAP 271, VKM 271, TBW 271
Contact time: 1 lpw (15 weeks) 2 p (2 h) (30 weeks)
Period of presentation: Year (elective)
Language of tuition: English Credits: 22
Module content:
This module is chosen as an elective and planned around orthodontics as a main field of study. This module will include:
• Cephalometric analysis
• Different fixed orthodontic techniques
• Orthodontic procedures pertaining to the scope of oral hygiene
• Presentation of seminars.

PDL 171 Periodontology 171
Academic organisation: Periodontics and Oral Medicine
Contact time: 2 lpw 1 ppw
Period of presentation: Semester 2
Language of tuition: Double medium  Credits: 12

Module content:
This module will provide the oral hygiene student with knowledge of the:
• Macro and microscopic features of the periodontium
• Function of the periodontium
• Assessment and diagnosis of periodontal diseases
• Determine risk factors of periodontal diseases

PDL 271 Periodontology 271
Academic organisation: Periodontics and Oral Medicine
Prerequisite: ELH 121, ELH 122, AIM 101, ACO 171, ANA 171, FAR 171, FLG 171, GMB 171, MDB 171, ODO 171, ORD 171, PDL 171, TBW 171, VKM 171, NHS 171
Contact time: 1 lpw 16 weeks, 1 p (2 h) 30 weeks
Period of presentation: Year
Language of tuition: Double medium  Credits: 11

Module content:
This module is a continuation of (PDL 171) Periodontology 171 and will provide the oral hygiene student with knowledge of:
• Periodontal diseases
• Pathogenesis of periodontal diseases
• Implantology
• Surgical procedures
The module will also enable the oral hygiene student to:
• compile, exercise and evaluate a comprehensive and effective preventive, therapeutic and maintenance plan for the periodontal patient; and
• actively participate in the prevention, treatment and maintenance of periodontal conditions.

PDL 370 Periodontology 370
Academic organisation: Periodontics and Oral Medicine
Prerequisite: BOK 280, BOK 281 or (BOK 285,287), BOK 283, GNK 286, GNK 288, GPS 280, IKT 200, SMO 211, SMO 281
Contact time: 2 lpw
Period of presentation: Year
Language of tuition: Both Afr and Eng  Credits: 8

Module content:
(i) The modules in the subject are offered in the third, fourth and fifth years of study.
(ii) The depth and weighting of the knowledge base and the clinical application and interpretation of the modules will be dependent on the year of study.
(iii) The goal is to educate and train general dental practitioners who will be able to apply their expertise and knowledge in the prevention and treatment of periodontal diseases in both the public and private sectors within the scope of the dental practitioner. In order to achieve this, the student must know the embryology, normal anatomy, histology and functions of the periodontium.
- The student must understand the aetiology, pathogenesis, the risk and other factors associated with the various forms of periodontal diseases, and their classification.
- The student must be able to perform a comprehensive clinical examination and use the information so gained to arrive at a diagnosis and treatment plan.
- The student must become proficient in applying preventive control methods, to supply oral hygiene methods and applicable instructions to the patient; motivating the patient; scaling and root planing; be able to correctly evaluate the tissue response to these procedures; be able to differentiate clinically between the various forms of
periodontal disease and be able to perform clinical procedures associated with the
treatment of early and moderate stages of periodontal diseases.
- The student must understand the treatment possibilities associated with established
and advanced periodontal diseases, including regenerative procedures and implant
treatment, and when and to whom, such patients should be referred for specialist
diagnosis and treatment, should this be necessary.

PDL 372 Periodontology 372
Academic organisation: Periodontics and Oral Medicine
Prerequisite: ODO 271, OFC 271, RAD 271, PDL 271, ORD 271, GAP 271, VKM 271,
TBW 271
Contact time: 1 lpw (15 weeks), 2 ppw (2h) (30 weeks)
Period of presentation: Year (elective)
Language of tuition: Both Afr and Eng Credits: 22
Module content:
This module is chosen as an elective around the field of periodontics as main field of
study. The module will provide the oral hygiene student with an in-depth overview of the
current status of periodontics with the emphasis on the clinical application, understanding
and role of the oral hygienist as part of the team. The purpose is to train the oral hygiene
student to be competent in applying his/her expertise and knowledge in the prevention
and treatment of periodontal diseases.

PDL 470 Periodontology 470

Language of tuition: Both Afr and Eng
Credits: 100

PGP 800 Psychopathology 800
Academic organisation: Psychiatry
Period of presentation: Year
Language of tuition: English
Credits: 28
Module content:
An in-depth study of the psychopathology diseases applicable to psychiatry.

PHA 770 Assignment in public health 770
Academic organisation: School of Health Systems and Public Health
Period of presentation: Year
Language of tuition: English
Credits: 30

PHM 770 Learning in public health 770
Academic organisation: School of Health Systems and Public Health
Contact time: 50 hours per week
Period of presentation: Year
Language of tuition: English  Credits: 5

Module content:
Special introduction to fundamentals in Executive Leadership in health. The emerging student will be taught the fundamentals in executive leadership in healthcare systems which will form the basic platform or foundation for understanding the challenges for application of leadership modalities at the different levels of healthcare service delivery in the public health service and how to begin to think and analyse how the principles of executive leadership at their level of appointment can improve health service delivery.

PHM 870 Learning in public health 870
Academic organisation: School of Health Systems and Public Health
Contact time: 1 dpw 1 ppw 1 other per week 1 spw 1 lpw
Period of presentation: Year
Language of tuition: English  Credits: 5

Module content:
This is the first (one-week) module at the beginning of the year focusing on learning. At the end of this week, you will have a much better understanding of what you actually want to achieve in public health and what you need to learn to get there. You will probably also have changed your views on learning: from individual surface learning and memorization, to valuing deep learning often in a group context. Finally, you will have achieved the ability to use the ever-increasing knowledge in health, philosophy, and ethics that are generated on the internet to your own best advantage.

PHM 871 Public health examination Part 1 871
Academic organisation: School of Health Systems and Public Health
Period of presentation: Year
Language of tuition: English  Credits: 0

PHM 872 Public health examination Part 2 872
Academic organisation: School of Health Systems and Public Health
Period of presentation: Year
Language of tuition: English  Credits: 0

PHR 870 MPH Mini-dissertation 870
Academic organisation: School of Health Systems and Public Health
Prerequisite: TNM 800
Period of presentation: Year
Language of tuition: English  Credits: 60
PHT 801 Physiotherapy 801
Academic organisation: Physiotherapy
Period of presentation: Semester 1
Language of tuition: Both Afr and Eng Credits: 12

PHT 802 Physiotherapy 802
Academic organisation: Physiotherapy
Period of presentation: Semester 1
Language of tuition: Both Afr and Eng Credits: 12

PHT 803 Physiotherapy 803
Academic organisation: Physiotherapy
Period of presentation: Semester 1
Language of tuition: Both Afr and Eng Credits: 12

Credits: 240

POH 170 Public oral health 170
Academic organisation: Community Dentistry
Contact time: 1 lpw 1 ppw
Period of presentation: Semester 2
Language of tuition: English
Credits: 5
Module content:
• Principles of public oral health.
• Determinants of health.
• Definitions of health, disease and illness.
• Public health approaches to prevention.

POH 270 Public oral health 270 (offered as from 2015)
Academic organisation: Community Dentistry
Contact time: 1 lpw
Period of presentation: Year
Language of tuition: English
Credits: 12
Module content:
• Orientation to health sciences research.
• Ethical consideration in the conduct of health sciences research.
• An overview of the research process.
• Selecting or identifying research problems.
• The literature review.
• Refining and defining the research question, formulating a hypothesis and preparing a research proposal.
• Quantitative research.
• Non-traditional and qualitative research designs.
• Sampling.
• Data collection and data quality.
• Data analysis.
• Research reports and report evaluation.

POH 370 Public oral health 370 (offered as from 2016)
Academic organisation: Community Dentistry
Contact time: 1 lpw
Period of presentation: Year
Language of tuition: English
Credits: 4
Module content:
• Oral epidemiology.
• Prevention and oral health promotion.
• Health services (systems).

POH 371 Public oral health 371
Academic organisation: Community Dentistry
Prerequisite: ODO 271, OFC 271, RAD 271, PDL 271, ORD 271, GAP 271, VKM 271, TBW 271
Contact time: 1 lpw (15 weeks) 2 p (2 h) (30 weeks)
Period of presentation: Year (elective)
Language of tuition: Both Afr and Eng  Credits: 22

Module content:
This module is chosen as an elective to further studies in the field of community dentistry. This module will provide the oral hygiene student with a deeper understanding and skills in the fields of preventive dentistry, oral epidemiology, and administration and management. This will enable him/her to develop and manage a needs-related preventive programme for the individual high-risk patient and also for a specific community or population. Students will be expected to submit a mini-research report demonstrating their understanding and skills in the field of public oral health. The main subject consists of four syllabus themes, namely:
- Preventive dentistry
- Oral epidemiology
- Project management
- Mini-research report.

POH 470 Public oral health 470 (offered as from 2017)
Academic organisation: Community Dentistry
Contact time: 1 lpw
Period of presentation: Year
Language of tuition: English  Credits: 6

Module content:
- Oral epidemiology.
- Prevention and oral health promotion.
- Health services (systems).
- Community engagement projects commence.

POH 570 Public oral health 570 (offered as from 2018)
Academic organisation: Community Dentistry
Contact time: 1 practical session per semester
Period of presentation: Year
Language of tuition: English  Credits: 5

Module content:
Community engagement projects continue.

POK 700 Sports science 700
Academic organisation: Centre for Sports Sciences
Period of presentation: Year
Language of tuition: Both Afr and Eng  Credits: 96

POK 800 Sports science 800
Academic organisation: Centre for Sports Sciences
Period of presentation: Year
Language of tuition: Both Afr and Eng Credits: 1

POK 890 Dissertation: Sports science 890
Academic organisation: Centre for Sports Sciences
Period of presentation: Year
Language of tuition: Both Afr and Eng  Credits: 240

POK 900 Sports science 900
Academic organisation: Centre for Sports Sciences
Period of presentation: Year
Language of tuition: Both Afr and Eng  Credits: 1
POK 990 Thesis: Sports science 990  
Academic organisation: Centre for Sports Sciences  
Period of presentation: Year  
Language of tuition: Both Afr and Eng  

**Credits: 480**

**POL 251 Professional development and leadership 251**  
Academic organisation: Physiotherapy  
Prerequisite: PHY 131, CMY 151, FSG 161, FSG 162, SLK 110, FTP 100, ANA 152, SLK 120, ANA 162  
Contact time: 1 web-based period per week 1 lpw 2 ppw  
Period of presentation: Semester 1  
Language of tuition: Both Afr and Eng  

**Credits: 10**

**Module content:**  

**POL 300 Professional development and leadership 300**  
Academic organisation: Physiotherapy  
Prerequisite: FSG 251, FSG 252, FSG 261, FSG 262, ANP 210, GMB 252, GMB 253, FTP 231, FTP 241, POL 251  
Contact time: 1 ppw 1 lpw 1 web-based period per week 1 dpw  
Period of presentation: Year  
Language of tuition: Both Afr and Eng  

**Credits: 13**

**Module content:**  
Evidence-based practice, ethics in physiotherapy practice, counselling skills, group dynamics, management of human behaviour, medico-legal documentation. Introduction to marketing, information management, principles of research in physiotherapy, single subject design. Problem-solving in a variety of health and healthcare situations.

**POL 400 Professional development and leadership 400**  
Academic organisation: Physiotherapy  
Prerequisite: MRZ 310, RHC 451, RHC 452, FAR 381, FAR 382, FTP 300, FTP 301, POL 300  
Contact time: 2 ppw 1 web-based period per week 1 lpw 2 dpw  
Period of presentation: Year  
Language of tuition: Both Afr and Eng  

**Credits: 19**

**Module content:**  
Theoretical and practical handling of marketing, management models, financial management, presentation of a scientific paper, diversity in the workplace, continuing professional development, quality assurance, management human behaviour, private practice management, labour relations.  
Examination period: October/November.

**PPS 770 Policy practice seminar 770**  
Academic organisation: Public Health Medicine  
Contact time: 50 hours per week  
Period of presentation: Year  
Language of tuition: English  

**Credits: 5**

**Module content:**  
The fundamentals of health policy practice implementation will be discussed and methods
of analysis will be linked to how the best effective health policy processes can be structured to respond to the health needs. The policy chain from inception to implementation will be analysed to establish why SA health policies, which are rated as very good, never gets implemented and where they are implemented, the results are less than optimal. How can policy practice assist executive leaders in health to work smarter, with less resources and achieve greater results for effective service delivery. The role of the community in the policy development and practice process will analysed to see what lessons can be learned to cut down on bureaucracy and red tape.

PRD 270 Prosthodontics 270
Academic organisation: Prosthodontics
Contact time: 1 ppw
Period of presentation: Year
Language of tuition: English
Credits: 3
Module content:
- Basic tooth morphology.
- Introduction to dental laboratory procedures in removable prosthodontics.

PRD 370 Prosthodontics 370
Academic organisation: Prosthodontics
Prerequisite: BOK 280, BOK 281, BOK 283, GNK 286, GNK 288, GPS 280, IKT 200, SMO 211, SMO 281
Contact time: 2 dpw 3 ppw 3 lpw
Period of presentation: Year
Language of tuition: English
Credits: 41
Module content:

PSB 371 Patients with special needs 371
Academic organisation: Community Dentistry
Prerequisites: ODO 271, OFC 271, RAD 271, PDL 271, ORD 271, GAP 271, VKM 271, TBW 271
Contact time: 2 lpw for 30 weeks 1 seminar for 3 hours
Period of presentation: Year
Language of tuition: Double medium Credits: 12
Module content:
Patients with special needs pose unique challenges, especially in relation to the need for an inventive and carefully planned approach suited to each individual’s needs. This module will therefore equip the oral hygiene student to manage patients in this regard. The focus is on adapting and modifying the approach and management of the patient according to the specific need for instance pregnancy, physical and mental disabilities, medical conditions and age.

PSI 800 Psychiatry 800
Academic organisation: Psychiatry
Prerequisites: ANA 804, FSG 801, ANP 872, MTS 801, NRE 801
Contact time: 1 spw
Period of presentation: Year
Language of tuition: English Credits: 300

QIM 771 Implementation of quality improvement modalities (strategies) in the health system 771  
**Academic organisation:** Public Health Medicine  
**Contact time:** 50 hours per week  
**Period of presentation:** Year  
**Language of tuition:** English  
**Credits:** 10

**Module content:**  
Participants will be required to identify the current quality challenges at their place of work and develop an advanced quality improvement strategic plan which they can implement. The plan must respond to the recent audit of facilities conducted by the Department of Health. Participants will be required upon returning to their place of work to implement the plan and after 6 months report on the results and what improvements had occurred as a result of their plans. The key factors to be addressed include waiting times, availability of medication, cleanliness of facilities, the long queues and patient satisfaction. Participants will be taught quality improvement strategies related to executive leadership, learning and organisational change.

RAD 271 Radiography 271  
**Academic organisation:** Oral Pathology and Oral Biology  
**Prerequisite:** ELH 121, ELH 122, AIM 101, ACO 171, ANA 171, FAR 171, FLG 171, GMB 171, MDB 171, ODO 171, ORD 171, PDL 171, TBW 171, VKM 171, NHS 171  
**Contact time:** 1 lpw (30 weeks) 2 p (2 h) (30 weeks)  
**Period of presentation:** Year  
**Language of tuition:** Double medium  
**Credits:** 20

**Module content:**  
The oral hygiene student must be competent to produce a variety of intra and extra-oral
Health Sciences 2014

radiographs of good diagnostic quality. He/she must also recognise relevant anatomical landmarks on a radiograph and distinguish between normal and abnormal appearances. He/she must at all times be conscious of possible deleterious effects of radiation on biological systems.

RAD 370 Diagnostic imaging 370
Academic organisation: Oral Pathology and Oral Biology
Prerequisite: BOK 280, BOK 281 or (BOK 285,287), BOK 283, GNK 286, GNK 288, GPS 280, IKT 200, SMO 211, SMO 281
Contact time: 2 ppw 1 lpw 1 dpw
Period of presentation: Year
Language of tuition: Both Afr and Eng Credits: 8

RAD 371 Radiography 371
Academic organisation: Oral Pathology and Oral Biology
Prerequisite: ODO 271, OFC 271, RAD 271, PDL 271, ORD 271, GAP 271, VKM 271, TBW 271
Contact time: 1 lpw (30 weeks) 2 p (2 h) (30 weeks)
Period of presentation: Year
Language of instruction: Double medium Credits: 20
Module content:
This module is aimed at providing the oral hygiene student with the necessary skills, attitude and relevant knowledge by studying the following aspects in radiation physics relevant to dentistry:
• Electromagnetic waves – their properties and behaviour
• X-rays – their specific properties, sources of X-rays and production of X-rays
• Construction of the X-ray tube
• Accurate image formation
• Interaction of photons with living tissues
• Radiation biology
• Radiation protection
• ALARA principle
• Quality control measures.
This module furthermore entails practical work in the Radiology section.

RAN 100 Radiographic anatomy 100
Academic organisation: Anatomy
Contact time: 1 ppw 2 lpw
**Period of presentation:** Year  
**Language of tuition:** English  
**Credits:** 20

**Module content:**  
General introduction to anatomy: Anatomical terminology, surface and regional anatomy, histology of basic tissues; ossification, healing and repair.  
Introduction to osteology.  
Regional anatomy I: Thoracic skeleton and thoracic soft tissues; osteology; joints and soft tissues of the extremities; osteology and joints of the vertebral column; abdominal surface anatomy; osteology and soft tissue of the pelvis. Skull I: Cranium and facial bones.  
Radiographic anatomy I: Regional radiographic anatomy, with emphasis on the skeletal components.

**RAN 280 Radiographic anatomy 280**  
**Academic organisation:** Anatomy  
**Prerequisite:** RFI 110, MTL 180, RAN 100, FSG 161, FSG 162, RAW 182, RAW 180  
**Contact time:** 1 dpw 1 other per week 2 lpw  
**Period of presentation:** Semester 1  
**Language of tuition:** English  
**Credits:** 10

**Module content:**  
Systemic anatomy I: Digestive and urogenital systems.  
Sensory organs: Skin; eye; ear; nose; tongue.  
Skull II: Advanced osteology; base of cranium; openings and sinuses.  
Radiographic anatomy II: Systemic anatomy with emphasis on soft tissue components.

**RAN 380 Radiographic anatomy 380**  
**Academic organisation:** Anatomy  
**Prerequisite:** RFI 210, RFI 211, RAN 280, FSG 251, FSG 252, FSG 262  
**Contact time:** 1 dpw 2 lpw 1 ppw  
**Period of presentation:** Year  
**Language of tuition:** English  
**Credits:** 10

**Module content:**  
Systemic anatomy II: Female reproductive system and breast; Cardiovascular system; Cerebrospinal fluid system. Introduction to neuroanatomy.  
Regional cross-sectional anatomy: Cranium, brain; thorax; abdomen; pelvis and limbs. Radiographic anatomy III: Systemic and cross-sectional anatomy with emphasis on three-dimensional reconstruction.

**RAN 700 Radiographic anatomy 700**  
**Academic organisation:** Anatomy  
**Period of presentation:** Semester 1  
**Language of tuition:** Both Afr and Eng  
**Credits:** 20

**RAW 180 Radiography 180**  
**Academic organisation:** Radiography  
**Contact time:** 1 spw 4 dpw 1 lpw  
**Period of presentation:** Year  
**Language of tuition:** English  
**Credits:** 50

**Module content:**  
(b) Patients with special problems. Handling of paediatric patients and geriatric patients.

**RAW 182 Radiographic imaging 182**

**Academic organisation:** Radiography  
**Contact time:** 1 lpw 1 spw 1 dpw  
**Period of presentation:** Year  
**Language of tuition:** Both Afr and Eng  
**Credits:** 20

**Module content:**  
Introduction: Discovery of X-rays, processing principles, handling of x-ray equipment. X-beam: production of X-rays, attenuation.  
Properties of the radiographic image: visibility and geometric properties.  
Image formation: interaction between X-rays and the human body and subject contrast.  
Primary exposure factors: mAs, kVp and SID. AEC. Principles of technique charts. Image recording: darkrooms, cassettes, intensifying screens, efficiency of rare earth intensifying screens and X-ray film construction.  
Control of scatter radiation: production of scatter, effect of scattered radiation on the image, beam restriction devices, grids and grid efficiency.  
Geometry: focal spot size, SID, OID, X-ray beam/body part/film alignment, influence of distances and other variables on the geometric properties of the image. Introduction to digital radiography.

**RAW 280 Radiography 280**

**Academic organisation:** Radiography  
**Prerequisite:** RAN 100, RFI 110, FSG 161, FSG 162, RAW 180, RAW 182, MTL 180  
**Contact time:** 3 dpw 1 lpw  
**Period of presentation:** Year  
**Language of tuition:** Double medium  
**Credits:** 54

**Module content:**  

**RAW 282 Radiographic imaging 282**

**Academic organisation:** Radiography  
**Prerequisite:** RAN 100, RFI 110, FSG 161, FSG 162, RAW 180, RAW 182, MTL 180  
**Contact time:** 1 dpw 1 lpw  
**Period of presentation:** Year  
**Language of tuition:** Double medium  
**Credits:** 20

**Module content:**  
Film evaluation.
Application of technique factors, compiling of technique charts. Films, film technology, image formation and sensitometric properties. Processing, monitoring the processor and processing area. Darkroom and design, chemicals. Quality assurance tests. Digital radiography: image formation and processing.

**RAW 284 Radiation therapy and nuclear medicine 284**

**Academic organisation:** Radiography

**Prerequisite:** RAN 100, RFI 110, FSG 161, FSG 162, RAW 180, RAW 182, MTL 180

**Contact time:** 1 lpw 1 dpw

**Period of presentation:** Quarter 4

**Language of tuition:** Double medium

**Credits:** 10

**Module content:**

(a) Radiobiology: Cell survival curves and target theories, radiation effects on tissue, tissue and organ radio sensitivity, Radiation pathology, acute and chronic effects, late effects of radiation. Clinical radiobiology: Radiation therapy, tumour radiobiology, fractionation, iso-effect formulae.

(c) Introduction to nuclear medicine: Principles of nuclear physics and nuclear medicine, nuclear instrumentation, radio chemical pharmacology. Basic approach to clinical nuclear medicine and relevant techniques.

**RAW 380 Radiography 380**

**Academic organisation:** Radiography

**Prerequisite:** FSG 251, FSG 252, FSG 262, GNK 286, RAN 280, RAW 281, RAW 282, RAW 283, RBG 281, RFI 210

**Contact time:** 4 dpw 1 spw 1 lpw

**Period of presentation:** Year

**Language of tuition:** Double medium

**Credits:** 52

**Module content:**

**Hysterosalpingography:** Booking procedures, patient-radiographer relationship, procedural considerations and evaluation criteria. Pattern recognition.
*Bone densitometry*: Principles, bone biology and remodelling, osteoporosis, core competencies for radiographers, physical principles of dual X-ray absorptiometry and other bone densitometry techniques. Clinical experience.

*Research project.*
Clinical evaluation and film evaluation of examinations that were done theoretically in the first and second year.

**RAW 382 Radiography practice 382**
*Academic organisation*: Radiography
*Contact time*: 1 lpw 2 dpw 1 spw
*Period of presentation*: Year
*Language of tuition*: Double medium

Module content:
Literature study, protocol and statistics (1 l + 1 x 2h discussion).
Preparation of protocol and submission thereof for approval (1 x 2h discussion).

RCH 371 Research 371
Academic organisation: Community Dentistry
Prerequisite: ODO 271, OFC 271, RAD 271, PDL 271, ORD 271, GAP 271, VKM 271, TBW 271
Contact time: 10 lectures x 90 min.
Period of presentation: Year
Language of instruction: Double medium
Credits: 5

Module content:
This module will assist the oral hygiene students to become competent in the area of research by becoming active consumers of research to improve their practice and also taking part in research in the area of oral health. The student must demonstrate the ability to take part in an oral health research project under the guidance of an experienced researcher and report on aspects of the research project such as the type of research, the elements of a scientific research methodology, the data collection and the statistical method(s) used in the project and the results.

RCH 410 Research project 410
Academic organisation: Human Nutrition
Prerequisite: RCH 320
Contact time: 1 dpw
Period of presentation: Semester 1
Language of tuition: Double medium
Credits: 7

Module content:
Execution and reporting.

RCH 480 Research project 480
Academic organisation: Human Nutrition
Period of presentation: Semester 1
Language of tuition: Both Afr and Eng
Credits: 6

RHC 480 Research in healthcare sciences 480
Academic organisation: Physiotherapy
Contact time: 1 other per week 2 web-based periods per week 3 lpw
Period of presentation: Semester 1
Language of tuition: Double medium Credits: 16

Module content:
Research in healthcare sciences. The outcomes of this module are:
• Understanding the importance of evidence-based clinical practice.
• Understanding the research process and general approaches to research.
• Knowledge of the methodologies commonly used in healthcare sciences.
• Reading and critiquing published research.
• Writing a literature review.
• Understanding and respecting research ethics and the criteria for good quality research.

RLE 710 Ethics and jurisprudence 710
Academic organisation: Dental Management Sciences
Prerequisite: A minimum of one year practice experience
Contact time: Contact hours as determined by the Head of Department
Period of presentation: Semester 1
Language of tuition: Both English and Afrikaans Credits: 30

Module content:
To be a good healthcare practitioner requires a life-long commitment to sound professional and ethical practices and an overriding dedication to the interests of one’s fellow human beings and society. The term “profession” means “a dedication, promise or commitment publicly made”. Practice as a healthcare professional is based on a
relationship of mutual trust between patients and healthcare practitioners. In the course of their professional work, healthcare practitioners are required to subscribe to certain rules of conduct. To this end the Health Professions Council of South Africa (HPCSA) has formulated a set of rules regarding professional conduct against which complaints of professional misconduct will be evaluated. These rules are presented in the basic subject Ethics and jurisprudence.

**RPD 200 Research and professional development 200**
**Academic organisation:** Occupational Therapy  
**Prerequisite:** ANA 151, ANA 152, ANA 161, ANA 162, FSG 161, AKU 100, ART 100, MTL 180, GNK 286  
**Contact time:** 2 ppw 1 dpw 1 lpw  
**Period of presentation:** Year  
**Language of tuition:** Double medium  
**Credits:** 10  
**Module content:**  
The study of the research process and the introduction to occupational therapy professional ethics and management.

**RPD 380 Research and professional development 380**
**Academic organisation:** Occupational Therapy  
**Prerequisite:** FSG 251, FSG 252, FSG 261, FSG 262, AKU 200, ART 282, ART 284, RPD 200, ART 281, ART 283  
**Contact time:** 4 dpw 5 lpw  
**Period of presentation:** Quarter 3  
**Language of tuition:** Double medium  
**Credits:** 20  
**Module content:**  
Development, submission and approval of an occupational therapy related research protocol. Continued study of occupational therapy professional ethics and management. Elective fieldwork to promote professional development.

**RPD 481 Research and professional development 481**
**Academic organisation:** Occupational Therapy  
**Prerequisite:** ANP 210, RPD 380, SEP 110/ZUL 110, AKU 303, AKU 381, AKU 382, ART 381, ART 382, ELH 121, ELH 122, AIM 101  
**Contact time:** 0.5 dpw  
**Period of presentation:** Semester 1  
**Language of tuition:** Double medium  
**Credits:** 15  
**Module content:**  
Continued study of the process of research. Includes the implementation of the approved research protocol and the documentation and presentation of the completed research project.

**RSD 890 Dissertation: Diagnostics 890**

SMH 770 Strategic marketing (and communication) in health 770
Academic organisation: Public Health Medicine
Contact time: 50 hours per week
Period of presentation: Year
Language of tuition: English Credits: 5
Module content:
The module will enable the participant to create a messaging strategy that can be used in all marketing materials. To develop a marketing programme appropriate for the target audience using the most effective possibilities such as public relations, advertising, website (and other internet platforms), promotional seminars, conferences and trade booth opportunities, downloadable materials, direct marketing (offline & online), packaging, event sponsorships and merchandising promotions. The participant will be taught the skills to develop a communications programme that complements the marketing programme and provides timely and comprehensive internal, external and strategic communications initiatives in an integrated approach. One of the key issues will be the level of the health message and whether it makes an impact on the improvement of uptake of healthcare services.

TBW 171 Comprehensive patient management 171
Academic organisation: Dentistry General
Contact time: 1 ppw 1 other per week 1 dpw
Period of presentation: Semester 2
Language of tuition: Double medium Credits: 2
Module content:
The purpose of this module is to:
• embed communication skills required during patient management; and
• facilitate an understanding of the patient’s psycho-social dimensions that may influence health-related behaviour and customer demand.

TBW 271 Comprehensive patient management 271
Academic organisation: Dental Management Sciences
Prerequisite: ELH 121, ELH 122, AIM 101, ACO 171, ANA 171, FAR 171, FLG 171, GMB 171, MDB 171, ODO 171, ORD 171, PDL 171, TBW 171, VKM 171, NHS 171
Contact time: 1 lpw (14 weeks)
Period of presentation: Semester (promotion module)
Language of tuition: Double medium Credits: 3
Module content:
The purpose of this module is to:
• embed aspects related to occupational health and safety;
• embed communication skills required during patient management;
• develop presentation skills to address large audiences;
• facilitate an understanding of professionalism and ethical behaviour;
• embed knowledge about legal aspects that are related to dentistry;
• embed knowledge/skills in terms of administrative management and scheduling in a dental practice;
• embed psychological aspects pertaining to patient management;
• facilitate the management of a primary preventive treatment plan; and
• provide primary preventive treatment in cooperation with senior BChD students.
TBW 370 Comprehensive patient management 370

**Academic organisation:** Dental Management Sciences

**Prerequisite:** BOK 280, BOK 281, BOK 283, GNK 286, GNK 288, GPS 280, IKT 200, SMO 211, SMO 281

**Contact time:** 1 ppw 1 lpw 1 other per week

**Period of presentation:** Year

**Language of tuition:** Double medium

**Credits:** 10

**Module content:**
Holistic evaluation of a patient, the clinical hypothetic-deductive reasoning processes, diagnosis, prognosis and treatment planning. Under the guidance of a tutor, and by utilising a special “practice patient” file, the students start treating a “practice patient” comprehensively. The student compiles a portfolio, on a continuous basis, on the clinical and administrative procedures concerning the “practice patient”. The portfolio contains the student's year mark, which is determined on a 50:50 basis with the examination mark as the final pass mark. The examination mark is determined when the student presents the practice patient case to an audience and a panel of adjudicators.

Application of business management principles during patient management. Preparing the student for a meaningful and successful career in an increasingly complex business and healthcare environment. Application of certain principles and skills in terms of:
- Psychology in the dentistry practice.
- Political parameters in dentistry.
- Sociology and dentistry.
- Ethics for the oral hygienist.
- Career possibilities.
- Managing a practice.

Additional to this, students should understand the economic, cultural, legal and regulatory environment to establish and optimise patient management.

TBW 371 Comprehensive patient management 371

**Academic organisation:** Dental Management Sciences

**Prerequisite:** ODO 271, OFC 271, RAD 271, PDL 271, ORD 271, GAP 271, VKM 271, TBW 271

**Contact time:** 1 lpw 2 ppw

**Period of presentation:** Year

**Language of tuition:** Double medium

**Credits:** 3

**Module content:**
The purpose of this module is to:
- facilitate an understanding of technology management and maintenance;
- embed knowledge/skills in terms of administrative management and scheduling in a dental practice;
- facilitate an understanding of customer needs and demands;
- embed knowledge/skills regarding internal marketing in a dental practice;
- facilitate career management abilities;
- facilitate an understanding of an employee’s rights in terms of the labour law;
- facilitate an understanding of an oral hygienist’s role in the management of a dental practice;
- facilitate the management of a primary preventive treatment plan; and
- provide primary preventive treatment in cooperation with senior BChD students.

Period of presentation: Year
Language of tuition: Double medium  
Credits: 480

**TGG 370 Applied medicine 370**
Academic organisation: Internal Medicine
Prerequisite: BOK 280, (BOK 281 or (BOK 285,287)), BOK 283, GNK 286, GNK 288, GPS 280, IKT 200, SMO 211, SMO 281
Contact time: 1 ppw 1 lpw
Period of presentation: Year
Language of tuition: Both Afr and Eng  
Credits: 11

Module content:
The purpose of this module is to enable the dentist to identify medical problems, which may have an effect on the dental treatment or may affect the patient’s general health. The dentist must be able to interpret the patient’s medical history, in order to modify the treatment plan accordingly to ensure a safe dental treatment and/or to refer the patient for medical or specialist care.

**TGO 800 Essay: Dental health education 800**
Academic organisation: Community Dentistry
Period of presentation: Year
Language of tuition: Both Afr and Eng  
Credits: 24

**THM 700 Dental materials 700**
Academic organisation: Odontology
Contact time: 2 spw 5 dpw
Period of presentation: Year
Language of tuition: Both Afr and Eng  
Credits: 100
THM 710 Dental materials 710  
Academic organisation: Odontology  
Contact time: 1 spw 10 lpw 5 dpw  
Period of presentation: Semester 1 and/or Semester 2  
Language of tuition: Double medium  
Credits: 12

**VKM 171 Preventive oral health 171**
Academic organisation: Community Dentistry
Contact time: 1 dpw 1 ppw
Period of presentation: Year
Language of tuition: Double medium

*Module content:*
This module entails lectures and clinical work, pertaining to the scope of oral hygiene, in
the pre-clinical ward. It is aimed at enabling an oral hygiene student to develop his/her skills, knowledge and attitude by means of developing, implementing and evaluating a needs-driven primary and basic-secondary preventive programme for a patient.

**VKM 271 Preventive oral health 271**
**Academic organisation:** Community Dentistry  
**Contact time:** 1 lpw (30 weeks) 6 p (2 h) (30 weeks)  
**Period of presentation:** Year (promotion module)  
**Language of tuition:** Double medium  
**Credits:** 58  
**Module content:**  
This module is a continuation of (VKM 171) Preventive oral health 171 and is aimed at enabling an oral hygiene student to develop his/her skills, knowledge and attitude by means of devising, implementing and evaluating a needs-driven primary and basic-secondary preventive programme for a patient. This module entails lectures and clinical work, pertaining to the scope of oral hygiene, on real patients.

**VKM 371 Preventive oral health 371**
**Academic organisation:** Community Dentistry  
**Prerequisite:** ODO 271, OFC 271, RAD 271, PDL 271, ORD 271, GAP 271, VKM 271, TBW 271  
**Contact time:** 6 p (2 h) (30 weeks)  
**Period of presentation:** Year  
**Language of tuition:** Double medium  
**Credits:** 36  
**Module content:**  
This module entails clinical work, pertaining to the scope of oral hygiene, on patients in the preventive clinic. The module is aimed at enabling an oral hygiene student to develop his/her skills, knowledge and attitude by means of devising, implementing and evaluating a primary and basic-secondary preventive programme for a patient.

**VNM 100 Nursing research methodology 100**
**Academic organisation:** Nursing Science  
**Contact time:** 2 lpw  
**Period of presentation:** Year  
**Language of tuition:** English  
**Credits:** 22  
**Module content:**  
Basic schooling in the nursing research process.

**VNM 800 Nursing research methodology 800**
**Academic organisation:** Nursing Science  
**Contact time:** 1 lpw 2 dpw  
**Period of presentation:** Semester 2  
**Language of tuition:** English  
**Credits:** 40

**VOW 110 Nursing education theory 110**
**Academic organisation:** Nursing Science  
**Contact time:** 2 lpw 1 other per week  
**Period of presentation:** Semester 1  
**Language of tuition:** English  
**Credits:** 15  
**Module content:**  
Development of nursing education.  
Historical development of nursing education.  
Philosophical aspects and the functioning of nursing schools.
Recent developments in nursing education.
Outcomes-based education (OBE).
Curriculum development.
Curriculum building. Correlation between theory and practice. The learning process and active learner development.

**VOW 120 Nursing education theory 120**
**Academic organisation:** Nursing Science
**Prerequisite:** VOW 110
**Contact time:** 2 lpw 1 other per week
**Period of presentation:** Semester 2
**Language of tuition:** English  
**Credits:** 15
**Module content:**
Facilitation of learning.
Assessment of progress and evaluation.
Nursing process as modality in nursing education.
Allocation of learners in clinical practice and the facilitation of clinical learning. Nursing theories and their application.

**VOW 250 Nursing education 250**
**Academic organisation:** Nursing Science
**Prerequisite:** VOW 110, VOW 120
**Contact time:** 2 lpw
**Period of presentation:** Semester 1
**Language of tuition:** English  
**Credits:** 20
**Module content:**
Syllabus: available on request from the head of department.

**VOW 260 Nursing education 260**
**Academic organisation:** Nursing Science
**Prerequisite:** VOW 250
**Contact time:** 2 lpw
**Period of presentation:** Semester 2
**Language of tuition:** Both Afr and Eng  
**Credits:** 20
**Module content:**
Syllabus: available on request from the head of department.

**VOW 300 Nursing education 300**
**Academic organisation:** Nursing Science
**Prerequisite:** VOW 250, VOW 260
**Contact time:** 2 dpw
**Period of presentation:** Year
**Language of tuition:** Both Afr and Eng  
**Credits:** 60
**Module content:**
Syllabus: available on request from the head of department.

**VPB 110 Nursing management 110**
**Academic organisation:** Nursing Science
**Contact time:** 2 lpw 1 other per week
**Period of presentation:** Semester 1
**Language of tuition:** English  
**Credits:** 25
**Module content:**
Systems approach, theories and policies: Application in nursing management. Ethical
code and the generic administrative process. Planning and organising on first-level management. Healthcare facilities, financial planning and time utilisation. Problem-solving, change and organisation.

**VPB 120 Nursing management 120**  
**Academic organisation:** Nursing Science  
**Prerequisite:** VPB 110  
**Contact time:** 1 other per week 2 lpw  
**Period of presentation:** Semester 2  
**Language of tuition:** English  
**Credits:** 25  
**Module content:**  

**VPB 160 Nursing management 160**  
**Academic organisation:** Nursing Science  
**Prerequisite:** VPB 110, VPB 120  
**Contact time:** 2 ppw  
**Period of presentation:** Year  
**Language of tuition:** English  
**Credits:** 10  
**Module content:**  
*Attendance module only*  
Nursing management practical work. Compulsory practical work, including budgeting, statistics, non-nursing duties, job descriptions, memoranda and report writing. Performance appraisal tool.

**VPB 250 Nursing management 250**  
**Academic organisation:** Nursing Science  
**Prerequisite:** VPB 110, VPB 120  
**Contact time:** 2 lpw  
**Period of presentation:** Semester 1  
**Language of tuition:** English  
**Credits:** 20  
**Module content:**  
The responsibilities of the nursing manager with regard to the provision and use of nursing personnel.

**VPB 260 Nursing management 260**  
**Academic organisation:** Nursing Science  
**Prerequisite:** VPB 250  
**Contact time:** 2 lpw  
**Period of presentation:** Semester 2  
**Language of tuition:** English  
**Credits:** 20  
**Module content:**  
The responsibilities of the nursing manager with regard to the retaining of nursing staff and the rendering of a quality nursing service.

**VPB 300 Nursing management 300**  
**Academic organisation:** Nursing Science  
**Prerequisite:** VPB 250, VPB 260  
**Contact time:** 2 dpw 2 lpw  
**Period of presentation:** Year
Module content: The nursing manager on mid-level management as planner, organiser, leader and controller.

**VPT 160 Systems of nursing practice 160**
Academic organisation: Nursing Science  
Contact time: 1 lpw  
Period of presentation: Year  
Language of tuition: English  
Credits: 20

Module content: General systems of clinical nursing practice.  

**VPT 260 Systems of nursing practice 260**
Academic organisation: Nursing Science  
Prerequisite: VPT 160  
Contact time: 2 lpw  
Period of presentation: Year  
Language of tuition: English  
Credits: 60

Module content: Specialised systems of clinical nursing practice.  
The systems of nursing practice in one of the following clinical nursing speciality areas: critical care, emergency nursing, advanced midwifery, neonatal nursing, operating theatre nursing or child nursing. Contemporary trends and issues.

**VPT 360 Systems of nursing practice 360**
Academic organisation: Nursing Science  
Prerequisite: VPT 260  
Contact time: 2 lpw 2 dpw  
Period of presentation: Year  
Language of tuition: English  
Credits: 35

Module content: Specialised systems of clinical nursing practice.  
The more advanced systems of nursing practice in one of the following clinical nursing speciality areas: critical care, emergency nursing, advanced midwifery, neonatal nursing, operating theatre nursing or child nursing. Contemporary trends and issues.

**VSG 864 Nutrition care 864**
Academic organisation: Human Nutrition  
Contact time: 1 dpw 5 web-based periods per week 2 other per week 10 spw  
Period of presentation: Semester 1  
Language of tuition: English  
Credits: 30

**VTH 700 Preventive dentistry 700**
Academic organisation: Community Dentistry  
Contact time: 1 dpw 1 spw  
Period of presentation: Year  
Language of tuition: Both Afr and Eng  
Credits: 100
WKT 881 Practical work and work assignments 881
Academic organisation: Pharmacology
Contact time: 1 spw 1 dpw
Period of presentation: Semester 1
Language of tuition: Double medium
Credits: 40

WKT 882 Practical work and work assignments 882
Academic organisation: Pharmacology
Contact time: 1 spw 1 dpw
Period of presentation: Semester 1
Language of tuition: Double medium
Credits: 40

WKT 883 Practical work and work assignments 883

Credits: 40

WSD 701 Work study 701
Academic organisation: Occupational Therapy
Contact time: 2 lpw 2 ppw 1 spw 2 dpw
Period of presentation: Year
Language of tuition: Double medium
Credits: 30
Module content:
Advanced study of method study and work-measurement, including mastership of MODAPTS.
Business management is an existing subject for the Postgraduate Diploma in Health Administration.
AGV 413 Communication for sustainable rural development 413
Academic organisation: Agricultural Economics, Extension and Rural Devel
Prerequisite: Health Sciences students: second year status
Contact time: 2 lpw
Period of presentation: Year
Language of tuition: English
Credits: 20
Module content:
Introduction to the communication process and its importance for sustainable development; the models of communication; critical elements and factors in communication; communication and perception. Use of non-verbal communication. Persuasion and credibility. Messages and message treatment; audience and audience identification; channels and methods of communication. Effective listening and feedback. Practical training in communication: Effective speaking; visual aids in communication; managing conflict; report writing. Introduction to Appreciative Inquiry as a communication approach.

BCM 251 Introduction to proteins and enzymes 251
Academic organisation: Biochemistry
Prerequisite: CMY 117 GS, CMY 127 GS and MLB 111 GS
Contact time: 2 lpw 0.5 ppw
Period of presentation: Semester 1
Language of tuition: Double medium
Credits: 12
Module content:
Structural and ionic properties of amino acids. Peptides, the peptide bond, primary, secondary, tertiary and quaternary structure of proteins. Interactions that stabilize protein structure, denaturation and renaturation of proteins. Introduction to methods for the purification of proteins, amino acid composition, and sequence determinations. Introduction to enzyme kinetics and enzyme inhibition. Allosteric enzymes, regulation of enzyme activity, active centres and mechanisms of enzyme catalysis. Examples of industrial applications of enzymes. Practical training in laboratory techniques and Good Laboratory Practice. Techniques for the quantitative and qualitative analysis of biological molecules. Processing and presentation of scientific data.

BCM 252 Carbohydrate metabolism 252
Academic organisation: Biochemistry
Prerequisite: CMY 117 GS, CMY 127 GS and MLB 111 GS
Contact time: 2 lpw 0.5 ppw
Period of presentation: Semester 1
Language of tuition: Double medium
Credits: 12
Module content:
BCM 261 Lipid and nitrogen metabolism 261
Academic organisation: Biochemistry
Prerequisite: CMY 117 GS, CMY 127 GS and MLB 111 GS
Contact time: 2 lpw 0.5 ppw
Period of presentation: Semester 2
Language of tuition: Double medium
Credits: 12
Module content:

BCM 262 Biochemical principles of nutrition and toxicology 262
Academic organisation: Biochemistry
Prerequisite: CMY 117 GS, CMY127 GS and MLB 111 GS
Contact time: 2 lpw 0.5 ppw
Period of presentation: Semester 2
Language of tuition: Double medium
Credits: 12
Module content:

CMY 117 General chemistry 117
Academic organisation: Chemistry
Prerequisite: Refer to Regulation 1.2
Contact time: 1 ppw 4 lpw
Period of presentation: Semester 1
Language of tuition: Double medium
Credits: 16
Module content:
Theory: General introduction to inorganic and analytical chemistry. Nomenclature of inorganic ions and compounds, stoichiometric calculations concerning chemical reactions, redox reactions, solubilities, atomic structure, periodicity. Inorganic and physical chemistry. Molecular structure and chemical bonding using the VSEPR models. Chemical equilibrium, acids and bases, buffers, precipitation.
CMY 127 General chemistry 127
Academic organisation: Chemistry
Prerequisite: Natural and Agricultural Sciences students: CMY 117 GS
Health Sciences students: none
Contact time: 1 ppw 4 lpw
Period of presentation: Semester 2
Language of tuition: Double medium
Credits: 16
Module content:
Theory: General physical-analytical chemistry: Physical behaviour of gases, liquids and solids, intermolecular forces, solutions: Organic chemistry: Structure (bonding), nomenclature, isomerism, introductory stereochemistry, introduction to chemical reactions and chemical properties of organic compounds and biological compounds, i.e. carbohydrates, lipids and aminoacids. Practical: Molecular structure (model building), synthesis and properties of simple organic compounds.

CMY 151 Chemistry 151
Academic organisation: Chemistry
Prerequisite: Refer to Regulation 1.2
Contact time: 1 ppw 4 lpw
Period of presentation: Semester 1
Language of tuition: Both Afr and Eng
Credits: 16
Module content:
Theory: Introduction to general chemistry: Measurement in chemistry, matter and energy, atomic theory and the periodic table, chemical compounds and chemical bonds; quantitative relationships in chemical reactions, states of matter and the kinetic theory; solutions and colloids, acids, bases and ionic compounds, chemical equilibria. Introduction to organic chemistry: Chemical bonding in organic compounds, nature, physical properties and nomenclature of simple organic molecules, isomerism, chemical properties of alkanes and cycloalkanes, alkenes, alcohols, aldehydes and ketones, carboxylic acids and esters, amines and amides, carbohydrates, proteins, and lipids. Practicals.

MLB 111 Molecular and cell biology 111
Academic organisation: Genetics
Prerequisite: Refer to Regulation 1.2
Contact time: 1 ppw 4 lpw
Period of presentation: Semester 1
Language of tuition: Double medium
Credits: 16
Module content:
Introductory study of the ultra structure, function and composition of representative cells and cell components. General principles of cell metabolism, molecular genetics, cell growth, cell division and differentiation.

PHY 131 Physics for biology students 131
Academic organisation: Physics
Prerequisite: Refer to Regulation 1.2
Contact time: 4 lpw 1 dpw 1 ppw
Period of presentation: Semester 1
Language of tuition: Double medium
Credits: 16
Module content:
Units, vectors, one dimensional kinematics, dynamics, work, equilibrium, sound, liquids, heat, thermodynamic processes, electric potential and capacitance, direct current and alternating current, optics, modern physics, radio activity.
PHY 141 General physics 141
Academic organisation: Physics
Prerequisite: PHY 131 GS as well as 50% minimum for the practical component of PHY 131 or TDH
Contact time: 1 lpw 2 tpw
Period of presentation: Semester 2
Language of tuition: English
Credits: 16
Module content:
*This is an anti-semester presentation of the module PHY 131 General Physics 131. Refer to PHY 131 for the content description. Students will not be credited for both PHY 131 and PHY 141 for degree purposes.

RFI 110 Radiation physics 110
Academic organisation: Physics
Contact time: 2 lpw
Period of presentation: Year
Language of tuition: Both English and Afrikaans
Credits: 10
Module content:
X-rays: production, absorption.

RFI 210 Radiation physics 210
Academic organisation: Physics
Prerequisite: RFI 110, MTL 180, RAN 100, FSG 161, FSG 162, RAW 182 and RAW 180
Contact time: 3 lpw
Period of presentation: Semester 1
Language of tuition: Afrikaans
Credits: 10
Module content:

RFI 211 Radiation physics 211
Academic organisation: Physics
Prerequisite: RFI 110, RAW 180, RAN 100, FSG 161, FSG 162, RAW 182 and MTL 180
Contact time: 4 lpw
Period of presentation: Semester 2
Language of tuition: Afrikaans
Credits: 10
Module content:
thermoluminescent detector, semi-conductor detectors. Radiopharmaceuticals. Biological
effects: genetic and somatic effects.

RFI 310 Radiation physics 310
Academic organisation: Physics
Prerequisite: FSG 251, RFI 210, RAW 281, RBG 281, RAN 280, RAW 282, FSG 252,
FSG 262, RAW 284 and RFI 211
Contact time: 3 lpw
Period of presentation: Semester 1
Language of tuition: Afrikaans  
Credits: 10

Module content:
Image reconstruction: fundamental equations, algorithms.
Image properties: field size, image matrix, voxel, pixel, CT number, window width and
height. Image quality: spatial resolution, contrast resolution, quantum mottle, spatial
uniformity and frequency. Image processing: edge enhancement, pixel shifting and
subtraction. Digital radiography: X-ray, equipment, analog to digital conversion, linear and
logarithmic subtraction, image noise. Ultrasound: theory, transducers, piezo-electric
crystals, resonant frequency, interaction with matter, acoustic impedance, Doppler
techniques. Magnetic resonance: medical applications.

VDB 321 Food service management 321
Academic organisation: Consumer Science
Prerequisite: Natural and Agricultural Sciences students: VDS 322 
Contact time: 1 ppw 3 lpw
Period of presentation: Semester 2
Language of tuition: Double medium  
Credits: 18

Module content:
Planning and layout of food service units for different food service systems. Equipment
for food services. Factors influencing the choice and purchasing of equipment for
different food service units. Hygiene and safety in food services. management in food
service systems. Financial management in food services.

VDS 111 Basic food preparation 111
Academic organisation: Consumer Science
Contact time: 0.5ppw 1 dpw 1 lpw 1 ppw
Period of presentation: Semester 1
Language of tuition: Double medium  
Credits: 6

Module content:
Module 1: Basic food preparation and food preparation techniques. Mise en place,
weighing and measurement techniques, equipment and terminology as applied in food
preparation. History of the foodservice industry and contemporary chefs. Basic food
quality control.
Module 2: Food preparation basics of the following: stocks, soups and sauces.

VDS 210 Food commodities and preparation 210
Academic organisation: Consumer Science
Prerequisite: VDS 121
Contact time: 1 ppw 3 lpw
Period of presentation: Semester 1
Language of tuition: Double Medium  
Credits: 18
Module content:
Module 1: The study of different food systems with regard to food preparation. Physical and chemical properties and the influence of the composition in food preparation.
Module 2: Food preparation basics of the following: fruit and vegetables; salads; frozen desserts; gelatine.
Module 3: Origin and development of food habits; Factors influencing habits and choice; Dynamics of food habits. Influence of religion on food habits. Food habits of different ethnic groups.

VDS 221 Food commodities and preparation 221
Academic organisation: Consumer Science
Prerequisite: VDS 210
Contact time: 1 ppw 3 lpw
Period of presentation: Semester 2
Language of tuition: Double Medium
Credits: 18

Module content:
Module 1: The study of different food systems with regard to food preparation. Physical and chemical properties and the influence of the composition in food preparation.
Module 2: Food preparation basics of the following: meat; poultry; fish, legumes, eggs and milk, baked products (whole spectrum); leavening agents.
Module 3: The influence of culture on cuisines. Study of the cuisines of selected African, European and Eastern countries.

VDS 322 Large-scale food production and restaurant management 322
Academic organisation: Consumer Science
Prerequisite: VDS 210 and VDS 221
Contact time: 3 lpw 3 ppw
Period of presentation: Semester 2
Language of tuition: Double medium
Credits: 31

Module content:
Module 1 and practical work: Principles of large-scale food preparation and the practical application thereof in a practical restaurant situation. Restaurant management. Recipe formats and adjustment applicable to large-scale food preparation. Work scheduling and the practical exposure to the use of large scale catering equipment in a real life situation.
Module 2: Menu planning for different food service systems and styles of food service.
Module 3: Large scale food procurement, consumption and storage.
Practical work: Principles of large-scale food preparation and the practical application thereof in a practical restaurant situation. Recipe formats and adjustment applicable to large-scale food preparation. Work scheduling and the practical exposure to the use of large scale catering equipment in a real life situation.

Alphabetical list of modules offered by the Faculty of Engineering, Built Environment and IT

AIM 101 Academic information management 101
Academic organisation: School of Information Technology
Contact time: 2 lpw
Period of presentation: Semester 1 or Semester 2
Language of tuition: Both Afr and Eng
Credits: 6

Module content:
Find, evaluate, process, manage and present information resources for academic purposes using appropriate technology. Apply effective search strategies in different...
technological environments. Demonstrate the ethical and fair use of information resources. Integrate 21st-century communications into the management of academic information.

**AIM 111 Academic information management 111**
**Academic organisation:** School of Information Technology  
**Contact time:** 2lpw  
**Period of presentation:** Semester 1  
**Language of tuition:** Both Eng and Afr  
**Credits:** 4  
**Module content:**  
Find, evaluate, process, manage and present information resources for academic purposes using appropriate technology.

**AIM 121 Academic information management 121 (new)**
**Academic organisation:** School of Information Technology  
**Contact time:** 2lpw  
**Period of presentation:** Semester 2  
**Language of tuition:** Both Eng and Afr  
**Credits:** 4  
**Module content:**  
Apply effective search strategies in different technological environments. Demonstrate the ethical and fair use of information resources. Integrate 21st-century communications into the management of academic information.

**Alphabetical list of modules offered by the Faculty of Economic and Management Sciences**

**BDO 110 Industrial and organisational psychology 110**
**Academic organisation:** Human Resource Management  
**Contact time:** 4 lpw  
**Period of presentation:** Semester 1  
**Language of tuition:** Both Afr and Eng  
**Credits:** 10  
**Module content:**  
*Introduction to industrial and organisational psychology*  
This section is an introduction to the various schools of thought in psychology with particular emphasis on industrial and organisational psychology and its fields of application. The basic principles of scientifically systematising industrial psychological knowledge will be discussed. The biological basis of behaviour will be addressed in order to lay the foundation for the application of ergonomical principles.  
*Individual processes*  
This section consists of the principles of learning as found in the work context. The role of perception in the work environment will be discussed by considering aspects such as shape, depth, distance and colour perceptions. Cognition, thought, reasoning, memory, creativity and decision-making will be included. Intelligence will be addressed and placed in an Industrial and organisational psychology perspective.

**BDO 120 Industrial and organisational psychology 120**
**Academic organisation:** Human Resource Management  
**Contact time:** 4 lpw  
**Period of presentation:** Semester 2  
**Language of tuition:** Both Afr and Eng  
**Credits:** 10  
**Module content:**  
*Development and personality*
This module consists of a discussion of the life span and important periods in human development with emphasis on their meaning in the work context. With regard to personality, the following themes will be addressed:

the cultural context of personality, its formation and determinants of personality;
personality as determinant of behaviour as well as the development and maintenance of self-image. Attention will be given to the basic methods of personality measuring and personality assessment.

**Man in interaction**

The nature and functions of as well as changes in attitudes and values will be discussed in order to gain a better understanding of them in a work context. Causes and handling of aggression will be discussed to get a better understanding of conflict. The causes, kinds and handling of conflict are discussed within a work context. Adaptability to work is addressed to create a basis for the management of a healthy worker corps. Earlier and contemporary motivational theories will be comprehensively discussed to establish a healthy basis for their implementation.

**BDO 219 Industrial and organisational psychology 219**

**Academic organisation:** Human Resource Management  
**Prerequisite:** BDO 110 GS, 120 GS  
**Contact time:** 3 lpw  
**Period of presentation:** Semester 1  
**Language of tuition:** Both Afr and Eng  
**Credits:** 16

**Module content:**

**Group behaviour and leadership**

This module will focus on organisational behaviour with specific reference to the principles of group behaviour and the role of work teams in the organisation. Particular attention will be paid to group development, group interaction, group structures, group processes and the promotion of team performance in the organisation. Leadership and the effect of power and politics in the organisation will be studied. The function of leadership in individual, group and task-oriented behaviour will also be addressed.

**Organisational behaviour**

The behavioural basis for organisational structuring and organisation design will be addressed. This will include organisational culture as an important facet in any organisation. The dynamics and approaches to organisational change will be addressed with specific reference to the role of change agents, resistance to change and organisational development with a practical discussion of the contemporary problems of organisational change, personnel turnover, fatigue, boredom, absenteeism, conflict, accidents.

**BDO 229 Industrial and organisational psychology 229**

**Academic organisation:** Human Resource Management  
**Prerequisite:** BDO 219 GS  
**Contact time:** 3 lpw  
**Period of presentation:** Semester 2  
**Language of tuition:** Both Afr and Eng  
**Credits:** 16

**Module content:**

**Employee health and ergonomics**

This section focuses on actual and important aspects of safety and health management in organisations, as well as the nature and role of ergonomics therein. These aspects are theoretically and practically covered, providing the student with the knowledge and skills required in the organisational psychology and human resource management field.
**Workforce diversity**
This section will focus on the development of sensitivity towards a diverse employee corps and the development of mutual respect and tolerance between individuals and groups in any organisation. Particular attention will be given to the prerequisites for the effective implementation of a diversity management programme in an organisation.

**BDO 319 Industrial and organisational psychology 319**
**Academic organisation:** Human Resource Management  
**Prerequisite:** BDO 110, 120; BDO 219 GS, BDO 229 GS  
**Contact time:** 3 lpw  
**Period of presentation:** Semester 1  
**Language of tuition:** Both Afr and Eng  
**Credits:** 20  
**Module content:**  
*Human resource management systems*  
This section provides an introduction to human resource management systems and addresses current developments and problems in the field, which will be comprehensively addressed and include the following: job analysis, description, specification, and design, remuneration theory and systems, job evaluation and grading as well as benefit and fringe-benefit systems. Remuneration systems as motivation for employees will also be included.  
*Human resources provision*  
Human resources provision will be presented from an industrial psychological perspective and will include the following themes: human resources planning; macro and micro variables which could affect personnel forecasting and provision; human resource information systems; the auditing of skills as well as techniques such as recruitment, selection, placement and induction.

**BDO 329 Industrial and organisational psychology 329**
**Academic organisation:** Human Resource Management  
**Prerequisite:** BDO 319 GS  
**Contact time:** 3 lpw  
**Period of presentation:** Semester 2  
**Language of tuition:** Both Afr and Eng  
**Credits:** 20  
**Module content:**  
*Motivation and performance management*  
This section will address the main characteristics of a performance management system and will focus on the strategic and motivational value of the process. Performance management will be addressed under the following headings: criteria development; performance planning; data gathering; observation and documenting; performance appraisal; appraisal instruments; performance feedback to promote motivation.  
*People and career development*  
This section will address current methods that can be used to develop human resources and to present career development programmes in order to promote performance at both an individual and organisational level. Emphasis will be on needs analysis, curriculum design, goal setting for learning, programme development, preparation of materials, training interventions, presentation and facilitation skills as well as course evaluation. The integration of individual career expectations with the organisation’s requirements and strategies will be illustrated based on career development.

ELH 131 Academic English for Health Sciences (BClinical Medical Practice)

Academic organisation: Unit for Academic Literacy
Contact time: 2 lpw 1tpw
Period of presentation: Semester 1
Language of tuition: English
Credits: 6
Module content:
Study of English used in medicine, aimed at developing reading, writing and interviewing skills in clinical situations.

ELH 132 Academic English for Health Sciences (BClinical Medical Practice)

Academic organisation: Unit for Academic Literacy
Contact time: 2 lpw 1tpw
Period of presentation: Semester 2
Language of tuition: English
Credits: 6
Module content:
Further study of English in medicine, with emphasis on language skills required in clinical contexts.

FIL 155 Science and world views 155

Academic organisation: Philosophy
Contact time: 1 lpw
Period of presentation: Semester 1
Language of tuition: Both Afr and Eng
Credits: 6
Module content:

MGW 112 People and their environment 112

Academic organisation: Sociology
Contact time: 4 lpw
Period of presentation: Semester 1
Language of tuition: English
Credits: 6
Module content:
This module comprises basic psychology and sociology concepts relevant to Medicine, and to Dentistry, in the case of BChD students. Basic psychiatric concepts are also taught.W

MTL 180 Medical terminology 180

Academic organisation: Ancient Languages
Contact time: 2 lpw
Period of presentation: Semester 1
Language of tuition: Both Afr and Eng
Credits: 12
Module content:
The acquisition of a basic medical orientated vocabulary compiled from Latin and Greek stem forms combined with prefixes and suffixes derived from those languages. The manner in which the meanings of medical terms can be determined by analysing the
Health Sciences 2014

terms into their recognisable meaningful constituent parts, is taught and exercised. The
functional use of medical terms in context as practical outcome of terminological
application is continually attended to.

SEP 110 Sepedi for beginners 110
Academic organisation: African Languages
Contact time: 2 lpw 1 dpw
Period of presentation: Semester 1
Language of tuition: Double Medium  Credits: 12
Module content:
*For absolute beginners only.
*Only students from the School of Healthcare Sciences may take this module during
semester 2. All other students must take this module during semester 1. Also note that
students from the School of Healthcare Sciences, who already possess the language
skills taught in this module, may write an exemption examination.
The acquisition of basic Sepedi communicative skills with emphasis on everyday
expressions and suitable high frequency vocabulary, within specific social situations.

SLK 110 Psychology 110
Academic organisation: Psychology
Contact time: 2 lpw 2 dpw
Period of presentation: Semester 1
Language of tuition: Both Afr and Eng  Credits: 12
Module content:
This module is a general orientation to psychology. An introduction is given to various
theoretical approaches in psychology, and the development of psychology as a science is
discussed. Selected themes from everyday life are explored and integrated with
psychological principles. This module focuses on major personality theories. An
introduction is given to various paradigmatic approaches in Psychology.

SLK 120 Psychology 120
Academic organisation: Psychology
Contact time: 2 lpw 2 dpw
Period of presentation: Semester 2
Language of tuition: Both Afr and Eng  Credits: 12
Module content:
This module introduces the student to a basic knowledge and understanding of the
biological basis of human behaviour. The module addresses the key concepts and
terminology related to the biological subsystem, the rules and principles guiding biological
psychology, and identification of the interrelatedness of different biological systems and
subsystems. In this module various cognitive processes are studied, including perception,
memory, thinking, intelligence and creativity. Illustrations are given of various thinking
processes, such as problem solving, critical, analytic and integrative thinking.

SLK 210 Psychology 210
Academic organisation: Psychology
Contact time: 2 lpw 2 dpw
Prerequisite: SLK 110, SLK 120(GS)
Period of presentation: Semester 1
Language of tuition: Both Afr and Eng  Credits: 20
Module content:
In this module human development from conception through adolescence to adulthood is
discussed with reference to various psychological theories. Incorporated are the
developmental changes related to cognitive, physical, emotional and social functioning of
the individual and the context of work in adulthood. Traditional and contemporary theories
of human development explaining and describing these stages are studied in order to
address the key issues related to both childhood and adulthood.

**SLK 220 Psychology 220**
**Academic organisation:** Psychology  
**Contact time:** 2 lpw 2 dpw  
**Prerequisite:** SLK 110, SLK 120(GS)  
**Period of presentation:** Semester 2  
**Language of tuition:** Both Afr and Eng  
**Credits:** 20

**Module content:**
This module is a social-psychological perspective on interpersonal and group processes. Themes that are covered include communication, pro-social behaviour, social influence and persuasion, political transformation, violence, and group behaviour.

**ZUL 110 isiZulu for beginners 110**
**Academic organisation:** African Languages  
**Contact time:** 2 lpw 1 dpw  
**Period of presentation:** Semester 1 and Semester 2  
**Language of tuition:** Double Medium  
**Credits:** 12

**Module content:**
*For absolute beginners only*  
*Only students from the School of Healthcare Sciences may take this module during semester 2. All other students must take this module during semester 1. Students from the School of Healthcare Sciences, who already possess the language skills taught in this module, may write an exemption examination.*
The acquisition of basic isiZulu communicative skills with emphasis on everyday expressions and suitable high frequency vocabulary, within specific situations.
