

University of Pretoria Yearbook 2016

Faculty of Health Sciences

Welcome to the Faculty of Health Sciences

The Faculty of Health Sciences is recognized nationally and internationally as an outstanding institution in terms of its education of health professionals, its research and its clinical service. Furthermore, it is an institution with a tradition of excellence and a proud history. A great health sciences institution, however, never rests comfortably on its past successes. A great health sciences institution does more than make history – it makes the future. The Faculty management is deeply committed and this has been translated into an action agenda which recognises the need for constant innovation and is dedicated to meet the health sciences challenges: those not yet conquered and those not yet known.

Students learn to make a life, make a living and make a difference. Graduates become community leaders that are distinct in their ability to think, communicate and contribute.

Research in the Faculty of Health Sciences has a strong emphasis on multidisciplinary approaches.

Faculty regulations and information

The rules for the degrees published here are subject to change and may be amended prior to the commencement of the academic year.

The General Regulations (G Regulations) apply to all faculties of the University of Pretoria. It is expected of each student to familiarise himself or herself well with these regulations. Ignorance concerning these regulations will not be accepted as an excuse for any transgression.

Also consult General Rules and Information on the Yearbook website for additional information.

1. Selection

A selection process takes place prior to admission to all the degree programmes in the Schools mentioned in the front part of this publication. For some of the undergraduate degree programmes a personal interview is required as part of the selection procedure. The National Benchmark Test (NBT) is compulsory for all applicants applying for admission to an undergraduate degree programme with the exception of the Bachelor of Clinical Medical Practice and students with previous tertiary exposure.

2. National Benchmark Test (NBT)

The National Benchmark Test is compulsory for applicants who are currently in Grade 12 or who have already completed Grade 12 and who wish to apply for admission to any field of study, with the exception of the Bachelor of Clinical Medical Practice as well as students with previous tertiary exposure, in the Faculty of Health Sciences. Applicants who fail to write this test will not be considered for selection. Academic Literacy, Quantitative Literacy and Mathematics are tested and applicants cannot specially prepare for the test. The test results will be used in addition to the Grade 12 marks for provisional selection and will not replace the Grade 12 marks.

3. Requirements for admission to specific modules

A student who has

- (a) obtained at least 50% in the final Grade 12 examination in Mathematics as well as in Physical Science, will be admitted to Molecular and cell biology (MLB 111), and a module in the subjects Chemistry,

Physics, Zoology and Entomology, Genetics, Microbiology or Botany;

(b) obtained at least 50% in the final Grade 12 examination in Mathematics as well as in Physical Science, will be admitted to a module in Radiation Physics (RFI);

(c) obtained at least 50% in the final Grade 12 examination in either Physical Science or Life Sciences, will be admitted to modules in Occupational Therapy and Therapeutic Media;

(d) obtained at least 60% in the final Grade 12 examination in Mathematics, will be admitted to the module WTW 158 in Mathematics; and

(e) obtained at least 50% in the final Grade 12 examination in Mathematics, will be admitted to the module WTW 134 in Mathematics.

4. Academic Literacy Test

All new undergraduate students who register in the School of Dentistry and the School of Medicine will be required to write an academic literacy test. On the grounds of this test, students will be required to follow compulsory academic literacy modules (ELH 111 and 112 for students of Dentistry and Medicine, and ELH 131 and 132 for students of Clinical Medical Practice), which they must pass as one of the requirements for obtaining their degree.

Undergraduate students who register in the School of Healthcare Sciences will not be required to write the academic literacy test. The academic literacy modules ELH 121 and ELH 122 are compulsory for all students, and a pass mark for each of these modules is a requirement for obtaining their degree.

5. Academic information management

It is required of all new first-year students at the University of Pretoria to complete the module AIM 101 Academic information management. Details of this module can be found in the Course Catalog.

6. Subminimum in examination papers

Where applicable, the subminimum required in examinations appears in the regulations of the degree/diploma in question and in the syllabi of the modules in question.

With regard to MBChB:

A subminimum may be required in each module or practical component from which a specific block is compiled, in order to pass in the block in question.

7. Examinations

The examinations in first-semester modules take place in May/June, while all other examinations (second-semester modules, year modules and blocks of the MBChB degree programme) take place in October/November.

8. Ancillary examinations

After conclusion of an examination and before examination results are announced, the examiners may summon a student for an ancillary examination on particular aspects of a module.

Details in respect of a School's requirements for ancillary examinations are published in the study guide of a given block.

9. Extraordinary examinations (including aegrotats)

Subject to the stipulations of the General Regulations, the period during which an extraordinary examination will take place in the School of Medicine, will be determined by the lecturer concerned, in consultation with the relevant head of department or block chairperson, provided that the examination in a block should take place during the second examination period, if possible.

If an examination consists of more than one evaluation modality, the examination as a whole must be repeated, even if part thereof has already been completed.

10. Re-marking of examination scripts

In accordance with the stipulations of the General Regulations, departments give feedback to students after an examination on the framework used by the examiners during the examination. The way in which feedback is given, is determined by the head of department. Students may, after perusal, and in the case of MBChB students, after the examination period (which includes the examination and the second examination), within 14 calendar days after commencement of the lectures in the next semester, and after payment of the prescribed fee, apply for the re-marking of an examination script, by an examiner (in the case of MBChB study an **external** examiner from outside of the University) appointed by the head of department concerned.

The School of Medicine furthermore defines the relevant regulation as follows:

- (i) A student has the right of **perusal** of his or her examination script **before** applying for the re-marking of the examination script.

The following is determined by perusal of the script:

- Whether all the answers have been marked.
- Whether the marks awarded, have been calculated correctly.
- Whether the student did in fact answer all the questions.

- (ii) **During perusal, the student, the lecturer as well as a third person must be present.**

If a discussion about the content of the answers in the script develops, the student must be referred to the administration of the School in question, **where he or she applies for the re-marking of the examination script.**

11. Second examination opportunity

- (i) A student may be admitted to a second examination in a module in the following instances [excepting specific faculty requirements in respect of second examinations in specific blocks for the first to the fifth year of study for the MBChB degree (consult Reg. M.1(b)) and the first and second year of study for BChD (consult Reg.D.1(b)):

(aa) If a final mark of between 40% and 49% has been obtained.

(bb) If a pass mark has been obtained but not the required subminimum of 40% in the examination as a whole; or

(cc) If a pass mark has been obtained but not the required subminimum in subsections of the module.

- (ii) A student must obtain a minimum of 50% in the second examination to pass.

(iii) The semester/year/continuous evaluation mark is taken into account only if a student did not obtain at least 50% in the second examination of a first-semester module at 100 level.

(iv) The highest final mark (pass mark) that can be awarded to a student for a second examination, is 50%.

12. Promotion

In certain departments, students can be promoted to a next semester or level of a subject without writing the prescribed examination, provided that their preparation is satisfactory and a continuous evaluation mark of at least 65% has been obtained.

Departments where promotion as prescribed above is possible, will inform students in good time in this regard.

Note:

- Students obtain credit for a promoted module only after they have passed an examination in a consecutive module or modules of the subject in question at this University.
- Promotion as described above, **does not** refer to the option that medical students may exercise to have the block mark at the end of the year, validated as the final block mark for a relevant block (i.e. to be exempted from the block examination in the block), provided, inter alia, that a block mark of at least 60% has been obtained in the block in question.

13. The examination moderating meeting

13.1 Students in Year 1 - 3:

(i) Students obtain class test, practical and block test marks in respect of each block and special activity (which are disclosed to students). These marks are processed into a block mark (which is not disclosed to students). Each block chairperson publishes a list of the registration numbers of students who have to sit the semester examination in his or her block. The block marks are submitted to Student Administration. Students with examination exemption, who nevertheless prefer to sit the block examination, may do so, but will then have to accept the final block mark (which is calculated from the block mark and the examination mark), even if it is less than the (original) block mark.

(ii) The final block mark of the students who have to sit the examination, is only determined at the end of the block examination, from the contributions of the block mark and the examination mark. This final block mark will reflect the real mark obtained. The EMM (Examination Moderating Meeting) now takes place with the following objectives:

- Identification of the students who pass;
- Identification of the students who fail and as a result, have to follow the remedial programme and sit the second block examination;
- Identification of students who did not obtain the required subminimum.
- Validation of the block marks of the students who have been exempted from the examination, as the final block marks for the blocks in question; and
- Identification of students who need study assistance.

(iii) Students who fail the examination, must follow the remedial opportunity where applicable and the need for a specific remedial action will be defined at the examination moderating meeting. Such students must sit the second block examination at the end of the second semester. Only the second block examination mark will count and the maximum that can be obtained is "50H".

(iv) The performance of the students who have written the second examination, will be discussed at the second EMM, with the following objectives:

- Identification of the students who pass; and
- Identification of the students who fail. In terms of the MBChB selection criteria, first- and second-year students who fail, must apply again for selection.

13.2 Students in Year 4 and the first half of Year 5: MBChB

(i) During the blocks and special activities, students write the class tests as well as the block test. These marks are announced by the block chairperson.

(ii) Students also do morning rotations, each of which is evaluated. There are eight morning rotations in Year 4, and four in the first half of Year 5. These rotation marks are announced by the relevant departments.

(iii) The block mark is calculated from the different test marks, marks awarded for practical work and

assignments, as well as the rotation(s) coupled to the specific block. In Year 4, this mark can only be calculated in middle September and in Year 5, only in middle May. These marks are not disclosed to students. A list of the registration numbers of students, who have not obtained examination exemption, is placed on the notice board by the block chairperson. These students are obliged to write the block examination. The block marks are submitted to Student Administration.

Students who nevertheless choose to write the examination, even though they have been exempted from it, may do so, but will have to accept the final block mark, even if it is lower than the (original) block mark.

(iv) The final block mark of the students who sit the examination is only calculated at the end of the block examination, from the contributions from the block mark and the examination mark. This final block mark will reflect the real mark obtained. An EMM is now being held, with the following objectives:

- Identification of the students who pass;
- Identification of the students who fail and resultantly have to follow the remedial programme and sit the second block examination;
- Validation of the block marks of the students with examination exemption, as their final block marks; and
- Identification of the students who need study assistance.

(v) Students who fail the examination, must follow the remedial programme and sit the second block examination, which will take place at the end of the second semester in Year 4, and at the beginning of the second semester in Year 5. Only the second block examination mark will count and a maximum of “50H” can be obtained.

(vi) Students who sit the second examination, are discussed at the second EMM, with the following objectives:

- Identification of the students who pass; and
- Identification of the students who fail.

13.3 Student Interns: MBChB

13.3.1 All students

(i) At the conclusion of each seven-week rotation, an end-of-rotation evaluation (EORE) takes place in the different departments. The aim with the EORE is the identification of those students who obtain examination exemption (semester examination) and those who are not exempted and will have to sit the examination at the end of the semester. All EOREs are supported by external examiners.

(ii) The same process takes place in rotations with a duration of 3,5 weeks.

(iii) No marks are disclosed to students, only the names and/or registration numbers of the students who must sit the semester examination.

(iv) After conclusion of the semester examination (which extends over three days on dates determined beforehand), an EMM is held, with the following objectives:

- Validation of the rotation marks as the semester examination mark, of the students who have obtained examination exemption. The rotation mark and the EORE mark contribute to the final mark.
- Identification of the students who have passed the semester examination. The rotation mark and the semester examination mark contribute to the final mark;
- Identification of the students who have failed the semester examination. These students are referred to Student Administration, as a new rotation division must now be followed; and
- Identification of the students who need study assistance.

13.4 Students who repeat rotations: MBChB

(i) Students who repeat rotations, do the EORE at the conclusion of the rotation that has been repeated. The objective is to obtain a pass mark. The continuous evaluation marks and the EORE mark contribute to the final

mark.

(ii) On the first Wednesday after the conclusion of the rotation, an EMM takes place at 13:00 (or a different timeslot as arranged), to evaluate the achievement of the students, who have repeated the rotation. The objectives of this EMM are:

- Identification of the students who pass the rotation that has been repeated (final mark of 50% or more) (maximum indicated on the form is "50H");
- Identification of the students who fail the rotation that has been repeated. These students are referred to Student Administration, as a new rotation division must now be followed; and
- Identification of the students who need study assistance.

(iii) The achievement of the students who have repeated a 3,5 week rotation, is discussed at the same EMM.

13.5 Students who are "finalists" at another time than the end of the sixth year of study: MBChB

13.5.1 Students who repeated previous rotations successfully, and who are now "finalists", but will be doing the current rotation for the first time:

(i) These students do the EORE just like all other students do, the objective being, as in the case with other students, to identify those who do or do not obtain, exemption from the semester examination.

(ii) Students who obtain examination exemption after the conclusion of the EORE, thus pass the rotation automatically.

(iii) Students who do not obtain exemption from the semester examination after the conclusion of the EORE, must therefore sit the examination at the end of the relevant semester.

(iv) In keeping with UP regulations, these students, who are completing their studies ("finalists"), who have only one course (rotation) to complete in order to comply with all the requirements for the MBChB degree, and who have not obtained examination exemption, may apply to sit a "special examination" the following week (at a time earlier than the semester examination where applicable). This examination (which will take place at an earlier time), must preferably be scheduled for the Monday or Tuesday of the following week. The department determines the format and due to the fact that the student has already been through the external evaluation process, the presence of an external examiner at the special examination is optional, although recommended. The final mark comprises the examination mark and must be 50% or more to pass. The marks must be available by the Wednesday in order that these students' marks can be submitted to the EMM, which will be held on that day.

(v) The objectives of the EMM for this category of students are:

- Identification of the students who have passed the special examination. These students complete the programme, and a special mini oath-taking ceremony is arranged for them; and
- Identification of the students who have failed the special examination. These students fail the course, must repeat the relevant rotation and must therefore be referred to Student Administration.

13.6 Students who are "finalists", but who are repeating the current rotation (all circumstances - previously, or at a recent EMM, identified as having failed): MBChB

(i) These students do the EORE as all other students. The objective is to obtain a pass mark. The continuous evaluation marks and the EORE mark contribute to the rotation mark, which, in this case, is also the final mark. The mark must be 50% or more, but the maximum that will be indicated on the form, is "50H".

(ii) On the first Wednesday after the conclusion of the rotation, an EMM will be held at 13:00 (or another time slot as arranged), to evaluate the achievement of these students who are repeating the current rotation. The objectives of this EMM are:

- Identification of the students who have passed the EORE/examination. These students thus complete the MBChB degree programme and a mini oath-taking ceremony will be arranged for them; and
- Identification of the students who have failed the EORE/examination. These students thus fail the rotation, must repeat the relevant rotation and must therefore be referred to Student Administration.

(iii) Students in this category, who are only repeating a 3,5 week rotation, will follow the exact same route, but a unique EMM will be arranged shortly after completion of the EORE/examination. The same objectives will apply.

Special refresher course for medical practitioners

A one-week course for medical practitioners is presented annually by the School of Medicine with clinical presentations by various departments in the afternoons and evenings. The School also offers an annual intensive two-day course in one main field of study.

A medical practitioner who wishes to update his or her knowledge, may register as a special postgraduate student in the School of Medicine (Medicine Special). He or she will then have the opportunity to attend demonstrations and discussions and to participate in work as determined by the head of the department concerned.

Visiting postgraduate students (Code 10290001)

A medical practitioner or specialist physician may apply to register as a postgraduate visiting student for non-examination purposes for a period/s of one month or longer as preferred, during which period he or she may work in a department of his/her choice. The nature of this work will be determined by each head of department. Periods of time completed in this way, will not be recognised as periods of formal training for the purposes of specialisation.

Medicine Special (Undergraduate)

Individual modules – not for degree purposes.

Code	Description
10180001	Medicine Special (Undergraduate) Prinshof Campus
10185021	Medicine Special (Cuban students: Prinshof Campus)
10190001	Medicine Foreign (Non-examination purposes) Visiting Undergraduate

Medicine Special (Postgraduate) (Code 10280001)

Registration as a postgraduate candidate with a view to complete examinations in prerequisite subjects for MMed (with approval of the Chairperson of the School and heads of departments in question), until such time as a registrarship becomes available. Neither the University of Pretoria nor the province is under any obligation whatsoever, to appoint such a student as a registrar or to give him or her precedence over other candidates to be appointed.

Undergrad Diploma/Certificate

Advanced University Diploma Oral Hygiene (11120013)

Duration of study 1 year

Programme information

The programme is integrated with and planned around one or more of the dental disciplines or any other topic as agreed on in consultation with the head(s) of department concerned and approved by the Dean.

The programme is only offered part-time, with contact time as determined by the head(s) of department concerned.

Admission requirements

Candidates must be in possession of a Diploma in Oral Hygiene or in Dental Therapy or an equivalent qualification and must be registered with the Health Professions Council of South Africa as an oral hygienist or a dental therapist.

Other programme-specific information

The **basic subject** is determined by the head of department and approved by the Dean.

Examinations and pass requirements

- (i) A year mark of at least 50% is required to be admitted to the examination. A subminimum of 50% is required in the examination in all modules, with a final mark of at least 50% to pass. A student who fails one or more module, must repeat such modules and the examinations in the ensuing semester. In modules that were passed, only practical and clinical work will be required.
- (ii) The requirements as set out above apply to a student who, after repeating a semester, again fails some of the modules.

Pass with distinction

The diploma is awarded with distinction to a student who obtains an average of at least 75% in both the main field of study and the basic subject.

Curriculum: Final year

Minimum credits: 100

Core modules

- Community dentistry 702 (GTH 702) - Credits: 100.00
- Maxillo-facial and oral surgery 701 (KGM 701) - Credits: 100.00
- Oral pathology 702 (MPG 702) - Credits: 100.00
- Orthodontics 701 (ORD 701) - Credits: 100.00
- Prosthodontics 701 (PRD 701) - Credits: 100.00
- Periodontics 701 (PRN 701) - Credits: 100.00
- Practice management 701 (PRS 701) - Credits: 90.00

HCert (Sports Science) Option: Education (10120002)

Duration of study 2 years

Contact Dr F Rossouw france.rossouw@up.ac.za +27 (0)124206116

Programme information

This programme will be an extended programme allowing the student to complete the programme in two years. The programme provides a basis for knowledge and skills development to improve athlete performance by means of physical assessment, exercise and conditioning prescription, and research. It aims to develop coaches who can function successfully in an interdisciplinary environment in order to improve athletes' and sports teams' performances using the latest techniques and research. It will therefore strive towards internationally recognised academic excellence, but with local relevance. The programme will create an ideal learning environment incorporating lectures, tutorials, practical sessions, and problem solving. Students will receive teaching and training by leaders in the field of Sports Science and coaching. Students will get the opportunity to work with various sporting codes and athletes of various skill levels. Upon completion, it will provide students wanting to further their studies with the opportunity to apply for the BA (Sports and Leisure Studies), Option: Sports Coaching Sciences in the Faculty of Humanities, or the BEd degree in the Faculty of Education.

Other programme-specific information

*Students who are deemed to be at risk of their level of academic literacy are compelled to take ALL 110 and ALL 125.

Students who are deemed NOT to be at risk of their level of academic literacy are compelled to take language modules to the value of 12 credits from the list of language modules.

Curriculum: Final year

Minimum credits: 118

Fundamental modules

Undergraduate Degree

BChD Dentistry (11130001)

Duration of study 5 years

Contact Prof WD Snyman willie.snyman@up.ac.za +27 (0)123192552

Programme information

NB: Selection of candidates takes place prior to admission.

The General Regulations are applicable to bachelor's degrees.

Each student in Dentistry must apply to the Registrar of the Health Professions Council of South Africa for registration as a student in Dentistry, within two months after the commencement of the first year of study. Students, who have been granted exemption from the first or second year of study, must also comply with the registration requirements.

NOTE: For students who registered for the BChD degree programme prior to 2014, the relevant regulations as they appear in the 2013 Yearbook will be applicable.

Admission requirements

- In order to register NSC/IEB/Cambridge candidates must comply with the minimum requirements for degree studies and with the minimum requirements for the relevant study programme.
- Life Orientation is excluded in the calculation of the APS.
- Grade 11 results will be used for the conditional admission of prospective students.
- Admission to Health Sciences study programmes is subject to a selection process.

Minimum requirements for 2016												
Achievement Level												APS
English				Mathematics				Physical Science				
NSC/IEB	HIGCSE	AS-Level	A-Level	NSC/IEB	HIGCSE	AS-Level	A-Level	NSC/IEB	HIGCSE	AS-Level	A-Level	
5	3	C	C	5	3	C	C	5	3	C	C	35

Additional requirements

- Candidates are not allowed to complete their first year of study at another university.
- In terms of the selection procedure, candidates must pass English, Mathematics and Physical Science with at least a 5 rating code (60%- 69%), and achieve an APS of at least 35, in order to be considered for selection and/or admission.

(c) At the conclusion of the selection process, candidates are informed in writing regarding the outcome.

(d) Admission of foreign students to the BChD degree programme is limited to one annually. Only applications of candidates from SADC countries are accepted.

(e) School-leaving candidates with no previous tertiary exposure, who have not been admitted to the first year of study for the BChD degree programme may register for the BSc degree programme in medical sciences or biological sciences at the University, provided that they comply with the admission requirements for the programme in question. A candidate who completes the first semester of such a degree programme successfully, may apply to be considered for admission to the second semester of BChD I on the grounds of this achievement. If successful, the student may be admitted to the second semester of BChD I.

Other programme-specific information

Note:

- (i) A new curriculum is being phased in for the programme. The first year of study will be followed for the first time in 2014, the second year in 2015, the third year in 2016, the fourth year in 2017 and the fifth year in 2018.
- (ii) The total credits and regulations for the degree programme in this publication are applicable to the new curriculum being phased in.
- (iii) In 2016 the fourth and fifth year of study will still be followed according to the old curriculum.
- (iv) Students who fail a year in the existing curriculum immediately prior to the year of the implementation of the revised curriculum will have to repeat all the modules for that particular year in the revised curriculum.
- (v) The total credits and regulations for the old curriculum appear in the 2013 Yearbook and are applicable for students who registered for the BChD degree programme prior to 2014.

- Apart from the examination modules mentioned above, the following compulsory **academic information management module** must also be passed during the first semester of the first year of study: **AIM 101**.
- All new first-year students at the University must write an **academic literacy test**. On the grounds of the outcome of this test, students will either be exempted from the following **academic literacy modules**, or if they have failed the test mentioned above, will be required to pass in the relevant modules: ELH 111 and 112
- The first semester of the year module PHY 181 is the same as PHY 131.
- Students are exempted from the language module(s) on the basis of the successful completion of a language proficiency test at the beginning of the year.

Requirements for admission to specific modules

A student who has:

- a. obtained at least 50% in the final Grade 12 examination in Mathematics as well as in Physical Science, will be admitted to Molecular and cell biology (MLB 111), and a module in the subjects Chemistry, Physics, Zoology and Entomology, Genetics, Microbiology or Botany;
- b. obtained at least 50% in the final Grade 12 examination in Mathematics as well as in Physical Science, will be admitted to a module in Radiation Physics (RFI);
- c. obtained at least 50% in the final Grade 12 examination in either Physical Science or Life Sciences, will be admitted to modules in Occupational Therapy and Therapeutic Media;
- d. obtained at least 60% in the final Grade 12 examination in Mathematics, will be admitted to the module WTW 158 in Mathematics; and
- e. obtained at least 50% in the final Grade 12 examination in Mathematics, will be admitted to the module WTW 134 in Mathematics.

Examinations and pass requirements

Passing a module

A **module mark** is calculated from the continuous evaluation opportunities during the course of the presentation of the module in question. These evaluations shall include one or more of the following:

- (i) Evaluations regarding theoretical knowledge.
- (ii) Evaluations regarding clinical knowledge and skills.
- (iii) Compulsory attendance at and active participation in prescribed activities.
- (iv) A final comprehensive module examination moderated by external examiners.

Repeating modules (and thus the year of study)

- (i) Students must pass all the modules of a particular year of study in order to be admitted to the next year of study.
- (ii) Students who repeat the first or second year of study are exempted from the modules which have been passed in the unsuccessful year. The examination moderating meeting, in conjunction with the Dean/Chairperson of the School of Dentistry, retains the right to only award a pass mark in the said modules, if the student complies with the following requirements regarding those modules:
 - That the mark awarded to the relevant module was not awarded on the grounds of condonement;
 - That the student attended the relevant module regularly and furthermore complied with all other requirements.
 - That the contents of the module in the ensuing year correspond with the contents of the module concerned.

Examinations and pass requirements, subminima and continuous evaluation mark

- (i) In accordance with the stipulations of the General Regulations, no minimum year or semester mark is required for admission to the examination: Provided that the different year and semester modules in a School need not be handled in the same manner, although a great degree of uniformity is expedient. Any other requirements for admission to the examination are set out in the study manuals. A final mark of at least 50% is required to pass (see also Reg. D.1(b) (i)).

(ii) Subminimum

A subminimum of 40% is required in the written section of an examination, with a subminimum of 50% in the clinical section of a module. At the beginning of the academic year, the head of department informs the students of the required subminimum in subsections of the modules offered by the department in question. This information is also published in the study manual.

(iii) Continuous evaluation mark

A student obtains marks for practical and clinical work, for tests and also for assignments completed during the course of an academic year.

A student who repeats a year of study and who must acquire certificates of satisfactory preparation in failed modules, must comply with all the requirements set by the head of department.

(iii) Supplementary examinations in the fourth year of study

A student who obtains between 40-49% in examination and promotion modules, is admitted to supplementary examinations. Should he or she fail this supplementary examination/promotion test, the fourth year has to be repeated. When a year of study has to be repeated, the student retains credit for the examination modules

passed. Consult Reg. D.1 (e) regarding the certificate of satisfactory preparation and progress, which must be obtained in the year of repetition in all promotion modules already passed, as well as the extent of involvement of students regarding promotion modules already passed, in order to maintain a specific level of clinical skills.

(iv) Examinations in the fifth year of study

A student who has failed the clinical part of any module in the final examination, will be required to repeat that module. The period which must elapse before the student may again sit an examination, is determined by the Dean, on the recommendation of the examination moderating committee. A student who repeats a module, must obtain certificates of satisfactory preparation in all the other modules that he/she has passed.

Promotion to next study year

Promotion to the next year of study

The stipulations of the General Regulations concerning satisfactory preparation and progress also apply to modules where a promotion test is required. Supplementary examination marks and pass marks in promotion modules are awarded according to the stipulations of the General Regulations: Provided that:

- i. Promotion is based on theoretical and/or practical and/or clinical evaluation throughout the year and a minimum of 50% is required to be promoted.
- ii. A student, who has obtained a year mark of less than 50% can be admitted by the examination moderating meeting to a supplementary promotion test in the relevant promotion module.
- iii. Students repeating a year of study retain credit for examination modules passed, unless determined otherwise, but a certificate of satisfactory preparation and progress must be obtained in all the promotion modules.
- iv. In order to comply with the requirements for (iii) and to maintain a specified level of clinical skills, the extent of involvement of students in successfully completed promotion modules is determined by the relevant module chairperson, at the commencement of the year, and agreed with the student(s) concerned.

Failed candidates/Admission to the second semester of BChD I

- i. (aa) Selected first-year students, who have passed a sufficient number of prescribed first-semester modules at 100 level will, in accordance with the stipulations of the General Regulations, automatically be admitted to the second semester of the first year of study. During the second semester, the students will be admitted to an examination on an anti-semester basis in the first-semester module(s) still outstanding, if this can be accommodated in the timetable.
- ii. (bb) In the School of Dentistry, a student may not repeat more semester modules than the equivalent of eight lectures per week on an anti-semester basis in the second semester.
- iii. **Admission to the next year of study**
- iv. A student must pass all the modules of the relevant year of study for admission to the next year of study.

Admission to the second year of study

A student must pass all the modules of the first year of study for admission to the second year of study.

Failed candidates

A student, who has failed a year of study for the second time before completing BChD II, is excluded from the programme and will again be subjected to selection with a view to readmission to the second year of

study. Also consult Reg. D.1 (c) concerning students who fail some modules of a year (and therefore the year of study).

Admission to the third year of study

A student must pass all the modules of the second year of study for admission to the third year of study.

Admission to the fourth year of study

A student must pass all the modules of the third year of study for admission to the fourth year of study.

Admission to fifth year of study

A student must pass all the modules of the fourth year of study for admission to the fifth year of study.

Academic exclusion from further study

- i. A student following a BChD degree will only be allowed two opportunities to repeat a year of study.
- ii. A student who does not comply with the abovementioned requirement but nevertheless wishes to be admitted to the School, may request the Dean/Chairperson of the School in writing, to consider his or her application for readmission in accordance with the prescribed procedure.
- iii. If a student fails one or more first-year modules (and therefore is not admitted to the second year of study), such a student forfeits his or her selection and must apply again for selection with a view to admission to the first year of study.
- iv. A student, who has failed a year of study for the second time before completing BChD II is excluded from the programme and must apply again for selection with a view to readmission to the second year of study.

Pass with distinction

The degree is conferred with distinction on a student who has obtained at least 65% in all the examination modules of the final year of study, with an average of at least 75% for all the modules.

BCMP Clinical Medical Practice (10130011)

Duration of study 3 years

Contact Dr JM Louw murray.louw@up.ac.za +27 (0)123563309

Programme information

The integrated outcomes-based, problem-oriented degree programme consists of theoretical modules and clinical rotations.

Admission requirements

- In order to register, NSC/IEB/Cambridge candidates must comply with the minimum requirements for degree studies and with the minimum requirements for the relevant study programme.
- Life Orientation is excluded in the calculation of the APS.
- Grade 11 results will be used for the conditional admission of prospective students.
- The Grade 12 score must not drop by more than 2 points for the provisional place to be retained. Admission to Health Sciences study programmes is subject to a selection process.
- The applications of international candidates who come from countries that have medical schools will not be considered for placement in the MBChB study programme.

Minimum requirements for 2016							
Achievement Level							APS
English				Mathematics			
NSC/IEB	HIGCSE	AS-Level	A-Level	NSC/IEB	HIGCSE	AS-Level	

4	3	D	D	4	3	D	D	25
---	---	---	---	---	---	---	---	----

Additional requirements

Also consult the General Regulations.

- Each student must apply to the Registrar of the Health Professions Council of South Africa for registration as a clinical associate, immediately after admission to the first year of study.
- After obtaining the degree, graduates must also register as clinical associates with the Health Professions Council of South Africa.

Other programme-specific information

Please note: **Third year of study**

- Attendance and continuous assessments for some modules will be either 1st semester or 2nd semester depending on rotation arrangements.
- Marks obtained in the clinical rotations are taken into account when calculating the relevant module marks.

Examinations and pass requirements

Examinations and pass requirements

(i) In accordance with the stipulations of the General Regulations, no minimum year or semester mark is required for admission to the examination. Adequate attendance at (more than 90%) and active participation in prescribed clinical activities as recorded in the clinical logbook are required for admission to the examination.

(ii) A **final module mark** in the relevant module is, however, calculated from the module examination mark **as well as** the module mark compiled from **continuous evaluation** during the presentation of the module (i.e. the semester, year or module mark). The latter is calculated from the marks obtained in one or more of the undermentioned:

- Evaluations of theoretical knowledge.
- Evaluations of clinical knowledge and skills.
- Compulsory attendance at and participation in prescribed activities.
- Compulsory attendance at all academic support activities for the first two years of study.

(iii) The contribution of each modality in the calculation of the abovementioned mark is set out in the regulations and published in the study guides. The details are explained to the students concerned before commencement of the modules. Likewise, the weight (50:50) allocated to the abovementioned marks and the various examination marks when calculating the final module mark awarded to the student. The importance of continuous evaluation in the assessment of students is non-negotiable, and therefore the marks awarded in this type of evaluations will form part of the final pass mark of all modules.

A student repeating the first or second year of study will retain credit for Clinical Medical Practice modules passed previously, subject to the following:

- The student will be required to participate adequately in the current year in the clinical component of all

Clinical Medical Practice modules in order to maintain a specified level of clinical skills and be required to record such activities in an appropriate clinical logbook.

- b. Compliance with (a) is a requirement for the admission to subsequent CMP modules.
- c. In order to comply with the requirements for (a), the extent of involvement of students in successfully completed modules is determined by the relevant course coordinator, at the commencement of the year, and agreed with the student(s) concerned.

Passing a module in the BClinical Medical Practice degree programme

- (i) A **module mark** is calculated from the continuous evaluation opportunities during the course of the presentation of the module in question. These evaluations shall include one or more of the following:
 - (aa) Evaluations regarding theoretical knowledge.
 - (bb) Evaluations regarding clinical knowledge and skills.
 - (cc) Compulsory attendance at and active participation in prescribed activities.
 - (dd) Compulsory attendance at all academic support activities for the first two years of study.
- (ii) Students may exercise the option to have the module mark at the **end of the year** validated as the **final module mark** for the module in question (i.e. they are exempted from the module examination for this module), provided that they comply with the following requirements:
 - (aa) The abovementioned module mark is more than 60% in all the different module assessments (with the exception of the Anatomy module that is more than 65%).
 - (bb) Proven attendance at all applicable module-specific activities, namely:
 - All tests/continuous evaluations.
 - All practicals and morning ward-round activities.
 - All relevant skills laboratory activities.
 - All relevant community-based education activities.
 - All clinical rotations.
 - (cc) A pass mark in the clinical rotation test.
 - (dd) Attendance at the module in question from day 1.
 - (ee) No conviction by the Faculty Preliminary Disciplinary Committee (Student offences) of any form of dishonesty or fraud.
- (iii) A **module examination** is granted to all registered students regardless of the module mark, subject to adequate attendance at and active participation in prescribed clinical activities as set out in the relevant study guide.
- (iv) The **final module mark** is calculated from the module examination mark and the module mark (continuous evaluation) in a 50:50 ratio, depending on the year of study and/or module-specific regulations. The formula according to which the final module mark is calculated will be set out in the study guide and communicated to students at the commencement of the programme.
- (v) In order to pass in a module, a subminimum of 40% is required in the written section of the module examination. In order to pass in a module in which a clinical component is included, a subminimum of 50% in the clinical component of the module examination is also required.
- (vi) A **second examination** in a module will be granted to all students who fail the module in question.
- (vii) As a rule, the **second examination** in question will take place in November/ December of the same year,

or in January of the following year. A minimum of 50% is required in order to pass in the second examination.

(viii) An **aegrotat or extraordinary examination** granted to a student who could not participate in the module examination due to illness or other acceptable reasons, will take place during the second examination period. Students must apply formally for such an examination, and admission to the examination is approved by the Chairperson of the School or his/her authorised representative. Where applicable, the Chairperson of the School may first require a recommendation from the Faculty Health Committee before approving an application for admission to an aegrotat.

All modalities of a final examination must be completed jointly as an aegrotat or an extraordinary examination, even if part of it has already been completed as part of the examination sat in the previous examination period. The **final module mark** is calculated from the marks of all the divisions/modalities of the aegrotat or extraordinary examination and the module mark in question (continuous evaluation mark). The same criteria set for a final mark in a module, are applicable in this case.

Note: No special **dates** will be arranged for an aegrotat/extraordinary examination. These examinations will only take place on the scheduled dates for regular first/second examinations.

(ix) Aegrotat/extraordinary **tests** are not allowed for the BClinical Medical Practice degree programme. However, students who have acceptable reasons for being absent from no more than one test will have a module mark calculated from the other continuous assessment opportunities. Students who have acceptable reasons for being absent from more than one test will, of course, have no module mark, and a pass in the module(s) will depend totally upon the module examination mark.

Academic exclusion from further study

(i) In accordance with the stipulations of the General Regulations, re-registration of a student is permitted only if the student completes the degree programme for which he or she is registered within the prescribed minimum period of study plus two years.

(ii) In the case of the BClinical Medical Practice degree offered by the School of Medicine, a student who fails a year of study for a second time must apply, in writing, to the Readmission Committee of the School, chaired by the chairperson of the School, for readmission to the programme.

(iii) The committee in question will take all factors into consideration and its decision and conditions will be final.

Promotion to next study year

i. Failed candidates/Admission to the second semester of the first year of study

Selected first-year students, who have passed in sufficient prescribed first-semester modules at 100 level will, in accordance with the stipulations of the General Regulations, automatically be admitted to the second semester of the first year of study.

ii Failed candidates/Admission to the second year of study

(aa) First-year students who have passed all prescribed core modules at 100 level will, in accordance with the stipulations of the General Regulations, automatically be admitted to the second year of study.

(bb) A student who has failed any one or more of the 100-level core modules will have to repeat those modules failed before he/she will be admitted to the second year of study.

(cc) Also consult Faculty regulations in respect of a student for the BClinical Medical Practice degree, who fails a year of study for a second time.

iii Failed candidates/Admission to the second semester of the second year of study

Second-year students who have passed in sufficient prescribed first-semester modules at 200 level will, in accordance with the stipulations of the General Regulations, automatically be admitted to the second semester of the second year of study.

iv Failed candidates/Admission to the third year of study

(aa) Second-year students who have passed in all prescribed first- and second-semester modules at 200 level will, in accordance with the stipulations of the General Regulations, automatically be admitted to the third year of study.

(bb) A student who has failed any one or more of the 200-level modules, will have to repeat those module(s) failed before he/she will be admitted to the third year of study.

(cc) Also consult Faculty regulations in respect of a student for the BClinical Medical Practice degree, who fails a year of study for a second time.

vi Failed candidates/Academic exclusion from further study

Consult Faculty regulations in respect of a student who does not complete the degree programme within the prescribed minimum period of study plus two years.

Pass with distinction

The degree is conferred with distinction on a student who has obtained an average of at least 75% in the clinical modules of the second and third years of study.

BCur Nursing Science (10131011)

Duration of study 4 years

Contact Prof FM Mulaudzi mavis.mulaudzi@up.ac.za +27 (0)123541908

Programme information

The Bachelor of Nursing Science [BCur] degree is a four-year, professional, career-oriented whole qualification that allows graduates to register with the South African Nursing Council (SANC) as:

- Nurse (General, Psychiatric and Community); and
- Midwife/Accoucheur

Successful completion of the degree programme will present graduates with the opportunity to further their studies in Nursing Science at postgraduate level.

Please note:

- Candidates who comply with the necessary admission requirements will follow the prescribed curriculum.
- The compulsory **practical and clinical hours of training** amount to a grand total of at least 4 000 hours over a four-year period
- Due to the compulsory practical and clinical training component as well as professional development, the curriculum cannot be completed in less than four years.
- The training institutions in question will grant vacation and sick leave according to the applicable requirements of the South African Nursing Council (SANC).

Also consult the General Regulations.

Conferment of the degree

The Bachelor of Nursing Science [BCur] is conferred on students who have fulfilled all the programme requirements as well as the prescribed practical and clinical training successfully.

Successful completion of the degree entitles the graduate to register with the South African Nursing Council as Nurse (General, Psychiatric and Community) and as Midwife/Accoucheur.

Admission requirements

- In order to register NSC/IEB/Cambridge candidates must comply with the minimum requirements for degree studies and with the minimum requirements for the relevant study programme.
- Life Orientation is excluded in the calculation of the APS.
- Grade 11 results will be used for the conditional admission of prospective students.
- Admission to Health Sciences study programmes is subject to a selection process.
- For selection purposes the sum of the results in six subjects including English is calculated.
- Mathematics Physical Science and Life Sciences are recommended subjects and might be useful during the study period and selection. These subjects are not compulsory.

Selection is based on academic merit the NBT the Value-added Questionnaire and an interview.

Other programme-specific information

1. Students who have to repeat specific modules, must also acquire a certificate of satisfactory attendance and progress in Nursing Practice Education (both modules of the year in question) in the year of repetition, even if the modules in question have already been passed in the unsuccessful year.
2. Examinations are compulsory in respect of all the modules presented by the Department of Nursing Science, as it is not possible to be promoted in any of these modules.
3. Each division of (NPE 461) Nursing practice education 461 must be passed individually with a subminimum of 50%.

Examinations and pass requirements

Exemption from the examination in (ANP) Anatomical Pathology 210

Exemption from the examination may be granted if a student who obtained a module mark of at least 60%, exercises the option to accept it as the final mark.

Academic exclusion from further study

- a. In accordance with the stipulations of the General Regulations, a student must complete the degree programme for which he or she is registered within the prescribed minimum period of study plus two years.
- b. Subject to the stipulations mentioned in a. above, a student in the School of Health Sciences, who fails a year of study for the second time, will only be allowed one opportunity to repeat a year of study, and will have to

submit a written application for readmission to the programme in accordance with the prescribed procedure.

Passing modules in Anatomy and Physiology

- i. A **module mark** is calculated from the continuous evaluation opportunities during the course of the presentation of the relevant module. These evaluations will include one or more of the following:
 - a. Evaluations in connection with theoretical knowledge.
 - b. Evaluations in connection with practical knowledge and skills.
 - c. Compulsory attendance at and active participation in prescribed activities.
 - d. A final comprehensive module test.
- ii. Students may exercise the option that the module mark at the end of the semester be ratified as the final module mark for the relevant module (i.e. they are exempted from the module examination for this module), if they comply with the following requirements:
 - a. The abovementioned module mark is more than 65%.
 - b. Proven attendance of all applicable module-specific activities, namely:
 - All tests/continuous evaluations.
 - All practical work and skills development sessions.
 - c. Attendance of the relevant module from Day 1.
 - d. No convictions by the School's Preliminary Disciplinary Committee (Student Transgressions) of any form of transgression.
- iii. A **module examination** is granted to all registered students (even if the module mark is more than 65%).
- iv. The **final module mark** is calculated from the examination mark and the module mark (continuous evaluation) in the ratio 50:50.
- v. A **second module examination** is granted to all students who have obtained a final module mark of 40% to 49%. Students who have obtained a module mark of less than 40%, fail the module and will have to repeat the year of study.
- vi. The relevant **second examination** will take place in November/December of the current year or in January of the subsequent year. A minimum of 50% is required to pass in the second examination.
- vii. **Aegrotats or extraordinary examinations**, for students who could not sit the module examination due to health or other acceptable reasons, will take place during the second examination period. Students must apply formally for these examinations, and will be admitted by the Chairperson of the School or his/her authorised person. Where applicable, the Chairperson of the School may first require the recommendation of the Faculty Health Committee before admission to an aegrotat.

All modalities of a final examination must be written jointly as an aegrotat or extraordinary examination, even if part of the relevant examination had already been written during the previous examination period.

The **final module mark** is calculated from the marks of all the sections/ modalities of the aegrotat or extraordinary examination and the continuous evaluation mark. The same criteria as set for a pass mark in a module are applicable here. Students who could not sit the module examination in the examination period due to acceptable reasons, and who are consequently writing the module examination in the second examination period, forfeit the opportunity to be admitted to a further second examination.

Exemption from the examination in (FAR) Pharmacology 381, 382

Exemption from the examination can be granted if a student who obtained a module mark of at least 60%, exercises the option to accept it as the final mark.

- In accordance with the stipulations of the General Regulations, no minimum year or semester mark is needed for admission to the examination, and all registered students are admitted to the examination automatically.
- The final mark for a specific module in Nursing Science, Physiotherapy, Radiography, Occupational Therapy and Human Nutrition (at least 50% is required to pass) is calculated from the examination mark as well as the mark compiled from the evaluation of a student during continuous, objective and controlled assessment opportunities during the course of the quarter/semester/year. At least one formal assessment per module is set as the minimum norm, and students will be exposed on a continuous and regular basis to self-directed assignments in order to promote reflective learning.
- In the case of modules with practical components, students are required to also comply with the applicable attendance requirements with regard to acquiring practical skills before a pass mark can be obtained for the module.
- There are two main examination opportunities per annum, the first and second examination. In respect of first-semester modules, the first examination opportunity is in May/June and the second examination opportunity in July. In respect of second-semester modules, the first examination opportunity is in October/ November and the second examination opportunity in November/December of the same year. Where students need to work additional clinical hours to be allowed to do a second examination, the Head of Department will determine the second examination opportunity.
- Only two examination opportunities per module are allowed. If a student fails a module at the second examination opportunity, the module must be repeated.
- A second examination opportunity in a module is granted to students in the following cases:
 - If a student obtains a final mark of less than 50% in the relevant module at the first examination opportunity and thus fails.
 - If a student does not obtain the subminimum in the examination, as required for a specific module.
 - If a student does not sit the examination in a module at the first examination opportunity due to illness or extraordinary circumstances.
- Students intending to sit the second examination due to the reasons mentioned above, must register for the second examination opportunity 24 hours after the results have been made public.
- If a student fails a module at the first examination opportunity, the examination mark obtained in the relevant module at the second examination opportunity will be calculated as the final mark. The marks obtained with continuous evaluation during the course of the quarter/semester/year will not be taken into calculation. If the student passes the module at the second examination opportunity, a maximum of 50% is awarded as a pass mark to the module in question.
- If a student could not sit the examination in a module at the first examination opportunity due to illness or extraordinary circumstances, the continuous evaluation mark, together with the examination mark obtained in the module in question at the second examination opportunity, will be calculated as the final mark obtained in the module.
- The School of Healthcare Sciences applies the General Regulations, according to which a student requiring a limited number of modules to complete his or her degree, may in terms of faculty regulations, be admitted to a special examination in the modules in question.

Promotion to next study year

- A student must pass in all the prescribed core modules of a specific year of study to be promoted to a subsequent year of study. A student can only be promoted to a subsequent year of study if the student has not

failed more than two fundamental modules of seven weeks each per semester or one module of 14 weeks per semester. A non-negotiable prerequisite for admission to the final year of study is pass marks in all the core and fundamental modules of the preceding years of study. Refer to the programmes for fundamental modules in each discipline.

- A pass mark refers to a final mark of at least 50%.
- Modules with practical and clinical training credits cannot be passed unless all the prescribed clinical hours and practical activities have been completed to the satisfaction of the head of department.
- The Chairperson of the examination moderating meeting may, after assessing the student's total profile, grant special approval to be promoted to the next year of study.
- The exception is the Department of Human Nutrition, where the regulations as applicable in the Faculty of Natural and Agricultural Sciences regarding the modules presented by that Faculty, are relevant.
- Modules can only be taken in advance or repeated if it can be accommodated in the existing examination timetable.
- A student who must repeat a year of study may, with the approval of the Chairperson of the examination moderating meeting and the head of department concerned, be allowed to take fundamental modules of the subsequent year, if he/she complies with all the prerequisites for the relevant modules. No adjustment to existing timetables will be allowed.

The following fundamental modules are relevant:

- Department of Nursing Science: SLK 110, 120; FSG 251, 252
- Department of Physiotherapy: SOH 254; FSG 251, 252, 261, 262; SLK 210, ANP 210; GMB 252, 253, 254; FAR 381, 382
- Department of Occupational Therapy: ZUL 110; SEP 110; SLK 210, 220; FSG 251, 252, 261, 262; ANP 210; RPD 481, GNK 286
- Department of Human Nutrition: FLG 211, 212, 221, 222; BCM 251, 252, 261, 262; FAR 381, 382, VDS 322; VDB 321
- Department of Radiography: FSG 251, 252, 262; GNK 286; ANP 210.

Practical/clinical/internship information

- (i) The curriculum includes compulsory practical and clinical training modules, comprising a percentage of the total credits required for the successful completion of the programme.
- (ii) Students will be registered as student nurses at an approved teaching hospital (or hospitals) for the duration of their studies.
- (iii) Students will be required to visit clinics outside of the hospital as well as institutions where health services are provided.
- (iv) Clinical training will take place for the duration of studies at the facilities mentioned above.
- (v) Students will be required to sign a contract of service with the approved teaching hospital (or hospitals) in question – information will be made available after successful application for admission.

Certain hospitals and healthcare facilities have been approved for the purposes of practical and clinical training in Fundamental Nursing Science, General Nursing Science, Psychiatric Nursing Science, Community Nursing Science and Midwifery.

Pass with distinction

The BCur degree is conferred with distinction on a student who has obtained:

- (i) At least 75% in each of NPE 461, NPE 462 and NUR 456.

(ii) A joint average of at least 75% in NUR 451 and NUR 452.

(iii) A joint average of at least 75% in DNP 451 and DNP 452

Curriculum: Year 1

BCur Nursing Science (Education and Administration) (10131081)

Duration of study 3 years

Contact Prof FM Mulaudzi mavis.mulaudzi@up.ac.za +27 (0)123541908

Programme information

The Bachelor of Nursing Science (Education and Administration) [BCur(I et A)] provides professional nurses registered with the South African Nursing Council (SANC), with the opportunity of obtaining post-basic, professional qualifications in any of the following areas of specialisation (major speciality):

- i. Nursing Management
- ii. Nursing Education
- iii. Community Nursing Science
- iv. Clinical Nursing Science, with a selected subspeciality in the second year of study, namely:

- Advanced Midwifery and Neonatal Nursing Science
- Neonatal Nursing Science
- Child Nursing Science
- Medical and Surgical Nursing Science: Critical Care Nursing: General
- Medical and Surgical Nursing Science: Critical Care Nursing:
- Paediatric
- Medical and Surgical Nursing Science: Critical Care Nursing: Trauma and Emergency Nursing
- Medical and Surgical Nursing Science: Operating Theatre Nursing
- Clinical Nursing Science, Health Assessment, Treatment and Care.

Successful completion of the degree programme will also provide graduates with the opportunity to further their studies, in their chosen fields of specialisation at postgraduate level, provided there are sufficient applications.

Candidates who comply with the admission requirements must compile a suitable curriculum in the selected area of specialisation, in consultation with the head of department.

The curriculum mentioned in iii above, must be reviewed on an annual basis in consultation with the head of department.

Conferment of the degree

The Bachelor of Nursing Science (Education and Administration) [BCur(I et A)] is conferred on students who comply with all the requirements for the degree programme and who have completed all required practical and/or clinical training.

The degree certificate will be endorsed with the specific area of specialisation (and the relevant subspeciality, in the case of Clinical Nursing).

Note: Also consult the General Regulations.

Admission requirements

Registration as a nurse with two years' experience

Please note that Grade 12 learners cannot apply for these study programmes.

Additional requirements

Proof of registration with the South African Nursing Council as a General Nurse.

- i. Candidates who intend following Community Nursing Science must also be registered with the South African Nursing Council as Midwife/Accoucheur.
- ii. At least two years of appropriate experience in the workplace as registered nurse (excluding other nursing-related coursework) for Nursing Management and Nursing Education.

Additional admission requirements for Clinical Nursing Science

- i. At least one year of appropriate experience in the workplace, relevant to the area of specialisation and approved by the head of department; excluding other nursing-related coursework.
- ii. Students must have access, at least on a part-time basis, to clinical training facilities which are suitable for the proposed area of specialisation and approved by the head of department.
- iii. With the exception of the subspecialities Critical Care Nursing – General; Trauma and Emergency Nursing and Operating Theatre Nursing, students must also be registered with the South African Nursing Council as Midwife/Accoucheur.

Other programme-specific information

A minimum of 360 credits is required, subject to:

- i. The successful completion, at 100, 200 and 300 level, of two approved major subjects (core modules) within a given area of specialisation.
- ii. Successful completion of all prescribed fundamental modules.
- iii. Satisfactory performance and successful completion of the required practical work and/or clinical training specified for the field of specialisation in question.
- iv. Successful completion of an approved curriculum (degree programme) compiled of modules equivalent to ten year modules.

Transitional measures

Students will be exempted from corresponding modules passed in the preceding seven (7) years.

Examinations and pass requirements

Academic exclusion from further study

- a. In accordance with the stipulations of the General Regulations, a student must complete the degree programme for which he or she is registered within the prescribed minimum period of study plus two years.
 - b. Subject to the stipulations mentioned in a. above, a student in the School of Health Sciences, who fails a year of study for the second time, will only be allowed one opportunity to repeat a year of study, and will have to submit a written application for readmission to the programme in accordance with the prescribed procedure.
- In accordance with the stipulations of the General Regulations, no minimum year or semester mark is needed for admission to the examination, and all registered students are admitted to the examination automatically.
 - The final mark for a specific module in Nursing Science, Physiotherapy, Radiography, Occupational Therapy and Human Nutrition (at least 50% is required to pass) is calculated from the examination mark as well as the mark compiled from the evaluation of a student during continuous, objective and controlled assessment opportunities during the course of the quarter/semester/year. At least one formal assessment per module is set as the minimum norm, and students will be exposed on a continuous and regular basis to self-directed assignments in order to promote reflective learning.
 - In the case of modules with practical components, students are required to also comply with the applicable attendance requirements with regard to acquiring practical skills before a pass mark can be obtained for the module.
 - There are two main examination opportunities per annum, the first and second examination. In respect of first-semester modules, the first examination opportunity is in May/June and the second examination opportunity in July. In respect of second-semester modules, the first examination opportunity is in October/ November and the

second examination opportunity in November/December of the same year. Where students need to work additional clinical hours to be allowed to do a second examination, the Head of Department will determine the second examination opportunity.

- Only two examination opportunities per module are allowed. If a student fails a module at the second examination opportunity, the module must be repeated.
- A second examination opportunity in a module is granted to students in the following cases:
 - If a student obtains a final mark of less than 50% in the relevant module at the first examination opportunity and thus fails.
 - If a student does not obtain the subminimum in the examination, as required for a specific module.
 - If a student does not sit the examination in a module at the first examination opportunity due to illness or extraordinary circumstances.
- Students intending to sit the second examination due to the reasons mentioned above, must register for the second examination opportunity 24 hours after the results have been made public.
- If a student fails a module at the first examination opportunity, the examination mark obtained in the relevant module at the second examination opportunity will be calculated as the final mark. The marks obtained with continuous evaluation during the course of the quarter/semester/year will not be taken into calculation. If the student passes the module at the second examination opportunity, a maximum of 50% is awarded as a pass mark to the module in question.
- If a student could not sit the examination in a module at the first examination opportunity due to illness or extraordinary circumstances, the continuous evaluation mark, together with the examination mark obtained in the module in question at the second examination opportunity, will be calculated as the final mark obtained in the module.
- The School of Healthcare Sciences applies the General Regulations, according to which a student requiring a limited number of modules to complete his or her degree, may in terms of faculty regulations, be admitted to a special examination in the modules in question.

Promotion to next study year

- A student must pass in all the prescribed core modules of a specific year of study to be promoted to a subsequent year of study. A student can only be promoted to a subsequent year of study if the student has not failed more than two fundamental modules of seven weeks each per semester or one module of 14 weeks per semester. A non-negotiable prerequisite for admission to the final year of study is pass marks in all the core and fundamental modules of the preceding years of study. Refer to the programmes for fundamental modules in each discipline.
- A pass mark refers to a final mark of at least 50%.
- Modules with practical and clinical training credits cannot be passed unless all the prescribed clinical hours and practical activities have been completed to the satisfaction of the head of department.
- The Chairperson of the examination moderating meeting may, after assessing the student's total profile, grant special approval to be promoted to the next year of study.
- The exception is the Department of Human Nutrition, where the regulations as applicable in the Faculty of Natural and Agricultural Sciences regarding the modules presented by that Faculty, are relevant.
- Modules can only be taken in advance or repeated if it can be accommodated in the existing examination timetable.
- A student who must repeat a year of study may, with the approval of the Chairperson of the examination moderating meeting and the head of department concerned, be allowed to take fundamental modules of the

subsequent year, if he/she complies with all the prerequisites for the relevant modules. No adjustment to existing timetables will be allowed.

The following fundamental modules are relevant:

- Department of Nursing Science: SLK 110, 120; FSG 251,252
- Department of Physiotherapy: SOH 254; FSG 251, 252, 261, 262; SLK 210, ANP 210; GMB 252, 253, 254; FAR 381, 382
- Department of Occupational Therapy: ZUL 110; SEP 110; SLK 210, 220; FSG 251, 252, 261, 262; ANP 210; RPD 481, GNK 286
- Department of Human Nutrition: FLG 211, 212, 221, 222; BCM 251, 252, 261, 262; FAR 381, 382, VDS 322; VDB 321
- Department of Radiography: FSG 251, 252, 262; GNK 286; ANP 210.

Practical/clinical/internship information

Certain hospitals and healthcare facilities have been approved for the purposes of practical and/or clinical training. Students will be required to complete their practical work and/or clinical training at these facilities.

Pass with distinction

The degree is conferred with distinction on a student who has obtained an average of at least 75% in the required 300-level modules.

General information

Faculty certificates

- i. Students who exit from the programme before completing the degree, and who fulfil all the requirements for registration of an additional qualification with the SANC, will be issued with an applicable Faculty Certificate.
- ii. Listing or registration with the SANC can be obtained in the following areas of specialisation, depending on the specific modules passed:
 - a. Listing: Handling of Medicine in Nursing and the Physical Evaluation of Patients
 - b. Registration:
 - Nursing Administration
 - Nursing Education
 - Community Nursing Science
 - Advanced Midwifery and Neonatal Nursing Science
 - Neonatal Nursing Science
 - Child Nursing Science
 - Medical and Surgical Nursing Science: Critical Care Nursing – General
 - Medical and Surgical Nursing Science: Critical Care Nursing – Paediatric
 - Medical and Surgical Nursing Science: Critical Care Nursing – Trauma and Emergency Nursing
 - Medical and Surgical Nursing Science: Operating Theatre Nursing
 - Clinical Nursing Science, Health Assessment, Treatment and Care

BDietetics Dietetics (10139001)

Duration of study 4 years

Contact Prof FAM Wenhold friede.wenhold@up.ac.za +27 (0)123543200

Programme information

The programme extends over four academic years during which period a student receives practical training as a student dietician at an institution or institutions approved for this purpose by the University.

After admission to the first year of study, each student in Dietetics must register as a student in Dietetics with the Health Professions Council of South Africa.

Students are required to complete at least four weeks applicable elective training (Code DTT 380) under the supervision of a dietician at an institution approved for this purpose by the University, after the first semester of the third year of study and prior to the commencement of the fourth year of study.

Note:

A revised curriculum is being phased in for the programme. The revised first year of study will be followed for the first time in 2015, the second year in 2016, the third year in 2017 and the fourth year in 2018.

Students who enrolled for the BDietetics degree programme prior to 2105 will complete the degree under the old curriculum.

Admission requirements

- In order to register, NSC/IEB/Cambridge candidates must comply with the minimum requirements for degree studies and with the minimum requirements for the relevant study programme.
- Life Orientation is excluded in the calculation of the APS.
- Grade 11 results will be used for the conditional admission of prospective students.
- The Grade 12 score must not drop by more than 2 points for the provisional place to be retained. Admission to Health Sciences study programmes is subject to a selection process.
- The applications of international candidates who come from countries that have medical schools will not be considered for placement in the MBChB study programme.

For selection purposes the sum of the results in six subjects, including English, Mathematics and Physical Science, is calculated.

Minimum requirements for 2016												APS

---	---	---	---	---	---	---	---	---	---	---	---	----

Additional requirements

Also consult General Regulations.

Note:

For students who registered for the BDietetics degree programme prior to 2015, the relevant regulations as they appear in the 2014 Yearbook will apply.

Other programme-specific information

Exemption from the examination in (FAR) Pharmacology 381, 382

Exemption from the examination can be granted if a student who obtained a module mark of at least 60%, exercises the option to accept it as the final mark.

Examinations and pass requirements

- (i) Each paper (Paper 1 and 2) of the written examination for Medical nutrition therapy 323, 411 and 480 (MNX 323, 411, 480) as well as the practical examination for MNX 411 must be passed individually with a subminimum of 40%.
- (ii) Each paper written for the second examination opportunity in Medical nutrition therapy 323, 411 and 480 (MNX 323, 411, 480) as well as the practical examination for MNX 411 (second examination opportunity) must be passed individually with a subminimum of 50%.
- In accordance with the stipulations of the General Regulations, no minimum year or semester mark is needed for admission to the examination, and all registered students are admitted to the examination automatically.
- The final mark for a specific module in Nursing Science, Physiotherapy, Radiography, Occupational Therapy and Human Nutrition (at least 50% is required to pass) is calculated from the examination mark as well as the mark compiled from the evaluation of a student during continuous, objective and controlled assessment opportunities during the course of the quarter/semester/year. At least one formal assessment per module is set as the minimum norm, and students will be exposed on a continuous and regular basis to self-directed assignments in order to promote reflective learning.
- In the case of modules with practical components, students are required to also comply with the applicable attendance requirements with regard to acquiring practical skills before a pass mark can be obtained for the module.
- There are two main examination opportunities per annum, the first and second examination. In respect of first-semester modules, the first examination opportunity is in May/June and the second examination opportunity in July. In respect of second-semester modules, the first examination opportunity is in October/ November and the second examination opportunity in November/December of the same year. Where students need to work additional clinical hours to be allowed to do a second examination, the Head of Department will determine the second examination opportunity.
- Only two examination opportunities per module are allowed. If a student fails a module at the second examination opportunity, the module must be repeated.
- A second examination opportunity in a module is granted to students in the following cases:
 - If a student obtains a final mark of less than 50% in the relevant module at the first examination opportunity and thus fails.

- If a student does not obtain the subminimum in the examination, as required for a specific module.
- If a student does not sit the examination in a module at the first examination opportunity due to illness or extraordinary circumstances.
- Students intending to sit the second examination due to the reasons mentioned above, must register for the second examination opportunity 24 hours after the results have been made public.
- If a student fails a module at the first examination opportunity, the examination mark obtained in the relevant module at the second examination opportunity will be calculated as the final mark. The marks obtained with continuous evaluation during the course of the quarter/semester/year will not be taken into calculation. If the student passes the module at the second examination opportunity, a maximum of 50% is awarded as a pass mark to the module in question.
- If a student could not sit the examination in a module at the first examination opportunity due to illness or extraordinary circumstances, the continuous evaluation mark, together with the examination mark obtained in the module in question at the second examination opportunity, will be calculated as the final mark obtained in the module.
- The School of Healthcare Sciences applies the General Regulations, according to which a student requiring a limited number of modules to complete his or her degree, may in terms of faculty regulations, be admitted to a special examination in the modules in question.

Promotion to next study year

- A student must pass in all the prescribed core modules of a specific year of study to be promoted to a subsequent year of study. A student can only be promoted to a subsequent year of study if the student has not failed more than two fundamental modules of seven weeks each per semester or one module of 14 weeks per semester. A non-negotiable prerequisite for admission to the final year of study is pass marks in all the core and fundamental modules of the preceding years of study. Refer to the programmes for fundamental modules in each discipline.
- A pass mark refers to a final mark of at least 50%.
- Modules with practical and clinical training credits cannot be passed unless all the prescribed clinical hours and practical activities have been completed to the satisfaction of the head of department.
- The Chairperson of the examination moderating meeting may, after assessing the student's total profile, grant special approval to be promoted to the next year of study.
- The exception is the Department of Human Nutrition, where the regulations as applicable in the Faculty of Natural and Agricultural Sciences regarding the modules presented by that Faculty, are relevant.
- Modules can only be taken in advance or repeated if it can be accommodated in the existing examination timetable.
- A student who must repeat a year of study may, with the approval of the Chairperson of the examination moderating meeting and the head of department concerned, be allowed to take fundamental modules of the subsequent year, if he/she complies with all the prerequisites for the relevant modules. No adjustment to existing timetables will be allowed.

The following fundamental modules are relevant:

- Department of Nursing Science: SLK 110, 120; FSG 251,252
- Department of Physiotherapy: SOH 254; FSG 251, 252, 261, 262; SLK 210, ANP 210; GMB 252, 253, 254; FAR 381, 382
- Department of Occupational Therapy: ZUL 110; SEP 110; SLK 210, 220; FSG 251, 252, 261, 262; ANP 210; RPD 481, GNK 286

- Department of Human Nutrition: FLG 211, 212, 221, 222; BCM 251, 252, 261, 262; FAR 381, 382, VDS 322; VDB 321
- Department of Radiography: FSG 251, 252, 262; GNK 286; ANP 210.

Practical/clinical/internship information

Internship training (second semester of the final year of study):

The three compulsory semester modules (CNT 480, MNX 480 and FSS 480) jointly form the internship training and must be taken simultaneously.

Pass with distinction

The degree is conferred with distinction on a student who has obtained at least 75% in the following modules: CNT 411, 480 jointly, as well as MNX 411, 480 jointly, and FSS 480.

Curriculum: Year 1

BOccTher Occupational Therapy (10138001)

Duration of study 4 years

Contact Dr M de Beer u09017372@up.ac.za

Programme information

Students who registered for BOccTher degree programme prior to 2015 will complete the degree according to the relevant regulations as published in the 2014 Yearbook. A revised curriculum as reflected below is being phased in for the programme. The revised first year of study will be followed for the first time in 2015, the second year of study in 2016, the third year of study in 2017 and the fourth year in 2018.

The programme extends over four academic years, during which period a student receives clinical training as a student occupational therapist at an institution approved by the University.

Students must complete at least 1 000 hours' clinical practical work over the four years of study in order to register as an occupational therapist with the Health Professions Council of South Africa.

Students may complete the first three years over four years. In such cases, the choice of modules for the different years is done at the commencement of studies, in conjunction with the head of department.

Admission requirements

- In order to register NSC/IEB/Cambridge candidates must comply with the minimum requirements for degree studies and with the minimum requirements for the relevant study programme.
- Life Orientation is excluded in the calculation of the APS.
- Grade 11 results will be used for the conditional admission of prospective students.
- Admission to Health Sciences study programmes is subject to a selection process.

Additional requirements

Also consult General Regulations.

Note: Each student in Occupational Therapy must apply immediately after admission to the first year of study, to the Registrar of the Health Professions Council of South Africa for registration as a student in Occupational Therapy.

Other programme-specific information

Important: The modules AIM 101 Academic information management and ELH 121 and 122 Academic English for Health Sciences must be completed before registration for the fourth year of study.

Note:

- (i) Consult the Department of Physiology regarding possible prerequisites for the modules in question.
- (ii) Students who enrolled for the BOccTher degree programme prior to 2015, will complete the degree under the old curriculum.
- (iii) Students who fail a year in the existing curriculum will be managed on an individual basis in the Department of Occupational Therapy.
- (iv) The total credits and regulations for the old curriculum appear in the 2014 yearbook and are applicable for these students.

Examinations and pass requirements

Subminimum: In modules with a written as well as a practical and/or clinical examination, a subminimum of 40% is required in the written as well as the practical and/or clinical sections of the examination.

Examination after one semester: A final-year student who has failed one module but who has passed all other modules, may be admitted to a special examination in the module in question at the end of the first semester of the subsequent year, after satisfactory attendance at lectures and clinical work during the first semester.

- In accordance with the stipulations of the General Regulations, no minimum year or semester mark is needed for admission to the examination, and all registered students are admitted to the examination automatically.
- The final mark for a specific module in Nursing Science, Physiotherapy, Radiography, Occupational Therapy and Human Nutrition (at least 50% is required to pass) is calculated from the examination mark as well as the mark compiled from the evaluation of a student during continuous, objective and controlled assessment opportunities during the course of the quarter/semester/year. At least one formal assessment per module is set as the minimum norm, and students will be exposed on a continuous and regular basis to self-directed assignments in order to promote reflective learning.
- In the case of modules with practical components, students are required to also comply with the applicable attendance requirements with regard to acquiring practical skills before a pass mark can be obtained for the module.
- There are two main examination opportunities per annum, the first and second examination. In respect of first-semester modules, the first examination opportunity is in May/June and the second examination opportunity in July. In respect of second-semester modules, the first examination opportunity is in October/ November and the second examination opportunity in November/December of the same year. Where students need to work additional clinical hours to be allowed to do a second examination, the Head of Department will determine the

second examination opportunity.

- Only two examination opportunities per module are allowed. If a student fails a module at the second examination opportunity, the module must be repeated.
- A second examination opportunity in a module is granted to students in the following cases:
 - If a student obtains a final mark of less than 50% in the relevant module at the first examination opportunity and thus fails.
 - If a student does not obtain the subminimum in the examination, as required for a specific module.
 - If a student does not sit the examination in a module at the first examination opportunity due to illness or extraordinary circumstances.
- Students intending to sit the second examination due to the reasons mentioned above, must register for the second examination opportunity 24 hours after the results have been made public.
- If a student fails a module at the first examination opportunity, the examination mark obtained in the relevant module at the second examination opportunity will be calculated as the final mark. The marks obtained with continuous evaluation during the course of the quarter/semester/year will not be taken into calculation. If the student passes the module at the second examination opportunity, a maximum of 50% is awarded as a pass mark to the module in question.
- If a student could not sit the examination in a module at the first examination opportunity due to illness or extraordinary circumstances, the continuous evaluation mark, together with the examination mark obtained in the module in question at the second examination opportunity, will be calculated as the final mark obtained in the module.
- The School of Healthcare Sciences applies the General Regulations, according to which a student requiring a limited number of modules to complete his or her degree, may in terms of faculty regulations, be admitted to a special examination in the modules in question.

Promotion to next study year

Students in the first year of study who do not qualify for admission to the second year of study are automatically subjected to selection again.

- A student must pass in all the prescribed core modules of a specific year of study to be promoted to a subsequent year of study. A student can only be promoted to a subsequent year of study if the student has not failed more than two fundamental modules of seven weeks each per semester or one module of 14 weeks per semester. A non-negotiable prerequisite for admission to the final year of study is pass marks in all the core and fundamental modules of the preceding years of study. Refer to the programmes for fundamental modules in each discipline.
- A pass mark refers to a final mark of at least 50%.
- Modules with practical and clinical training credits cannot be passed unless all the prescribed clinical hours and practical activities have been completed to the satisfaction of the head of department.
- The Chairperson of the examination moderating meeting may, after assessing the student's total profile, grant special approval to be promoted to the next year of study.
- The exception is the Department of Human Nutrition, where the regulations as applicable in the Faculty of Natural and Agricultural Sciences regarding the modules presented by that Faculty, are relevant.
- Modules can only be taken in advance or repeated if it can be accommodated in the existing examination timetable.
- A student who must repeat a year of study may, with the approval of the Chairperson of the examination moderating meeting and the head of department concerned, be allowed to take fundamental modules of the

subsequent year, if he/she complies with all the prerequisites for the relevant modules. No adjustment to existing timetables will be allowed.

The following fundamental modules are relevant:

- Department of Nursing Science: SLK 110, 120; FSG 251,252
- Department of Physiotherapy: SOH 254; FSG 251, 252, 261, 262; SLK 210, ANP 210; GMB 252, 253, 254; FAR 381, 382
- Department of Occupational Therapy: ZUL 110; SEP 110; SLK 210, 220; FSG 251, 252, 261, 262; ANP 210; RPD 481, GNK 286
- Department of Human Nutrition: FLG 211, 212, 221, 222; BCM 251, 252, 261, 262; FAR 381, 382, VDS 322; VDB 321
- Department of Radiography: FSG 251, 252, 262; GNK 286; ANP 210.

Pass with distinction

The BOccTher degree is conferred with distinction on a student who has obtained an average of at least 75% in the core modules in the final year of study.

BOH Oral Hygiene (11130011)

Duration of study 3 years

Contact Prof WD Snyman willie.snyman@up.ac.za +27 (0)123192552

Admission requirements

- In order to register, NSC/IEB/Cambridge candidates must comply with the minimum requirements for degree studies and with the minimum requirements for the relevant study programme.
- Life Orientation is excluded in the calculation of the APS.
- Grade 11 results will be used for the conditional admission of prospective students.

- The Grade 12 score must not drop by more than 2 points for the provisional place to be retained. Admission to Health Sciences study programmes is subject to a selection process.
- The applications of international candidates who come from countries that have medical schools will not be considered for placement in the MBChB study programme.

For selection purposes the sum of the results in six subjects, including English, Mathematics and Physical Science, is calculated.

Minimum requirements for 2016												
Achievement level												APS
English				Mathematics				Physical Science				
NSC/IEB	HIGCSE	AS-Level	A-Level	NSC/IEB	HIGCSE	AS-Level	A-Level	NSC/IEB	HIGCSE	AS-Level	A-Level	
4	3	D	D	4	3	D	D	4	3	D	D	25

Additional requirements

The General Regulations are applicable to bachelor's degrees.

Other programme-specific information

*The final examination for Oral biology (MDB 171) will take place at the end of the second semester together with Pharmacology (FAR 171) which is a semester module in the second semester.

**Students are exempted from the language modules (ZUL 110, AFR 111 and SEP 110) on the basis of the successful completion of a language proficiency test at the beginning of the year.

Examinations and pass requirements

Examinations of the first, second and third years of study

- A subminimum of 50% in the examination is required in respect of the examination modules, with a final mark of at least 50% to pass.
- A pass mark of at least 70% is required in Preventive oral health.
- A student who fails the clinical part of one or more of the modules of the third year must repeat those modules in the ensuing semester, with an examination at the end of the semester. The Dean on the recommendation of the examination moderating committee, will determine the time that must elapse before the student may again report for examination. Students, who are repeating the year of study, retain credit for modules passed, unless determined otherwise, but a certificate of satisfactory preparation and progress must be obtained in all modules passed.
- A student who has failed the theoretical part of any module in the third year, final examination, will be admitted to a supplementary examination in that part of the module. A student who fails the supplementary examination may, subject to other faculty regulations, sit an examination at the end of the ensuing

semester, but must obtain certificates of satisfactory preparation in all the other modules that he/she has passed.

(v) In order to comply with the requirements in (iii) above, and to maintain a specific level of clinical skills, the extent of students' involvement in modules passed, will be contracted with the students concerned, by the module chairperson, at the beginning of the year.

(vi) The requirement as stipulated in par.(f.)(i) above, will apply to students who, after repeating a semester, again fail some of the modules.

Promotion to next study year

Promotion to next year of study

Admission to the second year of study

- (i) To be admitted to the second year of study, a student must pass in all the first-year modules.
- (ii) Students who are repeating the first year of study, retain credit for examination modules passed, unless otherwise stipulated, but have to obtain a certificate of satisfactory preparation and progress in all the promotion modules. In order to comply with the requirements mentioned above, and to maintain a specific level of clinical skills, the extent of involvement of students in promotion modules passed, will be contracted by the module chairperson with the student(s) concerned, at the commencement of the academic year.
- (iii) A pass mark of at least 70% is required in the promotion module VKM 171 Preventive oral health 171.

Admission to the third year of study

- (i) To be admitted to the third year of study, a student must pass in all the second-year modules.
- (ii) Students who are repeating the second year of study, retain credit for examination modules passed, unless otherwise stipulated, but have to obtain a certificate of satisfactory preparation and progress in all the promotion modules. In order to comply with the requirements mentioned above, and to maintain a specific level of clinical skills, the extent of involvement of students in promotion modules passed, will be contracted by the module chairperson with the student(s) concerned, at the commencement of the academic year.
- (iii) A pass mark of at least 70% is required in the promotion module VKM 271 Preventive oral health 271.

Academic exclusion

- (i) A student following the Oral Hygiene programme will only be allowed two opportunities to repeat a year of study. Refer to the General Regulations.
- (ii) A student who does not comply with the abovementioned requirements but nevertheless wishes to be admitted to the School, may request the Dean/Chairperson in writing to consider his or her application for readmission in accordance with the prescribed procedure.
- (iii) A student who fails the first year of study must apply for readmission to the programme.

Pass with distinction

The degree is conferred with distinction on a student who obtains an average of at least 75% in the examination modules of the third year of study, and at least 65% in all the examination modules of the final year of study.

Curriculum: Year 1

Minimum credits: 124

Fundamental modules

Basic conversational Afrikaans 111 (AFR 111) - Credits: 12.00

Sepedi for beginners 110 (SEP 110) - Credits: 12.00

isiZulu for beginners 110 (ZUL 110) - Credits: 12.00

Academic information management 101 (AIM 101) - Credits: 6.00

Academic English for Health Sciences (BCur, BDietetics, BOH, BOccTher, BRad and BPhysT) 121 (ELH 121) - Credits: 6.00

Academic English for Health Sciences 122 (ELH 122) - Credits: 6.00

Academic orientation 110 (UPO 110) - Credits: 0.00

Core modules

Anatomy 171 (ANA 171) - Credits: 8.00

Pharmacology 171 (FAR 171) - Credits: 5.00

Physiology 171 (FLG 171) - Credits: 8.00

Microbiology and immunology 171 (GMB 171) - Credits: 8.00

Oral biology 171 (MDB 171) - Credits: 10.00

First aid 171 (NHS 171) - Credits: 5.00

Odontology 171 (ODO 171) - Credits: 12.00

Orthodontics 171 (ORD 171) - Credits: 9.00

Periodontology 171 (PDL 171) - Credits: 12.00

Comprehensive patient management 171 (TBW 171) - Credits: 2.00

Preventive oral health 171 (VKM 171) - Credits: 15.00

Academic competency in oral health 171 (ACO 171) - Credits: 12.00

Curriculum: Year 2

Minimum credits: 130

Core modules

Community as patient 271 (GAP 271) - Credits: 14.00

Odontology 271 (ODO 271) - Credits: 7.00

Orofacial surgery 271 (OFC 271) - Credits: 11.00

Orthodontics 271 (ORD 271) - Credits: 6.00

Periodontology 271 (PDL 271) - Credits: 11.00

Radiography 271 (RAD 271) - Credits: 20.00

Comprehensive patient management 271 (TBW 271) - Credits: 3.00

Preventive oral health 271 (VKM 271) - Credits: 58.00

Curriculum: Final year

Minimum credits: 130

Core modules

Community as patient 371 (GAP 371) - Credits: 13.00

Maxillo-facial pathology 371 (MFP 371) - Credits: 8.00

Patients with special needs 371 (PSB 371) - Credits: 12.00

Research 371 (RCH 371) - Credits: 5.00

Preventive oral health 371 (VKM 371) - Credits: 36.00

Counselling 371 (COU 371) - Credits: 5.00

Orofacial surgery 371 (OFC 371) - Credits: 6.00

Radiography 371 (RAD 371) - Credits: 20.00

Comprehensive patient management 371 (TBW 371) - Credits: 3.00

Elective modules

Orthodontics 372 (ORD 372) - Credits: 22.00

Periodontology 372 (PDL 372) - Credits: 22.00

Public oral health 371 (POH 371) - Credits: 22.00

BPhysT Physiotherapy (10138101)

Duration of study 4 years

Contact Prof DJ Mothabeng joyce.mothabeng@up.ac.za +27 (0)123563233

Programme information

A revised curriculum is being phased in for the programme. The revised first year of study will be followed for the first time in 2015, the second year in 2016, the third year in 2017 and the fourth year in 2018.

The programme extends over four academic years, during which period a student receives clinical training as a student physiotherapist at an institution approved by the University.

Students may be allowed to extend the first two years of study over three years, in which case the modules per year must be selected in consultation with the head of department at the commencement of studies.

Admission requirements

- In order to register NSC/IEB/Cambridge candidates must comply with the minimum requirements for degree studies and with the minimum requirements for the relevant study programme.
- Life Orientation is excluded in the calculation of the APS.
- Grade 11 results will be used for the conditional admission of prospective students.
- Admission to Health Sciences study programmes is subject to a selection process.

Minimum requirements for 2016												APS
Achievement Level												
English				Mathematics				Physical Science				
NSC/IEB	HIGCSE	AS-Level	A-Level	NSC/IEB	HIGCSE	AS-Level	A-Level	NSC/IEB	HIGCSE	AS-Level	A-Level	
4	3	D	D	4	3	D	D	4	3	D	D	30

Additional requirements

Also consult the General Regulations.

Notes:

(i) For students who registered for the BPhysT degree programme prior to 2015, the relevant regulations as they appear in the 2014 Yearbook will apply.

(ii) Each student in Physiotherapy must apply to the Registrar of the Health Professions Council of South Africa for registration as a student in Physiotherapy immediately after admission to the first year of study.

Other programme-specific information

First year of study:

Practical nursing

Practical nursing for a continual period of 40 hours must be completed satisfactorily at an approved hospital/facility after the conclusion of the examination period in November. Documentary proof to this effect must be submitted.

A subminimum of 40% is required in the theoretical as well as in the practical examination in FTP 100.

Second year of study:

Basic Emergency Care (Code GNK 286)

- If students obtain 60% or more in Basic Emergency Care, this mark will be validated as the **examination mark** at the end of the year, and such students will be exempted from the examination in the module.
- Students who obtain between 40% and 49% in the calculated mark for the module, will be admitted to a second examination in November/ December of the same year, or in January of the following year. A minimum of 50% is required as a pass mark for the second examination.
- This examination will also serve as an aegrotat or extraordinary examination for students who could not write the initial examination due to health or other acceptable reasons. A student must, however, apply formally to be admitted to such an examination, and the application must be approved by the Dean, on the recommendation of the head of department, and in some cases, also by the Faculty Health Committee.

Subminimum

A subminimum of 40% is required in the theoretical and practical components in the examination in FTP 220 and 203 and in POL 251 IHL 210

Third year of study:

Subminimum

A subminimum of 40% is required in the theoretical and practical/clinical examination in (FTP) Physiotherapy 300, (FTP) Physiotherapy clinical practice 301 and (POL) Professional development and leadership 300.

Fourth year of study

Subminimum

A subminimum of 40% is required in clinical/practical as well as theoretical components of the examination of (FTP 400,402) Physiotherapy 400 and 402 and (IHL 414, 424) Integrated healthcare leadership 414, 424.

Exemption from the examination in (ANP) Anatomical Pathology 210

Exemption from the examination may be granted if a student who obtained a module mark of at least 60%, exercises the option to accept it as the final mark.

Exemption from the examination in (FAR) Pharmacology 381, 382

Exemption from the examination can be granted if a student who obtained a module mark of at least 60%, exercises the option to accept it as the final mark.

Examinations and pass requirements

Students who fail a year in the existing curriculum will be managed on an individual basis in the Department of Physiotherapy.

Special examination: Fourth year of study

(aa) The student gets another opportunity to take part in the examination.

(bb) A special examination in (FTP 400) Physiotherapy 400, (FTP 402) Physiotherapy clinical practice 402 and (IHL 414, 424) Integrated healthcare leadership 414, 424, is conducted after six months have elapsed since the examination in which the student failed. If the student failed in (FTP 402) Physiotherapy clinical practice 402, he or she must undergo further clinical instruction in the clinical training areas and obtain at least 50% in the examination.

(cc) A student who has not obtained a pass mark in the research report of RHC 400, Research in healthcare sciences 400, must submit an amended research report at a later date determined by the head of department.

Ancillary examination: Fourth year of study

After the conclusion of the examination in (FTP 400) Physiotherapy 400 and (FTP 402) Physiotherapy clinical practice 402 and before the results are announced, the examiners may, with a view to awarding a final mark, summon a student for an ancillary examination in the theory and/or clinical component of (FTP 400) Physiotherapy 400 and (FTP 402) Physiotherapy clinical practice 402.

- In accordance with the stipulations of the General Regulations, no minimum year or semester mark is needed for admission to the examination, and all registered students are admitted to the examination automatically.
- The final mark for a specific module in Nursing Science, Physiotherapy, Radiography, Occupational Therapy and Human Nutrition (at least 50% is required to pass) is calculated from the examination mark as well as the mark compiled from the evaluation of a student during continuous, objective and controlled assessment opportunities during the course of the quarter/semester/year. At least one formal assessment per module is set as the minimum norm, and students will be exposed on a continuous and regular basis to self-directed assignments in order to promote reflective learning.
- In the case of modules with practical components, students are required to also comply with the applicable attendance requirements with regard to acquiring practical skills before a pass mark can be obtained for the module.
- There are two main examination opportunities per annum, the first and second examination. In respect of first-semester modules, the first examination opportunity is in May/June and the second examination opportunity in July. In respect of second-semester modules, the first examination opportunity is in October/ November and the second examination opportunity in November/December of the same year. Where students need to work additional clinical hours to be allowed to do a second examination, the Head of Department will determine the second examination opportunity.
- Only two examination opportunities per module are allowed. If a student fails a module at the second examination opportunity, the module must be repeated.
- A second examination opportunity in a module is granted to students in the following cases:
 - If a student obtains a final mark of less than 50% in the relevant module at the first examination opportunity and thus fails.
 - If a student does not obtain the subminimum in the examination, as required for a specific module.
 - If a student does not sit the examination in a module at the first examination opportunity due to illness or extraordinary circumstances.

- Students intending to sit the second examination due to the reasons mentioned above, must register for the second examination opportunity 24 hours after the results have been made public.
- If a student fails a module at the first examination opportunity, the examination mark obtained in the relevant module at the second examination opportunity will be calculated as the final mark. The marks obtained with continuous evaluation during the course of the quarter/semester/year will not be taken into calculation. If the student passes the module at the second examination opportunity, a maximum of 50% is awarded as a pass mark to the module in question.
- If a student could not sit the examination in a module at the first examination opportunity due to illness or extraordinary circumstances, the continuous evaluation mark, together with the examination mark obtained in the module in question at the second examination opportunity, will be calculated as the final mark obtained in the module.
- The School of Healthcare Sciences applies the General Regulations, according to which a student requiring a limited number of modules to complete his or her degree, may in terms of faculty regulations, be admitted to a special examination in the modules in question.

Promotion to next study year

Selected first-year students who have passed in sufficient first-semester modules at 100 level will, according to the stipulations of the General Regulations, automatically be admitted to the second semester of the first year of study. During the second semester, students may follow the outstanding module(s) on an anti-semester basis and write the examination, on the condition that the modules in question are indeed presented on an anti-semester basis in the second semester by the relevant department and can be accommodated in the class and examination timetables.

If a student fails one or more first-year modules, he or she forfeits selection and must apply again for selection for the first year of study.

Modules/subjects with practical and clinical training credits cannot be passed, unless all prescribed clinical hours and practical skills have been completed to the satisfaction of the head of department.

- A student must pass in all the prescribed core modules of a specific year of study to be promoted to a subsequent year of study. A student can only be promoted to a subsequent year of study if the student has not failed more than two fundamental modules of seven weeks each per semester or one module of 14 weeks per semester. A non-negotiable prerequisite for admission to the final year of study is pass marks in all the core and fundamental modules of the preceding years of study. Refer to the programmes for fundamental modules in each discipline.
- A pass mark refers to a final mark of at least 50%.
- Modules with practical and clinical training credits cannot be passed unless all the prescribed clinical hours and practical activities have been completed to the satisfaction of the head of department.
- The Chairperson of the examination moderating meeting may, after assessing the student's total profile, grant special approval to be promoted to the next year of study.
- The exception is the Department of Human Nutrition, where the regulations as applicable in the Faculty of Natural and Agricultural Sciences regarding the modules presented by that Faculty, are relevant.
- Modules can only be taken in advance or repeated if it can be accommodated in the existing examination timetable.
- A student who must repeat a year of study may, with the approval of the Chairperson of the examination moderating meeting and the head of department concerned, be allowed to take fundamental modules of the subsequent year, if he/she complies with all the prerequisites for the relevant modules. No adjustment to existing timetables will be allowed.

The following fundamental modules are relevant:

- Department of Nursing Science: SLK 110, 120; FSG 251,252
- Department of Physiotherapy: SOH 254; FSG 251, 252, 261, 262; SLK 210, ANP 210; GMB 252, 253, 254; FAR 381, 382
- Department of Occupational Therapy: ZUL 110; SEP 110; SLK 210, 220; FSG 251, 252, 261, 262; ANP 210; RPD 481, GNK 286
- Department of Human Nutrition: FLG 211, 212, 221, 222; BCM 251, 252, 261, 262; FAR 381, 382, VDS 322; VDB 321
- Department of Radiography: FSG 251, 252, 262; GNK 286; ANP 210.

Pass with distinction

The degree is conferred with distinction on a student who has obtained at least 75% in (FTP 400) Physiotherapy 400 and (FTP 402) Physiotherapy clinical practice 402 and a joint average of at least 75% in (RHC 400) Research in healthcare sciences 400 and (IHL 414, 424) Integrated healthcare leadership 414, 424.

Programme information

Each student in Radiography must apply to the Registrar of the Health Professions Council of South Africa for registration as a student in Radiography immediately after admission to the first year of study. The programme extends over three years' full-time study, during which period a student radiographer will be attached to an institution approved by the Department of Radiography.

Students must comply with the stipulations of the Health Professions Council of South Africa concerning the required number of practical hours and as determined by the Department of Radiography.

Admission requirements

- In order to register NSC/IEB/Cambridge candidates must comply with the minimum requirements for degree studies and with the minimum requirements for the relevant study programme.
- Life Orientation is excluded in the calculation of the APS.
- Grade 11 results will be used for the conditional admission of prospective students.
- Admission to Health Sciences study programmes is subject to a selection process.

Examinations and pass requirements

Subminimum: A subminimum of 40% is required in the written as well as the practical/clinical sections of the examination in Radiography at 100, 200 and 300 level.

- In accordance with the stipulations of the General Regulations, no minimum year or semester mark is needed for admission to the examination, and all registered students are admitted to the examination automatically.
- The final mark for a specific module in Nursing Science, Physiotherapy, Radiography, Occupational Therapy and Human Nutrition (at least 50% is required to pass) is calculated from the examination mark as well as the mark compiled from the evaluation of a student during continuous, objective and controlled assessment opportunities during the course of the quarter/semester/year. At least one formal assessment per module is set as the minimum norm, and students will be exposed on a continuous and regular basis to self-directed assignments in order to promote reflective learning.
- In the case of modules with practical components, students are required to also comply with the applicable attendance requirements with regard to acquiring practical skills before a pass mark can be obtained for the module.
- There are two main examination opportunities per annum, the first and second examination. In respect of first-semester modules, the first examination opportunity is in May/June and the second examination opportunity in July. In respect of second-semester modules, the first examination opportunity is in October/ November and the second examination opportunity in November/December of the same year. Where students need to work additional clinical hours to be allowed to do a second examination, the Head of Department will determine the second examination opportunity.
- Only two examination opportunities per module are allowed. If a student fails a module at the second examination opportunity, the module must be repeated.
- A second examination opportunity in a module is granted to students in the following cases:
 - If a student obtains a final mark of less than 50% in the relevant module at the first examination opportunity and thus fails.

- If a student does not obtain the subminimum in the examination, as required for a specific module.
- If a student does not sit the examination in a module at the first examination opportunity due to illness or extraordinary circumstances.
- Students intending to sit the second examination due to the reasons mentioned above, must register for the second examination opportunity 24 hours after the results have been made public.
- If a student fails a module at the first examination opportunity, the examination mark obtained in the relevant module at the second examination opportunity will be calculated as the final mark. The marks obtained with continuous evaluation during the course of the quarter/semester/year will not be taken into calculation. If the student passes the module at the second examination opportunity, a maximum of 50% is awarded as a pass mark to the module in question.
- If a student could not sit the examination in a module at the first examination opportunity due to illness or extraordinary circumstances, the continuous evaluation mark, together with the examination mark obtained in the module in question at the second examination opportunity, will be calculated as the final mark obtained in the module.
- The School of Healthcare Sciences applies the General Regulations, according to which a student requiring a limited number of modules to complete his or her degree, may in terms of faculty regulations, be admitted to a special examination in the modules in question.

Promotion to next study year

- A student must pass in all the prescribed core modules of a specific year of study to be promoted to a subsequent year of study. A student can only be promoted to a subsequent year of study if the student has not failed more than two fundamental modules of seven weeks each per semester or one module of 14 weeks per semester. A non-negotiable prerequisite for admission to the final year of study is pass marks in all the core and fundamental modules of the preceding years of study. Refer to the programmes for fundamental modules in each discipline.
- A pass mark refers to a final mark of at least 50%.
- Modules with practical and clinical training credits cannot be passed unless all the prescribed clinical hours and practical activities have been completed to the satisfaction of the head of department.
- The Chairperson of the examination moderating meeting may, after assessing the student's total profile, grant special approval to be promoted to the next year of study.
- The exception is the Department of Human Nutrition, where the regulations as applicable in the Faculty of Natural and Agricultural Sciences regarding the modules presented by that Faculty, are relevant.
- Modules can only be taken in advance or repeated if it can be accommodated in the existing examination timetable.
- A student who must repeat a year of study may, with the approval of the Chairperson of the examination moderating meeting and the head of department concerned, be allowed to take fundamental modules of the subsequent year, if he/she complies with all the prerequisites for the relevant modules. No adjustment to existing timetables will be allowed.

The following fundamental modules are relevant:

- Department of Nursing Science: SLK 110, 120; FSG 251,252
- Department of Physiotherapy: SOH 254; FSG 251, 252, 261, 262; SLK 210, ANP 210; GMB 252, 253, 254; FAR 381, 382
- Department of Occupational Therapy: ZUL 110; SEP 110; SLK 210, 220; FSG 251, 252, 261, 262; ANP 210; RPD 481, GNK 286

- Department of Human Nutrition: FLG 211, 212, 221, 222; BCM 251, 252, 261, 262; FAR 381, 382, VDS 322; VDB 321
- Department of Radiography: FSG 251, 252, 262; GNK 286; ANP 210.

Pass with distinction

The degree is conferred with distinction on a student who has obtained an average of at least 75% in the final-year modules.

Radiation physics 210 (RFI 210) - Credits: 10.00

Radiation physics 211 (RFI 211) - Credits: 10.00

Core modules

Radiography 280 (RAW 280) - Credits: 54.00

Radiographic imaging 282 (RAW 282) - Credits: 20.00

Radiation therapy and nuclear medicine 284 (RAW 284) - Credits: 10.00

Curriculum: Final year

Minimum credits: 127

Fundamental modules

Radiographic anatomy 380 (RAN 380) - Credits: 10.00

Core modules

Radiography 380 (RAW 380) - Credits: 52.00

Radiography practice 382 (RAW 382) - Credits: 30.00

BSportSci BSportSci (10135002)

Duration of study 3 years

Contact Prof PS Wood paola.wood@up.ac.za +27 (0)124206046

Programme information

This three year full-time BSportSci programme will consist of two specialist qualification pathways, namely Biokinetics and Sports Science. The first two years of study will comprise a generic curriculum shared with all BSportSci students that will include basic and applied sciences of the human body. At the end of the second year selection will take place on academic merit and students will branch into the specific Sports Science curriculum or Biokinetics curriculum up until the completion of their three year of studies. The first year of internship for the Biokinetics students will run concurrently with their third year. Then the Biokinetics students will proceed with the BScHons in Biokinetics with the second year of their internship. The four-year Biokinetics programme (3 + 1) is in line with the new regulations of the HPCSA for Biokinetics training which all universities that offer this programme will follow. The Sports Science students have the option of proceeding with the BScHons in Sports Science, enrol and complete the PGCE or start working in the sporting industry.

Admission requirements

Selection is based on academic merit, using a combination of the the Admission Point Score (APS) and the National Benchmark Test (NBT) as well as a Value-Added Questionnaire (VAQ). For final selection, certain minimum achievement levels are required (refer to the minimum requirements on page 1). In the case of candidates who are still at school, the Grade 11 final examination marks are used as the basis for provisional selection. One hundred (100) students are selected on academic merit for the first year of study.

Academic information management 101 (AIM 101) - Credits: 6.00

Academic English for Health Sciences (BCur, BDietetics, BOH, BOccTher, BRad and BPhysT) 121 (ELH 121) -

Credits: 6.00

Academic English for Health Sciences122 (ELH 122) - Credits: 6.00

Academic orientation 110 (UPO 110) - Credits: 0.00

Core modules

Physiology 110 (FSG 110) - Credits: 6.00

Physiology 120 (FSG 120) - Credits: 6.00

Medical terminology 180 (MTL 180) - Credits: 12.00

Physics for biology students 131 (PHY 131) - Credits: 16.00

Sports injuries I 110 (EXE 110) - Credits: 12.00

Research methodology I 111 (EXE 111) - Credits: 12.00

Motor learning and development I 120 (EXE 120) - Credits: 12.00

Exercise science programme development 121 (EXE 121) - Credits: 12.00

Measurement and evaluation 320 (EXE 320) - Credits: 15.00

Sports practical (basic) 100 (PRC 100) - Credits: 12.00

Introduction to human anatomy 123 (ANA 123) - Credits: 8.00

Curriculum: Year 2

Minimum credits: 141

Core modules

Sports injuries II 210 (EXE 210) - Credits: 16.00

Applied nutrition 220 (EXE 220) - Credits: 16.00

Motor learning and development II 221 (EXE 221) - Credits: 16.00

Sports practical (advanced) 200 (PRC 200) - Credits: 16.00

Fundamental physiology 110 (SMC 110) - Credits: 12.00

Applied kinesiology (anatomy) 210 (SMC 210) - Credits: 16.00

Applied biomechanics 211 (SMC 211) - Credits: 16.00

Applied physiology (exercise) 220 (SMC 220) - Credits: 16.00

Event management and entrepreneurship 210 (SMS 210) - Credits: 16.00

Curriculum: Final year

Minimum credits: 130

Core modules

Biomechanics II 321 (BGN 321) - Credits: 15.00

Applied exercise science (gymnasium) 310 (BGN 310) - Credits: 15.00

Testing and evaluation (laboratory) 320 (BGN 320) - Credits: 15.00

Research methodology II 301 (EXE 301) - Credits: 20.00

Sports injuries (upper and lower quarter) 310 (EXE 310) - Credits: 15.00

Laboratory evaluation 301 (PRC 301) - Credits: 20.00

Applied physiology 320 (SMC 320) - Credits: 20.00

MBChB Medicine (10130001)

Duration of study 6 years

Contact Prof BG Lindeque gerhard.lindeque@up.ac.za +27 (0)123541201

Programme information

Each student in Medicine must apply to the Registrar of the Health Professions Council of South Africa for registration as a student in Medicine, immediately after admission to the first year of study.

After obtaining the degree, a student must register with the Health Professions Council of South Africa as an intern, and complete at least one year of training at an institution approved by the abovementioned Council for this purpose. (Students who qualify after July 2006, will have a compulsory two-year internship.) After this, he or she must register with the Council as a physician and complete one year of community service before he or she may work in private practice.

The integrated outcomes-based problem-oriented programme consists of theoretical blocks, special activities (SAs) and clinical rotations. During the final 18 months, referred to as the Student Intern Complex (SIC), all the programme activities take place in the clinical settings.

Admission requirements

The applications of international candidates who come from countries that have medical schools will not be considered for placement in the MBChB study programme.

- In order to register NSC/IEB/Cambridge candidates must comply with the minimum requirements for degree studies and with the minimum requirements for the relevant study programme.
- Life Orientation is excluded in the calculation of the APS.
- Grade 11 results will be used for the conditional admission of prospective students.
- Admission to Health Sciences study programmes is subject to a selection process.
- For selection purposes the sum of the results in six subjects including English Mathematics and Physical Science is calculated.

Minimum requirements for 2016												
Achievement Level												
English				Mathematics				Physical Science				
NSC/IEB	HIGCSE	AS-Level	A-Level	NSC/IEB	HIGCSE	AS-Level	A-Level	NSC/IEB	HIGCSE	AS-Level	A-Level	APS
5	3	C	C	5	3	C	C	5	3	C	C	35

Additional requirements

The Faculty can accommodate 300 first-year MBChB students. Applicants for MBChB I are evaluated according to different categories, with the minimum admission requirements set according to the categories in question.

1. In terms of the selection procedure, candidates must pass English, Mathematics and Physical Science with at least a 5 rating code (60%-69%), and achieve an APS of at least 35, in order to be considered for selection and/or admission.
2. It is not possible for candidates to complete the first year of study for this study programme at another South African university.
3. A candidate who has passed a full academic year at another university, with at least four first-year subjects, will be considered for selection, but only for admission to MBChB I.

4. Admission of foreign candidates is limited. Preference will be given to students from SADC countries.
5. Candidates will be notified per SMS and in writing of the outcome of the selection.
6. School leaving candidates with no previous tertiary exposure who have not been admitted to MBChB I, may register for a first year of study in the BSc degree programme in Biological or Medical Sciences at the University of Pretoria, provided that they qualify for admission. If they pass the prescribed first-semester modules, they may apply before 31 May of their first year of study, to be considered for admission to MBChB I as from the second semester
7. Candidates who have not been admitted to the first year of study for the MBChB degree programme, may apply for admission to any other degree programme at this University, provided that they comply with the entrance requirements for the degree programme in question; and may, on the grounds of that achievement, reapply for selection (changing to MBChB I).

Other programme-specific information

Important:

Students have three assessment opportunities, namely a block test, first examination and second examination in order to pass GPS Generic procedural skills 280. Although a student will not be held back if GPS 280 is failed, the module in question must be passed by the end of the first semester of the third year of study, failing which the student will be held back in the third year of study.

Fourth year of study:

- SA 11 (GNK 487) Skin 487 is preceded by one study week named SA 11a in the 4th year, 2nd semester.
- Students who offer BOK 284 (25 credits) from 2015 will be required to offer and pass module GNK 482.
- SA 16 (GNK 482) Forensic medicine 482 will be offered for the first time in 2017. Students who passed BOK 284 prior to 2015 will not be required to offer this module as the contents were included in BOK 284 (31 credits).

Fifth year of study:

Block 18 (GNK 585) Pharmacotherapy 585 is preceded by two study weeks, namely Block 18a in the 2nd year, 2nd semester and Block 18b in the 4th year, 2nd semester.

Note: Marks obtained in the morning rotations are taken into account with the relevant block marks.

Second half of the fifth year of study, and the sixth year of study:

Admission to the Student Intern Complex (SIC):

1. For admission to the SIC, a student is required to pass in all the examination modules and morning rotations of the first semester of the fifth year of study.
2. Rotations and end-of-rotations evaluations (first examinations) and end-of-semester examinations (second examinations)
 - a. Training in the SIC extends over 18 months. Rotations take place over a period of 63 weeks in three semesters.
 - b. All students who are involved, will enjoy the same rank of seniority and will be known as student interns; i.e. no differentiation will in this case be made between the status of the fifth-year and sixth-year student concerned.
 - c. A rotation extends over seven weeks, and every three rotations are grouped together in a logical manner in the three semester divisions of the SIC.
 - d. The semester rotations are divided as follows:

Student Intern Complex (SIC) (18 months)

SIC Semester (a): Surgery and related disciplines and Family Medicine

i. Surgery (7 weeks) GNK 680 – 52 credits

- General surgery
- Vascular surgery
- Plastic surgery
- Paediatric surgery
- Cardiothoracic surgery
- Neurosurgery (1 week)

ii. Surgery-related subdisciplines (3 weeks)

- Urology (2 weeks) GNK 690 – 11 credits
- Orthopaedics (3 weeks) GNK 681 – 17 credits
- 1 week of exams

iii. Anaesthesiology and Family medicine (7 weeks)

- Anaesthesiology (3½ weeks) GNK 682 – 20 credits
- Family medicine (3½ weeks) GNK 691 – 20 credits

Total credits per semester: 120

SIC Semester (b): Internal medicine and related sub-disciplines and psychiatry

i. Internal medicine (7 weeks) GNK 683 – 45 credits

ii. Internal medicine-related subdisciplines (3½ weeks) GNK 684 – 20 credits

- Dermatology
- Haematology
- Cardiology
- Neurology (3½ weeks) GNK 693 – 15 credits

iii. Psychiatry (7 weeks) GNK 685 – 40 credits

Total credits per semester: 120

SIC Semester (c): Women's and children's health and community-based education

i. Obstetrics and gynaecology (7 weeks) GNK 686 – 40 credits

ii. Paediatrics (7 weeks) GNK 687 – 40 credits

iii. Community obstetrics (3½ weeks) GNK 692 – 20 credits

iv. Community-based education (3½ weeks) GNK 688 – 20 credits

Total credits per semester: 120

SA13 Special activity: Diagnostic laboratory medicine

i. Diagnostic laboratory medicine (2 weeks) GNK 689 – 11 credits

- Image-forming medicine
- Evidence-based medicine
- Bioethics (2 days)*

Total credits: 11

Total credits Student Intern Complex: 371

*SA13 Diagnostic laboratory medicine is followed by two study days, namely SA13a in the 6th year, 2nd semester.

- e. End-of-rotation evaluations are held at the end of every seven-week rotation. Students who obtain a final mark of at least 60%, are promoted in the rotation and need not sit the end-of-semester examination in that rotation.
- In the first semester, this examination will be held three times (for students in the first semester of their sixth year of study).
- In the second semester, this examination will also be held three times for students in the second semester of both the fifth and the sixth year of study.
- f. End-of-semester examinations are held in the relevant rotations of the semester of a SIC in which students have performed unsatisfactorily (i.e. less than 60%). Students who fail these examinations, will not be admitted to the rotations of the subsequent semester and will be required to repeat and pass the unsuccessful rotation(s). (Further details in this regard appear in Rotation(s) failed or not promoted in below.
- g. During the first semester of the sixth year of study, two lecturing periods of two weeks each will be devoted to the following: GNK 689: Diagnostic laboratory medicine; Image-forming medicine; Evidence-based medicine; Bioethics.

Rotation(s) failed or not promoted in

1. A student intern who fails a seven-week rotation or rotations for the first time (i.e. the end-of-rotation evaluation) or is not promoted in the rotation(s) in question, sits the end-of-semester examination in the rotation(s) in question. If successful in the second examination, he or she continues with the rotations of the following semester. If unsuccessful, the relevant rotation(s) must be repeated at the first opportunity in the next semester. The nature of such repetition must be regarded as remedial and it ends with the next end-of-rotation examination.
2. The end-of-rotation examination for such student interns serves as the next official evaluation and must, as such, be monitored by external examiners. A pass mark of at least 50% is required.
3. Student interns who pass the end-of-rotation evaluation, continue with the next “semester rotations” and may re-join their original group for the duration of the rest of the SIC. The third rotation of the semester will then again be out of phase.
4. Student interns who fail the end-of-rotation evaluation again (i.e. first examination), routinely continue with the next rotations or semester activity as applicable according to the number of rotations failed. Such student interns will complete the unsuccessful rotations at the end of the training period, after all other rotations have been passed.
5. The sixth year of study may be failed twice, provided that no previous year has been failed. This means that there is a total of seven semesters available for the sixth year of study to a student intern who has not failed any previous year of study.

Examinations and pass requirements

Passing a block/special activity in the MBChB degree programme

1. A block mark is calculated from the end of the block assessment and the continuous evaluation opportunities during the course of the presentation of the block or special activity in question. These evaluations shall include one or more of the following:
 - a. Evaluations regarding theoretical knowledge.
 - b. Evaluations regarding clinical knowledge and skills.
 - c. Compulsory attendance of, and active participation in prescribed activities.
 - d. A final comprehensive block test moderated by external examiners.

2. Students may exercise the option to have the block mark at the end of the year validated as the final block mark for the block in question (i.e. they are exempted from the block examination for this block), provided that they comply with the following requirements:
 - a. The abovementioned block mark is more than 60%.
 - b. Proven attendance of all applicable block-specific activities, namely:
 - All tests/continuous evaluations.
 - All practicals and morning ward-round activities.
 - All relevant skills laboratory activities.
 - All relevant community-based education activities.
 - All clinical rotations.
 - c. A pass mark in the clinical rotation test.
 - d. Attendance of the block in question from day 1.
 - e. No conviction by the Faculty Preliminary Disciplinary Committee (Student offences), of any form of dishonesty or fraud.
3. A block examination is granted to all registered students regardless of the block mark.
4. The final block mark is calculated from the block examination mark and the block mark (continuous evaluation) in a 50:50 or 60:40 ratio, depending on the year of study and/or block-specific regulations. The formula according to which the final block mark is calculated will be set out in the block book (study guide) and communicated to students at the commencement of the programme.
5. In order to pass in a block/special activity in which a clinical component is included, a subminimum of 50% is required for the block examination mark, implying that a student who obtains a block mark of more than 50% and a block examination mark of less than 50%, with a final block mark of more than 50%, fails the block and will thus be admitted to a second examination.
6. Regarding the Longitudinal Clinic Attachment Programme (L-CAS activities) of an academic year (module code LCP 180, 280, 380, 480 and 580), students must hand in a portfolio at the end of the academic year which will be assessed. Satisfactory attendance will furthermore be required regarding this module to pass the year. **Note:** Students are not allowed into patients' homes or any other unauthorised facility.
7. A second examination in a block will be granted to all students who fail the block.
8. As a rule, the second examination in question will take place in November/ December of the same year, or in January of the following year. However, this regulation is not applicable to the end of the first semester of MBChB V. (A minimum of 50% is required in order to pass in the second examination.
9. An aegrotat or extraordinary examination granted to a student who could not participate in the block examination due to illness or other acceptable reasons, will take place during the second examination period. Students must apply formally for such an examination, and admission to the examination is approved by the Chairperson of the School or his/her authorised person. Where applicable, the Chairperson of the School may first require a recommendation from the Faculty Health Committee before approving an application for admission to an aegrotat. All modalities of a final examination must be completed jointly as an aegrotat or an extraordinary examination, even if part of it has already been completed as part of the examination sat in the previous examination period. The final block mark is calculated from the marks of all the divisions/modalities of the aegrotat or extraordinary examination and the block mark in question (continuous evaluation mark). The same criteria set for a final mark in a block, are applicable in this case. **Note:** No special dates will be arranged for an aegrotat/extraordinary examination. These examinations will only take place on the scheduled dates for regular first/second examinations.
10. Aegrotat/extraordinary tests are not allowed for the MBChB degree programme. Students who have

acceptable reasons for being absent from tests, will of course have no block mark, and a pass in the block(s) will depend totally upon the block examination mark.

Repeating blocks and/or special activities (and thus the year of study) in the MBChB degree programme

A student who has failed one or more blocks and/or special activities in a year of study, must repeat the year of study. However, such a student will be exempted from the blocks and/or special activities passed in the previous (failed) year.

The Examination Moderating Meeting and/or the Chairperson of the School of Medicine, reserves the right to only award a pass mark to the said blocks and/or special activities should the student comply with the following requirements in respect of the blocks and/or special activities in question:

- That the mark awarded to the said block or special activity was not awarded on the grounds of condonement.
- That the student's attendance of the said block and/or special activity was satisfactory, that he or she participated in all other activities and complied with all other requirements.

Examinations and pass requirements

In accordance with the stipulations of the General Regulations, a minimum year or semester mark of 40% is required for admission to the examination: Provided that the different year and semester modules in a School need not be handled in the same manner, although a considerable degree of uniformity is advisable.

The stipulation that students be admitted to the examination without reservation, is supported. A final block mark in the relevant module is, however, calculated from the block examination mark as well as the block mark compiled from continuous evaluation during the presentation of the module (i.e. the semester, year, module or block mark). The latter is calculated from the marks obtained in one or more of the undermentioned:

1. Evaluations of theoretical knowledge.
2. Evaluations of clinical knowledge and skills.
3. Compulsory attendance of and participation in prescribed activities.

The contribution of each modality in the calculation of the abovementioned mark is set out in the regulations and published in the study guides. The details are explained in detail to the students concerned before commencement of the modules. Likewise, also the weight allocated to the abovementioned marks and the various examination marks when calculating the final block mark awarded to the student, which varies between 50:50 and 40:60 according to the field of study, year of study and programme-specific compilation.

The importance of continuous evaluation in the assessment of students is non-negotiable, and therefore the marks awarded in these type of evaluations will form part of the final pass mark of all modules/subjects.

The pass mark for essays is at least 50%. The stipulations of the General Regulations regarding requirements for dissertations apply mutatis mutandis to essays.

For requirements regarding the abovementioned, also consult the study manual of a given block.

Academic exclusion from further study

1. In accordance with the stipulations of the General Regulations, re-registration of a student is permitted only if the student completes the degree programme for which he or she is registered within the prescribed minimum period of study plus two years.
2. In the case of the MBChB degree offered by the School of Medicine, a student who fails a year of study for a second time, must apply, in writing, to the Readmission Committee of the School chaired by the Chairperson of the School, for readmission to the programme.
3. The Committee in question will take all relevant factors into consideration.

Promotion to next study year

Failed candidates/Admission to the second semester of MBChB I

1. Selected first-year students, who have passed in all prescribed first-semester modules at 100 level will, in accordance with the stipulations of the General Regulations, automatically be admitted to the second semester of the first year of study.
2. During the second semester, the students who have failed modules may be admitted to an examination on an anti-semester basis, if this can be accommodated in the timetables.
3. In the School of Medicine, a student may not repeat first-semester modules comprising more than 8 lectures per week on an anti-semester basis in the second semester.

Failed candidates/Admission to MBChB II

1. A student must pass all the modules prescribed for MBChB I, for admission to MBChB II.
2. Students who take the maximum allowable number of first-semester modules on an anti-semester basis in the second semester, must pass a second examination in the modules in question prior to commencement of the second year of study. Should a student pass in these modules, the fact that the modules were failed in the first semester, will not affect his or her admission to MBChB II.
3. None of the second-semester blocks and special activities of MBChB I are presented on an anti-semester basis.
4. ALL students who fail the first year of study for the MBChB degree, forfeit their selection and must apply, in writing, for readmission to the MBChB degree programme. Also consult Reg.M.1(c) regarding students who fail certain blocks in a year and therefore the year of study.

Admission to the second year of study

A student must pass all the modules prescribed for the first year of study before admission to the second year of study.

Failed candidates/Admission to MBChB III

1. Students must pass in all the prescribed modules for MBChB II for admission to MBChB III.
2. Students who fail one block, may repeat the MBChB II year* without forfeiting his/her selection.
3. Students who fail two blocks, but who have not failed a block before, may repeat the MBChB II year*, without forfeiting his/her selection.
4. Students who fail three or more blocks, are automatically excluded from the programme.
5. Students who have failed MBChB I and subsequently also MBChB II (notwithstanding the number of blocks involved), are automatically excluded from the programme.
6. Students who are excluded from the programme, will again be subjected to selection with a view to readmission to MBChB II.

See also **Examinations and pass requirements** regarding students who fail certain blocks and therefore have to repeat the year of study.

Admission to the third year of study

A student must pass all the modules prescribed for the second year of study with exception of SA9 for admission to the third year of study.

Failed candidate (third year of study)

A student who fails any given block (i.e. examination modules), fails and will be required to repeat the third year of study. Consult also faculty regulations regarding students who fail some blocks, and thus the year of study.

Admission to the fourth year of study:

A student must pass all the modules prescribed for the third year of study for admission to the fourth year of study. Consult also faculty regulations regarding students who fail certain blocks in a year, and therefore the year of study.

Failed candidates (fourth year of study)

A student who fails any given block (i.e. examination modules), fails and will be required to repeat the fourth year of study. Consult also the paragraph regarding students who fail some blocks, and thus the year of study.

Admission to the fifth year of study:

A student must pass all the modules prescribed for the fourth year of study for admission to the fifth year of study.

Fifth year of study:

Second semester

The Student Intern Complex (SIC) commences at the beginning of the second semester of the fifth year of study.

Failed candidates

1. At the end of the first semester of the fifth year of study, students will sit examinations in each block in which they have not been promoted. A second examination will take place immediately after commencement of the SIC. Successful students obtain SIC status and may continue with the SIC.
2. Students who fail the examination as well as the second examination in one block or more (and therefore fail the semester) may not continue with the SIC but participate in a remedial programme, which will take place during the first seven weeks of the second semester.
3. A second examination will be granted in the outstanding blocks at the end of the seven-week period.
4. Unsuccessful completion of the morning rotations during the first semester of the fifth year of study prevents a student from promoting the relevant block(s) and examination will become compulsory.
5. If the students pass in the second examination, they may join the SIC as from the second seven-week rotation period.
6. If a student again fails the second examination, the rest of the year of study will be used as remediation. In January of the subsequent year, students may commence provisionally with the SIC, but will have to interrupt the SIC for the duration of the unsuccessful block when it is presented in the first semester. Students will then have to repeat the block. Successful students then continue with the SIC.

Pass with distinction

The degree is conferred with distinction on a student who has obtained an average of at least 75% in the Student Intern Complex rotations.

General information

Students who will comply with all the requirements for the MBChB degree by 28 February, will receive the degree in question officially during the Autumn graduation ceremonies in April of the particular year. Students who will only comply with all the requirements for the MBChB degree during or after March, will receive the degree in question officially during the Spring graduation ceremonies in September of the particular year.

Student interns: MBChB

All students

- i. At the conclusion of each seven-week rotation, an end-of-rotation evaluation (EORE) takes place in the different departments. The aim with the EORE is the identification of those students who obtain examination

exemption (semester examination) and those who are not exempted and will have to sit the examination at the end of the semester. All EOREs are supported by external examiners.

- ii. The same process takes place in rotations with a duration of 3,5 weeks.
- iii. No marks are disclosed to students, only the names and/or registration numbers of the students who must sit the semester examination.
- iv. After conclusion of the semester examination (which extends over three days on dates determined beforehand), an EMM is held, with the following objectives:
 - Validation of the rotation marks as the semester examination mark, of the students who have obtained examination exemption. The rotation mark and the EORE mark contribute to the final mark.
 - Identification of the students who have passed the semester examination. The rotation mark and the semester examination mark contribute to the final mark;
 - Identification of the students who have failed the semester examination. These students are referred to Student Administration, as a new rotation division must now be followed; and
 - Identification of the students who need study assistance.

Students who repeat rotations: MBChB

- i. Students who repeat rotations, do the end-of-rotation evaluation (EORE) at the conclusion of the rotation that has been repeated. The objective is to obtain a pass mark. The continuous evaluation marks and the EORE mark contribute to the final mark.
- ii. On the first Wednesday after the conclusion of the rotation, an EMM takes place at 13:00 (or a different timeslot as arranged), to evaluate the achievement of the students, who have repeated the rotation. The objectives of this EMM are:
 - Identification of the students who pass the rotation that has been repeated (final mark of 50% or more) (maximum indicated on the form is "50H");
 - Identification of the students who fail the rotation that has been repeated. These students are referred to Student Administration, as a new rotation division must now be followed; and
 - Identification of the students who need study assistance.
- iii. The achievement of the students who have repeated a 3,5 week rotation, is discussed at the same EMM.

Students who are "finalists" at another time than the end of the sixth year of study: MBChB

1. Students who repeated previous rotations successfully, and who are now "finalists", but will be doing the current rotation for the first time:
 - i. These students do the EORE just like all other students do, the objective being, as in the case with other students, to identify those who do or do not obtain, exemption from the semester examination.
 - ii. Students who obtain examination exemption after the conclusion of the EORE, thus pass the rotation automatically.
 - iii. Students who do not obtain exemption from the semester examination after the conclusion of the EORE, must therefore sit the examination at the end of the relevant semester.
 - iv. In keeping with UP regulations, these students, who are completing their studies ("finalists"), who have only one course (rotation) to complete in order to comply with all the requirements for the MBChB degree, and who have not obtained examination exemption, may apply to sit a "special examination" the following week (at a time earlier than the semester examination where applicable). This examination (which will take place at an earlier time), must preferably be scheduled for the Monday or Tuesday of the following week. The department determines the format and due to the fact that the student has already been through the external evaluation process, the presence of an external examiner at the special examination is optional,

although recommended. The final mark comprises the examination mark and must be 50% or more to pass. The marks must be available by the Wednesday in order that these students' marks can be submitted to the EMM, which will be held on that day.

v. The objectives of the EMM for this category of students are:

- Identification of the students who have passed the special examination. These students complete the programme, and a special mini oath-taking ceremony is arranged for them; and
 - Identification of the students who have failed the special examination. These students fail the course, must repeat the relevant rotation and must therefore be referred to Student Administration.
2. Students who are "finalists", but who are repeating the current rotation (all circumstances – previously, or at a recent EMM, identified as having failed): MBChB
- i. These students do the EORE as all other students. The objective is to obtain a pass mark. The continuous evaluation marks and the EORE mark contribute to the rotation mark, which, in this case, is also the final mark. The mark must be 50% or more, but the maximum that will be indicated on the form, is "50H".
 - ii. On the first Wednesday after the conclusion of the rotation, an EMM will be held at 13:00 (or another time slot as arranged), to evaluate the achievement of these students who are repeating the current rotation. The objectives of this EMM are:
 - Identification of the students who have passed the EORE/examination. These students thus complete the MBChB degree programme and a mini oath-taking ceremony will be arranged for them; and
 - Identification of the students who have failed the EORE/examination. These students thus fail the rotation, must repeat the relevant rotation and must therefore be referred to Student Administration.
 - iii. Students in this category, who are only repeating a 3,5 week rotation, will follow the exact same route, but a unique EMM will be arranged shortly after completion of the EORE/examination. The same objectives will apply.

Curriculum: Year 1

Minimum credits: 142

Fundamental modules

Academic information management 101 (AIM 101) - Credits: 6.00

Academic English for Health Sciences 111 (ELH 111) - Credits: 6.00

Academic English for Health Sciences (MBChB and BChD) 112 (ELH 112) - Credits: 6.00

Academic orientation 110 (UPO 110) - Credits: 0.00

Core modules

Molecule to organism 121 (BOK 121) - Credits: 40.00

Chemistry 151 (CMY 151) - Credits: 16.00

Science and world views 155 (FIL 155) - Credits: 6.00

Orientation 120 (GNK 120) - Credits: 5.00

People and their environment 127 (GNK 127) - Credits: 10.00

Introduction to clinical pharmacotherapy 128 (GNK 128) - Credits: 10.00

People and their environment 112 (MGW 112) - Credits: 6.00

Molecular and cell biology 111 (MLB 111) - Credits: 16.00

Medical terminology 180 (MTL 180) - Credits: 12.00

Physics for biology students 131 (PHY 131) - Credits: 16.00

Longitudinal clinic attachment programme 180 (LCP 180) - Credits: 0.00

Elective modules

Special study module 121 (SMO 121) - Credits: 5.00

Curriculum: Year 2

Minimum credits: 185

Fundamental modules

Longitudinal clinic attachment programme 280 (LCP 280) - Credits: 0.00

Core modules

Homeostasis 280 (BOK 280) - Credits: 42.00

People and their environment 284 (BOK 284) - Credits: 25.00

Introduction to clinical medicine 283 (GNK 283) - Credits: 10.00

Basic emergency care 286 (GNK 286) - Credits: 5.00

Anatomy (Dissection) 288 (GNK 288) - Credits: 37.00

Generic procedural skills 280 (GPS 280) - Credits: 2.00

Infectious diseases 287 (BOK 287) - Credits: 23.00

Pathological conditions 285 (BOK 285) - Credits: 22.00

Elective modules

Special study module 211 (SMO 211) - Credits: 5.00

Special study module 281 (SMO 281) - Credits: 5.00

Curriculum: Year 3

Minimum credits: 203

Fundamental modules

Generic procedural skills 380 (GPS 380) - Credits: 5.00

Special study module 311 (SMO 311) - Credits: 5.00

Special study module 380 (SMO 380) - Credits: 5.00

Special study module 382 (SMO 382) - Credits: 5.00

Longitudinal clinic attachment programme 380 (LCP 380) - Credits: 0.00

Core modules

Abdomen and mamma 380 (BOK 380) - Credits: 50.00

Pregnancy and neonatology 382 (BOK 382) - Credits: 55.00

Heart and blood vessels 381 (GNK 381) - Credits: 25.00

Lungs and chest 383 (GNK 383) - Credits: 20.00

Haematological malignancies 386 (GNK 386) - Credits: 5.00

Elective 488 (GNK 488) - Credits: 23.00

Curriculum: Year 4

Minimum credits: 212

Fundamental modules

Special study module 411 (SMO 411) - Credits: 2.00

Core modules

Genital and urinary tract diseases 480 (BOK 480) - Credits: 62.00

Nervous system 482 (BOK 482) - Credits: 28.00
Preceptorship 385 (GNK 385) - Credits: 10.00
Disorders of childhood 481 (GNK 481) - Credits: 31.00
Musculoskeletal conditions 483 (GNK 483) - Credits: 28.00
Endocrinology 484 (GNK 484) - Credits: 6.00
Head and neck 485 (GNK 485) - Credits: 33.00
Ageing 486 (GNK 486) - Credits: 8.00
Skin 487 (GNK 487) - Credits: 5.00
Longitudinal clinic attachment programme 480 (LCP 480) - Credits: 0.00
Forensic medicine 482 (GNK 482) - Credits: 6.00

Curriculum: Year 5

Minimum credits: 239

Fundamental modules

Special study module 511 (SMO 511) - Credits: 2.00
Special study module 512 (SMO 512) - Credits: 2.00
Longitudinal clinic attachment programme 580 (LCP 580) - Credits: 0.00

Core modules

Psychiatry and social dysfunction 581 (GNK 581) - Credits: 34.00
Health and healthcare 582 (GNK 582) - Credits: 27.00
Traumatology 583 (GNK 583) - Credits: 25.00
Pharmacotherapy 585 (GNK 585) - Credits: 7.00
Anaesthesiology 586 (GNK 586) - Credits: 13.00
Internal medicine 683 (GNK 683) - Credits: 45.00
Internal medicine related sub-disciplines 684 (GNK 684) - Credits: 20.00
Psychiatry 685 (GNK 685) - Credits: 40.00
Forensic medicine morning rotation 587 (GNK 587) - Credits: 4.00

Curriculum: Final year

Minimum credits: 288

Core modules

Surgery 680 (GNK 680) - Credits: 52.00
Orthopaedics 681 (GNK 681) - Credits: 17.00
Anaesthesiology 682 (GNK 682) - Credits: 20.00
Internal medicine 683 (GNK 683) - Credits: 45.00
Internal medicine related sub-disciplines 684 (GNK 684) - Credits: 20.00
Psychiatry 685 (GNK 685) - Credits: 40.00
Obstetrics and gynaecology 686 (GNK 686) - Credits: 40.00
Paediatrics 687 (GNK 687) - Credits: 40.00
Community-based education 688 (GNK 688) - Credits: 20.00
Diagnostic laboratory medicine 689 (GNK 689) - Credits: 11.00
Urology 690 (GNK 690) - Credits: 11.00
Family medicine 691 (GNK 691) - Credits: 20.00
Community obstetrics 692 (GNK 692) - Credits: 20.00

Neurology 693 (GNK 693) - Credits: 15.00

Postgrad Diploma/Certificate

PGDip Family Medicine (10220122)

Duration of study 1 year

Contact Dr RPG Botha gerhard.botha@up.ac.za +27 (0)123192300

Admission requirements

Prospective students must be in possession of a MBChB degree or equivalent qualification. South African candidates must be registered as a medical doctor with the Health Professions Council of South Africa and non-South Africans as a medical doctor with the Licensing authority in their country of origin and present acceptable documentary proof to this effect.

Other programme-specific information

Note: Physicians who wish to complete only one (or a few) of the module(s), will be allowed to register for only those modules.

Examinations and pass requirements

Assignments as prescribed by the head of department, must be submitted for each of the eight modules. If a student does not achieve at least 50%, one resubmission is permitted for each module.

A minimum final mark of 50% is required as a pass mark for each module.

Pass with distinction

An average of at least 75% in the four compulsory modules and the four elective modules is required to obtain the diploma with distinction.

Curriculum: Year 1

Minimum credits: 160

Core modules

Emergency medicine 780 (FEM 780) - Credits: 20.00

Family-oriented patient care 780 (FFM 780) - Credits: 20.00

Practice management 780 (FMX 780) - Credits: 20.00

Philosophy and principles of family medicine 780 (HAK 780) - Credits: 20.00

Elective modules

Chronic diseases 781 (FMD 781) - Credits: 10.00

Psychiatry 781 (FMF 781) - Credits: 10.00

Infectious diseases 781 (FMI 781) - Credits: 10.00

Sports medicine 781 (FMS 781) - Credits: 10.00

Curriculum: Final year

Minimum credits: 160

Core modules

Emergency medicine 780 (FEM 780) - Credits: 20.00
Family-oriented patient care 780 (FFM 780) - Credits: 20.00
Practice management 780 (FMX 780) - Credits: 20.00
Philosophy and principles of family medicine 780 (HAK 780) - Credits: 20.00

Elective modules

Clinically applied anatomy 782 (FMA 782) - Credits: 10.00
Chronic diseases 781 (FMD 781) - Credits: 10.00
Psychiatry 781 (FMF 781) - Credits: 10.00
Infectious diseases 781 (FMI 781) - Credits: 10.00
Sports medicine 781 (FMS 781) - Credits: 10.00

PGDip General Ultrasound (10220096)

Duration of study 2 years

Contact Dr HM Swanepoel hester.swanepoel@up.ac.za +27 (0)129972438

Admission requirements

Prospective students must be in possession of an MBChB degree. All candidates must be registered as a medical doctor with the Health Professions Council of South Africa. Due to limited resources a selection procedure might need to be applied.

Other programme-specific information

Select one of the following at the end of the first semester:

- Cardiac ultrasound
- Obstetrics
- General
- Vascular

Examinations and pass requirements

- Students must obtain a minimum mark of 50% in all the practical assessments and assignments assigned every semester.
- A practical examination (ULT 751) will take place at the end of the two-year programme.
- The final written examination (ULT 750) takes the form of a portfolio of the continuous written assessments completed during each module.
- A minimum final mark of 50% is required in both the portfolio and the practical examination to pass.

Pass with distinction

An average of at least 75% in all modules is required to obtain the diploma with distinction.

Curriculum: Year 1

Minimum credits: 60

Core modules

Applied ultrasound imaging of the body 710 (ULT 710) - Credits: 4.00

Applied ultrasound physics 711 (ULT 711) - Credits: 2.00
Applied ultrasound pathology 712 (ULT 712) - Credits: 4.00
Basic abdominal ultrasound 713 (ULT 713) - Credits: 10.00
Basic pelvic ultrasound 720 (ULT 720) - Credits: 14.00

Elective modules

Ultrasound of small body parts 721 (ULT 721) - Credits: 14.00
Elective module: Obstetrics ultrasound 723 (ULT 723) - Credits: 12.00
Elective module: General ultrasound 724 (ULT 724) - Credits: 12.00
Elective module: Vascular ultrasound 725 (ULT 725) - Credits: 12.00
Elective module: Cardiac ultrasound 722 (ULT 722) - Credits: 12.00

Curriculum: Final year

Minimum credits: 60

Core modules

Abdominal ultrasound 730 (ULT 730) - Credits: 14.00
Obstetric ultrasound 731 (ULT 731) - Credits: 14.00
Pelvic ultrasound 740 (ULT 740) - Credits: 8.00

Elective modules

Elective module: Cardiac ultrasound 732 (ULT 732) - Credits: 12.00
Elective module: Obstetrics ultrasound 733 (ULT 733) - Credits: 12.00
Elective module: General ultrasound 734 (ULT 734) - Credits: 12.00
Elective module: Vascular ultrasound 735 (ULT 735) - Credits: 12.00
Elective module: Cardiac ultrasound 742 (ULT 742) - Credits: 12.00
Elective module: Obstetrics ultrasound 743 (ULT 743) - Credits: 12.00
Elective module: General ultrasound 744 (ULT 744) - Credits: 12.00
Elective module: Vascular ultrasound 745 (ULT 745) - Credits: 12.00
Final written examination 750 (ULT 750) - Credits: 1.00
Practical examination 751 (ULT 751) - Credits: 1.00

PGDip Group Activities (10220151)

Duration of study 1 year

Admission requirements

- Subject to the stipulations of the General Regulations, the BOccTher degree or equivalent qualification as well as registration with the Health Professions Council of South Africa is required.
- A student must fill at least a part-time post regarded by the head of department as appropriate for the field of study in question.

Examinations and pass requirements

(i) Admission

A continuous evaluation mark of at least 50% as well as satisfactory class attendance is required for admission to the examination.

(ii) **Pass requirement**

A subminimum of 50% must be obtained in both the written and the oral/ practical sections of the examination, with a final mark of at least 50% to pass.

(iii) **Second examination**

Students will be admitted to any second examination granted, six months after the original examination has taken place.

Pass with distinction

The diploma is issued with distinction to a student who obtains an average of at least 75% in all prescribed modules.

Curriculum: Final year

Minimum credits: 120

Fundamental modules

[Group techniques in occupational therapy 700](#) (GRT 700) - Credits: 60.00

[Interpersonal communication 700](#) (IKX 700) - Credits: 60.00

PGDip Hand Therapy (10220161)

Duration of study 1 year

Programme information

The programme extends over one academic year and is presented in four blocks. (The number of blocks and duration may be adjusted after consultation between the lecturers and students.)

Note: Commencement of studies must be discussed with the head of department, as the programme is presented every second year.

Admission requirements

- Subject to the stipulations of the General Regulations, the BOccTher degree or an equivalent qualification or the BPhysT degree or an equivalent qualification is required for admission as well as registration as an occupational therapist/physiotherapist with the Health Professions Council of South Africa.
- A student must fill at least a part-time position that is deemed by the head of department to be appropriate for the field of study in question.

Additional requirements

Examinations and pass requirements

(i) **Pass requirements**

In the case of a written and oral/practical examination, a subminimum of 50% is required in each of the written as well as the oral/practical sections of the examination, with a final mark (continuous evaluation mark and

examination mark) of at least 50% to pass in a module.

(ii) **Admission to the examination**

Students must have attended all practicals and submitted all assignments, failing which admission to the examination will not be granted.

(iii) **Second examination**

The dates for second examinations are arranged in consultation with the head of department, with the proviso that this will take place not later than the next examination period.

Pass with distinction

The diploma is awarded with distinction to a student who obtains at least 75% in (ADM 701) Advanced clinical management in hand therapy 701, and an average of at least 75% in the other modules.

Curriculum: Final year

Minimum credits: 120

Fundamental modules

Anatomy 701 (AAN 701) - Credits: 10.00

Advanced clinical management in hand therapy 701 (ADM 701) - Credits: 50.00

Biomechanics and ergonomics 701 (BEX 701) - Credits: 10.00

Physiology and pathophysiology 701 (FIP 701) - Credits: 10.00

Clinical skills in hand therapy 701 (KVH 701) - Credits: 40.00

PGDip Handling of Childhood Disability (10220171)

Duration of study 1 year

Programme information

Note: Commencement of studies must be cleared with the head of department as the programme is presented every second year.

Admission requirements

- A career-oriented bachelor's degree or an equivalent qualification which is regarded as applicable for admission to study by the head of department.
- At least one year professional experience after the degree or equivalent qualification has been obtained, in an area that is regarded as applicable by the head of department.
- A student must fill at least a part-time post regarded as appropriate by the head of department for the field of study in question.

Additional requirements

Examinations and pass requirements

Students are required to attend all lectures and practical work to the satisfaction of the head of department, for admission to the examination.

Examination in the written, oral and/or practical components of an examination must be passed with a final mark of at least 50%, to pass in the module in question.

Pass with distinction

The diploma is awarded with distinction to a student who obtains an average of at least 75% in all the prescribed modules.

Curriculum: Final year

Minimum credits: 120

Fundamental modules

Normal development 701 (DCD 701) - Credits: 20.00

Identification 702 (DCD 702) - Credits: 30.00

Intervention for developmental disabilities 703 (DCD 703) - Credits: 35.00

Intervention for disabilities 704 (DCD 704) - Credits: 35.00

PGDip Occupational Health (10220084)

Duration of study 2 years

Programme information

A curriculum comprises prescribed modules and/or a research report compiled in conjunction with the head of department or Chairperson of the School. Details regarding the curriculum and syllabuses are published in a brochure which is available on request from the department or School. Students may, with the approval of the Head of the Department of Public Health Medicine or the Chairperson of the School of Health Systems and Public Health, register simultaneously for Part I and Part II of a diploma which extends over two academic years.

Admission requirements

For admission to the Postgraduate Diplomas in Tropical Medicine and Health, Occupational Medicine and Health, and Public Health Medicine, the MBChB degree or an equivalent qualification with a completed internship of at least one year, plus professional (work) experience (post-internship) of at least one year that is regarded as applicable by the Head of the Department of Public Health Medicine or the Chairperson of the School of Health Systems and Public Health, is required.

Additional requirements

Registration as a special student in the Faculty in order to pass a status examination

i. Candidates will be required to first register as a special student in the Faculty, in order to pass in a status examination, in the following instances:

- A three-year bachelor's degree with less than five years' applicable practical (work) experience; or
- A four-year bachelor's degree with less than two years' applicable practical (work) experience; or
- Any applicant in possession of an approved bachelor's degree, who the School's Selection Committee deems fit to register as a special student.

NB:

In accordance with the criteria of the Senate of the University, the applications for admission of all such candidates must, apart from any Faculty requirements, also be submitted to the University Senate for approval.

All candidates accepted for postgraduate study (MPH or the Postgraduate Diplomas) must be in possession of a National Senior Certificate with admission for degree purposes.

ii. Pass requirements for the status examination

- At least 60% must be obtained in the status examination.
- The status examination will be written in June.
- iii. The application of a student who has passed the status examination must be submitted to the Senate of the University for approval. Successful students may then enrol for the degree programme in the following academic year.

Other selection criteria

(Each on a scale of one to five.)

- Academic merit
- National/International need for public health
- Under-represented groups in public health
- Public health related employment
- Track record – e.g. employment, academic, community-building, etc.

Examinations and pass requirements

Students must attend all lectures and practical classes to the satisfaction of the head of department or the Chairperson of the School before they will be admitted to the examinations. Written, oral and/or practical examinations must be passed in all the modules. All diploma programme summative assessments will be externally moderated. The minimum pass mark for prescribed modules and the summative assessment is 50%. Only with the approval of the Chairperson of the School, on the recommendation of the head of department, will a student be allowed to continue his or her studies after having failed two modules (or the same module twice). A second examination in a module (including the diploma-specific summative assessment) is arranged in conjunction with the head of department.

Pass with distinction

A diploma is awarded with distinction to a student who has obtained a mark of at least 75% for the externally moderated assessment component as well as a simple (unweighted) average of at least 75% of all the marks for the other required modules for the relevant diploma; excluding PHM 870 Learning in public health 870.

General information

Concurrent registration for two study programmes

- In accordance with the stipulations of the General Regulations, which is mutatis mutandis applicable in the case of postgraduate diploma study, the permission of the Dean is required for concurrent registration, subject to the regulations applicable to the fields of study in question and to any other stipulations the Dean may prescribe. Such a concession may be withdrawn by the Dean if the student does not perform satisfactorily – all assignments and coursework must be completed on time. Concurrent registration will not be accepted as a reason for poor performance or not meeting deadlines for both study programmes.
- In the case of registering concurrently for two study programmes in the School of Health Systems and Public Health and elsewhere, students must obtain the written consent of both the coordinator of their current programme and the coordinator of the second programme (or the track co-ordinator in the case of the MPH),

and submit it with a substantiating letter to the School's Academic Programme Committee, for recommendation by the Chairperson of the School, after which the application is submitted to the Dean for approval.

- iii. The School of Health Systems and Public Health states that concurrent registration for two study programmes is a privilege and not a right.
- iv. Concurrent registration must be applied for annually and is granted based on academic performance in the primary degree/diploma programme. If the current field of study is a master's degree, then the second field of study can be a postgraduate diploma.
- v. If the current field of study is a postgraduate diploma, then the second field of study can be another postgraduate diploma.

Curriculum: Year 1

Minimum credits: 52

Core modules

Assignment in occupational health 770 (AOH 770) - Credits: 30.00
Introduction to environmental and occupational health 770 (EOH 770) - Credits: 10.00
Occupational health law 771 (HCL 771) - Credits: 10.00
Primary epidemiology 772 (HME 772) - Credits: 10.00
Learning in public health 770 (PHM 770) - Credits: 5.00
Human resource management and industrial sociology 771 (SCM 771) - Credits: 10.00

Elective modules

Basis in environmental health 770 (EHM 770) - Credits: 5.00
Managing occupational health services 773 (HCM 773) - Credits: 10.00
Principles of occupational medicine 770 (OCM 770) - Credits: 10.00
Principles of occupational hygiene and toxicology 770 (OHT 770) - Credits: 10.00
Principles of quality assurance 770 (TQM 770) - Credits: 10.00
Health promotion 770 (SCP 770) - Credits: 5.00
Health promotion in practice 772 (SCP 772) - Credits: 5.00
Communication in health 771 (SCC 771) - Credits: 5.00
Human nutrition and public health 773 (CDS 773) - Credits: 5.00

Curriculum: Final year

Minimum credits: 130

Core modules

Assignment in occupational health 770 (AOH 770) - Credits: 30.00
Introduction to environmental and occupational health 770 (EOH 770) - Credits: 10.00

- At least 60% must be obtained in the status examination.
 - The status examination will be written in June.
- iii. The application of a student who has passed the status examination must be submitted to the Senate of the

University for approval. Successful students may then enrol for the degree programme in the following academic year.

Other selection criteria

(Each on a scale of one to five.)

- Academic merit
- National/International need for public health
- Under-represented groups in public health
- Public health related employment
- Track record – e.g. employment, academic, community-building, etc.

Examinations and pass requirements

Students must attend all lectures and practical classes to the satisfaction of the head of department or the Chairperson of the School before they will be admitted to the examinations. Written, oral and/or practical examinations must be passed in all the modules. All diploma programme summative assessments will be externally moderated. The minimum pass mark for prescribed modules and the summative assessment is 50%. Only with the approval of the Chairperson of the School, on the recommendation of the head of department, will a student be allowed to continue his or her studies after having failed two modules (or the same module twice). A second examination in a module (including the diploma-specific summative assessment) is arranged in conjunction with the head of department.

Pass with distinction

A diploma is awarded with distinction to a student who has obtained a mark of at least 75% for the externally moderated assessment component as well as a simple (unweighted) average of at least 75% of all the marks for the other required modules for the relevant diploma; excluding PHM 870 Learning in public health 870.

General information

Concurrent registration for two study programmes

- In accordance with the stipulations of the General Regulations, which is mutatis mutandis applicable in the case of postgraduate diploma study, the permission of the Dean is required for concurrent registration, subject to the regulations applicable to the fields of study in question and to any other stipulations the Dean may prescribe. Such a concession may be withdrawn by the Dean if the student does not perform satisfactorily – all assignments and coursework must be completed on time. Concurrent registration will not be accepted as a reason for poor performance or not meeting deadlines for both study programmes.
- In the case of registering concurrently for two study programmes in the School of Health Systems and Public Health and elsewhere, students must obtain the written consent of both the coordinator of their current programme and the coordinator of the second programme (or the track co-ordinator in the case of the MPH), and submit it with a substantiating letter to the School's Academic Programme Committee, for recommendation by the Chairperson of the School, after which the application is submitted to the Dean for approval.
- The School of Health Systems and Public Health states that concurrent registration for two study programmes is a privilege and not a right.
- Concurrent registration must be applied for annually and is granted based on academic performance in the primary degree/diploma programme. If the current field of study is a master's degree, then the second field of

study can be a postgraduate diploma.

- v. If the current field of study is a postgraduate diploma, then the second field of study can be another postgraduate diploma.

Curriculum: Year 1

Minimum credits: 130

Core modules

Introduction to environmental and occupational health 770 (EOH 770) - Credits: 10.00
Occupational health law 771 (HCL 771) - Credits: 10.00
Primary epidemiology 772 (HME 772) - Credits: 10.00
Clinical skills in occupational medicine 771 (OCM 771) - Credits: 5.00
Learning in public health 770 (PHM 770) - Credits: 5.00
Human resource management and industrial sociology 771 (SCM 771) - Credits: 10.00

Elective modules

Assignment in occupational health 770 (AOH 770) - Credits: 30.00
Managing occupational health services 773 (HCM 773) - Credits: 10.00
Principles of occupational medicine 770 (OCM 770) - Credits: 10.00
Principles of occupational hygiene and toxicology 770 (OHT 770) - Credits: 10.00

Curriculum: Final year

Minimum credits: 130

PGDip Option: Executive Leadership (10220075)

Duration of study 2 years

Programme information

A curriculum comprises prescribed modules and/or a research report compiled in conjunction with the head of department or Chairperson of the School. Details regarding the curriculum and syllabuses are

published in a brochure which is available on request from the department or School. Students may, with the approval of the Head of the Department of Public Health Medicine or the Chairperson of the School of Health Systems and Public Health, register simultaneously for Part I and Part II of a diploma which extends over two academic years.

Admission requirements

- A four-year bachelor's degree, plus at least two years' applicable work experience; **or**
- A three-year bachelor's degree plus at least five years' applicable work experience.

Additional requirements

Registration as a special student in the Faculty in order to pass a status examination

i. Candidates will be required to first register as a special student in the Faculty, in order to pass in a status examination, in the following instances:

- A three-year bachelor's degree with less than five years' applicable practical (work) experience; or
- A four-year bachelor's degree with less than two years' applicable practical (work) experience; or
- Any applicant in possession of an approved bachelor's degree, who the School's Selection Committee deems fit to register as a special student.

NB:

In accordance with the criteria of the Senate of the University, the applications for admission of all such candidates must, apart from any Faculty requirements, also be submitted to the University Senate for approval. All candidates accepted for postgraduate study (MPH or the Postgraduate Diplomas) must be in possession of a National Senior Certificate with admission for degree purposes.

ii. Pass requirements for the status examination

- At least 60% must be obtained in the status examination.
 - The status examination will be written in June.
- iii. The application of a student who has passed the status examination must be submitted to the Senate of the University for approval. Successful students may then enrol for the degree programme in the following academic year.

Other selection criteria

(Each on a scale of one to five.)

- Academic merit
- National/International need for public health
- Under-represented groups in public health
- Public health related employment

PGDip Public Health Medicine (10220094)

Duration of study 2 years

Programme information

A curriculum comprises prescribed modules and/or a research report compiled in conjunction with the head of department or Chairperson of the School. Details regarding the curriculum and syllabuses are published in a brochure which is available on request from the department or School. Students may, with the approval of the Head of the Department of Public Health Medicine or the Chairperson of the School of Health Systems and Public Health, register simultaneously for Part I and Part II of a diploma which extends over two academic years.

Admission requirements

For admission to the Postgraduate Diplomas in Tropical Medicine and Health, Occupational Medicine and Health, and Public Health Medicine, the MBChB degree or an equivalent qualification with a completed internship of at least one year plus professional (work) experience (post-internship) of at least one year that is regarded as applicable by the Head of the Department of Public Health Medicine or the Chairperson of the School of Health Systems and Public Health is required.

Additional requirements

Registration as a special student in the Faculty in order to pass a status examination

i. Candidates will be required to first register as a special student in the Faculty, in order to pass in a status examination, in the following instances:

- A three-year bachelor's degree with less than five years' applicable practical (work) experience; or
- A four-year bachelor's degree with less than two years' applicable practical (work) experience; or

General information

Concurrent registration for two study programmes

- In accordance with the stipulations of the General Regulations, which is mutatis mutandis applicable in the case of postgraduate diploma study, the permission of the Dean is required for concurrent registration, subject to the regulations applicable to the fields of study in question and to any other stipulations the Dean may prescribe. Such a concession may be withdrawn by the Dean if the student does not perform satisfactorily – all assignments and coursework must be completed on time. Concurrent registration will not be accepted as a reason for poor performance or not meeting deadlines for both study programmes.
- In the case of registering concurrently for two study programmes in the School of Health Systems and Public Health and elsewhere, students must obtain the written consent of both the coordinator of their current programme and the coordinator of the second programme (or the track co-ordinator in the case of the MPH), and submit it with a substantiating letter to the School's Academic Programme Committee, for recommendation by the Chairperson of the School, after which the application is submitted to the Dean for approval.
- The School of Health Systems and Public Health states that concurrent registration for two study programmes is a privilege and not a right.
- Concurrent registration must be applied for annually and is granted based on academic performance in the primary degree/diploma programme. If the current field of study is a master's degree, then the second field of study can be a postgraduate diploma.
- If the current field of study is a postgraduate diploma, then the second field of study can be another postgraduate diploma.

Curriculum: Year 1

Minimum credits: 125

Core modules

Principles of communicable disease control 771 (CDC 771) - Credits: 10.00
Seminars in tropical health (Agent) 772 (CDC 772) - Credits: 10.00
Seminars in tropical health (Environment) 773 (CDC 773) - Credits: 10.00
Seminars in tropical health (Host) 774 (CDC 774) - Credits: 10.00
Clinical tropical medicine 770 (CDS 770) - Credits: 5.00
Principles of demography 770 (DEG 770) - Credits: 10.00
Basis in environmental health 770 (EHM 770) - Credits: 5.00
Legislation and health 770 (HCL 770) - Credits: 10.00
Health policy and systems 772 (HCM 772) - Credits: 10.00
Primary epidemiology 772 (HME 772) - Credits: 10.00
Group music: Teaching and learning (2) 274 (MOP 274) - Credits: 20.00
Assignment in public health 770 (PHA 770) - Credits: 30.00

Curriculum: Final year

Minimum credits: 125

Core modules

Principles of communicable disease control 771 (CDC 771) - Credits: 10.00
Seminars in tropical health (Agent) 772 (CDC 772) - Credits: 10.00

PGDip Tropical Medicine and Health (10220063)

Duration of study 2 years

Programme information

A curriculum comprises prescribed modules and/or a research report compiled in conjunction with the head of department or Chairperson of the School. Details regarding the curriculum and syllabuses are published in a brochure which is available on request from the department or School. Students may, with the approval of the Head of the Department of Public Health Medicine or the Chairperson of the School of Health Systems and Public Health, register simultaneously for Part I and Part II of a diploma which extends over two academic years.

Admission requirements

For admission to the Postgraduate Diplomas in Tropical Medicine and Health, Occupational Medicine and Health, and Public Health Medicine, the MBChB degree or an equivalent qualification with a completed internship of at least one year plus professional (work) experience (post-internship) of at least one year that is regarded as applicable by the Head of the Department of Public Health Medicine or the Chairperson of the School of Health Systems and Public Health is required.

Additional requirements

Registration as a special student in the Faculty in order to pass a status examination

i. Candidates will be required to first register as a special student in the Faculty, in order to pass in a status examination, in the following instances:

- A three-year bachelor's degree with less than five years' applicable practical (work) experience; or
- A four-year bachelor's degree with less than two years' applicable practical (work) experience; or
- Any applicant in possession of an approved bachelor's degree, who the School's Selection Committee deems fit to register as a special student.

NB:

In accordance with the criteria of the Senate of the University, the applications for admission of all such candidates must, apart from any Faculty requirements, also be submitted to the University Senate for approval. All candidates accepted for postgraduate study (MPH or the Postgraduate Diplomas) must be in possession of a National Senior Certificate with admission for degree purposes.

ii. Pass requirements for the status examination

- At least 60% must be obtained in the status examination.
- The status examination will be written in June.

iii. The application of a student who has passed the status examination must be submitted to the Senate of the University for approval. Successful students may then enrol for the degree programme in the following academic year.

Other selection criteria

(Each on a scale of one to five.)

- Academic merit
- National/International need for public health
- Under-represented groups in public health
- Public health related employment
- Track record – e.g. employment, academic, community-building, etc.

Examinations and pass requirements

Students must attend all lectures and practical classes to the satisfaction of the head of department or the Chairperson of the School before they will be admitted to the examinations. Written, oral and/or practical examinations must be passed in all the modules. All diploma programme summative assessments will be externally moderated. The minimum pass mark for prescribed modules and the summative assessment is 50%. Only with the approval of the Chairperson of the School, on the recommendation of the head of department, will a student be allowed to continue his or her studies

after having failed two modules (or the same module twice). A second examination in a module (including the diploma-specific summative assessment) is arranged in conjunction with the head of department.

Pass with distinction

A diploma is awarded with distinction to a student who has obtained a mark of at least 75% for the externally moderated assessment component as well as a simple (unweighted) average of at least 75% of all the marks for the other required modules for the relevant diploma; excluding PHM 870 Learning in public health 870.

General information

Concurrent registration for two study programmes

- i. In accordance with the stipulations of the General Regulations, which is mutatis mutandis applicable in the case of postgraduate diploma study, the permission of the Dean is required for concurrent registration, subject to the regulations applicable to the fields of study in question and to any other stipulations the Dean may prescribe. Such a concession may be withdrawn by the Dean if the student does not perform satisfactorily – all assignments and coursework must be completed on time. Concurrent registration will not be accepted as a reason for poor performance or not meeting deadlines for both study programmes.
- ii. In the case of registering concurrently for two study programmes in the School of Health Systems and Public Health and elsewhere, students must obtain the written consent of both the coordinator of their current programme and the coordinator of the second programme (or the track co-ordinator in the case of the MPH), and submit it with a substantiating letter to the School's Academic Programme Committee, for recommendation by the Chairperson of the School, after which the application is submitted to the Dean for approval.
- iii. The School of Health Systems and Public Health states that concurrent registration for two study programmes is a privilege and not a right.
- iv. Concurrent registration must be applied for annually and is granted based on academic performance in the primary degree/diploma programme. If the current field of study is a master's degree, then the second field of study can be a postgraduate diploma.
- v. If the current field of study is a postgraduate diploma, then the second field of study can be another postgraduate diploma.

Curriculum: Final year

Minimum credits: 50

Core modules

Principles of communicable disease control 771 (CDC 771) - Credits: 10.00

Seminars in tropical health (Agent) 772 (CDC 772) - Credits: 10.00

Seminars in tropical health (Environment) 773 (CDC 773) - Credits: 10.00

Seminars in tropical health (Host) 774 (CDC 774) - Credits: 10.00

Clinical tropical medicine 770 (CDS 770) - Credits: 5.00

Learning in public health 770 (PHM 770) - Credits: 5.00

PGDip Vocational Rehabilitation (10220141)

Duration of study 1 year

Programme information

Please Note: Commencement of studies must be discussed with the head of department, as the programme is presented every second year.

Admission requirements

- Subject to the stipulations of the General Regulations, the BOccTher degree or an equivalent qualification as well as registration as an Occupational Therapist with the Health Professions Council of South Africa is required for admission.
- A student must fill at least a part-time post regarded by the head of department as appropriate for the field of study in question.

Examinations and pass requirements

The sequence of the examinations in the prerequisite subjects will be determined by the head of the department, depending on the candidate's choice of a major subject.

Pass with distinction

The diploma is awarded with distinction to a student who has obtained an average of at least 75% in all the subjects.

Curriculum: Final year

Minimum credits: 120

Fundamental modules

Vocational Rehabilitation 700 (BRH 700) - Credits: 30.00

Financial administration 702 (FIA 702) - Credits: 30.00

Groups in occupational therapy 701 (GRA 701) - Credits: 30.00

Work study 701 (WSD 701) - Credits: 30.00

Postgrad Dipl in Dentistry Aesthetic Dentistry (11220022)

Duration of study 1 year

Admission requirements

Subject to the stipulations of the General Regulations, the BChD degree or an equivalent qualification is required.

Other programme-specific information

Contact time

The contact time in the major field of study is determined by the head of the department concerned and approved by the Dean. It includes systematic tuition as well as clinical/practical assignments.

Examinations and pass requirements

The examination in the basic subject and the main field of study may take place every semester. However, only one subject may be written per semester. In order to be admitted to the examination in the main field of study the student must pass the basic subject. A final mark of at least 50% is required to pass.

Subject to exceptions approved by the Dean, on the recommendation of the head of department, a student may not enter for the postgraduate diploma's examination in the same subject more than twice.

Pass with distinction

The diploma is awarded with distinction to students who obtain at least 75% in both the main field of study and the basic subject.

Curriculum: Final year

Minimum credits: 100

Fundamental modules

Aesthetic dentistry 700 (ADX 700) - Credits: 100.00

Dental materials 710 (THM 710) - Credits: 12.00

Postgrad Dipl in Dentistry Community Dentistry (11220017)

Duration of study 1 year

Admission requirements

Subject to the stipulations of the General Regulations, the BChD degree or an equivalent qualification is required.

Other programme-specific information

Contact time

The contact time in the major field of study is determined by the head of the department concerned and approved by the Dean. It includes systematic tuition as well as clinical/practical assignments.

Examinations and pass requirements

The examination in the basic subject and the main field of study may take place every semester. However, only one subject may be written per semester. In order to be admitted to the examination in the main field of study the student must pass the basic subject. A final mark of at least 50% is required to pass.

Subject to exceptions approved by the Dean, on the recommendation of the head of department, a student may not enter for the postgraduate diploma's examination in the same subject more than twice.

Pass with distinction

The diploma is awarded with distinction to students who obtain at least 75% in both the main field of study and the basic subject.

Curriculum: Year 1

Minimum credits: 100

Fundamental modules

Community dentistry 700 (GTH 700) - Credits: 100.00

Curriculum: Final year

Minimum credits: 100

Fundamental modules

Community dentistry 700 (GTH 700) - Credits: 100.00

Postgrad Dipl in Dentistry Dental Materials (11220021)

Duration of study 1 year

Admission requirements

Subject to the stipulations of the General Regulations, the BChD degree or an equivalent qualification is required.

Other programme-specific information

Contact time

The contact time in the major field of study is determined by the head of the department concerned and approved by the Dean. It includes systematic tuition as well as clinical/practical assignments.

Examinations and pass requirements

The examination in the basic subject and the main field of study may take place every semester. However, only one subject may be written per semester. In order to be admitted to the examination in the main field of study the student must pass the basic subject. A final mark of at least 50% is required to pass.

Subject to exceptions approved by the Dean, on the recommendation of the head of department, a student may not enter for the postgraduate diploma's examination in the same subject more than twice.

Pass with distinction

The diploma is awarded with distinction to students who obtain at least 75% in both the main field of study and the basic subject.

Curriculum: Final year

Minimum credits: 100

Core modules

Applied oral biology 710 (MDB 710) - Credits: 12.00

Prosthodontics 701 (PRD 701) - Credits: 100.00

Postgrad Dipl in Dentistry Radiography (11220025)

Duration of study 1 year

Admission requirements

Subject to the stipulations of the General Regulations, the BChD degree or an equivalent qualification is required.

Other programme-specific information

Contact time

The contact time in the major field of study is determined by the head of the department concerned and approved by the Dean. It includes systematic tuition as well as clinical/practical assignments.

Examinations and pass requirements

Honours

BRadHons Diagnostics (10247062)

Duration of study 1 year

Admission requirements

Subject to the stipulations of the General Regulations, a candidate must hold the BRad degree or an equivalent qualification in the relevant field of specialisation for admission to honours degree study and must be registered as a radiographer with the Health Professions Council of South Africa.

A student must be appointed in a full-time position at an institution approved by the Department for this purpose.

Additional requirements

All students must register for NVB 700 Research principles.

Also consult the General Regulations.

Examinations and pass requirements

Second examinations may be granted in modules not passed, according to the stipulations of the School of Healthcare Sciences in this regard.

Pass with distinction

The degree is conferred with distinction on a student who has obtained an average of at least 75% in all the modules for the degree.

Curriculum: Year 1

Minimum credits: 165

Core modules

Anatomical pathology 703 (ANP 703) - Credits: 5.00

Research principles 700 (NVB 700) - Credits: 20.00

Radiographic anatomy 700 (RAN 700) - Credits: 20.00

Quality assurance 780 (RAW 780) - Credits: 30.00

Image interpretation 781 (RAW 781) - Credits: 30.00

Computer tomography 782 (RAW 782) - Credits: 30.00

Magnetic resonance 783 (RAW 783) - Credits: 30.00

Intervention 784 (RAW 784) - Credits: 30.00

Essay 700 (RSK 700) - Credits: 30.00

Curriculum: Final year

Minimum credits: 165

Core modules

Anatomical pathology 703 (ANP 703) - Credits: 5.00

Research principles 700 (NVB 700) - Credits: 20.00

Radiographic anatomy 700 (RAN 700) - Credits: 20.00

Essay 700 (RSK 700) - Credits: 30.00

BRadHons Nuclear Medicine (10247021)

Duration of study 1 year

Programme information

Students who did not register at undergraduate level (i.e. from the second year of study) in Nuclear Medicine, register according to this curriculum.

All students must register for NVB 700 Research principles.

Also consult the General Regulations.

Admission requirements

- (i) Subject to the stipulations of the General Regulations, a candidate must hold the BRad degree, or an equivalent qualification in the relevant field of specialisation for admission to honours degree study, and must be registered as a radiographer with the Health Professions Council of South Africa.
- (ii) A student must be appointed in a full-time position at an institution approved by the Department for this purpose.

Examinations and pass requirements

Second examinations may be granted in modules not passed, according to the stipulations of the School of Healthcare Sciences in this regard.

Pass with distinction

The degree is conferred with distinction on a student who has obtained an average of at least 75% in all the modules for the degree.

Curriculum: Year 1

Minimum credits: 160

Core modules

Nuclear medicine 701 (KDE 701) - Credits: 30.00

Research principles 700 (NVB 700) - Credits: 20.00

Radiochemistry and pharmacology 700 (RCF 700) - Credits: 25.00

Essay 700 (RSK 700) - Credits: 30.00

Radiation physics and instrumentation for nuclear medicine 700 (SFI 700) - Credits: 20.00

Theory of nuclear medicine 710 (TKG 710) - Credits: 30.00

Curriculum: Final year

Minimum credits: 160

Core modules

Nuclear medicine 701 (KDE 701) - Credits: 30.00

Research principles 700 (NVB 700) - Credits: 20.00

Radiochemistry and pharmacology 700 (RCF 700) - Credits: 25.00

Essay 700 (RSK 700) - Credits: 30.00

Radiation physics and instrumentation for nuclear medicine 700 (SFI 700) - Credits: 20.00

Theory of nuclear medicine 710 (TKG 710) - Credits: 30.00

BRadHons Nuclear Medicine (10247071)

Duration of study 1 year

Programme information

Students who specialised at undergraduate level (i.e. from the second year of study) in Nuclear Medicine, register according to this curriculum.

Admission requirements

Subject to the stipulations of the General Regulations, a candidate must hold the BRad degree, or an equivalent qualification in the relevant field of specialisation for admission to honours degree study, and must be registered as a radiographer with the Health Professions Council of South Africa.

A student must be appointed in a full-time position at an institution approved by the Department for this purpose.

Additional requirements

All students must register for NVB 700 Research principles.

Also consult the General Regulations.

Examinations and pass requirements

Second examinations may be granted in modules not passed, according to the stipulations of the School of Healthcare Sciences in this regard.

Pass with distinction

The degree is conferred with distinction on a student who has obtained an average of at least 75% in all the modules for the degree.

Curriculum: Final year

Minimum credits: 165

Core modules

Instrumentation 700 (INX 700) - Credits: 30.00

Nuclear medicine 700 (KDE 700) - Credits: 50.00

Research principles 700 (NVB 700) - Credits: 20.00

Nuclear medicine 700 (RDF 700) - Credits: 30.00

Essay 700 (RSK 700) - Credits: 30.00

BRadHons Radiation Therapy (10247011)

Duration of study 1 year

Programme information

Students who did not register at undergraduate level (i.e. from the second year of study) in Radiation

Therapy, register according to this curriculum.

Admission requirements

- (i) Subject to the stipulations of the General Regulations, a candidate must hold the BRad degree, or an equivalent qualification in the relevant field of specialisation for admission to honours degree study, and must be registered as a radiographer with the Health Professions Council of South Africa.
- (ii) A student must be appointed in a full-time position at an institution approved by the Department for this purpose.

BScHons Aerospace Medicine (10244021)

Duration of study 1 year

Programme information

The following requirements are set:

- Advanced instruction by means of self-tuition, lectures and seminars.
- Students must pass the module TNM 800 Applied research methodology 800.

- Students must pass the module PHM 770 Learning in public health 770.
- Students must pass a research report (or project) that carries at least 30 credits.

Admission requirements

- A candidate must hold a bachelor's degree deemed acceptable by the head of department for the proposed field of study or an equivalent qualification deemed acceptable by the Senate of the University for the proposed field of study with at least one applicable biological subject as major subject.

- Admission to the study for an honours degree is subject to the approval of the head of department: with the proviso that a candidate who has obtained an average of less than 60% in the modules of his or her major subject in the final year of the bachelor's degree study may only be admitted with the **Dean's approval** on the recommendation of the head of department. Additional requirements may be set by the head of department.

Additional requirements

- Candidates must have an MBChB or equivalent degree deemed acceptable by the head of the department.
- Candidates must be registered Aviation Medical Examiners.

Examinations and pass requirements

- The individual modules in each field of study must all be passed with a mark of at least 50% in each module, before a student may graduate in that field of study.
- Each field of study has a specified, externally moderated, summative assessment that must also be passed before the student may graduate.

Pass with distinction

The degree is conferred with distinction on a student who has obtained an average of at least 75% in the summative assessment, as well as an average of at least 75% for the remaining components of the curriculum (i.e. excluding the summative assessment mark).

Curriculum: Final year

Minimum credits: 120

Core modules

Primary epidemiology 772 (HME 772) - Credits: 10.00

Aerospace medicine 700 (LRG 700) - Credits: 85.00

Learning in public health 770 (PHM 770) - Credits: 5.00

Applied research methodology 800 (TNM 800) - Credits: 5.00

BScHons Anatomy (10243012)

Duration of study 1 year

Contact Prof MC Bosman marinus.bosman@up.ac.za +27 (0)123192233

Programme information

The following requirements are set for completing the programme:

- Advanced instruction by means of self-tuition and four compulsory seminars of which at least one must be read to and defended before the department in question, on topics assigned to the student.
- Practical experience of the laboratory techniques used in the particular subsections of the subject.
- Attendance at the compulsory faculty module (TNM 800) Applied research methodology 800.
- Attendance at the prescribed module (MBS 800) Medical biostatistics 800.
- Taking part in a research project and presentation of an independent research report.
- Satisfactory attendance at a library-user course.

Admission requirements

A candidate must hold a bachelor's degree deemed acceptable by the head of department for the proposed field of study or an equivalent qualification deemed acceptable by the Senate of the University for the proposed field of study with at least one applicable biological subject as major subject.

Admission to the study for an honours degree is subject to the approval of the head of department: with the proviso that a candidate who has obtained an average of less than 60% in the modules of his or her major subject in the final year of the bachelor's degree study may only be admitted with the **Dean's approval** on the recommendation of the head of department. Additional requirements may be set by the head of department.

Additional requirements

The prerequisites for admission to the honours degree in certain fields of study are indicated in the syllabuses of the specific department.

Also consult General Regulations.

Examinations and pass requirements

- i. The examination at the end of the programme will consist of two written papers of three hours each as well as an oral examination of 30 minutes.
- ii. For the field of specialisation Medical Physics, one examination of three hours is required in each of the theoretical modules. The mark awarded to the practical work will also be taken into account when the final mark is calculated.
- iii. The maximum period for completion of the honours degree, is two years in the case of full-time students and three years in the case of part-time students. In exceptional circumstances, a student may apply, in writing, to the head of department for an extension of the period of study.
- iv. To comply with the pass requirements for the degree, a student must obtain a final mark of at least 50% in each division as indicated, as well as a pass mark of at least 50% for the essay/work assignment (if applicable). The stipulations regarding pass requirements for dissertations in the General Regulations apply mutatis mutandis to essays.

Pass with distinction

The degree is conferred with distinction on a student who has obtained an average of at least 75% in the examination (written, oral, practical, etc).

Curriculum: Final year

Minimum credits: 125

Core modules

Human osteology 122 (ANA 122) - Credits: 4.00

Anatomy 700 (ANA 700) - Credits: 96.00

Medical biostatistics 800 (MBS 800) - Credits: 20.00

Applied research methodology 800 (TNM 800) - Credits: 5.00

BScHons Comparative Anatomy (10243019)

Duration of study 1 year

Contact Prof AC Oettlé u02455226@tuks.co.za +27 (0)124203111

Programme information

The following requirements are set for completing the programme:

- Advanced instruction by means of self-tuition and four compulsory seminars of which at least one must be read to and defended before the department in question, on topics assigned to the student.
- Practical experience of the laboratory techniques used in the particular subsections of the subject.
- Attendance at the compulsory faculty module (TNM 800) Applied research methodology 800.
- Attendance at the prescribed module (MBS 800) Medical biostatistics 800.
- Taking part in a research project and presentation of an independent research report.
- Satisfactory attendance at a library-user course.

Admission requirements

- A candidate must hold a bachelor's degree deemed acceptable by the head of department for the proposed field of study or an equivalent qualification deemed acceptable by the Senate of the University for the proposed field of study with at least one applicable biological subject as major subject.

- Admission to the study for an honours degree is subject to the approval of the head of department: with the proviso that a candidate who has obtained an average of less than 60% in the modules of his or her major subject in the final year of the bachelor's degree study may only be admitted with the **Dean's approval** on the recommendation of the head of department. Additional requirements may be set by the head of department.

Additional requirements

The prerequisites for admission to the honours degree in certain fields of study are indicated in the syllabuses of the specific department.

Also consult General Regulations.

Examinations and pass requirements

- The examination at the end of the programme will consist of two written papers of three hours each as well as an oral examination of 30 minutes.
- For the field of specialisation Medical Physics, one examination of three hours is required in each of the theoretical modules. The mark awarded to the practical work will also be taken into account when the final mark is calculated.
- The maximum period for completion of the honours degree, is two years in the case of full-time students and three years in the case of part-time students. In exceptional circumstances, a student may apply, in writing, to the head of department for an extension of the period of study.
- To comply with the pass requirements for the degree, a student must obtain a final mark of at least 50% in each division as indicated, as well as a pass mark of at least 50% for the essay/work assignment (if applicable). The stipulations regarding pass requirements for dissertations in the General Regulations apply mutatis mutandis to essays.

Pass with distinction

The degree is conferred with distinction on a student who has obtained an average of at least 75% in the examination (written, oral, practical, etc).

BScHons Environmental Health (10244023)

Duration of study 1 year

Programme information

The following requirements are set:

- Advanced instruction by means of self-tuition, lectures and seminars.
- Students must pass the module TNM 800 Applied research methodology 800.
- Students must pass the module PHM 770 Learning in public health 770.
- Students must pass a research report (or project) that carries at least 30 credits.

Admission requirements

- A candidate must hold a bachelor's degree deemed acceptable by the head of department for the proposed field of study, or an equivalent qualification deemed acceptable by the Senate of the University for the proposed field of study, with at least one applicable biological subject as major subject.
- Admission to the study for an honours degree is subject to the approval of the head of department: with the proviso that a candidate who has obtained an average of less than 60% in the modules of his or her major subject in the final year of the bachelor's degree study, may only be admitted with the **Dean's approval**, on the recommendation of the head of department. Additional requirements may be set by the head of department.

Other programme-specific information

Students who want to specialise in environmental health need to enrol for ENV 785 and GGY 789 to replace EOH 771 and EOH 772.

Examinations and pass requirements

- i. The individual modules in each field of study must all be passed with a mark of at least 50% in each module, before a student may graduate in that field of study.
- ii. Each field of study has a specified, externally moderated, summative assessment that must also be passed before the student may graduate.

Pass with distinction

The degree is conferred with distinction on a student who has obtained an average of at least 75% in the summative assessment, as well as an average of at least 75% for the remaining components of the curriculum (i.e. excluding the summative assessment mark).

Curriculum: Year 1

Minimum credits: 120

Core modules

Assignment in occupational health 770 (AOH 770) - Credits: 30.00
Basis in environmental health 770 (EHM 770) - Credits: 5.00
Health risk assessment 771 (EHM 771) - Credits: 10.00
Introduction to environmental and occupational health 770 (EOH 770) - Credits: 10.00
Environmental change 789 (GGY 789) - Credits: 15.00
Occupational health law 771 (HCL 771) - Credits: 10.00
Managing occupational health services 773 (HCM 773) - Credits: 10.00
Principles of occupational hygiene and toxicology 770 (OHT 770) - Credits: 10.00
Learning in public health 770 (PHM 770) - Credits: 5.00
Applied research methodology 800 (TNM 800) - Credits: 5.00
Environmental assessments 785 (ENV 785) - Credits: 15.00
Environmental health examination 774 (EOH 774) - Credits: 1.00

Curriculum: Final year

Minimum credits: 120

Core modules

The stipulations regarding pass requirements for dissertations in the General Regulations apply mutatis mutandis to essays.

Pass with distinction

The degree is conferred with distinction on a student who has obtained an average of at least 75% in the examination (written, oral, practical, etc).

Curriculum: Final year

Minimum credits: 120

Core modules

Medical criminalistics 700 (KRT 700) - Credits: 96.00

Medical biostatistics 800 (MBS 800) - Credits: 20.00

Applied research methodology 800 (TNM 800) - Credits: 5.00

BScHons Medical Immunology (10243171)

Duration of study 1 year

Contact

Prof R Cockeran riana.cockeran@up.ac.za +27 (0)123192624

Programme information

The following requirements are set for completing the programme:

- Advanced instruction by means of self-tuition and four compulsory seminars of which at least one must be read to and defended before the department in question, on topics assigned to the student.
- Practical experience of the laboratory techniques used in the particular subsections of the subject.
- Attendance at the compulsory faculty module (TNM 800) Applied research methodology 800.
- Attendance at the prescribed module (MBS 800) Medical biostatistics 800.
- Taking part in a research project and presentation of an independent research report.
- Satisfactory attendance at a library-user course.

Admission requirements

- A candidate must hold a bachelor's degree deemed acceptable by the head of department for the proposed field of study or an equivalent qualification deemed acceptable by the Senate of the University for the proposed field of study with at least one applicable biological subject as major subject.
- Admission to the study for an honours degree is subject to the approval of the head of department: with the proviso that a candidate who has obtained an average of less than 60% in the modules of his or her major subject in the final year of the bachelor's degree study may only be admitted with the Dean's approval on the recommendation of the head of department. Additional requirements may be set by the head of department.

Additional requirements

The prerequisites for admission to the honours degree in certain fields of study are indicated in the syllabuses of the specific department.

Also consult General Regulations.

Examinations and pass requirements

- i. The examination at the end of the programme will consist of two written papers of three hours each as well as an oral examination of 30 minutes.
- ii. For the field of specialisation Medical Physics, one examination of three hours is required in each of the theoretical modules. The mark awarded to the practical work will also be taken into account when the final mark is calculated.
- iii. The maximum period for completion of the honours degree, is two years in the case of full-time students and three years in the case of part-time students. In exceptional circumstances, a student may apply, in writing, to the head of department for an extension of the period of study.
- iv. To comply with the pass requirements for the degree, a student must obtain a final mark of at least 50% in each division as indicated, as well as a pass mark of at least 50% for the essay/work assignment (if applicable). The stipulations regarding pass requirements for dissertations in the General Regulations apply mutatis mutandis to essays.

Pass with distinction

BScHons Occupational Hygiene (10244022)

Duration of study 1 year

Programme information

The following requirements are set:

- Advanced instruction by means of self-tuition, lectures and seminars.
- Students must pass the module TNM 800 Applied research methodology 800.
- Students must pass the module PHM 770 Learning in public health 770.
- Students must pass a research report (or project) that carries at least 30 credits.

Admission requirements

- A candidate must hold a bachelor's degree deemed acceptable by the head of department for the proposed field of study, or an equivalent qualification deemed acceptable by the Senate of the University for the proposed field of study, with at least one applicable biological subject as major subject.
- Admission to the study for an honours degree is subject to the approval of the head of department: with the

proviso that a candidate who has obtained an average of less than 60% in the modules of his or her major subject in the final year of the bachelor's degree study, may only be admitted with the **Dean's approval**, on the recommendation of the head of department. Additional requirements may be set by the head of department.

Examinations and pass requirements

- i. The individual modules in each field of study must all be passed with a mark of at least 50% in each module, before a student may graduate in that field of study.
- ii. Each field of study has a specified, externally moderated, summative assessment that must also be passed before the student may graduate.

Pass with distinction

The degree is conferred with distinction on a student who has obtained an average of at least 75% in the summative assessment, as well as an average of at least 75% for the remaining components of the curriculum (i.e. excluding the summative assessment mark).

Curriculum: Final year

Minimum credits: 125

Core modules

Assignment in occupational health 770 (AOH 770) - Credits: 30.00

Basis in environmental health 770 (EHM 770) - Credits: 5.00

Health risk assessment 771 (EHM 771) - Credits: 10.00

Introduction to environmental and occupational health 770 (EOH 770) - Credits: 10.00

Occupational health law 771 (HCL 771) - Credits: 10.00

Applied research methodology 800 (TNM 800) - Credits: 5.00

Occupational Hygiene examination 773 (EOH 773) - Credits: 1.00

Occupational health and safety legislation in South Africa 772 (EOH 772) - Credits: 10.00

Environmental and occupational hygiene measuring techniques 771 (EOH 771) - Credits: 20.00

BScHons Pharmacology (10243161)

Duration of study 1 year

Contact Prof AD Cromarty duncan.cromarty@up.ac.za +27 (0)123192622

Programme information

The following requirements are set for completing the programme:

- Advanced instruction by means of self-tuition and four compulsory seminars of which at least one must be read to and defended before the department in question, on topics assigned to the student.
- Practical experience of the laboratory techniques used in the particular subsections of the subject.
- Attendance at the compulsory faculty module (TNM 800) Applied research methodology 800.

- Attendance at the prescribed module (MBS 800) Medical biostatistics 800.
- Taking part in a research project and presentation of an independent research report.
- Satisfactory attendance at a library-user course.

Admission requirements

- A candidate must hold a bachelor's degree deemed acceptable by the head of department for the proposed field of study or an equivalent qualification deemed acceptable by the Senate of the University for the proposed field of study with at least one applicable biological subject as major subject.
- Admission to the study for an honours degree is subject to the approval of the head of department: with the proviso that a candidate who has obtained an average of less than 60% in the modules of his or her major subject in the final year of the bachelor's degree study may only be admitted with the Dean's approval on the recommendation of the head of department. Additional requirements may be set by the head of department.

Additional requirements

A minimum average of 60% in Pharmacology at undergraduate level.

In addition, the modules (FAR 381, 382) Pharmacology 381, 382 must be completed at the Department of Pharmacology, if not completed at undergraduate level.

Exemption from the examination in FAR 381, 382 may be granted if a student, who obtained a module mark of at least 60%, exercises the option to accept this as the final mark.

The prerequisites for admission to the honours degree in certain fields of study are indicated in the syllabuses of the specific department.

Also consult General Regulations.

Examinations and pass requirements

- i. The examination at the end of the programme will consist of two written papers of three hours each as well as an oral examination of 30 minutes.
- ii. For the field of specialisation Medical Physics, one examination of three hours is required in each of the theoretical modules. The mark awarded to the practical work will also be taken into account when the final mark is calculated.
- iii. The maximum period for completion of the honours degree, is two years in the case of full-time students and three years in the case of part-time students. In exceptional circumstances, a student may apply, in writing, to the head of department for an extension of the period of study.
- iv. To comply with the pass requirements for the degree, a student must obtain a final mark of at least 50% in each division as indicated, as well as a pass mark of at least 50% for the essay/work assignment (if applicable). The stipulations regarding pass requirements for dissertations in the General Regulations apply mutatis mutandis to essays.

Pass with distinction

The degree is conferred with distinction on a student who has obtained an average of at least 75% in the examination (written, oral, practical, etc).

The following requirements are set for completing the programme:

- Advanced instruction by means of self-tuition and four compulsory seminars of which at least one must be read to and defended before the department in question, on topics assigned to the student.
- Practical experience of the laboratory techniques used in the particular subsections of the subject.
- Attendance at the compulsory faculty module (TNM 800) Applied research methodology 800.
- Attendance at the prescribed module (MBS 800) Medical biostatistics 800.
- Taking part in a research project and presentation of an independent research report.
- Satisfactory attendance at a library-user course.

Admission requirements

- A candidate must hold a bachelor's degree deemed acceptable by the head of department for the proposed field of study or an equivalent qualification deemed acceptable by the Senate of the University for the proposed field of study with at least one applicable biological subject as major subject.
- Admission to the study for an honours degree is subject to the approval of the head of department: with the proviso that a candidate who has obtained an average of less than 60% in the modules of his or her major subject in the final year of the bachelor's degree study may only be admitted with the **Dean's approval** on the

recommendation of the head of department. Additional requirements may be set by the head of department.

Additional requirements

- Only students who intend to specialise in Physical Anthropology may, in addition to the requirements as set out above, also apply for admission, provided that they are in possession of a BA degree with Archaeology as major subject.
- A minimum average of 60% in the modules of the major subjects in the final year of study, is required.
- The module (ANA 122) Human osteology 122 must be taken additionally.

The prerequisites for admission to the honours degree in certain fields of study are indicated in the syllabuses of the specific department.

Also consult General Regulations.

Examinations and pass requirements

- i. The examination at the end of the programme will consist of two written papers of three hours each as well as an oral examination of 30 minutes.
- ii. For the field of specialisation Medical Physics, one examination of three hours is required in each of the theoretical modules. The mark awarded to the practical work will also be taken into account when the final mark is calculated.
- iii. The maximum period for completion of the honours degree, is two years in the case of full-time students and three years in the case of part-time students. In exceptional circumstances, a student may apply, in writing, to the head of department for an extension of the period of study.
- iv. To comply with the pass requirements for the degree, a student must obtain a final mark of at least 50% in each division as indicated, as well as a pass mark of at least 50% for the essay/work assignment (if applicable). The stipulations regarding pass requirements for dissertations in the General Regulations apply mutatis mutandis to essays.

Pass with distinction

The degree is conferred with distinction on a student who has obtained an average of at least 75% in the examination (written, oral, practical, etc).

Master's

MChD Community Dentistry (11250071)

Duration of study 4 years

Admission requirements

(i) Each candidate for admission to the study for the MChD degree programme must:

- either hold the BChD degree of the University of Pretoria or an equivalent qualification, or be admitted to master's degree studies in terms of the stipulations of General Regulations G.1.3 and G.62;
- be registered as a dentist with the Health Professions Council of South Africa in the category Independent Practice.

(ii) For the MChD degree (endorsement Maxillofacial Surgery – Medical or Dental (Codes 11250091 and 11250011), a candidate

- is required, subject to the stipulations of General Regulations G.1.3 and G.62, to have obtained the BChD and/or MBChB degree or equivalent qualification at least one year previously, passed the Advanced Trauma Life Support Course (maximum three attempts), as well as the basic subjects Anatomy 870, Physiology 806 and Pharmacology 809 and the PGDipDent (Oral Surgery), with a minimum pass mark of 65% in the major subject. Students who hold the Postgraduate Diploma in Dentistry [PGDipDent(Oral Surgery)] and/or the Master of Science Dentistry [MScDent] with Oral Surgery as the main field of study, may apply in writing for credit for the basic subject(s) (see also General Regulation G.10.3(b)).
- is required to be registered as a dentist and/or physician with the Health Professions Council of South Africa in the category Independent Practice.

Other programme-specific information

Additionally, the Diploma in Health Systems Management must be attended and passed on a capita selecta basis, or any other management course as determined by the head of department and approved by the dean.

Examinations and pass requirements

(i) Examinations in the basic subjects

- a. A student must pass these subjects prior to admission to the examination in the major subject. A minimum of at least 50% is required to pass.
- b. Examinations in the basic subjects must be passed before the end of the third year of study, or at a time as determined by the head of department.
- c. The Diploma in Health Systems Management offered by the School of Health Systems and Public Health must be attended and passed

(ii) Examinations in the major subject

- a. Admission to the examination in the major subject is determined by the head of department.
- b. The student must submit and pass a dissertation on an approved topic related to the major subject and submit a manuscript for publication as required.

Also consult the General Regulations.

i. Examinations in the basic and subsidiary subjects (with the exception of KGM 803):

- a. A student must pass these subjects prior to admission to the examination in the major subject. A minimum of at least 50% is required to pass.
 - b. Examinations in the basic and subsidiary subjects must be passed before the end of the third year of study, or at a time as determined by the head of department.
- ii. Examinations in the major subject:** Admission to the examination in the major subject is determined by the head of department.
- iii.** If a student fails one or more of the basic subjects, subsidiary subjects or the major subject, the head of department may recommend to the examination moderating meeting, that he or she be admitted to a supplementary examination. A student who has been admitted to a second examination in a basic subject must write the examination during the next examination period. Second examinations in the major subject may only take place after a minimum period of six months has elapsed since the examination in which the student failed.

NB:

- a. In view of the fact that a postgraduate student may repeat an examination in any subject only once, a student who fails a second examination will have to discontinue the programme. In this event, a student who has been holding a registrarship, will have to vacate the position as soon as possible after one calendar month's notice to the University of Pretoria and/or other recognised training institution, where applicable.
 - b. If a student is admitted to a second examination in the major subject, the head of department will determine whether he/she has to vacate the registrarship at the end of the training period, or immediately after the second examination.
- iv. Subminimum:** In order to pass in the major subject a student must obtain a subminimum of 50% in all the sections of the examination, with a final mark of at least 50%.
- v.** The stipulations of the General Regulations are applicable with regard to attendance courses.
- vi.** In addition to the stipulations already mentioned, a dissertation on a topic related to the major subject must also be submitted. In order to pass in the final examination, a pass mark must also be obtained for the dissertation.

Exemption

Exemption may be granted by the Dean, on the recommendation of the Head of Department by virtue of comparable training and/or experience in terms of the requirements of School Regulations, with the proviso that exemption from the examination and evaluation in the major subject may not be granted.

Please note: The regulations of the Health Professions Council of South Africa, as published in the Government Gazette No. 4631 of 11 January 1991 – Notice No. R.40 (as amended), will be used as a criterion in determining the period of exemption.

Practical/clinical/internship information

Practical training is provided at recognised institutions.

Pass with distinction

A student who obtains a final mark of at least 75% (with the first attempt) in the major subject qualifies to obtain the degree with distinction.

An MChD student, who has obtained at least 75% with the first attempt in both his major subject and the dissertation, will receive the degree with distinction.

MChD in Maxillo-facial and Oral Surgery (endorsement ChirMaxFac-Med) (11250091)

Duration of study 4 years

Admission requirements

- (i) Each candidate for admission to the study for the MChD degree programme must:
 - (aa) either hold the BChD degree of the University of Pretoria or an equivalent qualification, or be admitted to master's degree studies in terms of the stipulations of General Regulations G.1.3 and G.62;
 - (bb) be registered as a dentist with the Health Professions Council of South Africa in the category Independent Practice.
- (ii) For the MChD degree (endorsement Maxillofacial Surgery – Medical or Dental (Codes 11250091 and 11250011), a candidate
 - (aa) is required, subject to the stipulations of General Regulations G.1.3 and G.62, to have obtained the BChD and/or MBChB degree or equivalent qualification at least one year previously, passed the Advanced Trauma Life Support Course (maximum three attempts), as well as the basic subjects Anatomy 870, Physiology 806 and Pharmacology 809 and the PGDipDent (Oral Surgery), with a minimum pass mark of 65% in the major subject. Students who hold the Postgraduate Diploma in Dentistry [PGDipDent(Oral Surgery)] and/or the Master of Science Dentistry [MScDent] with Oral Surgery as the main field of study, may apply in writing for credit for the basic subject(s) (see also General Regulation G.10.3(b)).
 - (bb) is required to be registered as a dentist and/or physician with the Health Professions Council of South Africa in the category Independent Practice.

(iii) For the MChD degrees (Orthodontics, Periodontics and Oral Medicine and Prosthodontics) a candidate is required to pass all the basic subjects [University of Pretoria or the Colleges of Medicine of South Africa] before he or she may be admitted to the first year of study. The following basic subjects are required; for Orthodontics (Anatomy 871, Physiology 806); for Periodontics and Oral Medicine (Anatomy 873, Physiology 806, General pathology 808 and Oral biology 800) and for Prosthodontics (Anatomy 874, Physiology 806 and Oral biology 800).

Other programme-specific information

In order to qualify for the degree, a candidate must, for a period of four to eight years, depending on the specific requirements for a particular field of study, have held a full-time training position/registrarship successfully, at a training institution approved by the University. In the case of Maxillofacial and Oral Surgery, a candidate must hold a full-time registrarship for a minimum of four years (for a candidate with both a BChD degree and a MBChB degree), a minimum of seven years (for a candidate with a BChD degree), a minimum of six years years (for a candidate with a MBChB degree), or a minimum of five years (for MChD (ChirMaxFac-Dent)).

Examinations and pass requirements

i. Examinations in the basic subjects

A student must pass all the basic subjects (Anatomy [with Embryology], Physiology and Pharmacology [University of Pretoria or College of Maxillofacial and Oral Surgery of the Colleges of Medicine of South Africa] before he or she may be admitted to the first year of study. A minimum pass mark of at least 50% is required in all examinations for the University of Pretoria and College of Maxillofacial and Oral Surgery and a minimum pass mark of 65% from another tertiary institution (see also the General Regulations).

ii. Examinations in the subsidiary (intermediary) subjects

(The minimum pass mark is 50%.)

- For the endorsement Maxillofacial Surgery-Medicus, a student has to pass in Principles of surgery in the year of study as indicated, before he or she may continue with the programme.
- A student has to pass in Applied oral pathology at least two and a half years prior to the examination in his or her major subject.

These subsidiary subjects may be passed at the University of Pretoria or the College of Maxillofacial and Oral Surgery of the Colleges of Medicine of South Africa.

- If a student fails any of the subsidiary subjects Principles of surgery or Applied oral pathology, the head of department may recommend that he or she be admitted to a second examination.

iv. Examination and evaluation in the major subject

- If a student fails his or her major subject, the student has to reapply for admission to the final examination of the College of Maxillofacial and Oral Surgery of the Colleges of Medicine of South Africa.
- In the light of the fact that a postgraduate student may repeat an examination in any subject only once, a student who fails a second examination, will have to discontinue the programme.
- If a student has been admitted to a second examination in the major subject, the head of department will determine whether he or she should vacate the registrarship at the end of the training period. The student

has to vacate the registrarship immediately after the second examination has been completed.

- d. Subminimum: A student must obtain a subminimum of 60% in the clinical section (operation and short cases) of the examination, with a subminimum of 50% in all the other sections for the master's degree. He or she must also comply with the requirements regarding the number of operation procedures performed in each section, as required by the head of department. A final mark of at least 50% is required in order to pass in a subject.
- e. In addition to the stipulations already mentioned, the student must submit and pass a mini-dissertation (endorsement Maxillofacial Surgery-Med) or a dissertation (endorsement Maxillofacial Surgery-Dent), on an approved topic related to the major subject and submit a manuscript as required (see also the General Regulations). A complete record of operations (as a logbook) must also be submitted.

(v) The master's degree can only be conferred after the National Professional Examination [FCMFOS(SA)] has been passed (as this master's degree and the Fellowship may be used as an interwoven final equivalence examination).

Exemption

Exemption may be granted by the Dean, on the recommendation of the Head of Department by virtue of comparable training and/or experience in terms of the requirements of School Regulations, with the proviso that exemption from the examination and evaluation in the major subject may not be granted.

Please note: The regulations of the Health Professions Council of South Africa, as published in the Government Gazette No. 4631 of 11 January 1991 – Notice No. R.40 (as amended), will be used as a criterion in determining the period of exemption.

Pass with distinction

A student who obtains a final mark of at least 75% (with the first attempt) in the major subject, qualifies to obtain the degree with distinction.

General information

1. The content of the basic subjects, subsidiary subjects and attendance courses will be determined by the particular head of department in consultation with the head of the department at Dentistry or Medicine.
2. General information concerning content and extent of the basic and subsidiary subjects is available at the department in question.
3. Students have to ensure that certificates of satisfactory preparation are acquired in all the attendance courses.

Maxillofacial and Oral Surgery

Major subject:

Maxillofacial and oral surgery: Experience is acquired through practical and clinical training and supplemented by seminars, discussions, papers and research. Diagnosis, planning, surgical and secondary treatment of diseases, injuries and defects of the human mouth, jaws, face and related structures.

Subsidiary (intermediary) subject:

Principles of surgery: Instruction mainly by the Departments of Surgery (and its divisions), Neurosurgery, Otorhinolaryngology, Ophthalmology and Family Medicine. This training takes place over nine months.

Instruction in the subsidiary subject:

Principles of surgery:

Endorsement ChirMaxFac-Med BVC 806

General Surgery (including Paediatric Surgery): 2 months

Intensive Care: 2 months

Neurosurgery: 2 months

Ophthalmology: 1 month

Otorhinolaryngology: 1 month

Plastic Surgery: 1 month

Applied Oral Pathology: 3 months

Endorsement ChirMaxFac-Dent BVC 807

Distress Unit (Family Medicine): 1 month

General Surgery (including Paediatric Surgery): 1 month

Intensive Care: 2 months

Neurosurgery: 2 months

Ophthalmology: 1 month

Otorhinolaryngology: 1 month

Plastic Surgery: 1 month

Applied Oral Pathology: 3 months

General information concerning the endorsements ChirMaxFac-Med and ChirMaxFac-Dent

1. A candidate with a BChD or BDS degree should preferably enrol for the MChD(ChirMaxFac-Med) programme.
2. Permission is granted to a student for (ChirMaxFac-Med) to register simultaneously for the postgraduate and undergraduate programmes as applicable. At the end of the programme the student will have complied with all the requirements for the BChD, MBChB and MChD degrees.
3. The content of the basic and subsidiary (intermediary) subjects and attendance courses will be determined by the particular head of department, in consultation with the Department of Maxillofacial and Oral Surgery.
4. Basic and subsidiary (intermediary) subjects: Acknowledgement of basic and/or subsidiary (intermediary) subjects may be granted if all the particular subjects have already been passed at an approved institution such as the Colleges of South Africa (College of Maxillofacial and Oral Surgery) as recommended by the Head of department.
5. Pharmacology as a basic subject has to be passed as a prerequisite before the first year of study, should all other basic subjects be acknowledged by an approved institution.
6. Instruction in the major subject extends over a minimum period of three years, of which the first year mainly concentrates on minor oral surgery.
7. A student for the endorsement ChirMaxFac-Med can only fulfil his or her clinical obligations in Principles of Surgery after he or she has complied with the requirements for the MBChB degree, as well as having completed the Certificate for Advanced Trauma Life Support (ATLS) (before commencing the registrarship).
8. The instruction in the last two years in the major subject takes place only after having successfully completed the subsidiary subjects.
9. The first year of registrarship is acknowledged as an additional year of experience for Medicine and Dentistry if the training in Maxillofacial and Oral Surgery is discontinued. However, a student who discontinues one of the subjects must resign from the registrarship immediately.
10. The basic subjects for Maxillofacial and Oral Surgery (endorsements ChirMaxFac-Med and ChirMaxFac-Dent) are identical.
11. The requirements for the major subject are: Submission of a mini-dissertation (endorsement ChirMaxFac-Med) and a dissertation (endorsement ChirMaxFac-Dent), a letter from an appropriate journal editor,

acknowledging receipt of the draft manuscript, surgical portfolio (logbook) with minimum cases treated per surgical section, a prescribed summary of case reports, any publications, research abstracts, examination in a surgical procedure and examination in patient short cases conducted under examination conditions.

12. A student may only proceed with the final FC MFOS (SA) examination after fulfilling the requirements for the MChD(ChirMaxFac-Med or -Dent) as stipulated in 11. above.
13. The MChD(ChirMaxFac-Med or -Dent) may only be awarded after successfully passing the final examination for the FC MFOS (SA).
14. Costs or fees for any examination(s) and registration at the Colleges of Medicine of South Africa have to be met by the student.

Curriculum: Year 1

Core modules

- General pathology 808 (APA 808) - Credits: 24.00

Oral Pathology 805 (MPG 805) - Credits: 24.00
Applied research methodology 800 (TNM 800) - Credits: 5.00

Curriculum: Year 2

Core modules

- Principles of surgery 806 (BVC 806) - Credits: 52.00
Maxillo-facial and oral surgery 802 (KGM 802) - Credits: 700.00

Curriculum: Year 3

Core modules

- Maxillo-facial and oral surgery 802 (KGM 802) - Credits: 700.00

Curriculum: Final year

Core modules

- Maxillo-facial and oral surgery 802 (KGM 802) - Credits: 700.00

MChD in Maxillofacial and Oral Surgery (endorsement ChirMaxFac-Dent) (11250011)

Duration of study 5 years

Admission requirements

- (i) Each candidate for admission to the study for the MChD degree programme must:
 - (aa) either hold the BChD degree of the University of Pretoria or an equivalent qualification, or be admitted to master's degree studies in terms of the stipulations of General Regulations G.1.3 and G.62;
 - (bb) be registered as a dentist with the Health Professions Council of South Africa in the category Independent Practice.
- (ii) For the MChD degree (endorsement Maxillofacial Surgery – Medical or Dental (Codes 11250091 and 11250011), a candidate

(aa) is required, subject to the stipulations of General Regulations G.1.3 and G.62, to have obtained the BChD and/or MBChB degree or equivalent qualification at least one year previously, passed the Advanced Trauma Life Support Course (maximum three attempts), as well as the basic subjects Anatomy 870, Physiology 806 and Pharmacology 809 and the PGDipDent (Oral Surgery), with a minimum pass mark of 65% in the major subject. Students who hold the Postgraduate Diploma in Dentistry [PGDipDent(Oral Surgery)] and/or the Master of Science Dentistry [MScDent] with Oral Surgery as the main field of study, may apply in writing for credit for the basic subject(s) (see also General Regulation G.10.3(b)).

(bb) is required to be registered as a dentist and/or physician with the Health Professions Council of South Africa in the category Independent Practice.

(iii) For the MChD degrees (Orthodontics, Periodontics and Oral Medicine and Prosthodontics) a candidate is required to pass all the basic subjects [University of Pretoria or the Colleges of Medicine of South Africa] before he or she may be admitted to the first year of study. The following basic subjects are required; for Orthodontics (Anatomy 871, Physiology 806); for Periodontics and Oral Medicine (Anatomy 873, Physiology 806, General pathology 808 and Oral biology 800) and for Prosthodontics (Anatomy 874, Physiology 806 and Oral biology 800).

Other programme-specific information

In order to qualify for the degree, a candidate must, for a period of four to eight years, depending on the specific requirements for a particular field of study, have held a full-time training position/registrarship successfully, at a training institution approved by the University. In the case of Maxillofacial and Oral Surgery, a candidate must hold a full-time registrarship for a minimum of four years (for a candidate with both a BChD degree and a MBChB degree), a minimum of seven years (for a candidate with a BChD degree), a minimum of six years (for a candidate with a MBChB degree), or a minimum of five years (for MChD (ChirMaxFac-Dent)).

Examinations and pass requirements

i. Examinations in the basic subjects

A student must pass all the basic subjects (Anatomy [with Embryology], Physiology and Pharmacology [University of Pretoria or College of Maxillofacial and Oral Surgery of the Colleges of Medicine of South Africa] before he or she may be admitted to the first year of study. A minimum pass mark of at least 50% is required in all examinations for the University of Pretoria and College of Maxillofacial and Oral Surgery and a minimum pass mark of 65% from another tertiary institution (see also the General Regulations).

ii. Examinations in the subsidiary (intermediary) subjects

(The minimum pass mark is 50%.)

- For the endorsement Maxillofacial Surgery-Medicus, a student has to pass in Principles of surgery in the year of study as indicated, before he or she may continue with the programme.
- A student has to pass in Applied oral pathology at least two and a half years prior to the examination in his or her major subject.

These subsidiary subjects may be passed at the University of Pretoria or the College of Maxillofacial and Oral Surgery of the Colleges of Medicine of South Africa.

iii. If a student fails any of the subsidiary subjects Principles of surgery or Applied oral pathology, the head of department may recommend that he or she be admitted to a second examination.

iv. Examination and evaluation in the major subject

- a. If a student fails his or her major subject, the student has to reapply for admission to the final examination of the College of Maxillofacial and Oral Surgery of the Colleges of Medicine of South Africa.
- b. In the light of the fact that a postgraduate student may repeat an examination in any subject only once, a student who fails a second examination, will have to discontinue the programme.
- c. If a student has been admitted to a second examination in the major subject, the head of department will determine whether he or she should vacate the registrarship at the end of the training period. The student has to vacate the registrarship immediately after the second examination has been completed.
- d. Subminimum: A student must obtain a subminimum of 60% in the clinical section (operation and short cases) of the examination, with a subminimum of 50% in all the other sections for the master's degree. He or she must also comply with the requirements regarding the number of operation procedures performed in each section, as required by the head of department. A final mark of at least 50% is required in order to pass in a subject.
- e. In addition to the stipulations already mentioned, the student must submit and pass a mini-dissertation (endorsement Maxillofacial Surgery-Med) or a dissertation (endorsement Maxillofacial Surgery-Dent), on an approved topic related to the major subject and submit a manuscript as required (see also the General Regulations). A complete record of operations (as a logbook) must also be submitted.

(v) The master's degree can only be conferred after the National Professional Examination [FCMFOS(SA)] has been passed (as this master's degree and the Fellowship may be used as an interwoven final equivalence examination).

Exemption

Exemption may be granted by the Dean, on the recommendation of the Head of Department by virtue of comparable training and/or experience in terms of the requirements of School Regulations, with the proviso that exemption from the examination and evaluation in the major subject may not be granted.

Please note: The regulations of the Health Professions Council of South Africa, as published in the Government Gazette No. 4631 of 11 January 1991 – Notice No. R.40 (as amended), will be used as a criterion in determining the period of exemption.

Pass with distinction

A student who obtains a final mark of at least 75% (with the first attempt) in the major subject, qualifies to obtain the degree with distinction.

General information

1. The content of the basic subjects, subsidiary subjects and attendance courses will be determined by the particular head of department in consultation with the head of the department at Dentistry or Medicine.
2. General information concerning content and extent of the basic and subsidiary subjects is available at the department in question.
3. Students have to ensure that certificates of satisfactory preparation are acquired in all the attendance courses.

Maxillofacial and Oral Surgery

Major subject:

Maxillofacial and oral surgery: Experience is acquired through practical and clinical training and supplemented by seminars, discussions, papers and research. Diagnosis, planning, surgical and secondary treatment of diseases, injuries and defects of the human mouth, jaws, face and related structures.

Subsidiary (intermediary) subject:

Principles of surgery: Instruction mainly by the Departments of Surgery (and its divisions), Neurosurgery, Otorhinolaryngology, Ophthalmology and Family Medicine. This training takes place over nine months.

Instruction in the subsidiary subject:

Principles of surgery:

Endorsement ChirMaxFac-Med BVC 806

General Surgery (including Paediatric Surgery): 2 months

Intensive Care: 2 months

Neurosurgery: 2 months

Ophthalmology: 1 month

Otorhinolaryngology: 1 month

Plastic Surgery: 1 month

Applied Oral Pathology: 3 months

Endorsement ChirMaxFac-Dent BVC 807

Distress Unit (Family Medicine): 1 month

General Surgery (including Paediatric Surgery): 1 month

Intensive Care: 2 months

Neurosurgery: 2 months

Ophthalmology: 1 month

Otorhinolaryngology: 1 month

Plastic Surgery: 1 month

Applied Oral Pathology: 3 months

General information concerning the endorsements ChirMaxFac-Med and ChirMaxFac-Dent

1. A candidate with a BChD or BDS degree should preferably enrol for the MChD(ChirMaxFac-Med) programme.
2. Permission is granted to a student for (ChirMaxFac-Med) to register simultaneously for the postgraduate and undergraduate programmes as applicable. At the end of the programme the student will have complied with all the requirements for the BChD, MBChB and MChD degrees.
3. The content of the basic and subsidiary (intermediary) subjects and attendance courses will be determined by the particular head of department, in consultation with the Department of Maxillofacial and Oral Surgery.
4. Basic and subsidiary (intermediary) subjects: Acknowledgement of basic and/or subsidiary (intermediary) subjects may be granted if all the particular subjects have already been passed at an approved institution such as the Colleges of South Africa (College of Maxillofacial and Oral Surgery) as recommended by the Head of department.
5. Pharmacology as a basic subject has to be passed as a prerequisite before the first year of study, should all other basic subjects be acknowledged by an approved institution.
6. Instruction in the major subject extends over a minimum period of three years, of which the first year mainly concentrates on minor oral surgery.
7. A student for the endorsement ChirMaxFac-Med can only fulfil his or her clinical obligations in Principles of Surgery after he or she has complied with the requirements for the MBChB degree, as well as having

- completed the Certificate for Advanced Trauma Life Support (ATLS) (before commencing the registrarship).
8. The instruction in the last two years in the major subject takes place only after having successfully completed the subsidiary subjects.
 9. The first year of registrarship is acknowledged as an additional year of experience for Medicine and Dentistry if the training in Maxillofacial and Oral Surgery is discontinued. However, a student who discontinues one of the subjects must resign from the registrarship immediately.
 10. The basic subjects for Maxillofacial and Oral Surgery (endorsements ChirMaxFax-Med and ChirMaxFac-Dent) are identical.
 11. The requirements for the major subject are: Submission of a mini-dissertation (endorsement ChirMaxFac-Med) and a dissertation (endorsement ChirMaxFac-Dent), a letter from an appropriate journal editor, acknowledging receipt of the draft manuscript, surgical portfolio (logbook) with minimum cases treated per surgical section, a prescribed summary of case reports, any publications, research abstracts, examination in a surgical procedure and examination in patient short cases conducted under examination conditions.
 12. A student may only proceed with the final FC MFOS (SA) examination after fulfilling the requirements for the MChD(ChirMaxFac-Med or -Dent) as stipulated in 11. above.
 13. The MChD(ChirMaxFac-Med or -Dent) may only be awarded after successfully passing the final examination for the FC MFOS (SA).
 14. Costs or fees for any examination(s) and registration at the Colleges of Medicine of South Africa have to be met by the student.

Curriculum: Year 1

Core modules

- General pathology 808 (APA 808) - Credits: 24.00
Principles of surgery 806 (BVC 806) - Credits: 52.00
Maxillo-facial and oral surgery 802 (KGM 802) - Credits: 700.00
Oral pathology 801 (MPG 801) - Credits: 24.00
Applied research methodology 800 (TNM 800) - Credits: 5.00

Curriculum: Final year

Core modules

- Principles of surgery 807 (BVC 807) - Credits: 52.00
Maxillo-facial and oral surgery 802 (KGM 802) - Credits: 700.00

MChD in Maxillofacial and Oral Surgery (endorsement ChirMaxFac-Med) (11250093)

Duration of study 7 years

Admission requirements

- (i) Each candidate for admission to the study for the MChD degree programme must:
 - (aa) either hold the BChD degree of the University of Pretoria or an equivalent qualification, or be admitted to master's degree studies in terms of the stipulations of General Regulations G.1.3 and G.62;
 - (bb) be registered as a dentist with the Health Professions Council of South Africa in the category Independent Practice.

(ii) For the MChD degree (endorsement Maxillofacial Surgery – Medical or Dental (Codes 11250091 and 11250011), a candidate

(aa) is required, subject to the stipulations of General Regulations G.1.3 and G.62, to have obtained the BChD and/or MBChB degree or equivalent qualification at least one year previously, passed the Advanced Trauma Life Support Course (maximum three attempts), as well as the basic subjects Anatomy 870, Physiology 806 and Pharmacology 809 and the PGDipDent (Oral Surgery), with a minimum pass mark of 65% in the major subject. Students who hold the Postgraduate Diploma in Dentistry [PGDipDent(Oral Surgery)] and/or the Master of Science Dentistry [MScDent] with Oral Surgery as the main field of study, may apply in writing for credit for the basic subject(s) (see also General Regulation G.10.3(b)).

(bb) is required to be registered as a dentist and/or physician with the Health Professions Council of South Africa in the category Independent Practice.

(iii) For the MChD degrees (Orthodontics, Periodontics and Oral Medicine and Prosthodontics) a candidate is required to pass all the basic subjects [University of Pretoria or the Colleges of Medicine of South Africa] before he or she may be admitted to the first year of study. The following basic subjects are required; for Orthodontics (Anatomy 871, Physiology 806); for Periodontics and Oral Medicine (Anatomy 873, Physiology 806, General pathology 808 and Oral biology 800) and for Prosthodontics (Anatomy 874, Physiology 806 and Oral biology 800).

Additional requirements

Second year of study: The student must also register for the MBChB degree and must apply for registration as a student in Medicine with the Health Professions Council of South Africa.

Other programme-specific information

In order to qualify for the degree, a candidate must, for a period of four to eight years, depending on the specific requirements for a particular field of study, have held a full-time training position/registrarship successfully, at a training institution approved by the University. In the case of Maxillofacial and Oral Surgery, a candidate must hold a full-time registrarship for a minimum of four years (for a candidate with both a BChD degree and a MBChB degree), a minimum of seven years (for a candidate with a BChD degree), a minimum of six years (for a candidate with a MBChB degree), or a minimum of five years (for MChD (ChirMaxFac-Dent)).

Examinations and pass requirements

i. Examinations in the basic subjects

A student must pass all the basic subjects (Anatomy [with Embryology], Physiology and Pharmacology [University of Pretoria or College of Maxillofacial and Oral Surgery of the Colleges of Medicine of South Africa] before he or she may be admitted to the first year of study. A minimum pass mark of at least 50% is required in all examinations for the University of Pretoria and College of Maxillofacial and Oral Surgery and a minimum pass mark of 65% from another tertiary institution (see also the General Regulations).

ii. Examinations in the subsidiary (intermediary) subjects

(The minimum pass mark is 50%.)

- a. For the endorsement Maxillofacial Surgery-Medicus, a student has to pass in Principles of surgery in the year of study as indicated, before he or she may continue with the programme.
- b. A student has to pass in Applied oral pathology at least two and a half years prior to the examination in his or her major subject.

These subsidiary subjects may be passed at the University of Pretoria or the College of Maxillofacial and Oral Surgery of the Colleges of Medicine of South Africa.

- iii. If a student fails any of the subsidiary subjects Principles of surgery or Applied oral pathology, the head of department may recommend that he or she be admitted to a second examination.

iv. **Examination and evaluation in the major subject**

- a. If a student fails his or her major subject, the student has to reapply for admission to the final examination of the College of Maxillofacial and Oral Surgery of the Colleges of Medicine of South Africa.
- b. In the light of the fact that a postgraduate student may repeat an examination in any subject only once, a student who fails a second examination, will have to discontinue the programme.
- c. If a student has been admitted to a second examination in the major subject, the head of department will determine whether he or she should vacate the registrarship at the end of the training period. The student has to vacate the registrarship immediately after the second examination has been completed.
- d. Subminimum: A student must obtain a subminimum of 60% in the clinical section (operation and short cases) of the examination, with a subminimum of 50% in all the other sections for the master's degree. He or she must also comply with the requirements regarding the number of operation procedures performed in each section, as required by the head of department. A final mark of at least 50% is required in order to pass in a subject.
- e. In addition to the stipulations already mentioned, the student must submit and pass a mini-dissertation (endorsement Maxillofacial Surgery-Med) or a dissertation (endorsement Maxillofacial Surgery-Dent), on an approved topic related to the major subject and submit a manuscript as required (see also the General Regulations). A complete record of operations (as a logbook) must also be submitted.

(v) The master's degree can only be conferred after the National Professional Examination [FCMFOS(SA)] has been passed (as this master's degree and the Fellowship may be used as an interwoven final equivalence examination).

Exemption

Exemption may be granted by the Dean, on the recommendation of the Head of Department by virtue of comparable training and/or experience in terms of the requirements of School Regulations, with the proviso that exemption from the examination and evaluation in the major subject may not be granted.

Please note: The regulations of the Health Professions Council of South Africa, as published in the Government Gazette No. 4631 of 11 January 1991 – Notice No. R.40 (as amended), will be used as a criterion in determining the period of exemption.

Pass with distinction

A student who obtains a final mark of at least 75% (with the first attempt) in the major subject, qualifies to obtain the degree with distinction.

General information

1. The content of the basic subjects, subsidiary subjects and attendance courses will be determined by the particular head of department in consultation with the head of the department at Dentistry or Medicine.
2. General information concerning content and extent of the basic and subsidiary subjects is available at the department in question.
3. Students have to ensure that certificates of satisfactory preparation are acquired in all the attendance courses.

Maxillofacial and Oral Surgery

Major subject:

Maxillofacial and oral surgery: Experience is acquired through practical and clinical training and supplemented by seminars, discussions, papers and research. MChD Oral Pathology (11250031)

Duration of study 5 years

Admission requirements

(i) Each candidate for admission to the study for the MChD degree programme must:

- either hold the BChD degree of the University of Pretoria or an equivalent qualification, or be admitted to master's degree studies in terms of the stipulations of General Regulations G.1.3 and G.62;
- be registered as a dentist with the Health Professions Council of South Africa in the category Independent Practice.

(ii) For the MChD degree (endorsement Maxillofacial Surgery – Medical or Dental (Codes 11250091 and 11250011), a candidate

- is required, subject to the stipulations of General Regulations G.1.3 and G.62, to have obtained the BChD and/or MBChB degree or equivalent qualification at least one year previously, passed the Advanced Trauma Life Support Course (maximum three attempts), as well as the basic subjects Anatomy 870, Physiology 806 and Pharmacology 809 and the PGDipDent (Oral Surgery), with a minimum pass mark of 65% in the major subject. Students who hold the Postgraduate Diploma in Dentistry [PGDipDent(Oral Surgery)] and/or the Master of Science Dentistry [MScDent] with Oral Surgery as the main field of study, may apply in writing for credit for the basic subject(s) (see also General Regulation G.10.3(b)).
- is required to be registered as a dentist and/or physician with the Health Professions Council of South Africa in the category Independent Practice.

(iii) For the MChD degrees (Orthodontics, Periodontics and Oral Medicine and Prosthodontics) a candidate is required to pass all the basic subjects [University of Pretoria or the Colleges of Medicine of South Africa] before he or she may be admitted to the first year of study. The following basic subjects are required; for Orthodontics (Anatomy 871, Physiology 806); for Periodontics and Oral Medicine (Anatomy 873, Physiology 806, General pathology 808 and Oral biology 800) and for Prosthodontics (Anatomy 874, Physiology 806 and Oral biology 800).

Other programme-specific information

Costs or fees for any examination(s) and registration at the Colleges of Medicine of South Africa have to be met by the student.

Examinations and pass requirements

(i) Examinations in the basic subjects

A student must pass the basic subject Molecular pathology (MPX 800) at the University of Pretoria. The basic subject, Anatomical pathology (ANP 808) will be examined by the College of Pathologists as their Part I examination.

(ii) Examination and evaluation in the major subject

(aa) The final exit examination of the major subject (MPG 802) will be administered by the College of Pathologists. Only candidates who have met all the requirements for the MChD degree in Oral Pathology except for the major subject (final examination), i.e. passed all the prerequisite subjects; completed all applicable training as prescribed (continuous evaluation of the candidate in an approved registrar post by the Head of Department of the candidate); and completed the required research component for the degree, will be allowed to write the College examination (exit examination) after which they will obtain both the FCP and the MChD as specialist qualifications.

(bb) The student must submit and pass a dissertation on an approved topic related to the major subject and submit a manuscript for publication as required.

(cc) A student who obtains a final mark of at least 75% (with the first attempt) in the major subject qualifies to obtain the degree with distinction.

(dd) Costs or fees for any examination(s) and registration at the Colleges of Medicine of South Africa have to be met by the student.

Exemption

Exemption may be granted by the Dean, on the recommendation of the Head of Department by virtue of comparable training and/or experience in terms of the requirements of School Regulations, with the proviso that exemption from the examination and evaluation in the major subject may not be granted.

Please note: The regulations of the Health Professions Council of South Africa, as published in the Government Gazette No. 4631 of 11 January 1991 – Notice No. R.40 (as amended), will be used as a criterion in determining the period of exemption.

Pass with distinction

A student who obtains a final mark of at least 75% (with the first attempt) in the major subject qualifies to obtain the degree with distinction.

MChD Orthodontics (11250021)

Duration of study 4 years

Admission requirements

- (i) Each candidate for admission to the study for the MChD degree programme must:
 - (aa) either hold the BChD degree of the University of Pretoria or an equivalent qualification, or be admitted to master's degree studies in terms of the stipulations of General Regulations G.1.3 and G.62;
 - (bb) be registered as a dentist with the Health Professions Council of South Africa in the category Independent Practice.
- (ii) For the MChD degree (endorsement Maxillofacial Surgery – Medical or Dental (Codes 11250091 and 11250011), a candidate
 - (aa) is required, subject to the stipulations of General Regulations G.1.3 and G.62, to have obtained the BChD and/or MBChB degree or equivalent qualification at least one year previously, passed the Advanced Trauma Life Support Course (maximum three attempts), as well as the basic subjects Anatomy 870, Physiology 806 and Pharmacology 809 and the PGDipDent (Oral Surgery), with a minimum pass mark of 65% in the major subject. Students who hold the Postgraduate Diploma in Dentistry [PGDipDent(Oral Surgery)] and/or the Master of Science Dentistry [MScDent] with Oral Surgery as the main field of study, may apply in writing for credit for the basic subject(s) (see also General Regulation G.10.3(b)).
 - (bb) is required to be registered as a dentist and/or physician with the Health Professions Council of South Africa in the category Independent Practice.
- (iii) For the MChD degrees (Orthodontics, Periodontics and Oral Medicine and Prosthodontics) a candidate is required to pass all the basic subjects [University of Pretoria or the Colleges of Medicine of South Africa] before he or she may be admitted to the first year of study. The following basic subjects are required; for Orthodontics (Anatomy 871, Physiology 806); for Periodontics and Oral Medicine (Anatomy 873, Physiology 806, General pathology 808 and Oral biology 800) and for Prosthodontics (Anatomy 874, Physiology 806 and Oral biology 800).

Examinations and pass requirements

(i) Examination in the basic subjects

A student must pass all the basic subjects [University of Pretoria or the Colleges of Medicine of South Africa] before he or she may be admitted to the first year of study. Refer to regulation D3(b)(iii).

(ii) Examination and evaluation in the major subject

Admission to the examination in the major subject is determined by the head of department.

- a. The final exit examination of the major subjects will be administered by the Colleges of Medicine of South Africa. Only candidates who have met all the requirements for the MChD degree except for the major subject (final examination), i.e. passed all the prerequisite subjects; completed all applicable training as prescribed by the Head of Department concerned; and completed the required research component for the degree, will be allowed to write the College examination (exit examination) after which they will obtain both the College qualification and the MChD as specialist qualifications.
- b. The student must submit and pass a dissertation on an approved topic related to the major subject and submit a manuscript for publication as required.
- c. Costs or fees for any examination(s) and registration at the Colleges of Medicine of South Africa have to be met by the student.

Also consult the General Regulations.

i. Examinations in the basic and subsidiary subjects (with the exception of KGM 803):

- a. A student must pass these subjects prior to admission to the examination in the major subject. A minimum of at least 50% is required to pass.
- b. Examinations in the basic and subsidiary subjects must be passed before the end of the third year of study, or at a time as determined by the head of department.

ii. Examinations in the major subject: Admission to the examination in the major subject is determined by the head of department.

- iii. If a student fails one or more of the basic subjects, subsidiary subjects or the major subject, the head of department may recommend to the examination moderating meeting, that he or she be admitted to a supplementary examination. A student who has been admitted to a second examination in a basic subject must write the examination during the next examination period. Second examinations in the major subject may only take place after a minimum period of six months has elapsed since the examination in which the student failed.

NB:

- a. In view of the fact that a postgraduate student may repeat an examination in any subject only once, a student who fails a second examination will have to discontinue the programme. In this event, a student who has been holding a registrarship, will have to vacate the position as soon as possible after one calendar month's notice to the University of Pretoria and/or other recognised training institution, where applicable.
 - b. If a student is admitted to a second examination in the major subject, the head of department will determine whether he/she has to vacate the registrarship at the end of the training period, or immediately after the second examination.
- iv. **Subminimum:** In order to pass in the major subject a student must obtain a subminimum of 50% in all the sections of the examination, with a final mark of at least 50%.
- v. The stipulations of the General Regulations are applicable with regard to attendance courses.

- vi. In addition to the stipulations already mentioned, a dissertation on a topic related to the major subject must also be submitted. In order to pass in the final examination, a pass mark must also be obtained for the dissertation.

Exemption

Exemption may be granted by the Dean, on the recommendation of the Head of Department by virtue of comparable training and/or experience in terms of the requirements of School Regulations, with the proviso that exemption from the examination and evaluation in the major subject may not be granted.

Please note: The regulations of the Health Professions Council of South Africa, as published in the Government Gazette No. 4631 of 11 January 1991 – Notice No. R.40 (as amended), will be used as a criterion in determining the period of exemption.

Pass with distinction

A student who obtains a final mark of at least 75% (with the first attempt) in the major subject qualifies to obtain the degree with distinction.

An MChD student, who has obtained at least 75% with the first attempt in both his major subject and the dissertation, will receive the degree with distinction.

MChD Periodontics and Oral Medicine (11250041)

Duration of study 4 years

Admission requirements

- (i) Each candidate for admission to the study for the MChD degree programme must:
 - (aa) either hold the BChD degree of the University of Pretoria or an equivalent qualification, or be admitted to master's degree studies in terms of the stipulations of General Regulations G.1.3 and G.62;
 - (bb) be registered as a dentist with the Health Professions Council of South Africa in the category Independent Practice.
- (ii) For the MChD degree (endorsement Maxillofacial Surgery – Medical or Dental (Codes 11250091 and 11250011), a candidate
 - (aa) is required, subject to the stipulations of General Regulations G.1.3 and G.62, to have obtained the BChD and/or MBChB degree or equivalent qualification at least one year previously, passed the Advanced Trauma Life Support Course (maximum three attempts), as well as the basic subjects Anatomy 870, Physiology 806 and Pharmacology 809 and the PGDipDent (Oral Surgery), with a minimum pass mark of 65% in the major subject. Students who hold the Postgraduate Diploma in Dentistry [PGDipDent(Oral Surgery)] and/or the Master of Science Dentistry [MScDent] with Oral Surgery as the main field of study, may apply in writing for credit for the basic subject(s) (see also General Regulation G.10.3(b)).
 - (bb) is required to be registered as a dentist and/or physician with the Health Professions Council of South Africa in the category Independent Practice.
- (iii) For the MChD degrees (Orthodontics, Periodontics and Oral Medicine and Prosthodontics) a candidate is required to pass all the basic subjects [University of Pretoria or the Colleges of Medicine of South Africa] before he or she may be admitted to the first year of study. The following basic subjects are required; for Orthodontics (Anatomy 871, Physiology 806); for Periodontics and Oral Medicine (Anatomy 873, Physiology 806, General pathology 808 and Oral biology 800) and for Prosthodontics (Anatomy 874, Physiology 806 and Oral biology 800).

Examinations and pass requirements

(i) Examination in the basic subjects

A student must pass all the basic subjects [University of Pretoria or the Colleges of Medicine of South Africa] before he or she may be admitted to the first year of study. Refer to regulation D3(b)(iii).

(ii) Examination and evaluation in the major subject

Admission to the examination in the major subject is determined by the head of department.

- a. The final exit examination of the major subjects will be administered by the Colleges of Medicine of South Africa. Only candidates who have met all the requirements for the MChD degree except for the major subject (final examination), i.e. passed all the prerequisite subjects; completed all applicable training as prescribed by the Head of Department concerned; and completed the required research component for the degree, will be allowed to write the College examination (exit examination) after which they will obtain both the College qualification and the MChD as specialist qualifications.
- b. The student must submit and pass a dissertation on an approved topic related to the major subject and submit a manuscript for publication as required.

- c. Costs or fees for any examination(s) and registration at the Colleges of Medicine of South Africa have to be met by the student.

Also consult the General Regulations.

i. Examinations in the basic and subsidiary subjects (with the exception of KGM 803):

- a. A student must pass these subjects prior to admission to the examination in the major subject. A minimum of at least 50% is required to pass.
- b. Examinations in the basic and subsidiary subjects must be passed before the end of the third year of study, or at a time as determined by the head of department.

ii. Examinations in the major subject: Admission to the examination in the major subject is determined by the head of department.

MCur Clinical Fields of Study (10251151)

Duration of study 2 years

Admission requirements

Subject to the stipulations of the General Regulations, at least a Bachelor of Nursing Science degree **and** according to the discretion of the head of department, an applicable post-basic qualification. The master's degree may only be awarded in the field of study of the prerequisite degree or equivalent qualification.

Examinations and pass requirements

A final mark of at least 50% is required in both VNM 800 and the dissertation in order to comply with all the requirements for the degree.

Pass with distinction

The degree is conferred with distinction on a student who has obtained at least 75% for the dissertation.

Curriculum: Year 1

Core modules

Dissertation: Nursing science 890 (VGK 890) - Credits: 280.00

Nursing research methodology 800 (VNM 800) - Credits: 40.00

Curriculum: Final year

Core modules

Dissertation: Nursing science 890 (VGK 890) - Credits: 280.00

MCur Clinical Fields of Study (Coursework) (10251152)

Duration of study 2 years

Programme information

The master's degree may only be awarded in the field of study of the prerequisite degree or equivalent qualification. Not all the different fields of study are presented every year. Commencement of studies must

therefore be discussed beforehand with the head of department.

Admission requirements

- Subject to the stipulations of General Regulation G.62 the Bachelor of Nursing Science degree is required for admission. In the case of the non-clinical fields another approved bachelor's degree may also be considered.
- Successful completion of an entrance examination according to the discretion of the head of department.

Clinical fields of specialisation:

- (aa) A minimum of one year experience as registered nurse in the workplace, which is deemed appropriate by the head of department for the proposed field of study, other nursing science-related modules excluded.
- (bb) Students must, at least on a part-time basis, have access to clinical learning facilities suitable for the chosen field of specialisation, and approved by the head of department for the field of study in question.
- (cc) Registration with the South African Nursing Council (SANC) is required as follows:
 - For **Advanced Medical and Surgical Nursing Science (Critical Care Nursing: General)**, as general nurse.
 - For **Advanced Medical and Surgical Nursing Science (Critical Care: Trauma and Emergency Nursing)**, as general nurse.
 - For **Advanced Midwifery and Neonatal Nursing Science**, as general nurse and midwife/accoucheur.
 - For **Advanced Psychiatric Nursing Science**, as general nurse and psychiatric nurse.
 - For **Advanced Community Nursing Science**, as general nurse, midwife/accoucheur and community nurse.
 - For **Advanced Paediatric Nursing Science**, as general nurse and midwife/accoucheur.
 - For **Advanced Neonatal Nursing Science**, as general nurse and midwife/accoucheur.
 - For **Advanced Women's Health**, as general nurse, midwife/ accoucheur and community nurse.
 - For **Primary Curative Care**, as general nurse, midwife/accou-cheur and community nurse, as well as listing with the SANC, in the Handling of Medicine in Nursing and the Physical Evaluation of Patients.

Non-clinical fields:

Registration with the South African Nursing Council (SANC) is required as follows:

- For **Nursing Management**, as general nurse and in Nursing Administration (Nursing Management).
- For **Nursing Education**, as general nurse and lecturer.

Examinations and pass requirements

- i. A final mark of at least 50% must be obtained in each of the prescribed modules in order to pass.
- ii. Modules with a practical and/or clinical training component can only be passed if the student has also completed all prescribed practical and/or clinical work to the satisfaction of the head of department.
- iii. The degree is conferred on a student who has complied with all the degree requirements.

Pass with distinction

- i. The degree is conferred with distinction on a student who has maintained an average of at least 75% for the duration of his/her studies, with the exception of Nursing research methodology (VNM 800) and Advanced dynamics of nursing practice (DNP 800).
- ii. Students who complete the degree in a clinical field of specialisation, will receive their degree certificates endorsed with the subspeciality in question.

MCur Nursing Education (10251051)

Duration of study 2 years

Admission requirements

Subject to the stipulations of the General Regulations, at least a Bachelor of Nursing Science degree **and** according to the discretion of the head of department, an applicable post-basic qualification. The master's degree may only be awarded in the field of study of the prerequisite degree or equivalent qualification.

Examinations and pass requirements

A final mark of at least 50% is required in both VNM 800 and the dissertation in order to comply with all the requirements for the degree.

Pass with distinction

The degree is conferred with distinction on a student who has obtained at least 75% for the dissertation.

Curriculum: Year 1

Fundamental modules

Dissertation: Nursing science 890 (VGK 890) - Credits: 280.00
Nursing research methodology 800 (VNM 800) - Credits: 40.00

Curriculum: Final year

Core modules

Dissertation: Nursing science 890 (VGK 890) - Credits: 280.00
Nursing research methodology 800 (VNM 800) - Credits: 40.00

MCur Nursing Education (Coursework) (10251052)

Duration of study 2 years

Programme information

The master's degree may only be awarded in the field of study of the prerequisite degree or equivalent qualification. Not all the different fields of study are presented every year. Commencement of studies must therefore be discussed beforehand with the head of department.

Admission requirements

- Subject to the stipulations of General Regulation G.62 the Bachelor of Nursing Science degree is required for admission. In the case of the non-clinical fields another approved bachelor's degree may also be considered.
- Successful completion of an entrance examination according to the discretion of the head of department.

Clinical fields of specialisation:

- (aa) A minimum of one year experience as registered nurse in the workplace, which is deemed appropriate by the head of department for the proposed field of study, other nursing science-related modules excluded.
- (bb) Students must, at least on a part-time basis, have access to clinical learning facilities suitable for the chosen field of specialisation, and approved by the head of department for the field of study in question.
- (cc) Registration with the South African Nursing Council (SANC) is required as follows:
 - For **Advanced Medical and Surgical Nursing Science (Critical Care Nursing: General)**, as general nurse.
 - For **Advanced Medical and Surgical Nursing Science (Critical Care: Trauma and Emergency Nursing)**, as general nurse.
 - For **Advanced Midwifery and Neonatal Nursing Science**, as general nurse and midwife/accoucheur.
 - For **Advanced Psychiatric Nursing Science**, as general nurse and psychiatric nurse.
 - For **Advanced Community Nursing Science**, as general nurse, midwife/accoucheur and community nurse.
 - For **Advanced Paediatric Nursing Science**, as general nurse and midwife/accoucheur.
 - For **Advanced Neonatal Nursing Science**, as general nurse and midwife/accoucheur.
 - For **Advanced Women's Health**, as general nurse, midwife/ accoucheur and community nurse.
 - For **Primary Curative Care**, as general nurse, midwife/accoucheur and community nurse, as well as listing with the SANC, in the Handling of Medicine in Nursing and the Physical Evaluation of Patients.

Non-clinical fields:

Registration with the South African Nursing Council (SANC) is required as follows:

- For **Nursing Management**, as general nurse and in Nursing Administration (Nursing Management).
- For **Nursing Education**, as general nurse and lecturer.

Examinations and pass requirements

- i. A final mark of at least 50% must be obtained in each of the prescribed modules in order to pass.
- ii. Modules with a practical and/or clinical training component can only be passed if the student has also completed all prescribed practical and/or clinical work to the satisfaction of the head of department.
- iii. The degree is conferred on a student who has complied with all the degree requirements.

Pass with distinction

- i. The degree is conferred with distinction on a student who has maintained an average of at least 75% for the duration of his/her studies, with the exception of Nursing research methodology (VNM 800) and Advanced dynamics of nursing practice (DNP 800).
- ii. Students who complete the degree in a clinical field of specialisation, will receive their degree certificates endorsed with the subspeciality in question.

Curriculum: Year 1

Fundamental modules

MDiet Coursework (10259002)

Duration of study 2 years

Programme information

For the coursework component, a student has to take compulsory modules to a total of 80 credits and choose modules (from elective modules) to a total of 120 credits. Any specific module is offered on condition that a minimum number of students is registered for the module, as determined by the Head of the department and the Dean. Students must consult the head of the division in order to compile a meaningful programme, as well as for information on the syllabi of the modules. The departmental postgraduate brochure should also be consulted.

Also consult General Regulations.

Admission requirements

- Subject to the stipulations of General Regulation G.62 the minimum requirement is a Bachelor's degree in Dietetics/Human Nutrition as well as registration as a dietician with the Health Professions Council of South Africa.

- At least one year of full-time practical experience after acquiring the qualification in terms of which admission to master's degree study is sought.
- Students are selected on the grounds of previous academic achievement.

Additional requirements

(TNM 800) Applied Research Methodology 800 or an equivalent module must be passed satisfactorily.

Examinations and pass requirements

A final mark of at least 50% is required to pass in the coursework. A minimum of 50% is required to pass in the essay.

Pass with distinction

The degree is conferred with distinction on a student who has obtained an average of at least 75% in the coursework as well as a minimum of 75% in the essay.

Curriculum: Year 1

Core modules

Essay: Dietetics 895 (DEK 895) - Credits: 120.00

Nutritional assessment 881 (DEK 881) - Credits: 30.00

Introduction to research and nutritional epidemiology 880 (DEK 880) - Credits: 30.00

Literature study 882 (DEK 882) - Credits: 20.00

Elective modules

Early childhood nutrition intervention 884 (DEK 884) - Credits: 20.00

Immunonutrition 804 (DEK 804) - Credits: 20.00

Sport nutrition 805 (DEK 805) - Credits: 20.00

Nutrition counselling 806 (DEK 806) - Credits: 20.00

MDiet Dietetics (10259001)

Duration of study 2 years

Programme information

The master's degree is conferred by virtue of a dissertation (DEK 890) on an approved topic based on research.

Admission requirements

- Subject to the stipulations of General Regulation G.62 students must hold a recognised honours degree in Dietetics/Human Nutrition and be registered as a dietician with the Health Professions Council of South Africa.
- At least one year of full-time practical experience after acquiring the qualification in terms of which admission to master's degree study is sought.
- Students are selected on the grounds of previous academic achievement.

Additional requirements

(TNM 800) Applied research methodology 800 or an equivalent module must be passed.

Examinations and pass requirements

A minimum pass mark of 50% is required for the dissertation.

Pass with distinction

The degree is conferred with distinction on a student who obtains at least 75% in the dissertation.

Curriculum: Year 1

Core modules

Dissertation: Dietetics 890 (DEK 890) - Credits: 240.00
Applied research methodology 800 (TNM 800) - Credits: 5.00

MEarly Childhood Intervention Early Childhood Intervention (10258240)

Duration of study 2 years

Contact Prof K van Niekerk karin.vanniekerk@up.ac.za +27 (0)123563220

Admission requirements

A candidate must be in possession of an applicable four-year professional bachelor's degree or an equivalent qualification.

Additional requirements

Also consult General Regulations.

Other programme-specific information

Refer to the study guide available on request from the Centre for Augmentative and Alternative Communication for information on the subdivisions of specific modules.

Examinations and pass requirements

- (i) A minimum of 50% is required to pass in a module, and all modules must be passed before the degree will be conferred.
- (ii) The nature and frequency of examinations will be determined by the head of department in conjunction with the programme supervisor.

Second examinations

Second examinations or regrouping of work assignments will take place within two weeks or a month after conclusion of the examination in which the student failed.

Promotion to next study year

A student must pass the first year of study for admission to the second year of study. Participation as described in the study guide is a requirement for promotion to the second year of study.

Pass with distinction

The degree is conferred with distinction on a student who has obtained an average of at least 75% in all the modules.

MMed Anaesthesiology (10250011)

Duration of study 4 years

Contact Prof AJ Rantloane arthur.rantloane@up.ac.za +27 (0)123192108

Programme information

Please note:

- All MMed students must register for, and attend (TNM 800) Applied research methodology 800 satisfactorily, preferably during the intermediate phase/ after completion of Part 1 and before sitting for Part 2 of the MMed.
- All MMed students must submit a dissertation (MMS 800) which must be assessed as satisfactory by an external examiner, or a research article that has been accepted for publication in a subsidised periodical. The student must be the first author of the article. An ordinary literature review will not be accepted. The research proposal must be approved by the MMed Protocol Committee prior to the intermediate exam (surgical disciplines) or otherwise within two years of enrolment (other disciplines). It is in the best interest of the candidate to complete the research component prior to the exit exam and if not possible, preferably to postpone the exam. If the exam is to be written in Semester 2 of the 4th year the dissertation should be submitted 1 September of the 4th year. If this is not the case, the supervisor should complete and sign the necessary documentation, stipulating that the candidate will complete the project within the next 3 to 6 months. The dissertation must be submitted prior to the taking of the CMSA fellowship examination.
- A systematic literature review (Cochrane type) on an approved subject, which is undertaken in such a manner that bias is minimised, may be presented as an alternative to the dissertation for awarding the MMed (Public Health Medicine) degree. It requires, inter alia, a protocol with clearly formulated objectives and methods. Inclusion and exclusion methods for the study must be determined. Where applicable, the data must be summarised (meta analysis), with applicable statistical methods. This alternative is in special cases applicable to other MMed degrees.

Registrarship:

- Inquire at the Head of Department regarding the availability of registrarships for the specialisation Medical Oncology.
- Inquire at the Head of the Department of Family Medicine regarding the availability of registrarships for the specialisation Emergency Medicine.

Each student must prove to the University that he or she

- i. has successfully filled the required full-time training post for a period of four or five years according to the requirements of the department in question at the Steve Biko Academic Hospital, Tshwane Academic Division of the NHLS (in case of pathology registrars) or Kalafong Hospital or at an institution recognised by the University as equivalent;
- ii. has completed the theoretical, practical, clinical and applicable training as stipulated;
- iii. has passed the prescribed written, oral, practical and/or clinical university examinations, and
- iv. has successfully completed the research component of the degree.

Admission requirements

A prospective student for the MMed degree programme must be in possession of the MBChB degree of this University or a qualification deemed by the University to be equivalent to the MBChB degree for at least two years. In addition such a student must be registered as a physician with the Health Professions Council of South Africa for at least one year.

Other programme-specific information

“Major subject” refers to the recognised field of study in Medicine in which the student specialises. The study of the major subject extends over four or five years, as prescribed by the department in question.

Examinations and pass requirements

- i. The sequence of the examinations in the prerequisite subjects will be determined by the head of the department under which the major subject falls.
- ii. The nature, duration and time of the examinations in the prerequisite subjects are determined in cooperation with the heads of the departments under which the prerequisite subjects fall – with the proviso that, except in cases where stipulated otherwise, the examinations in the prerequisite subjects may be held at any time prior to or concurrently with the major subject. The examinations in the major subjects are held as follows:
- iii. In the case of four-year programmes: not before the end of the third year.
- iv. In the case of five-year programmes: not before the end of the fourth year.
- v. A minimum final mark of 50% is required by all departments to pass in a subject and in the clinical section of the examination, a subminimum of 50%. General Regulations apply.
- vi. A student is not admitted to the examination in a prerequisite subject (second examinations excluded) more than twice, nor is he or she admitted to the examination in the major subject more than twice.

Note: Certificates of satisfactory preparation and progress are required in respect of the fourth year of four-year programmes in which an examination is held at the end of the third year.

Second examinations

Second examinations for MMed students will only be held after at least six months have elapsed since the conclusion of the examination in which the student had failed.

Rules governing the writing of the examinations of the College of Medicine of South Africa [CMSA]

- i. Only candidates who have met all requirements for the MMed degree except for the major subject (final examination), i.e. passed all prerequisite subjects (the latter to be interchangeable; can be passed either at the University or as primary and intermediary examinations at the College of Medicine of South Africa [CMSA], completed all practical, clinical and applicable training of four or five years as prescribed by the relevant academic department (continuous evaluation of the candidate, in an approved registrar post, by the Head of department of the candidate); and completed the required research component for the degree in accordance

with the Faculty Yearbook regulations, i.e. Applied research methodology 800 (TNM 800) and the dissertation (MMS 800) or an article (not an ordinary literature review) that has been accepted for publication in a subsidised periodical, will be allowed to write the college examination (exit examination), after which they will obtain both the CMSA fellowship and the MMed as specialist qualifications.

- ii. The rules have been effective as from 1 January 2011. As a transitional measure, cases will be considered on an individual basis where necessary.

Exemption

Exemption

- i. The Faculty Board may grant partial exemption from the training and work mentioned under par. (b) and (c)(i) and (ii) above on the grounds of comparable training and experience completed in another post or at another recognised institution – with the proviso that exemption from a maximum period of 18 months may be granted with regard to four-year and five-year programmes.
- ii. Exemption from a maximum of three years may be granted by the Department of Medical Oncology for the MMed in Medical Oncology [MMed(MedOnc)] on the grounds of the MMed(Int) or MMed(Paed) degree of this University, or experience recognised by the University as equivalent.
- iii. Specific prerequisite subjects must be passed within 24 months after commencement of the programme.
- iv. Exemption from a maximum of two years' clinical training may be granted in the Department of Forensic Medicine in respect of the MMed(Path) degree with specialisation Forensic Pathology, to a candidate already in possession of an MMed degree (or a degree deemed equivalent by the University) with specialisation in Anatomical Pathology.

Pass with distinction

The degree is conferred at the end of the prescribed training period (i.e. three, four or five years, respectively). The degree is conferred with distinction on a student who has obtained a final mark of at least 75% in his or her major subject.

General information

Registrars

Departments expect registrars to participate increasingly in the examining and treatment of patients in the hospital, both in-patients and out-patients, as well as performing and interpreting tests in the laboratory (where applicable); initially under supervision and later increasingly at their own responsibility. Lectures/symposia with closely related departments are organised, as well as discussions of literature, etc.

Exemption

Exemption

- i. The Faculty Board may grant partial exemption from the training and work mentioned under par. (b) and (c)(i) and (ii) above on the grounds of comparable training and experience completed in another post or at another recognised institution – with the proviso that exemption from a maximum period of 18 months may be granted with regard to four-year and five-year programmes.
- ii. Exemption from a maximum of three years may be granted by the Department of Medical Oncology for the MMed in Medical Oncology [MMed(MedOnc)] on the grounds of the MMed(Int) or MMed(Paed) degree of this University, or experience recognised by the University as equivalent.
- iii. Specific prerequisite subjects must be passed within 24 months after commencement of the programme.
- iv. Exemption from a maximum of two years' clinical training may be granted in the Department of Forensic Medicine in respect of the MMed(Path) degree with specialisation Forensic Pathology, to a candidate already in possession of an MMed degree (or a degree deemed equivalent by the University) with specialisation in Anatomical Pathology.

Pass with distinction

The degree is conferred at the end of the prescribed training period (i.e. three, four or five years, respectively). The degree is conferred with distinction on a student who has obtained a final mark of at least 75% in his or her major subject.

General information

Registrars

Departments expect registrars to participate increasingly in the examining and treatment of patients in the hospital, both in-patients and out-patients, as well as performing and interpreting tests in the laboratory (where applicable); initially under supervision and later increasingly at their own responsibility. Lectures/symposia with closely related departments are organised, as well as discussions of literature, etc.

Programme information

Please note:

- i. All MMed students must register for, and attend (TNM 800) Applied research methodology 800 satisfactorily, preferably during the intermediate phase/ after completion of Part 1 and before sitting for Part 2 of the MMed.
- ii. All MMed students must submit a dissertation (MMS 800) which must be assessed as satisfactory by an external examiner, or a research article that has been accepted for publication in a subsidised periodical. The student must be the first author of the article. An ordinary literature review will not be accepted. The research proposal must be approved by the MMed Protocol Committee prior to the intermediate exam (surgical disciplines) or otherwise within two years of enrolment (other disciplines). It is in the best interest of the candidate to complete the research component prior to the exit exam and if not possible, preferably to postpone the exam. If the exam is to be written in Semester 2 of the 4th year the dissertation should be submitted 1 September of the 4th year. If this is not the case, the supervisor should complete and sign the necessary documentation, stipulating that the candidate will complete the project within the next 3 to 6 months. The dissertation must be submitted prior to the taking of the CMSA fellowship examination.
- iii. A systematic literature review (Cochrane type) on an approved subject, which is undertaken in such a manner that bias is minimised, may be presented as an alternative to the dissertation for awarding the MMed (Public Health Medicine) degree. It requires, inter alia, a protocol with clearly formulated objectives and methods. Inclusion and exclusion methods for the study must be determined. Where applicable, the data must be summarised (meta analysis), with applicable statistical methods. This alternative is in special cases applicable to other MMed degrees.

Registrarship:

- Inquire at the Head of Department regarding the availability of registrarships for the specialisation Medical Oncology.

- Inquire at the Head of the Department of Family Medicine regarding the availability of registrarships for the specialisation Emergency Medicine.

Each student must prove to the University that he or she

- has successfully filled the required full-time training post for a period of four or five years according to the requirements of the department in question at the Steve Biko Academic Hospital, Tshwane Academic Division of the NHLS (in case of pathology registrars) or Kalafong Hospital or at an institution recognised by the University as equivalent;
- has completed the theoretical, practical, clinical and applicable training as stipulated;
- has passed the prescribed written, oral, practical and/or clinical university examinations, and
- has successfully completed the research component of the degree.

Admission requirements

A prospective student for the MMed degree programme must be in possession of the MBChB degree of this University or a qualification deemed by the University to be equivalent to the MBChB degree for at least two years. In addition such a student must be registered as a physician with the Health Professions Council of South Africa for at least one year.

Other programme-specific information

Satisfactory progress after one year of training is required, as evaluated by the applicable examination panel.

“Major subject” refers to the recognised field of study in Medicine in which the student specialises. The study of the major subject extends over four or five years, as prescribed by the department in question.

Examinations and pass requirements

- The sequence of the examinations in the prerequisite subjects will be determined by the head of the department under which the major subject falls.
- The nature, duration and time of the examinations in the prerequisite subjects are determined in cooperation with the heads of the departments under which the prerequisite subjects fall – with the proviso that, except in cases where stipulated otherwise, the examinations in the prerequisite subjects may be held at any time prior to or concurrently with the major subject. The examinations in the major subjects are held as follows:
- In the case of four-year programmes: not before the end of the third year.
- In the case of five-year programmes: not before the end of the fourth year.
- A minimum final mark of 50% is required by all departments to pass in a subject and in the clinical section of the examination, a subminimum of 50%. General Regulations apply.
- A student is not admitted to the examination in a prerequisite subject (second examinations excluded) more than twice, nor is he or she admitted to the examination in the major subject more than twice.

Note: Certificates of satisfactory preparation and progress are required in respect of the fourth year of four-year programmes in which an examination is held at the end of the third year.

Second examinations

Second examinations for MMed students will only be held after at least six months have elapsed since the conclusion of the examination in which the student had failed.

Rules governing the writing of the examinations of the College of Medicine of South Africa [CMSA]

- Only candidates who have met all requirements for the MMed degree except for the major subject (final examination), i.e. passed all prerequisite subjects (the latter to be interchangeable; can be passed either at

the University or as primary and intermediary examinations at the College of Medicine of South Africa [CMSA], completed all practical, clinical and applicable training of four or five years as prescribed by the relevant academic department (continuous evaluation of the candidate, in an approved registrar post, by the Head of department of the candidate); and completed the required research component for the degree in accordance with the Faculty Yearbook regulations, i.e. Applied research methodology 800 (TNM 800) and the dissertation (MMS 800) or an article (not an ordinary literature review) that has been accepted for publication in a subsidised periodical, will be allowed to write the college examination (exit examination), after which they will obtain both the CMSA fellowship and the MMed as specialist qualifications.

- ii. The rules have been effective as from 1 January 2011. As a transitional measure, cases will be considered on an individual basis where necessary.

Exemption

- i. Only candidates who have met all requirements for the MMed degree except for the major subject (final examination), i.e. passed all prerequisite subjects (the latter to be interchangeable; can be passed either at the University or as primary and intermediary examinations at the College of Medicine of South Africa [CMSA], completed all practical, clinical and applicable training of four or five years as prescribed by the relevant academic department (continuous evaluation of the candidate, in an approved registrar post, by the Head of department of the candidate); and completed the required research component for the degree in accordance

with the Faculty Yearbook regulations, i.e. Applied research methodology 800 (TNM 800) and the dissertation (MMS 800) or an article (not an ordinary literature review) that has been accepted for publication in a subsidised periodical, will be allowed to write the college examination (exit examination), after which they will obtain both the CMSA fellowship and the MMed as specialist qualifications.

- ii. The rules have been effective as from 1 January 2011. As a transitional measure, cases will be considered on an individual basis where necessary.

Exemption

Exemption

- i. The Faculty Board may grant partial exemption from the training and work mentioned under par. (b) and (c)(i) and (ii) above on the grounds of comparable training and experience completed in another post or at another recognised institution – with the proviso that exemption from a maximum period of 18 months may be granted with regard to four-year and five-year programmes.
- ii. Exemption from a maximum of three years may be granted by the Department of Medical Oncology for the MMed in Medical Oncology [MMed(MedOnc)] on the grounds of the MMed(Int) or MMed(Paed) degree of this University, or experience recognised by the University as equivalent.
- iii. Specific prerequisite subjects must be passed within 24 months after commencement of the programme.
- iv. Exemption from a maximum of two years' clinical training may be granted in the Department of Forensic Medicine in respect of the MMed(Path) degree with specialisation Forensic Pathology, to a candidate already in possession of an MMed degree (or a degree deemed equivalent by the University) with specialisation in Anatomical Pathology.

Pass with distinction

The degree is conferred at the end of the prescribed training period (i.e. three, four or five years, respectively). The degree is conferred with distinction on a student who has obtained a final mark of at least 75% in his or her major subject.

General information

Registrars

Departments expect registrars to participate increasingly in the examining and treatment of patients in the hospital, both in-patients and out-patients, as well as performing and interpreting tests in the laboratory (where applicable); initially under supervision and later increasingly at their own responsibility. Lectures/symposia with closely related departments are organised, as well as discussions of literature, etc.

Programme information

Please note:

- All MMed students must register for, and attend (TNM 800) Applied research methodology 800 satisfactorily, preferably during the intermediate phase/ after completion of Part 1 and before sitting for Part 2 of the MMed.
- All MMed students must submit a dissertation (MMS 800) which must be assessed as satisfactory by an external examiner, or a research article that has been accepted for publication in a subsidised periodical. The student must be the first author of the article. An ordinary literature review will not be accepted. The research proposal must be approved by the MMed Protocol Committee prior to the intermediate exam (surgical disciplines) or otherwise within two years of enrolment (other disciplines). It is in the best interest of the candidate to complete the research component prior to the exit exam and if not possible, preferably to postpone the exam. If the exam is to be written in Semester 2 of the 4th year the dissertation should be submitted 1 September of the 4th year. If this is not the case, the supervisor should complete and sign the necessary documentation, stipulating that the candidate will complete the project within the next 3 to 6 months. The dissertation must be submitted prior to the taking of the CMSA fellowship examination.
- A systematic literature review (Cochrane type) on an approved subject, which is undertaken in such a manner that bias is minimised, may be presented as an alternative to the dissertation for awarding the MMed (Public Health Medicine) degree. It requires, inter alia, a protocol with clearly formulated objectives and methods. Inclusion and exclusion methods for the study must be determined. Where applicable, the data must be summarised (meta analysis), with applicable statistical methods. This alternative is in special cases applicable to other MMed degrees.

Registrarship:

- Inquire at the Head of Department regarding the availability of registrarships for the specialisation Medical Oncology.
- Inquire at the Head of the Department of Family Medicine regarding the availability of registrarships for the specialisation Emergency Medicine.

Each student must prove to the University that he or she

- i. has successfully filled the required full-time training post for a period of four or five years according to the requirements of the department in question at the Steve Biko Academic Hospital, Tshwane Academic Division of the NHLS (in case of pathology registrars) or Kalafong Hospital or at an institution recognised by the University as equivalent;
- ii. has completed the theoretical, practical, clinical and applicable training as stipulated;
- iii. has passed the prescribed written, oral, practical and/or clinical university examinations, and
- iv. has successfully completed the research component of the degree.

Admission requirements

A prospective student for the MMed degree programme must be in possession of the MBChB degree of this University or a qualification deemed by the University to be equivalent to the MBChB degree for at least two years. In addition such a student must be registered as a physician with the Health Professions Council of South Africa for at least one year.

Other programme-specific information

“Major subject” refers to the recognised field of study in Medicine in which the student specialises. The study of the major subject extends over four or five years, as prescribed by the department in question.

Examinations and pass requirements

- i. The sequence of the examinations in the prerequisite subjects will be determined by the head of the department under which the major subject falls.
- ii. The nature, duration and time of the examinations in the prerequisite subjects are determined in cooperation with the heads of the departments under which the prerequisite subjects fall – with the proviso that, except in cases where stipulated otherwise, the examinations in the prerequisite subjects may be held at any time prior to or concurrently with the major subject. The examinations in the major subjects are held as follows:
- iii. In the case of four-year programmes: not before the end of the third year.
- iv. In the case of five-year programmes: not before the end of the fourth year.
- v. A minimum final mark of 50% is required by all departments to pass in a subject and in the clinical section of the examination, a subminimum of 50%. General Regulations apply.
- vi. A student is not admitted to the examination in a prerequisite subject (second examinations excluded) more than twice, nor is he or she admitted to the examination in the major subject more than twice.

Note: Certificates of satisfactory preparation and progress are required in respect of the fourth year of four-year programmes in which an examination is held at the end of the third year.

Second examinations

Second examinations for MMed students will only be held after at least six months have elapsed since the conclusion of the examination in which the student had failed.

Rules governing the writing of the examinations of the College of Medicine of South Africa [CMSA]

- i. Only candidates who have met all requirements for the MMed degree except for the major subject (final examination), i.e. passed all prerequisite subjects (the latter to be interchangeable; can be passed either at the University or as primary and intermediary examinations at the College of Medicine of South Africa [CMSA], completed all practical, clinical and applicable training of four or five years as prescribed by the relevant academic department (continuous evaluation of the candidate, in an approved registrar post, by the Head of

department of the candidate); and completed the required research component for the degree in accordance with the Faculty Yearbook regulations, i.e. Applied research methodology 800 (TNM 800) and the dissertation (MMS 800) or an article (not an ordinary literature review) that has been accepted for publication in a subsidised periodical, will be allowed to write the college examination (exit examination), after which they will obtain both the CMSA fellowship and the MMed as specialist qualifications.

- i. The sequence of the examinations in the prerequisite subjects will be determined by the head of the department under which the major subject falls.
- ii. The nature, duration and time of the examinations in the prerequisite subjects are determined in cooperation with the heads of the departments under which the prerequisite subjects fall – with the proviso that, except in cases where stipulated otherwise, the examinations in the prerequisite subjects may be held at any time prior to or concurrently with the major subject. The examinations in the major subjects are held as follows:
- iii. In the case of four-year programmes: not before the end of the third year.
- iv. In the case of five-year programmes: not before the end of the fourth year.
- v. A minimum final mark of 50% is required by all departments to pass in a subject and in the clinical section of the examination, a subminimum of 50%. General Regulations apply.
- vi. A student is not admitted to the examination in a prerequisite subject (second examinations excluded) more than twice, nor is he or she admitted to the examination in the major subject more than twice.

Note: Certificates of satisfactory preparation and progress are required in respect of the fourth year of four-year programmes in which an examination is held at the end of the third year.

Second examinations

Second examinations for MMed students will only be held after at least six months have elapsed since the conclusion of the examination in which the student had failed.

Rules governing the writing of the examinations of the College of Medicine of South Africa [CMSA]

- i. Only candidates who have met all requirements for the MMed degree except for the major subject (final examination), i.e. passed all prerequisite subjects (the latter to be interchangeable; can be passed either at the University or as primary and intermediary examinations at the College of Medicine of South Africa [CMSA],

completed all practical, clinical and applicable training of four or five years as prescribed by the relevant academic department (continuous evaluation of the candidate, in an approved registrar post, by the Head of department of the candidate); and completed the required research component for the degree in accordance with the Faculty Yearbook regulations, i.e. Applied research methodology 800 (TNM 800) and the dissertation (MMS 800) or an article (not an ordinary literature review) that has been accepted for publication in a subsidised periodical, will be allowed to write the college examination (exit examination), after which they will obtain both the CMSA fellowship and the MMed as specialist qualifications.

- ii. The rules have been effective as from 1 January 2011. As a transitional measure, cases will be considered on an individual basis where necessary.

Exemption

Exemption

- i. The Faculty Board may grant partial exemption from the training and work mentioned under par. (b) and (c)(i) and (ii) above on the grounds of comparable training and experience completed in another post or at another recognised institution – with the proviso that exemption from a maximum period of 18 months may be granted with regard to four-year and five-year programmes.
- ii. Exemption from a maximum of three years may be granted by the Department of Medical Oncology for the MMed in Medical Oncology [MMed(MedOnc)] on the grounds of the MMed(Int) or MMed(Paed) degree of this University, or experience recognised by the University as equivalent.
- iii. Specific prerequisite subjects must be passed within 24 months after commencement of the programme.
- iv. Exemption from a maximum of two years' clinical training may be granted in the Department of Forensic Medicine in respect of the MMed(Path) degree with specialisation Forensic Pathology, to a candidate already in possession of an MMed degree (or a degree deemed equivalent by the University) with specialisation in Anatomical Pathology.

Pass with distinction

The degree is conferred at the end of the prescribed training period (i.e. three, four or five years, respectively). The degree is conferred with distinction on a student who has obtained a final mark of at least 75% in his or her major subject.

General information

Registrars

Departments expect registrars to participate increasingly in the examining and treatment of patients in the hospital, both in-patients and out-patients, as well as performing and interpreting tests in the laboratory (where applicable); initially under supervision and later increasingly at their own responsibility. Lectures/symposia with closely related departments are organised, as well as discussions of literature, etc.

Duration of study 4 years

Contact Prof GR Tintinger gregory.tintinger@up.ac.za +27 (0)123542287

Programme information

Please note:

- i. All MMed students must register for, and attend (TNM 800) Applied research methodology 800 satisfactorily, preferably during the intermediate phase/ after completion of Part 1 and before sitting for Part 2 of the MMed.
- ii. All MMed students must submit a dissertation (MMS 800) which must be assessed as satisfactory by an external examiner, or a research article that has been accepted for publication in a subsidised periodical. The student must be the first author of the article. An ordinary literature review will not be accepted. The research proposal must be approved by the MMed Protocol Committee prior to the intermediate exam (surgical disciplines) or otherwise within two years of enrolment (other disciplines). It is in the best interest of the candidate to complete the research component prior to the exit exam and if not possible, preferably to postpone the exam. If the exam is to be written in Semester 2 of the 4th year the dissertation should be submitted 1 September of the 4th year. If this is not the case, the supervisor should complete and sign the necessary documentation, stipulating that the candidate will complete the project within the next 3 to 6 months. The dissertation must be submitted prior to the taking of the CMSA fellowship examination.
- iii. A systematic literature review (Cochrane type) on an approved subject, which is undertaken in such a manner that bias is minimised, may be presented as an alternative to the dissertation for awarding the MMed (Public Health Medicine) degree. It requires, inter alia, a protocol with clearly formulated objectives and methods. Inclusion and exclusion methods for the study must be determined. Where applicable, the data must be summarised (meta analysis), with applicable statistical methods. This alternative is in special cases applicable to other MMed degrees.

Registrarship:

- Inquire at the Head of Department regarding the availability of registrarships for the specialisation Medical Oncology.
- Inquire at the Head of the Department of Family Medicine regarding the availability of registrarships for the specialisation Emergency Medicine.

Each student must prove to the University that he or she

- i. has successfully filled the required full-time training post for a period of four or five years according to the requirements of the department in question at the Steve Biko Academic Hospital, Tshwane Academic Division of the NHLS (in case of pathology registrars) or Kalafong Hospital or at an institution recognised by the University as equivalent;
- ii. has completed the theoretical, practical, clinical and applicable training as stipulated;
- iii. has passed the prescribed written, oral, practical and/or clinical university examinations, and
- iv. has successfully completed the research component of the degree.

Admission requirements

A prospective student for the MMed degree programme must be in possession of the MBChB degree of this University or a qualification deemed by the University to be equivalent to the MBChB degree for at least two years. In addition such a student must be registered as a physician with the Health Professions Council of South Africa for at least one year.

Other programme-specific information

A certificate issued by the Head of Department must be submitted as proof that the student is well qualified in research methodology before the degree is conferred.

“Major subject” refers to the recognised field of study in Medicine in which the student specialises. The study of the major subject extends over four or five years, as prescribed by the department in question.

Examinations and pass requirements

- i. The sequence of the examinations in the prerequisite subjects will be determined by the head of the department under which the major subject falls.
- ii. The nature, duration and time of the examinations in the prerequisite subjects are determined in cooperation with the heads of the departments under which the prerequisite subjects fall – with the proviso that, except in cases where stipulated otherwise, the examinations in the prerequisite subjects may be held at any time prior to or concurrently with the major subject. The examinations in the major subjects are held as follows:
- iii. In the case of four-year programmes: not before the end of the third year.
- iv. In the case of five-year programmes: not before the end of the fourth year.
- v. A minimum final mark of 50% is required by all departments to pass in a subject and in the clinical section of the examination, a subminimum of 50%. General Regulations apply.
- vi. A student is not admitted to the examination in a prerequisite subject (second examinations excluded) more than twice, nor is he or she admitted to the examination in the major subject more than twice.

Note: Certificates of satisfactory preparation and progress are required in respect of the fourth year of four-year programmes in which an examination is held at the end of the third year.

Second examinations

Second examinations for MMed students will only be held after at least six months have elapsed since the conclusion of the examination in which the student had failed.

Admission requirements

- A candidate for admission to the study for the MPharmMed degree must be in possession of the MBChB degree of this University or a qualification deemed equivalent by the University for at least one year. Additionally the candidate must be registered as a medical practitioner with the Health Professions Council of South Africa.

Additional requirements

Also consult General Regulations.

Examinations and pass requirements

- The examinations for each year of study will take place during the summer examination period.
- To pass in a module, a minimum final mark of 50% is required.
- In addition to the examination, a student will be required to complete all practical work and work assignments satisfactorily, as well as (NAV 882) Research report (Preparation) 882 and pass (NAV 883) Research report 883 (minimum pass mark 50%), in order to comply with all the requirements for the degree.
- Second examinations will not be held before at least six months have elapsed since conclusion of the examination in which the student failed.

Pass with distinction

The degree will be conferred with distinction on a student who has obtained a final mark of at least 75% in the following modules:

- (i) Medical pharmacology 802 and 803
- (ii) Pharmacokinetics and pharmacodynamics 802 and 803, as well as a final mark of at least 75% for (NAV 883) Research report 883 in the final year of study.

Programme information

Please note:

- i. All MMed students must register for, and attend (TNM 800) Applied research methodology 800 satisfactorily, preferably during the intermediate phase/ after completion of Part 1 and before sitting for Part 2 of the MMed.
- ii. All MMed students must submit a dissertation (MMS 800) which must be assessed as satisfactory by an external examiner, or a research article that has been accepted for publication in a subsidised periodical. The student must be the first author of the article. An ordinary literature review will not be accepted. The research proposal must be approved by the MMed Protocol Committee prior to the intermediate exam (surgical

- disciplines) or otherwise within two years of enrolment (other disciplines). It is in the best interest of the candidate to complete the research component prior to the exit exam and if not possible, preferably to postpone the exam. If the exam is to be written in Semester 2 of the 4th year the dissertation should be submitted 1 September of the 4th year. If this is not the case, the supervisor should complete and sign the necessary documentation, stipulating that the candidate will complete the project within the next 3 to 6 months. The dissertation must be submitted prior to the taking of the CMSA fellowship examination.
- iii. A systematic literature review (Cochrane type) on an approved subject, which is undertaken in such a manner that bias is minimised, may be presented as an alternative to the dissertation for awarding the MMed (Public Health Medicine) degree. It requires, inter alia, a protocol with clearly formulated objectives and methods. Inclusion and exclusion methods for the study must be determined. Where applicable, the data must be summarised (meta analysis), with applicable statistical methods. This alternative is in special cases applicable to other MMed degrees.

Registrarship:

- Inquire at the Head of Department regarding the availability of registrarships for the specialisation Medical Oncology.
- Inquire at the Head of the Department of Family Medicine regarding the availability of registrarships for the specialisation Emergency Medicine.

Each student must prove to the University that he or she

- i. has successfully filled the required full-time training post for a period of four or five years according to the requirements of the department in question at the Steve Biko Academic Hospital, Tshwane Academic Division of the NHLS (in case of pathology registrars) or Kalafong Hospital or at an institution recognised by the University as equivalent;
- ii. has completed the theoretical, practical, clinical and applicable training as stipulated;
- iii. has passed the prescribed written, oral, practical and/or clinical university examinations, and
- iv. has successfully completed the research component of the degree.

Admission requirements

A prospective student for the MMed degree programme must be in possession of the MBChB degree of this University or a qualification deemed by the University to be equivalent to the MBChB degree for at least two years. In addition such a student must be registered as a physician with the Health Professions Council of South Africa for at least one year.

Other programme-specific information

Satisfactory progress after one year of training is required, as evaluated by the applicable examination panel.

Duration of training: Four years, of which at least three years must be in the major field of study. The fourth year can either be in the major subject or in any combination of the other Pathology specialisations.

“Major subject” refers to the recognised field of study in Medicine in which the student specialises. The study of the major subject extends over four or five years, as prescribed by the department in question.

Examinations and pass requirements

- i. The sequence of the examinations in the prerequisite subjects will be determined by the head of the department under which the major subject falls.
- ii. The nature, duration and time of the examinations in the prerequisite subjects are determined in cooperation

with the heads of the departments under which the prerequisite subjects fall – with the proviso that, except in cases where stipulated otherwise, the examinations in the prerequisite subjects may be held at any time prior to or concurrently with the major subject. The examinations in the major subjects are held as follows:

- iii. In the case of four-year programmes: not before the end of the third year.
- iv. In the case of five-year programmes: not before the end of the fourth year.
- v. A minimum final mark of 50% is required by all departments to pass in a subject and in the clinical section of the examination, a subminimum of 50%. General Regulations apply.
- vi. A student is not admitted to the examination in a prerequisite subject (second examinations excluded) more than twice, nor is he or she admitted to the examination in the major subject more than twice.

Note: Certificates of satisfactory preparation and progress are required in respect of the fourth year of four-year programmes in which an examination is held at the end of the third year.

Second examinations

Second examinations for MMed students will only be held after at least six months have elapsed since the conclusion of the examination in which the student had failed.

Rules governing the writing of the examinations of the College of Medicine of South Africa [CMSA]

- i. Only candidates who have met all requirements for the MMed degree except for the major subject (final examination), i.e. passed all prerequisite subjects (the latter to be interchangeable; can be passed either at the University or as primary and intermediary examinations at the College of Medicine of South Africa [CMSA], completed all practical, clinical and applicable training of four or five years as prescribed by the relevant academic department (continuous evaluation of the candidate, in an approved registrar post, by the Head of department of the candidate); and completed the required research component for the degree in accordance with the Faculty Yearbook regulations, i.e. Applied research methodology 800 (TNM 800) and the dissertation (MMS 800) or an article (not an ordinary literature review) that has been accepted for publication in a subsidised periodical, will be allowed to write the college examination (exit examination), after which they will obtain both the CMSA fellowship and the MMed as specialist qualifications.
- ii. The rules have been effective as from 1 January 2011. As a transitional measure, cases will be considered on an individual basis where necessary.

Exemption

Exemption

- i. The Faculty Board may grant partial exemption from the training and work mentioned under par. (b) and (c)(i) and (ii) above on the grounds of comparable training and experience completed in another post or at another recognised institution – with the proviso that exemption from a maximum period of 18 months may be granted with regard to four-year and five-year programmes.
- ii. Exemption from a maximum of three years may be granted by the Department of Medical Oncology for the MMed in Medical Oncology [MMed(MedOnc)] on the grounds of the MMed(Int) or MMed(Paed) degree of this University, or experience recognised by the University as equivalent.
- iii. Specific prerequisite subjects must be passed within 24 months after commencement of the programme.
- iv. Exemption from a maximum of two years' clinical training may be granted in the Department of Forensic Medicine in respect of the MMed(Path) degree with specialisation Forensic Pathology, to a candidate already in possession of an MMed degree (or a degree deemed equivalent by the University) with specialisation in Anatomical Pathology.

Pass with distinction

The degree is conferred at the end of the prescribed training period (i.e. three, four or five years, respectively). The degree is conferred with distinction on a student who has obtained a final mark of at least 75% in his or her major subject.

General information

Registrars

Departments expect registrars to participate increasingly in the examining and treatment of patients in the hospital, both in-patients and out-patients, as well as performing and interpreting tests in the laboratory (where applicable); initially under supervision and later increasingly at their own responsibility. Lectures/symposia with closely related departments are organised, as well as discussions of literature, etc.

- i. Only candidates who have met all requirements for the MMed degree except for the major subject (final examination), i.e. passed all prerequisite subjects (the latter to be interchangeable; can be passed either at the University or as primary and intermediary examinations at the College of Medicine of South Africa [CMSA], completed all practical, clinical and applicable training of four or five years as prescribed by the relevant academic department (continuous evaluation of the candidate, in an approved registrar post, by the Head of department of the candidate); and completed the required research component for the degree in accordance with the Faculty Yearbook regulations, i.e. Applied research methodology 800 (TNM 800) and the dissertation (MMS 800) or an article (not an ordinary literature review) that has been accepted for publication in a subsidised periodical, will be allowed to write the college examination (exit examination), after which they will obtain both the CMSA fellowship and the MMed as specialist qualifications.
- ii. The rules have been effective as from 1 January 2011. As a transitional measure, cases will be considered on an individual basis where necessary.

Exemption

Exemption

- i. The Faculty Board may grant partial exemption from the training and work mentioned under par. (b) and (c)(i) and (ii) above on the grounds of comparable training and experience completed in another post or at another recognised institution – with the proviso that exemption from a maximum period of 18 months may be granted with regard to four-year and five-year programmes.
- ii. Exemption from a maximum of three years may be granted by the Department of Medical Oncology for the MMed in Medical Oncology [MMed(MedOnc)] on the grounds of the MMed(Int) or MMed(Paed) degree of this

University, or experience recognised by the University as equivalent.

- iii. Specific prerequisite subjects must be passed within 24 months after commencement of the programme.
- iv. Exemption from a maximum of two years' clinical training may be granted in the Department of Forensic Medicine in respect of the MMed(Path) degree with specialisation Forensic Pathology, to a candidate already in possession of an MMed degree (or a degree deemed equivalent by the University) with specialisation in Anatomical Pathology.

Pass with distinction

The degree is conferred at the end of the prescribed training period (i.e. three, four or five years, respectively). The degree is conferred with distinction on a student who has obtained a final mark of at least 75% in his or her major subject.

General information

Registrars

Departments expect registrars to participate increasingly in the examining and treatment of patients in the hospital, both in-patients and out-patients, as well as performing and interpreting tests in the laboratory (where applicable); initially under supervision and later increasingly at their own responsibility. Lectures/symposia with closely related departments are organised, as well as discussions of literature, etc.

Curriculum: Year 1

Core modules

- Anatomy 809 (ANA 809) - Credits: 36.00
- Physiology 801 (FSG 801) - Credits: 36.00
- Nuclear physics 802 (KDE 802) - Credits: 36.00

Curriculum: Year 2

Core modules

- Anatomy 809 (ANA 809) - Credits: 36.00
- Physiology 801 (FSG 801) - Credits: 36.00
- Nuclear physics 802 (KDE 802) - Credits: 36.00

Curriculum: Year 3

Core modules

- Radiobiology, chemistry and pharmacology 800 (RCF 800) - Credits: 36.00
- Applied research methodology 800 (TNM 800) - Credits: 5.00
- Pathology 801 (PAG 801) - Credits: 36.00

Curriculum: Final year

Core modules

- Nuclear medicine 801 (KDE 801) - Credits: 300.00
- MMed: Essay 800 (MMS 800) - Credits: 12.00
- Applied research methodology 800 (TNM 800) - Credits: 5.00

MMed Obstetrics and Gynaecology (10250101)

Duration of study 4 years

Contact Prof BG Lindeque gerhard.lindeque@up.ac.za +27 (0)123541201

Programme information

Please note:

- i. All MMed students must register for, and attend (TNM 800) Applied research methodology 800 satisfactorily, preferably during the intermediate phase/ after completion of Part 1 and before sitting for Part 2 of the MMed.
- ii. All MMed students must submit a dissertation (MMS 800) which must be assessed as satisfactory by an external examiner, or a research article that has been accepted for publication in a subsidised periodical. The student must be the first author of the article. An ordinary literature review will not be accepted. The research proposal must be approved by the MMed Protocol Committee prior to the intermediate exam (surgical disciplines) or otherwise within two years of enrolment (other disciplines). It is in the best interest of the candidate to complete the research component prior to the exit exam and if not possible, preferably to postpone the exam. If the exam is to be written in Semester 2 of the 4th year the dissertation should be submitted 1 September of the 4th year. If this is not the case, the supervisor should complete and sign the necessary documentation, stipulating that the candidate will complete the project within the next 3 to 6 months. The dissertation must be submitted prior to the taking of the CMSA fellowship examination.
- iii. A systematic literature review (Cochrane type) on an approved subject, which is undertaken in such a manner that bias is minimised, may be presented as an alternative to the dissertation for awarding the MMed (Public Health Medicine) degree. It requires, inter alia, a protocol with clearly formulated objectives and methods. Inclusion and exclusion methods for the study must be determined. Where applicable, the data must be summarised (meta analysis), with applicable statistical methods. This alternative is in special cases applicable to other MMed degrees.

Registrarship:

- Inquire at the Head of Department regarding the availability of registrarships for the specialisation Medical Oncology.
- Inquire at the Head of the Department of Family Medicine regarding the availability of registrarships for the specialisation Emergency Medicine.

Each student must prove to the University that he or she

- i. has successfully filled the required full-time training post for a period of four or five years according to the requirements of the department in question at the Steve Biko Academic Hospital, Tshwane Academic Division of the NHLS (in case of pathology registrars) or Kalafong Hospital or at an institution recognised by the University as equivalent;
- ii. has completed the theoretical, practical, clinical and applicable training as stipulated;
- iii. has passed the prescribed written, oral, practical and/or clinical university examinations, and
- iv. has successfully completed the research component of the degree.

Admission requirements

A prospective student for the MMed degree programme must be in possession of the MBChB degree of this University or a qualification deemed by the University to be equivalent to the MBChB degree for at least two years. In addition such a student must be registered as a physician with the Health Professions Council of South Africa for at least one year.

Other programme-specific information

In addition to the prerequisite subjects mentioned, also (OEG 801). Additional examination: Basic sciences 801 (examination on aspects from the basic sciences, as applicable to Obstetrics and Gynaecology).

“Major subject” refers to the recognised field of study in Medicine in which the student specialises. The study of the major subject extends over four or five years, as prescribed by the department in question.

Examinations and pass requirements

- i. The sequence of the examinations in the prerequisite subjects will be determined by the head of the department under which the major subject falls.
- ii. The nature, duration and time of the examinations in the prerequisite subjects are determined in cooperation with the heads of the departments under which the prerequisite subjects fall – with the proviso that, except in cases where stipulated otherwise, the examinations in the prerequisite subjects may be held at any time prior to or concurrently with the major subject. The examinations in the major subjects are held as follows:
- iii. In the case of four-year programmes: not before the end of the third year.
- iv. In the case of five-year programmes: not before the end of the fourth year.
- v. A minimum final mark of 50% is required by all departments to pass in a subject and in the clinical section of the examination, a subminimum of 50%. General Regulations apply.
- vi. A student is not admitted to the examination in a prerequisite subject (second examinations excluded) more than twice, nor is he or she admitted to the examination in the major subject more than twice.

Note: Certificates of satisfactory preparation and progress are required in respect of the fourth year of four-year programmes in which an examination is held at the end of the third year.

Second examinations

Second examinations for MMed students will only be held after at least six months have elapsed since the conclusion of the examination in which the student had failed.

Rules governing the writing of the examinations of the College of Medicine of South Africa [CMSA]

- i. Only candidates who have met all requirements for the MMed degree except for the major subject (final examination), i.e. passed all prerequisite subjects (the latter to be interchangeable; can be passed either at the University or as primary and intermediary examinations at the College of Medicine of South Africa [CMSA], completed all practical, clinical and applicable training of four or five years as prescribed by the relevant academic department (continuous evaluation of the candidate, in an approved registrar post, by the Head of department of the candidate); and completed the required research component for the degree in accordance with the Faculty Yearbook regulations, i.e. Applied research methodology 800 (TNM 800) and the dissertation (MMS 800) or an article (not an ordinary literature review) that has been accepted for publication in a subsidised periodical, will be allowed to write the college examination (exit examination), after which they will obtain both the CMSA fellowship and the MMed as specialist qualifications.
- ii. The rules have been effective as from 1 January 2011. As a transitional measure, cases will be considered on an individual basis where necessary.

Exemption

Exemption

- i. The Faculty Board may grant partial exemption from the training and work mentioned under par. (b) and (c)(i) and (ii) above on the grounds of comparable training and experience completed in another post or at another recognised institution – with the proviso that exemption from a maximum period of 18 months may be

granted with regard to four-year and five-year programmes.

- ii. Exemption from a maximum of three years may be granted by the Department of Medical Oncology for the MMed in Medical Oncology [MMed(MedOnc)] on the grounds of the MMed(Int) or MMed(Paed) degree of this University, or experience recognised by the University as equivalent.
- iii. Specific prerequisite subjects must be passed within 24 months after commencement of the programme.
- iv. Exemption from a maximum of two years' clinical training may be granted in the Department of Forensic Medicine in respect of the MMed(Path) degree with specialisation Forensic Pathology, to a candidate already in possession of an MMed degree (or a degree deemed equivalent by the University) with specialisation in Anatomical Pathology.

Pass with distinction

The degree is conferred at the end of the prescribed training period (i.e. three, four or five years, respectively). The degree is conferred with distinction on a student who has obtained a final mark of at least 75% in his or her major subject.

- Inquire at the Head of the Department of Family Medicine regarding the availability of registrarships for the specialisation Emergency Medicine.

Each student must prove to the University that he or she

- has successfully filled the required full-time training post for a period of four or five years according to the requirements of the department in question at the Steve Biko Academic Hospital, Tshwane Academic Division of the NHLS (in case of pathology registrars) or Kalafong Hospital or at an institution recognised by the University as equivalent;
- has completed the theoretical, practical, clinical and applicable training as stipulated;
- has passed the prescribed written, oral, practical and/or clinical university examinations, and
- has successfully completed the research component of the degree.

Admission requirements

A prospective student for the MMed degree programme must be in possession of the MBChB degree of this University or a qualification deemed by the University to be equivalent to the MBChB degree for at least two years. In addition such a student must be registered as a physician with the Health Professions Council of South Africa for at least one year.

Other programme-specific information

“Major subject” refers to the recognised field of study in Medicine in which the student specialises. The study of the major subject extends over four or five years, as prescribed by the department in question.

Examinations and pass requirements

- i. The sequence of the examinations in the prerequisite subjects will be determined by the head of the department under which the major subject falls.
- ii. The nature, duration and time of the examinations in the prerequisite subjects are determined in cooperation with the heads of the departments under which the prerequisite subjects fall – with the proviso that, except in cases where stipulated otherwise, the examinations in the prerequisite subjects may be held at any time prior to or concurrently with the major subject. The examinations in the major subjects are held as follows:
- iii. In the case of four-year programmes: not before the end of the third year.
- iv. In the case of five-year programmes: not before the end of the fourth year.
- v. A minimum final mark of 50% is required by all departments to pass in a subject and in the clinical section of the examination, a subminimum of 50%. General Regulations apply.
- vi. A student is not admitted to the examination in a prerequisite subject (second examinations excluded) more than twice, nor is he or she admitted to the examination in the major subject more than twice.

Note: Certificates of satisfactory preparation and progress are required in respect of the fourth year of four-year programmes in which an examination is held at the end of the third year.

Second examinations

Second examinations for MMed students will only be held after at least six months have elapsed since the conclusion of the examination in which the student had failed.

Rules governing the writing of the examinations of the College of Medicine of South Africa [CMSA]

- i. Only candidates who have met all requirements for the MMed degree except for the major subject (final examination), i.e. passed all prerequisite subjects (the latter to be interchangeable; can be passed either at the University or as primary and intermediary examinations at the College of Medicine of South Africa [CMSA], completed all practical, clinical and applicable training of four or five years as prescribed by the relevant academic department (continuous evaluation of the candidate, in an approved registrar post, by the Head of department of the candidate); and completed the required research component for the degree in accordance with the Faculty Yearbook regulations, i.e. Applied research methodology 800 (TNM 800) and the dissertation (MMS 800) or an article (not an ordinary literature review) that has been accepted for publication in a subsidised periodical, will be allowed to write the college examination (exit examination), after which they will obtain both the CMSA fellowship and the MMed as specialist qualifications.
- ii. The rules have been effective as from 1 January 2011. As a transitional measure, cases will be considered on an individual basis where necessary.

Exemption

Exemption

- i. The Faculty Board may grant partial exemption from the training and work mentioned under par. (b) and (c)(i) and (ii) above on the grounds of comparable training and experience completed in another post or at another recognised institution – with the proviso that exemption from a maximum period of 18 months may be granted with regard to four-year and five-year programmes.
- ii. Exemption from a maximum of three years may be granted by the Department of Medical Oncology for the MMed in Medical Oncology [MMed(MedOnc)] on the grounds of the MMed(Int) or MMed(Paed) degree of this University, or experience recognised by the University as equivalent.
- iii. Specific prerequisite subjects must be passed within 24 months after commencement of the programme.
- iv. Exemption from a maximum of two years' clinical training may be granted in the Department of Forensic Medicine in respect of the MMed(Path) degree with specialisation Forensic Pathology, to a candidate already in possession of an MMed degree (or a degree deemed equivalent by the University) with specialisation in Anatomical Pathology.

Pass with distinction

The degree is conferred at the end of the prescribed training period (i.e. three, four or five years, respectively). The degree is conferred with distinction on a student who has obtained a final mark of at least 75% in his or her major subject.

General information

Registrars

Departments expect registrars to participate increasingly in the examining and treatment of patients in the hospital, both in-patients and out-patients, as well as performing and interpreting tests in the laboratory (where applicable); initially under supervision and later increasingly at their own responsibility. Lectures/symposia with closely related departments are organised, as well as discussions of literature, etc.

Programme information

Please note:

- All MMed students must register for, and attend (TNM 800) Applied research methodology 800 satisfactorily, preferably during the intermediate phase/ after completion of Part 1 and before sitting for Part 2 of the MMed.
- All MMed students must submit a dissertation (MMS 800) which must be assessed as satisfactory by an external examiner, or a research article that has been accepted for publication in a subsidised periodical. The student must be the first author of the article. An ordinary literature review will not be accepted. The research proposal must be approved by the MMed Protocol Committee prior to the intermediate exam (surgical disciplines) or otherwise within two years of enrolment (other disciplines). It is in the best interest of the candidate to complete the research component prior to the exit exam and if not possible, preferably to postpone the exam. If the exam is to be written in Semester 2 of the 4th year the dissertation should be submitted 1 September of the 4th year. If this is not the case, the supervisor should complete and sign the necessary documentation, stipulating that the candidate will complete the project within the next 3 to 6 months. The dissertation must be submitted prior to the taking of the CMSA fellowship examination.
- A systematic literature review (Cochrane type) on an approved subject, which is undertaken in such a manner that bias is minimised, may be presented as an alternative to the dissertation for awarding the MMed (Public Health Medicine) degree. It requires, inter alia, a protocol with clearly formulated objectives and methods. Inclusion and exclusion methods for the study must be determined. Where applicable, the data must be summarised (meta analysis), with applicable statistical methods. This alternative is in special cases applicable to other MMed degrees.

Registrarship:

- Inquire at the Head of Department regarding the availability of registrarships for the specialisation Medical Oncology.
- Inquire at the Head of the Department of Family Medicine regarding the availability of registrarships for the specialisation Emergency Medicine.

Each student must prove to the University that he or she

- has successfully filled the required full-time training post for a period of four or five years according to the requirements of the department in question at the Steve Biko Academic Hospital, Tshwane Academic Division of the NHLS (in case of pathology registrars) or Kalafong Hospital or at an institution recognised by the

- University as equivalent;
- ii. has completed the theoretical, practical, clinical and applicable training as stipulated;
 - iii. has passed the prescribed written, oral, practical and/or clinical university examinations, and
 - iv. has successfully completed the research component of the degree.

Admission requirements

A prospective student for the MMed degree programme must be in possession of the MBChB degree of this University or a qualification deemed by the University to be equivalent to the MBChB degree for at least two years. In addition such a student must be registered as a physician with the Health Professions Council of South Africa for at least one year.

- i. All MMed students must register for, and attend (TNM 800) Applied research methodology 800 satisfactorily, preferably during the intermediate phase/ after completion of Part 1 and before sitting for Part 2 of the MMed.
- ii. All MMed students must submit a dissertation (MMS 800) which must be assessed as satisfactory by an external examiner, or a research article that has been accepted for publication in a subsidised periodical. The student must be the first author of the article. An ordinary literature review will not be accepted. The research proposal must be approved by the MMed Protocol Committee prior to the intermediate exam (surgical disciplines) or otherwise within two years of enrolment (other disciplines). It is in the best interest of the candidate to complete the research component prior to the exit exam and if not possible, preferably to postpone the exam. If the exam is to be written in Semester 2 of the 4th year the dissertation should be submitted 1 September of the 4th year. If this is not the case, the supervisor should complete and sign the necessary documentation, stipulating that the candidate will complete the project within the next 3 to 6 months. The dissertation must be submitted prior to the taking of the CMSA fellowship examination.
- iii. A systematic literature review (Cochrane type) on an approved subject, which is undertaken in such a manner that bias is minimised, may be presented as an alternative to the dissertation for awarding the MMed (Public Health Medicine) degree. It requires, inter alia, a protocol with clearly formulated objectives and methods. Inclusion and exclusion methods for the study must be determined. Where applicable, the data must be summarised (meta analysis), with applicable statistical methods. This alternative is in special cases applicable to other MMed degrees.

Registrarship:

- Inquire at the Head of Department regarding the availability of registrarships for the specialisation Medical

Oncology.

- Inquire at the Head of the Department of Family Medicine regarding the availability of registrarships for the specialisation Emergency Medicine.

Each student must prove to the University that he or she

- i. has successfully filled the required full-time training post for a period of four or five years according to the requirements of the department in question at the Steve Biko Academic Hospital, Tshwane Academic Division of the NHLS (in case of pathology registrars) or Kalafong Hospital or at an institution recognised by the University as equivalent;
- ii. has completed the theoretical, practical, clinical and applicable training as stipulated;
- iii. has passed the prescribed written, oral, practical and/or clinical university examinations, and
- iv. has successfully completed the research component of the degree.

Admission requirements

A prospective student for the MMed degree programme must be in possession of the MBChB degree of this University or a qualification deemed by the University to be equivalent to the MBChB degree for at least two years. In addition such a student must be registered as a physician with the Health Professions Council of South Africa for at least one year.

Other programme-specific information

“**Major subject**” refers to the recognised field of study in Medicine in which the student specialises. The study of the major subject extends over four or five years, as prescribed by the department in question.

Examinations and pass requirements

- i. The sequence of the examinations in the prerequisite subjects will be determined by the head of the department under which the major subject falls.
- ii. The nature, duration and time of the examinations in the prerequisite subjects are determined in cooperation with the heads of the departments under which the prerequisite subjects fall – with the proviso that, except in cases where stipulated otherwise, the examinations in the prerequisite subjects may be held at any time prior to or concurrently with the major subject. The examinations in the major subjects are held as follows:
- iii. In the case of four-year programmes: not before the end of the third year.
- iv. In the case of five-year programmes: not before the end of the fourth year.
- v. A minimum final mark of 50% is required by all departments to pass in a subject and in the clinical section of the examination, a subminimum of 50%. General Regulations apply.
- vi. A student is not admitted to the examination in a prerequisite subject (second examinations excluded) more than twice, nor is he or she admitted to the examination in the major subject more than twice.

Note: Certificates of satisfactory preparation and progress are required in respect of the fourth year of four-year programmes in which an examination is held at the end of the third year.

Second examinations

Second examinations for MMed students will only be held after at least six months have elapsed since the conclusion of the examination in which the student had failed.

Rules governing the writing of the examinations of the College of Medicine of South Africa [CMSA]

- i. Only candidates who have met all requirements for the MMed degree except for the major subject (final examination), i.e. passed all prerequisite subjects (the latter to be interchangeable; can be passed either at

the University or as primary and intermediary examinations at the College of Medicine of South Africa [CMSA], completed all practical, clinical and applicable training of four or five years as prescribed by the relevant academic department (continuous evaluation of the candidate, in an approved registrar post, by the Head of department of the candidate); and completed the required research component for the degree in accordance with the Faculty Yearbook regulations, i.e. Applied research methodology 800 (TNM 800) and the dissertation (MMS 800) or an article (not an ordinary literature review) that has been accepted for publication in a subsidised periodical, will be allowed to write the college examination (exit examination), after which they will obtain both the CMSA fellowship and the MMed as specialist qualifications.

- ii. The rules have been effective as from 1 January 2011. As a transitional measure, cases will be considered on an individual basis where necessary.

Exemption

Exemption

- i. The Faculty Board may grant partial exemption from the training and work mentioned under par. (b) and (c)(i) and (ii) above on the grounds of comparable training and experience completed in another post or at another recognised institution – with the proviso that exemption from a maximum period of 18 months may be granted with regard to four-year and five-year programmes.
- ii. Exemption from a maximum of three years may be granted by the Department of Medical Oncology for the MMed in Medical Oncology [MMed(MedOnc)] on the grounds of the MMed(Int) or MMed(Paed) degree of this University, or experience recognised by the University as equivalent.
- iii. Specific prerequisite subjects must be passed within 24 months after commencement of the programme.
- iv. Exemption from a maximum of two years' clinical training may be granted in the Department of Forensic Medicine in respect of the MMed(Path) degree with specialisation Forensic Pathology, to a candidate already in possession of an MMed degree (or a degree deemed equivalent by the University) with specialisation in Anatomical Pathology.

Pass with distinction

The degree is conferred at the end of the prescribed training period (i.e. three, four or five years, respectively). The degree is conferred with distinction on a student who has obtained a final mark of at least 75% in his or her major subject.

General information

Registrars

Departments expect registrars to participate increasingly in the examining and treatment of patients in the hospital, both in-patients and out-patients, as well as performing and interpreting tests in the laboratory (where applicable); initially under supervision and later increasingly at their own responsibility. Lectures/symposia with closely related departments are organised, as well as discussions of literature, etc.

Curriculum: Year 1

Core modules

Anatomy 804 (ANA 804) - Credits: 36.00

Anatomical pathology 872 (ANP 872) - Credits: 36.00

Medical applied psychology 801 (MTS 801) - Credits: 36.00

Neurophysiology 801 (NFG 801) - Credits: 36.00

Curriculum: Year 2

Core modules

Anatomy 804 (ANA 804) - Credits: 36.00
Anatomical pathology 872 (ANP 872) - Credits: 36.00
Medical applied psychology 801 (MTS 801) - Credits: 36.00
Neurophysiology 801 (NFG 801) - Credits: 36.00

Curriculum: Year 3

Core modules

Medical applied psychology 801 (MTS 801) - Credits: 36.00
Neurology 801 (NRE 801) - Credits: 36.00
Applied research methodology 800 (TNM 800) - Credits: 5.00

Curriculum: Final year

Core modules

MMed: Essay 800 (MMS 800) - Credits: 12.00
Psychiatry 800 (PSI 800) - Credits: 300.00
Applied research methodology 800 (TNM 800) - Credits: 5.00

MMed Public Health Medicine (10250372)

Duration of study 4 years

Admission requirements

A prospective student for the MMed degree programme must be in possession of the MBChB degree of this University or a qualification deemed by the University to be equivalent to the MBChB degree for at least two years. In addition, such a student must be registered as a physician with the Health Professions Council of South Africa for at least one year.

Additional requirements

Each student must prove to the University that he or she

- (i) has successfully filled the required full-time training post for a period of four years according to the requirements of the Department of Public Health Medicine.
- (ii) has completed the theoretical and practical applicable training as stipulated; and
- (iii) has passed the prescribed written, oral and/or practical university examinations or equivalent primary Colleges of Medicine of South Africa examinations.

Other programme-specific information

Please note: All MMed students must register for, and attend (TNM 800) Applied research methodology, satisfactorily.

“Major subject” refers to the recognised field of study in Medicine in which the student specialises. The study of the major subject extends over four years, as prescribed by the Department of Public Health Medicine.

Examinations and pass requirements

- (i) The sequence of the examinations in the prerequisite subjects will be determined by the head of the department of Public Health Medicine.
- (ii) The final exit examination for the major subject will be conducted by the Colleges of Medicine of South Africa. Only candidates who have met all the requirements for the MMed(Public Health Medicine) degree except for the major subject, i.e. passed all prerequisite subjects, completed all applicable training as prescribed in Reg. P.3(c) and completed the required research component for the degree in accordance with the Faculty Yearbook regulations, i.e. TNM 800 and the dissertation (GGS 890) will be allowed to write the Colleges of Medicine of South Africa exit examination.
- (iii) A minimum final mark of 50% is required to pass in a subject.
- (iv) A student is not admitted to the examination in a prerequisite subject (second examinations excluded) more than twice, nor is he or she admitted to the examination in the major subject more than twice.

Second examinations

Second examinations in the prerequisite subjects will only be held after at least six months have elapsed since the conclusion of the examination in which the student had failed.

Exemption

- (i) The Faculty Board may grant partial exemption from the training and work mentioned earlier on the grounds of comparable training and experience completed in another post or at another recognised institution – with the proviso that exemption from a maximum period of 18 months may be granted in the case of a four-year programme such as the MMed (Public Health Medicine) degree programme.
- (ii) Exemption from a maximum of two years' Public Health Medicine training may be granted in the Department of Public Health Medicine in respect of the MMed(Public Health Medicine) degree, to a candidate already in possession of a Fellowship of the College of Public Health Medicine or a Fellowship of the College of Occupational Health Medicine of the Colleges of Medicine of South Africa. Such a candidate must have completed a period of at least 24 months of registrar training in Public Health Medicine or in Occupational Health Medicine that is recorded as such by the HPCSA.

Practical/clinical/internship information

Registrars in Public Health Medicine are expected to undergo rotational attachment to a number of designated health service organisations during their period of training.

Research information

A dissertation on an approved research project must be passed in addition to the major subject and prerequisites. The stipulations of the General Regulations regarding the preparation and submission, the technical editing and the résumé of the dissertation apply.

Pass with distinction

The degree is conferred at the end of the prescribed training period, i.e. four years. The degree is conferred with distinction on a student who has obtained a final mark of at least 75% in his or her major subject.

Curriculum: Year 1

Core modules

Administrative theory and health related social sciences 800 (ASW 800) - Credits: 70.00
Epidemiology theory, biostatistics and demography 800 (EBD 800) - Credits: 70.00
Scientific writing 871 (HMS 871) - Credits: 5.00
Communicable and non-communicable health-related conditions 800 (ONO 800) - Credits: 70.00
Learning in public health 870 (PHM 870) - Credits: 5.00

Curriculum: Year 2

The dissertation must be submitted prior to the taking of the CMSA fellowship examination.
- iii. A systematic literature review (Cochrane type) on an approved subject, which is undertaken in such a manner that bias is minimised, may be presented as an alternative to the dissertation for awarding the MMed (Public Health Medicine) degree. It requires, inter alia, a protocol with clearly formulated objectives and methods. Inclusion and exclusion methods for the study must be determined. Where applicable, the data must be summarised (meta analysis), with applicable statistical methods. This alternative is in special cases applicable to other MMed degrees.

Registrarship:

- Inquire at the Head of Department regarding the availability of registrarships for the specialisation Medical Oncology.
- Inquire at the Head of the Department of Family Medicine regarding the availability of registrarships for the specialisation Emergency Medicine.

Each student must prove to the University that he or she

- i. has successfully filled the required full-time training post for a period of four or five years according to the requirements of the department in question at the Steve Biko Academic Hospital, Tshwane Academic Division of the NHLS (in case of pathology registrars) or Kalafong Hospital or at an institution recognised by the University as equivalent;
- ii. has completed the theoretical, practical, clinical and applicable training as stipulated;
- iii. has passed the prescribed written, oral, practical and/or clinical university examinations, and
- iv. has successfully completed the research component of the degree.

Admission requirements

A prospective student for the MMed degree programme must be in possession of the MBChB degree of this University or a qualification deemed by the University to be equivalent to the MBChB degree for at least two years. In addition such a student must be registered as a physician with the Health Professions Council of South Africa for at least one year.

Other programme-specific information

“**Major subject**” refers to the recognised field of study in Medicine in which the student specialises. The study of the major subject extends over four or five years, as prescribed by the department in question.

Examinations and pass requirements

- i. The sequence of the examinations in the prerequisite subjects will be determined by the head of the department under which the major subject falls.

- ii. The nature, duration and time of the examinations in the prerequisite subjects are determined in cooperation with the heads of the departments under which the prerequisite subjects fall – with the proviso that, except in cases where stipulated otherwise, the examinations in the prerequisite subjects may be held at any time prior to or concurrently with the major subject. The examinations in the major subjects are held as follows:
- iii. In the case of four-year programmes: not before the end of the third year.
- iv. In the case of five-year programmes: not before the end of the fourth year.
- v. A minimum final mark of 50% is required by all departments to pass in a subject and in the clinical section of the examination, a subminimum of 50%. General Regulations apply.
- vi. A student is not admitted to the examination in a prerequisite subject (second examinations excluded) more than twice, nor is he or she admitted to the examination in the major subject more than twice.

Note: Certificates of satisfactory preparation and progress are required in respect of the fourth year of four-year programmes in which an examination is held at the end of the third year.

Second examinations

Second examinations for MMed students will only be held after at least six months have elapsed since the conclusion of the examination in which the student had failed.

Rules governing the writing of the examinations of the College of Medicine of South Africa [CMSA]

- i. Only candidates who have met all requirements for the MMed degree except for the major subject (final examination), i.e. passed all prerequisite subjects (the latter to be interchangeable; can be passed either at the University or as primary and intermediary examinations at the College of Medicine of South Africa [CMSA], completed all practical, clinical and applicable training of four or five years as prescribed by the relevant academic department (continuous evaluation of the candidate, in an approved registrar post, by the Head of department of the candidate); and completed the required research component for the degree in accordance with the Faculty Yearbook regulations, i.e. Applied research methodology 800 (TNM 800) and the dissertation (MMS 800) or an article (not an ordinary literature review) that has been accepted for publication in a subsidised periodical, will be allowed to write the college examination (exit examination), after which they will obtain both the CMSA fellowship and the MMed as specialist qualifications.
- ii. The rules have been effective as from 1 January 2011. As a transitional measure, cases will be considered on an individual basis where necessary.

Exemption

Exemption

- i. The Faculty Board may grant partial exemption from the training and work mentioned under par. (b) and (c)(i) and (ii) above on the grounds of comparable training and experience completed in another post or at another recognised institution – with the proviso that exemption from a maximum period of 18 months may be granted with regard to four-year and five-year programmes.
- ii. Exemption from a maximum of three years may be granted by the Department of Medical Oncology for the MMed in Medical Oncology [MMed(MedOnc)] on the grounds of the MMed(Int) or MMed(Paed) degree of this University, or experience recognised by the University as equivalent.
- iii. Specific prerequisite subjects must be passed within 24 months after commencement of the programme.
- iv. Exemption from a maximum of two years' clinical training may be granted in the Department of Forensic Medicine in respect of the MMed(Path) degree with specialisation Forensic Pathology, to a candidate already in possession of an MMed degree (or a degree deemed equivalent by the University) with specialisation in Anatomical Pathology.

Pass with distinction

The degree is conferred at the end of the prescribed training period (i.e. three, four or five years, respectively). The degree is conferred with distinction on a student who has obtained a final mark of at least 75% in his or her major subject.

General information

Registrars

Departments expect registrars to participate increasingly in the examining and treatment of patients in the hospital, both in-patients and out-patients, as well as performing and interpreting tests in the laboratory (where applicable); initially under supervision and later increasingly at their own responsibility. Lectures/symposia with closely related departments are organised, as well as discussions of literature, etc.

Programme information

Please note:

- i. All MMed students must register for, and attend (TNM 800) Applied research methodology 800 satisfactorily, preferably during the intermediate phase/ after completion of Part 1 and before sitting for Part 2 of the MMed.
- ii. All MMed students must submit a dissertation (MMS 800) which must be assessed as satisfactory by an external examiner, or a research article that has been accepted for publication in a subsidised periodical. The student must be the first author of the article. An ordinary literature review will not be accepted. The research proposal must be approved by the MMed Protocol Committee prior to the intermediate exam (surgical disciplines) or otherwise within two years of enrolment (other disciplines). It is in the best interest of the candidate to complete the research component prior to the exit exam and if not possible, preferably to postpone the exam. If the exam is to be written in Semester 2 of the 4th year the dissertation should be submitted 1 September of the 4th year. If this is not the case, the supervisor should complete and sign the necessary documentation, stipulating that the candidate will complete the project within the next 3 to 6 months. The dissertation must be submitted prior to the taking of the CMSA fellowship examination.
- iii. A systematic literature review (Cochrane type) on an approved subject, which is undertaken in such a manner that bias is minimised, may be presented as an alternative to the dissertation for awarding the MMed (Public Health Medicine) degree. It requires, inter alia, a protocol with clearly formulated objectives and methods. Inclusion and exclusion methods for the study must be determined. Where applicable, the data must be summarised (meta analysis), with applicable statistical methods. This alternative is in special cases applicable to other MMed degrees.

Registrarship:

- Inquire at the Head of Department regarding the availability of registrarships for the specialisation Medical Oncology.
- Inquire at the Head of the Department of Family Medicine regarding the availability of registrarships for the specialisation Emergency Medicine.

Each student must prove to the University that he or she

- i. has successfully filled the required full-time training post for a period of four or five years according to the requirements of the department in question at the Steve Biko Academic Hospital, Tshwane Academic Division of the NHLS (in case of pathology registrars) or Kalafong Hospital or at an institution recognised by the University as equivalent;
- ii. has completed the theoretical, practical, clinical and applicable training as stipulated;
- iii. has passed the prescribed written, oral, practical and/or clinical university examinations, and
- iv. has successfully completed the research component of the degree.

Admission requirements

A prospective student for the MMed degree programme must be in possession of the MBChB degree of this University or a qualification deemed by the University to be equivalent to the MBChB degree for at least two years. In addition such a student must be registered as a physician with the Health Professions Council of South Africa for at least one year.

MMilMed Military Medicine (10255001)

Duration of study 2 years

Admission requirements

Candidates must be in possession of the MBChB degree for at least two years.

Additional requirements

Also consult the General Regulations. The first two years will be part-time study, and the final year full-time study as a registrar in the relevant main discipline.

Examinations and pass requirements

- (i) The sequence of the examinations in the prerequisite subjects is determined by the head of the department under which the major subject falls.
- (ii) The nature, duration and time of the examinations are determined in co-operation with the heads of the departments under which the prerequisite subjects fall – with the proviso that, except in cases indicated differently, the examinations in the prerequisite subjects will be held at any time prior to, or concurrently with the examinations in the major subject.
- (iii) To pass in a module, a minimum final mark of 50% is required.
- (iv) A student will not be admitted to the examinations in a prerequisite module, or to the examination in the major subject, more than twice (second examinations excluded).

Second examinations

Second examinations will take place only after at least six months have elapsed since the conclusion of the examination in which the student failed.

Pass with distinction

The degree is conferred with distinction on a student who has obtained a final mark of at least 75% in his or her major subject.

MOccTher Activity Theory (10258051)

Duration of study 2 years

Admission requirements

(i) Subject to the stipulations of the General Regulations, the Bachelor's degree in Occupational Therapy or an equivalent qualification is required for admission as well as registration as occupational therapist with the Health Professions Council of South Africa.

(ii) A student must have at least one year clinical experience in the proposed field of study (Community service year excluded).

(iii) A student must hold at least a 15 hours per week position for the duration of study deemed applicable to the proposed field of study by the head of department.

(iv) Fields of specialisation for the MOccTher degree with coursework are offered on an annual basis if at least five applicants apply for admission to a particular field of specialisation. The closing date for new applications is 31 October annually. Applicants will be notified as soon as possible after this date whether or not a particular field of specialisation will be presented in the subsequent year. Commencement of studies must therefore be discussed beforehand with the head of department.

Additional requirements

Also consult the General Regulations.

Note:

Students must register for, and attend (TNM 800) Applied research methodology 800 satisfactorily. (Exemption will be granted if the module, BSN 701 Biostatistics and research methodology has been passed for the BOccTherHons degree.)

Examinations and pass requirements

- A continuous evaluation mark of at least 50% is required for admission to the examination in the major subject.
- The sequence of the examinations in the prerequisite subjects will be determined by the head of department according to the major subject followed by the student.
- In order to pass, a subminimum of 40% in the written and/or practical and/or clinical sections of the examination, and a final mark of at least 50%, is required in the major as well as the prerequisite subject.

Pass with distinction

The degree is conferred with distinction on a student who has obtained at least 75% in the major

subject, and an average of at least 65% in the prerequisite subjects.

Curriculum: Year 1

Core modules

Occupational therapeutic anatomy 803 (AAN 803) - Credits: 24.00

Theory in occupational therapy practice 800 (ATP 800) - Credits: 28.00

Physiology 881 (FSG 881) - Credits: 28.00

Applied research methodology 800 (TNM 800) - Credits: 5.00

Curriculum: Final year

Core modules

Occupational therapy 805 (ART 805) - Credits: 100.00

Essay: Occupational therapy 891 (ART 891) - Credits: 38.00

MOccTher Hand Therapy (10258011)

Duration of study 2 years

Admission requirements

- Subject to the stipulations of General Regulation G.62 the Bachelor's degree in Occupational Therapy or an equivalent qualification is required for admission as well as registration as occupational therapist with the Health Professions Council of South Africa.
- A student must have at least one year clinical experience in the proposed field of study (Community service year excluded).
- A student must hold at least a 15 hours per week position for the duration of study deemed applicable to the proposed field of study by the head of department.
- Fields of specialisation for the MOccTher degree with coursework are offered on an annual basis if at least five applicants apply for admission to a particular field of specialisation. The closing date for new applications is 31 October annually. Applicants will be notified as soon as possible after this date whether or not a particular field of specialisation will be presented in the subsequent year. Commencement of studies must therefore be discussed beforehand with the head of department.

Additional requirements

Also consult the General Regulations.

Note:

Students must register for, and attend (TNM 800) Applied research methodology 800 satisfactorily. (Exemption will be granted if the module, BSN 701 Biostatistics and research methodology has been passed for the BOccTherHons degree.)

Examinations and pass requirements

- i. A continuous evaluation mark of at least 50% is required for admission to the examination in the major

- subject.
- ii. The sequence of the examinations in the prerequisite subjects will be determined by the head of department according to the major subject followed by the student.
 - iii. In order to pass, a subminimum of 40% in the written and/or practical and/or clinical sections of the examination, and a final mark of at least 50%, is required in the major as well as the prerequisite subject.

Pass with distinction

The degree is conferred with distinction on a student who has obtained at least 75% in the major subject, and an average of at least 65% in the prerequisite subjects.

Curriculum: Year 1

Core modules

- Occupational therapeutic anatomy 802 (AAN 802) - Credits: 28.00

MOccTher Neurology (10258021)

Duration of study 2 years

Admission requirements

- Subject to the stipulations of General Regulation G.62 the Bachelor's degree in Occupational Therapy or an equivalent qualification is required for admission as well as registration as occupational therapist with the Health Professions Council of South Africa.
- A student must have at least one year clinical experience in the proposed field of study (Community service year excluded).
- A student must hold at least a 15 hours per week position for the duration of study deemed applicable to the proposed field of study by the head of department.
- Fields of specialisation for the MOccTher degree with coursework are offered on an annual basis if at least five applicants apply for admission to a particular field of specialisation. The closing date for new applications is 31 October annually. Applicants will be notified as soon as possible after this date whether or not a particular field of specialisation will be presented in the subsequent year. Commencement of studies must therefore be discussed beforehand with the head of department.

Additional requirements

Also consult the General Regulations.

Note:

Students must register for, and attend (TNM 800) Applied research methodology 800 satisfactorily. (Exemption will be granted if the module, BSN 701 Biostatistics and research methodology has been passed for the BOccTherHons degree.)

Examinations and pass requirements

- i. A continuous evaluation mark of at least 50% is required for admission to the examination in the major subject.
- ii. The sequence of the examinations in the prerequisite subjects will be determined by the head of department according to the major subject followed by the student.
- iii. In order to pass, a subminimum of 40% in the written and/or practical and/or clinical sections of the examination, and a final mark of at least 50%, is required in the major as well as the prerequisite subject.

Pass with distinction

The degree is conferred with distinction on a student who has obtained at least 75% in the major subject, and an average of at least 65% in the prerequisite subjects.

Curriculum: Year 1**Core modules**

Occupational therapeutic anatomy 803 (AAN 803) - Credits: 24.00
Anatomical pathology 891 (ANP 891) - Credits: 28.00
Theory in occupational therapy practice 800 (ATP 800) - Credits: 28.00
Physiology 881 (FSG 881) - Credits: 28.00
Applied research methodology 800 (TNM 800) - Credits: 5.00

Curriculum: Final year**Core modules**

Occupational therapy 802 (ART 802) - Credits: 100.00
Essay: Occupational therapy 891 (ART 891) - Credits: 38.00

MOccTher Occupational Therapy (10258001)

Duration of study 2 years

Admission requirements

- Subject to the stipulations of General Regulation G.62 the Bachelor's degree in Occupational Therapy or an equivalent qualification is required for admission as well as registration as occupational therapist with the Health Professions Council of South Africa.
- A student must have at least one year clinical experience in the proposed field of study (Community service year excluded).
- A student must hold at least a 15 hours per week position for the duration of study deemed applicable to the proposed field of study by the head of department.
- Fields of specialisation for the MOccTher degree with coursework are offered on an annual basis if at least five

applicants apply for admission to a particular field of specialisation. The closing date for new applications is 31 October annually. Applicants will be notified as soon as possible after this date whether or not a particular field of specialisation will be presented in the subsequent year. Commencement of studies must therefore be discussed beforehand with the head of department.

- For the MOccTher degree by virtue of research a written structured letter of motivation must be submitted with the application on 31 October.

Additional requirements

Also consult the General Regulations.

Note:

Students must register for, and attend (TNM 800) Applied research methodology 800 satisfactorily. (Exemption will be granted if the module, BSN 701 Biostatistics and research methodology has been passed for the BOccTherHons degree.)

Examinations and pass requirements

The minimum pass mark for the dissertation is 50%.

Pass with distinction

The degree is conferred with distinction on a student who has obtained at least 75% for the dissertation and at least 65% in the module (ATP 800) Theory in occupational therapy practice 800. (TNM 800) Applied research methodology 800 and (ART 800) Occupational therapy 800 must have been attended satisfactorily.

Curriculum: Final year

MPhil Philosophy and Ethics of Mental Health (10250500)

Duration of study 2 years

Contact Prof CW van Staden werdie.vanstaden@up.ac.za +27 (0)123199720

Admission requirements

A bachelor honours degree or equivalent in a field of relevance to either mental health or philosophy eg MBChB; BPsych; BAHons; LLB; BCur; BOccTher is the minimum admission requirement.

Practical experience and/or a relevant master's degree is strongly recommended eg MMed (Psych); MA (Philosophy); MA (Psychology); MA (Sociology) MA (Social Work); MMus (Music Therapy); LLM; MCur MOccTher.

Additional requirements

Also consult General Regulations.

Examinations and pass requirements

- (i) Students must complete the assignments of each of the core modules and obtain a minimum mark of 50% to pass in the respective core modules.
- (ii) The dissertation must consist of five sections of which the first four will respectively address a topic from the core modules. The fifth section will be on an appropriate topic of the student's choice.
- (iii) The first four sections of the dissertation should each be between 5 000 and 6 000 words and the fifth section should be approximately 10 000 words in length.
- (iv) A minimum mark of 50% will be required in each section of the dissertation to pass.
- (v) A student will be disqualified from further study towards this degree when he or she fails any one of the sections for the third time.

Pass with distinction

The degree will be conferred with distinction on a student who obtains a mark of 75% or more for the dissertation.

MPhyst Internal Medicine (10258162)

Duration of study 2 years

Admission requirements

Subject to the stipulations of General Regulations the BPhysT degree or an equivalent qualification is required as well as registration as a physiotherapist with the Health Professions Council of South Africa.

Additional requirements

- i. For the MPhysT degree, students must also hold at least a part-time position, deemed applicable for master's degree studies by the head of department.
- ii. Candidates will be required to provide proof of having successfully completed applicable postgraduate modules in clinical fields of specialisation, e.g. Orthopaedic Manual Therapy 1, before the MPhysT degree will be conferred.
- iii. During the MPhysT studies, students must participate in formal departmental instruction and/or research programmes of at least 60 hours per year.
- iv. Postgraduate modules for all the fields of specialisation for the MPhysT degree with coursework, are offered on a biennial basis, if at least five applicants apply for admission to a particular field of specialisation. The closing date for new applications is 31 October annually. Applicants will be notified as soon as possible after this date, whether or not a particular field of specialisation will be presented in the subsequent year. Commencement of studies must, therefore, be discussed beforehand with the head of department.

Also consult General Regulations.

Other programme-specific information

Candidates who have passed with at least 60% in corresponding modules to those indicated by the department during the four-year BPhysT degree studies or an equivalent degree programme must, in consultation with the head of department, select relevant modules from any faculty of the University of Pretoria, instead of the modules in question to the value of at least 69 credits, provided it can be accommodated in the class and examination timetables.

Examinations and pass requirements

- i. The examinations in the prerequisite modules will take place prior to or con-currently with that of the major subject as determined by the head of department.
- ii. The examination consists of a written and a clinical as well as an oral component.
- iii. A subminimum of 50% is required in each section of the examination, with a final mark of at least 50% to pass.
- iv. A student will be granted a second opportunity to take part in the examination in the major subject after at least six months have elapsed since the original examination took place.
- v. Students must submit a publication that has been accepted by an accredited journal for publication before the degree will be conferred.
- vi. Candidates who submit certificates of successful completion of modules in the Continued Professional Development programme with a view to admission to the MPhysT with coursework, must pass in an open examination in the module in question in order to retain credits.

Pass with distinction

The degree is conferred with distinction on a student who has obtained an average of at least 75% in the major subject and the prerequisite subjects, and at least 60% in all other prescribed modules.

- For the MPhysT degree, students must also hold at least a part-time position, deemed applicable for master's degree studies by the head of department.
- Candidates will be required to provide proof of having successfully completed applicable postgraduate modules in clinical fields of specialisation, e.g. Orthopaedic Manual Therapy 1, before the MPhysT degree will be conferred.
- During the MPhysT studies, students must participate in formal departmental instruction and/or research programmes of at least 60 hours per year.
- Postgraduate modules for all the fields of specialisation for the MPhysT degree with coursework, are offered on a biennial basis, if at least five applicants apply for admission to a particular field of specialisation. The closing date for new applications is 31 October annually. Applicants will be notified as soon as possible after this date, whether or not a particular field of specialisation will be presented in the subsequent year. Commencement of studies must, therefore, be discussed beforehand with the head of department.

Also consult General Regulations.

Other programme-specific information

Candidates who have passed with at least 60% in corresponding modules to those indicated by the department during the four-year BPhysT degree studies or an equivalent degree programme must, in

consultation with the head of department, select relevant modules from any faculty of the University of Pretoria, instead of the modules in question to the value of at least 69 credits, provided it can be accommodated in the class and examination timetables.

Examinations and pass requirements

- The examinations in the prerequisite modules will take place prior to or con-currently with that of the major subject as determined by the head of department.
- The examination consists of a written and a clinical as well as an oral component.
- A subminimum of 50% is required in each section of the examination, with a final mark of at least 50% to pass.
- A student will be granted a second opportunity to take part in the examination in the major subject after at least six months have elapsed since the original examination took place.
- Students must submit a publication that has been accepted by an accredited journal for publication before the degree will be conferred.
- Candidates who submit certificates of successful completion of modules in the Continued Professional Development programme with a view to admission to the MPhyST with coursework, must pass in an open examination in the module in question in order to retain credits.

Pass with distinction

The degree is conferred with distinction on a student who has obtained an average of at least 75% in the major subject and the prerequisite subjects, and at least 60% in all other prescribed modules.

Curriculum: Year 1

Fundamental modules

Physiotherapeutic anatomy 807 (FSA 807) - Credits: 15.00

MPhyst Physiotherapy (10258101)

Duration of study 2 years

Programme information

The master's degree is conferred by virtue of a dissertation (FTP 890), on an approved topic based on research.

Note: All MPhyst students must register for, and attend (TNM 800) Applied research methodology 800 satisfactorily.

Admission requirements

(i) For the MPhyst degree, students must also hold at least a part-time position, deemed applicable for master's degree studies by the head of department.

(ii) Candidates will be required to provide proof of having successfully completed applicable postgraduate modules in clinical fields of specialisation, e.g. Orthopaedic Manual Therapy 1, before the MPhyst degree will be conferred.

(iii) A candidate who applies for admission to the MPhyst degree studies by virtue of research (Code 10258101), must comply with the following requirement:

Complete applicable continued training courses presented at national level, in the field of research, as accredited with the Professional Board of Physiotherapy, Biokinetics and Podiatry.

(iv) During the MPhyst studies, students must participate in formal departmental instruction and/or research programmes of at least 60 hours per year.

Research information

Publication

All students must submit a publication that has been accepted for publication by an accredited journal before the degree will be conferred.

Pass with distinction

To obtain the degree with distinction, at least 75% is required for the dissertation.

Curriculum: Year 1

MPublic Health Public Health (10256501)

Duration of study 2 years

Programme information

The MPH programme comprises the following three components:

- Core modules
- Track modules (compulsory and elective)
- Mini-dissertation

Track modules (compulsory and elective)

The following areas are available:

- Biostatistics and epidemiology – Monitoring and evaluation
- Disease control
- Disease control – field Epidemiology and Laboratory Training programme
- Environmental and occupational health
- Environmental and occupational health – Occupational hygiene
- Environmental and occupational health – Aerospace medicine

- Health policy and management
- Health promotion

Information regarding the content of each track is available on the website of the School of Health Systems and Public Health (<http://shsph.up.ac.za>)

Admission requirements

A candidate for admission to the study for the Master's in Public Health must be in possession of:

- a four-year bachelor's degree; plus at least two years' applicable practical (work) experience; or
- an honours degree; or
- a three-year bachelor's degree plus at least five years' applicable practical (work) experience.

Additional requirements

Registration as a special student in the Faculty in order to pass a status examination

i. Candidates will be required to first register as a special student in the Faculty, in order to pass in a status examination, in the following instances:

- A three-year bachelor's degree with less than five years' applicable practical (work) experience; or
- A four-year bachelor's degree with less than two years' applicable practical (work) experience; or
- Any applicant in possession of an approved bachelor's degree, who the School's Selection Committee deems fit to register as a special student.

NB:

In accordance with the criteria of the Senate of the University, the applications for admission of all such candidates must, apart from any Faculty requirements, also be submitted to the University Senate for approval. All candidates accepted for postgraduate study (MPH or the Postgraduate Diplomas) must be in possession of a National Senior Certificate with admission for degree purposes.

ii. Pass requirements for the status examination

- At least 60% must be obtained in the status examination.
- The status examination will be written in June.

iii. The application of a student who has passed the status examination must be submitted to the Senate of the University for approval. Successful students may then enrol for the degree programme in the following academic year.

Other selection criteria

(Each on a scale of one to five.)

- Academic merit
- National/International need for public health
- Under-represented groups in public health
- Public health related employment
- Track record – e.g. employment, academic, community-building, etc.

Other programme-specific information

Please note: All MMed students must register for, and attend (TNM 800) Applied research methodology, satisfactorily.

Also consult General Regulations

Examinations and pass requirements

(i) Examination of modules

- Each module has its individual (own) evaluation, which may consist of more than one mode of evaluation. **To pass in a module, a student must obtain a minimum pass mark of 50%.**
- If a student fails a module but obtains 40% to 49%, a second examination in the module in question must be written. The student must arrange with the lecturer who presents the module, in consultation with the Academic Programme Coordinator, in this regard.
- If a student fails a module but obtains a mark of less than 40%, the module must be repeated in full in the following year.
- If a core module is still not passed after two attempts, the student will not be allowed to continue with the MPH programme.
- A compulsory module in the student's track can only be repeated once. If it is not passed after the second attempt, the student will be requested to change the track. If the student fails after two attempts in the second track, he or she will not be allowed to continue with the MPH programme.
- If an elective module is failed after two attempts, the student will have to select another elective module.

(ii) Final examinations for the MPH

(aa) Other than summarising the total of marks obtained for modules, the MPH has an additional evaluation of its coursework, consisting of two comprehensive examinations. The decision as to whether these examinations will be written or conducted orally, lies with the examiners.

(bb) The first examination will take place after completion of all the compulsory core modules and covers basic knowledge in Public Health. This examination will consist of two papers, each two hours long. Paper I will cover material learned during the core modules HME 870, DEG 870 and BOS 870. Paper II will cover material learned during the remaining core modules with the exception of material learned during the Scientific writing 871 module (HMS 871).

(cc) The second examination will take place at the end of the MPH programme and covers the modules taken as part of a track.

(dd) The minimum pass mark for each examination is 50% and for the first core examination a subminimum of 40% is required for each of the two papers. The final mark for the first core examination will be a simple average of the percentage marks obtained in each of the two constituent papers. If a student fails either of the examinations, he or she will be required to rewrite in the next examination period. If a student fails for the second time he/she may not continue with the MPH programme.

(iii) Examination of mini-dissertation

The mini-dissertation must be passed independently with at least 50%.

Research information

Mini-dissertation

- The MPH degree consists of coursework (70%) and a research component (30%). The mini-dissertation contributes 60 credits (the equivalent of 600 notional hours of learning according to SAQA criteria).
- The expected outcome of the mini-dissertation is that the student will be able to identify and investigate

health and health systems problems in a comprehensive manner, and that he or she will be able to (i.e. begin to) formulate appropriate interventions.

(iii) The student's research protocol is submitted for approval to the MPH track head, prior to submission to the Health Sciences Research Ethics Committee.

Pass with distinction

The degree will be conferred with distinction on a student who has a final mark of at least 75% for the mini-dissertation and an average of at least 75% for the combination of coursework and examinations.

General information

Concurrent registration for two study programmes

- i. In accordance with the stipulations of the General Regulations, which is mutatis mutandis applicable in the case of postgraduate diploma study, the permission of the Dean is required for concurrent registration, subject to the regulations applicable to the fields of study in question and to any other stipulations the Dean may prescribe. Such a concession may be withdrawn by the Dean if the student does not perform satisfactorily – all assignments and coursework must be completed on time. Concurrent registration will not be accepted as a reason for poor performance or not meeting deadlines for both study programmes.
- ii. In the case of registering concurrently for two study programmes in the School of Health Systems and Public Health and elsewhere, students must obtain the written consent of both the coordinator of their current programme and the coordinator of the second programme (or the track co-ordinator in the case of the MPH), and submit it with a substantiating letter to the School's Academic Programme Committee, for recommendation by the Chairperson of the School, after which the application is submitted to the Dean for approval.
- iii. The School of Health Systems and Public Health states that concurrent registration for two study programmes is a privilege and not a right.
- iv. Concurrent registration must be applied for annually and is granted based on academic performance in the primary degree/diploma programme. If the current field of study is a master's degree, then the second field of study can be a postgraduate diploma.
- v. If the current field of study is a postgraduate diploma, then the second field of study can be another postgraduate diploma.

Curriculum: Year 1

Core modules

Biostatistics (1) 870 (BOS 870) - Credits: 10.00

Introduction to health management 870 (HCM 870) - Credits: 10.00

Epidemiology 1 870 (HME 870) - Credits: 10.00

Scientific writing 871 (HMS 871) - Credits: 5.00

Applied research methodology 800 (TNM 800) - Credits: 5.00

Basis of environmental health 880 (EHM 880) - Credits: 10.00

Social determinants of health and primary health care 880 (SCM 880) - Credits: 10.00

Learning in public health 880 (PHM 880) - Credits: 10.00

Curriculum: Final year

MRad Diagnostics (10257001)

Duration of study 1 year

Admission requirements

Subject to the stipulations of General Regulation G.62 at least a bachelor honours degree in Radiography is required as well as registration as a radiographer with the Health Professions Council of South Africa.

The master's degree may only be taken in the field of study in which the foregoing degree or equivalent qualification has been obtained.

Other programme-specific information

(TNM 800) Applied research methodology 800 or an equivalent module must be passed.

Pass with distinction

A minimum of 75% must be obtained in the dissertation, to obtain the degree with distinction.

Curriculum: Final year

Core modules

Applied research methodology 800 (TNM 800) - Credits: 5.00

MRad Nuclear Medicine (10257021)

Duration of study 1 year

Admission requirements

Admission Requirements:

Subject to the stipulations of General Regulation G.62 at least a bachelor honours degree in Radiography is required as well as registration as a radiographer with the Health Professions Council of South Africa.

The master's degree may only be taken in the field of study in which the foregoing degree or equivalent qualification has been obtained.

Main curriculum information:

(i) A dissertation in the field of Nuclear medicine (KDE 890).

(ii) (TNM 800) Applied research methodology 800 or an equivalent module must be passed.

Other programme-specific information

(TNM 800) Applied research methodology 800 or an equivalent module must be passed.

Pass with distinction

A minimum of 75% must be obtained in the dissertation, to obtain the degree with distinction.

Curriculum: Final year

Dissertation: Radiation therapy 890 (RSZ 890) - Credits: 240.00

Applied research methodology 800 (TNM 800) - Credits: 5.00

MSc Aerospace Medicine (10253251)

Duration of study 1 year

Admission requirements

Subject to the stipulations of the General Regulations, a four-year bachelor's degree is required or an honours degree or in the case of a three-year bachelor's degree also applicable practical (work) experience as prescribed by the University plus any other additional work deemed necessary by the head of department: With the proviso that the head of department will have the discretion to decide whether the prerequisite qualification or the qualification plus work experience would be acceptable for admission to the proposed field of study.

For admission to the field of study of Aerospace Medicine, an honours degree in Aerospace Medicine or another applicable honours degree is required.

Additional requirements

All MSc students must register for, and attend (TNM 800) Applied research methodology 800 satisfactorily. (Exemption may be granted if the module has already been passed for the BSCHons degree.) Also consult General Regulations.

Other programme-specific information

Subject to the stipulations of the General Regulations, the Chairperson of the School may, in consultation with the head of department, approve a fixed limited extension of the period on the

grounds of extraordinary circumstances.

Examinations and pass requirements

- i. The minimum pass mark for a module is 50%.
- ii. The prescribed modules must be passed independently of each other.
- iii. Second examinations in the modules are arranged by the head of department, within a period of time specified by him or her.
- iv. No second examinations will be granted in modules in which less than 40% has been obtained. Instead, the module must be repeated in its entirety.
- v. Only with the approval of the Chairperson of the School, on the recommendation of the head of department, will a student be allowed to continue his or her studies after having failed two modules (or the same module twice).

Research information

Research protocol

After registration, a student is required to submit a complete research protocol regarding the proposed dissertation to the Academic Advisory Committee and if necessary, also to the Ethics Committee for approval.

Dissertation

A dissertation on an approved research project must be passed in addition to the coursework. The stipulations of the General Regulations regarding the preparation and submission, the technical editing and the résumé of the dissertation apply.

A systematic literature review (Cochrane type) on an approved subject, which is undertaken in such a manner that bias is minimised, may be presented as an alternative to the dissertation for awarding the MSc degree, provided that the module CLI 870 Principles of clinical epidemiology has been successfully completed. It requires, inter alia, a research protocol with clearly formulated objectives and methods. Inclusion and exclusion methods for the study must be determined. Where applicable, the data must be summarised (meta analysis), with applicable statistical methods.

Pass with distinction

The average mark of the modules, weighted in respect of the number of credits acquired for each individual module, will be the final mark (%) of the coursework.

The degree is conferred with distinction on a student who obtains an average mark of at least 75% in the coursework, as well as a final mark of at least 75% for the dissertation.

MSc Anatomy (10253012)

Duration of study 1 year

Contact Prof MC Bosman marius.bosman@up.ac.za +27 (0)123192233

Programme information

In accordance with the stipulations of the General Regulations, the MSc degree is conferred by virtue of an examination, or an examination and a dissertation, or an examination and an essay, or a dissertation.

Also consult General Regulations.

Note:

All MSc students must register for, and attend (TNM 800) Applied research methodology 800 satisfactorily. (Exemption may be granted if the module has already been passed for the BSchHons degree.)

The maximum period for completion of the master's degree is four years. All the stipulations pertaining to coursework master's degrees and postgraduate studies in accordance with the General Regulations apply. Subject to the stipulations of the General Regulations, the Chairperson of the School in question may, in consultation with the head of department, approve a fixed limited extension of the period on the grounds of extraordinary circumstances.

Admission requirements

Subject to the stipulations of the General Regulations, a four-year bachelor's degree is required or an honours degree or in the case of a three-year bachelor's degree also applicable practical (work) experience as prescribed by the University plus any other additional work deemed necessary by the head of department: With the proviso that the head of department will have the discretion to decide whether the prerequisite qualification or the qualification plus work experience would be acceptable for admission to the proposed field of study.

Research information

Research protocol

After registration, a student is required to submit a complete research protocol regarding the proposed dissertation to the MSc Committee of the School and if necessary, also to the Ethics Committee for approval.

Dissertation

A dissertation must be submitted via Student Administration at least three months prior to the date of a particular graduation ceremony. A manual on the editing of dissertations is available on request from the head of the department in question.

Pass with distinction

The degree is conferred with distinction on a student who has obtained an average of at least 75% in the examination, or in the examination and the dissertation, or in the examination and the essay, or in

the dissertation.

MSc Applied Human Nutrition (10253341)

Duration of study 1 year

Admission requirements

A recognised bachelor's degree in Medicine or in a supplementary health service profession; or a recognised and applicable bachelor honours degree of equivalent status as the BDietetics degree with regard to Physiology and Biochemistry.

Additional requirements

All MSc students must register for, and attend (TNM 800) Applied research methodology 800 satisfactorily. (Exemption may be granted if the module has already been passed for the BScHons degree.) Also consult General Regulations.

Other programme-specific information

Subject to the stipulations of the General Regulations, the Chairperson of the School may, in consultation with the head of department, approve a fixed limited extension of the period on the grounds of extraordinary circumstances.

Pass with distinction

The MSc in Applied Human Nutrition is conferred with distinction on a student who obtains an average of at least 75% in all the abovementioned modules and for the essay.

Curriculum: Final year

Core modules

Early childhood nutrition intervention 884 (DEK 884) - Credits: 20.00

Human nutrition 885 (DEK 885) - Credits: 12.00

Diet therapy 886 (DEK 886) - Credits: 12.00

Applied nutrition 887 (DEK 887) - Credits: 12.00

Applied research methodology 800 (TNM 800) - Credits: 5.00

MSc Biostatistics (10253110)

Duration of study 2 years

Admission requirements

Subject to the stipulations of the General Regulations, a four-year bachelor's degree is required or an honours degree or in the case of a three-year bachelor's degree also applicable practical (work) experience as prescribed by the University plus any other additional work deemed necessary by the head of department: With the proviso that the head of department will have the discretion to decide whether the prerequisite qualification or the qualification plus work experience would be acceptable for admission to the proposed field of study.

In the case of the field of study Biostatistics, an applicable honours degree is required, with Statistics at honours level.

Additional requirements

All MSc students must register for, and attend (TNM 800) Applied research methodology 800 satisfactorily. (Exemption may be granted if the module has already been passed for the BScHons degree.) Also consult General Regulations.

Other programme-specific information

Please note: The choice of elective modules has to be approved by the supervisor.

Subject to the stipulations of the General Regulations, the Chairperson of the School may, in consultation with the head of department, approve a fixed limited extension of the period on the grounds of extraordinary circumstances.

Examinations and pass requirements

- i. The minimum pass mark for a module is 50%.
- ii. The prescribed modules must be passed independently of each other.

MSc Haematology (10253261)

Duration of study 1 year

Contact Prof R Pool roger.pool@up.ac.za +27 (0)123192449

Programme information

In accordance with the stipulations of the General Regulations, the MSc degree is conferred by virtue of an examination, or an examination and a dissertation, or an examination and an essay, or a dissertation.

Also consult General Regulations.

Note:

All MSc students must register for, and attend (TNM 800) Applied research methodology 800 satisfactorily. (Exemption may be granted if the module has already been passed for the BScHons degree.)

The maximum period for completion of the master's degree is four years. All the stipulations pertaining to coursework master's degrees and postgraduate studies in accordance with the General Regulations apply. Subject to the stipulations of the General Regulations, the Chairperson of the School in question may, in consultation with the head of department, approve a fixed limited extension of the period on the grounds of extraordinary circumstances.

Admission requirements

Subject to the stipulations of the General Regulations, a four-year bachelor's degree is required or an honours degree or in the case of a three-year bachelor's degree also applicable practical (work) experience as prescribed by the University plus any other additional work deemed necessary by the head of department: With the proviso that the head of department will have the discretion to decide whether the prerequisite qualification or the qualification plus work experience would be acceptable for admission to the proposed field of study.

Research information

Research protocol

After registration, a student is required to submit a complete research protocol regarding the proposed dissertation to the MSc Committee of the School and if necessary, also to the Ethics Committee for approval.

Dissertation

A dissertation must be submitted via Student Administration at least three months prior to the date of a particular graduation ceremony. A manual on the editing of dissertations is available on request from the head of the department in question.

Pass with distinction

The degree is conferred with distinction on a student who has obtained an average of at least 75% in the examination, or in the examination and the dissertation, or in the examination and the essay, or in the dissertation.

Curriculum: Final year

Core modules

Dissertation: Haematology 890 (HEM 890) - Credits: 240.00

Dissertation: Pharmacology 890 (FAR 890) - Credits: 240.00

MSc Public Health (10253291)

Duration of study 2 years

Admission requirements

Subject to the stipulations of the General Regulations, a four-year bachelor's degree is required or an honours degree or in the case of a three-year bachelor's degree also applicable practical (work) experience as prescribed by the University plus any other additional work deemed necessary by the head of department: With the proviso that the head of department will have the discretion to decide whether the prerequisite qualification or the qualification plus work experience would be acceptable for admission to the proposed field of study.

Additional requirements

All MSc students must register for, and attend (TNM 800) Applied research methodology 800 satisfactorily. (Exemption may be granted if the module has already been passed for the BScHons degree.) Also consult General Regulations.

Other programme-specific information

Please note: The choice of elective modules has to be approved by the supervisor.

Subject to the stipulations of the General Regulations, the Chairperson of the School may, in consultation with the head of department, approve a fixed limited extension of the period on the grounds of extraordinary circumstances.

Examinations and pass requirements

- i. The minimum pass mark for a module is 50%.
- ii. The prescribed modules must be passed independently of each other.
- iii. Second examinations in the modules are arranged by the head of department, within a period of time specified by him or her.
- iv. No second examinations will be granted in modules in which less than 40% has been obtained. Instead, the module must be repeated in its entirety.
- v. Only with the approval of the Chairperson of the School, on the recommendation of the head of department, will a student be allowed to continue his or her studies after having failed two modules (or the same module twice).

Research information

Research protocol

After registration, a student is required to submit a complete research protocol regarding the proposed dissertation to the Academic Advisory Committee and if necessary, also to the Ethics Committee for approval.

Dissertation

A dissertation on an approved research project must be passed in addition to the coursework. The stipulations of the General Regulations regarding the preparation and submission, the technical editing and the résumé of the dissertation apply.

A systematic literature review (Cochrane type) on an approved subject, which is undertaken in such a manner that bias is minimised, may be presented as an alternative to the dissertation for awarding the MSc degree, provided that the module CLI 870 Principles of clinical epidemiology has been successfully completed. It requires, inter alia, a research protocol with clearly formulated objectives and methods. Inclusion and exclusion methods for the study must be determined. Where applicable, the data must be summarised (meta analysis), with applicable statistical methods.

Pass with distinction

The average mark of the modules, weighted in respect of the number of credits acquired for each individual module, will be the final mark (%) of the coursework.

The degree is conferred with distinction on a student who obtains an average mark of at least 75% in the coursework, as well as a final mark of at least 75% for the dissertation.

Principles of clinical epidemiology 870 (CLI 870) - Credits: 10.00

Principles of demography 870 (DEG 870) - Credits: 5.00

Health risk assessment 871 (EHM 871) - Credits: 10.00

Methods in exposure assessment 872 (EHM 872) - Credits: 10.00

Environmental chemical pollution and health 873 (EHM 873) - Credits: 5.00

Introduction to toxicology 871 (EOH 871) - Credits: 5.00

Environmental epidemiology 870 (EOM 870) - Credits: 10.00

Conducting surveys 873 (EPM 873) - Credits: 10.00

Disease surveillance 874 (EPM 874) - Credits: 5.00

Monitoring and evaluation 873 (HME 873) - Credits: 15.00

Qualitative research methods 870 (QHR 870) - Credits: 10.00

Curriculum: Final year

Fundamental modules

Scientific writing 871 (HMS 871) - Credits: 5.00

Learning in public health 870 (PHM 870) - Credits: 5.00

Applied research methodology 800 (TNM 800) - Credits: 5.00

Core modules

Biostatistics (1) 870 (BOS 870) - Credits: 10.00

Biostatistics 2 871 (BOS 871) - Credits: 10.00

Dissertation: Public health medicine 890 (GGs 890) - Credits: 100.00

Epidemiology 1 870 (HME 870) - Credits: 10.00

Elective modules

Principles of clinical epidemiology 870 (CLI 870) - Credits: 10.00

Principles of demography 870 (DEG 870) - Credits: 5.00

Health risk assessment 871 (EHM 871) - Credits: 10.00

Methods in exposure assessment 872 (EHM 872) - Credits: 10.00

Environmental chemical pollution and health 873 (EHM 873) - Credits: 5.00

Introduction to toxicology 871 (EOH 871) - Credits: 5.00

Environmental epidemiology 870 (EOM 870) - Credits: 10.00

MSc Radiation Oncology (10253282)

Duration of study 1 year

Contact Mr MR Mlambo roy.mlambo@up.ac.za +27 (0)123541033

Programme information

In accordance with the stipulations of the General Regulations, the MSc degree is conferred by virtue of an examination, or an examination and a dissertation, or an examination and an essay, or a dissertation.

Also consult General Regulations.

Note:

All MSc students must register for, and attend (TNM 800) Applied research methodology 800 satisfactorily. (Exemption may be granted if the module has already been passed for the BScHons degree.)

The maximum period for completion of the master's degree is four years. All the stipulations pertaining to coursework master's degrees and postgraduate studies in accordance with the General Regulations apply. Subject to the stipulations of the General Regulations, the Chairperson of the School in question may, in consultation with the head of department, approve a fixed limited extension of the period on the grounds of extraordinary circumstances.

Admission requirements

Subject to the stipulations of the General Regulations, a four-year bachelor's degree is required or an honours degree or in the case of a three-year bachelor's degree also applicable practical (work) experience as prescribed by the University plus any other additional work deemed necessary by the head of department: With the proviso that the head of department will have the discretion to decide whether the prerequisite qualification or the qualification plus work experience would be acceptable for admission to the proposed field of study.

Other programme-specific information

The head of department has the discretion to decide whether the specialisation Radiation Oncology will be presented in a particular year (the number of prospective students applying must justify the presentation of the specialisation in question in a given year).

Research information

Research protocol

After registration, a student is required to submit a complete research protocol regarding the proposed dissertation to the MSc Committee of the School and if necessary, also to the Ethics Committee for approval.

Dissertation

A dissertation must be submitted via Student Administration at least three months prior to the date of a particular graduation ceremony. A manual on the editing of dissertations is available on request from the head of the department in question.

Pass with distinction

The degree is conferred with distinction on a student who has obtained an average of at least 75% in the examination, or in the examination and the dissertation, or in the examination and the essay, or in the dissertation.

Curriculum: Final year

Core modules

Dissertation: Radiation oncology 890 (SOZ 890) - Credits: 240.00

MScDent General (11252001)

Duration of study 2 years

Programme information

The programme consists of:

- An examination on an approved programme of advanced study and tuition in an applicable area of Dentistry.
- A dissertation related to the major subject. In the final evaluation, the dissertation and the examination will carry equal weight.

Admission requirements

Subject to the stipulations of the General Regulations, the BChD degree or an equivalent qualification is required, as well as the Postgraduate Diploma in Dentistry [PGDipDent]. The candidate may be exempted from the latter qualification at the discretion of the head of the department concerned and with the Dean's approval.

Candidates in possession of an applicable bachelor honours degree or equivalent qualification may be admitted to study in certain specialised basic dental sciences at the discretion of the head of department concerned and according to the General Regulations, and with the Dean's approval.

Examinations and pass requirements

The stipulations of the General Regulations apply. A minimum pass mark of 50% is required for the dissertation, with a minimum of 50% as pass mark in the examination.

Pass with distinction

A student must obtain a minimum of 75% in both the examination and the dissertation.

Curriculum: Year 1

Core modules

Dissertation: MSc(Odontology) 890 (ODO 890) - Credits: 240.00

Applied research methodology 800 (TNM 800) - Credits: 5.00

MScDent Maxillo-facial and Oral Radiology (11252005)

Duration of study 2 years

Admission requirements

Subject to the stipulations of the General Regulations, the BChD degree is required, as well as the Postgraduate

Diploma in Dentistry [PGDipDent] in the main field of study (RAD) Radiography 700.

Examinations and pass requirements

The stipulations of the General Regulations apply.

Pass with distinction

A student must obtain a minimum of 65% in the basic subject and at least 75% in the major subject of the study programme.

MScDent Oral Surgery (11252004)

Duration of study 2 years

Admission requirements

Subject to the stipulations of the General Regulations, the BChD degree is required, as well as the Postgraduate Diploma in Dentistry [PGDipDent] with the main field of study Oral Surgery (Oral Surgery with a minimum pass mark of 65%).

Other programme-specific information

A minimum of any two of the listed basic subjects is required. These basic subjects may be passed at the University of Pretoria or the College of Maxillofacial and Oral Surgery of the Colleges of Medicine of South Africa or may be part of the PGDipDent in Oral Surgery, or promoted/passed with a minimum pass mark of 65% from another tertiary institution (see also the General Regulations).

Students who hold the Postgraduate Diploma in Dentistry [PGDipDent] with Oral Surgery as the main field of study, may apply in writing for credit for the basic subject, clinical training and the written final examination in Oral Surgery, provided that a minimum of 65% has been obtained in the basic subject at the University of Pretoria (see also the General Regulations).

Examinations and pass requirements

The stipulations of the General Regulations apply.

Pass with distinction

A student must obtain a minimum of 65% in Parts I and II, and a minimum of 75% in each of the subdivisions of Part III of the study programme.

Curriculum: Year 1

Doctorate

DCur Nursing (10261001)

Duration of study 2 years

Programme information

The DCur degree is conferred by virtue of the publications of a candidate who enjoys international recognition on the grounds of his or her outstanding and extensive research.

Also consult the General Regulations.

DMedicine Anaesthesiology (10260011)

Duration of study 2 years

Contact Prof Aj Rantloane arthur.rantloane@up.ac.za +27 (0)123192108

Programme information

The MD degree is conferred by virtue of a thesis and, if the Dean deems it necessary, an examination on the field of study of the thesis. Also consult General Regulations. Please note: All MD students must register for, and attend (TNM 800) Applied research methodology 800 satisfactorily. (Exemption may be granted if Applied research methodology 800 has already been passed for the master's degree.) The maximum period for completion of the degree is five years. Under exceptional circumstances, a student may apply to the head of department, in writing, for a fixed, limited extension of this period.

Admission requirements

For admission to the study for the MD degree a candidate must be in possession of the MMed or the PhD degree or a qualification of equivalent status following a MBChB degree – in the case of Family Medicine the MMed in Family Medicine; and in the case of Pharmacology the MPharmMed degree of the University of Pretoria. Alternatively the student must comply with the stipulations as set out in the General Regulations.

Research information

A complete research protocol regarding the proposed thesis (as well as the curriculum vitae of the candidate) must be submitted for approval to the Postgraduate Committee and if necessary, also to the Ethics Committee. The thesis must deal with a problem from any field of study in Medicine and must satisfy the supervisor and the examiners that it represents advanced original research and/or creative work in the field of Medicine. It must give an overview of the literature that was used on the topic and contain a description of the observations made and experiments done by the student, as well as a discussion of the conclusions reached.

Research information

A complete research protocol regarding the proposed thesis (as well as the curriculum vitae of the candidate) must be submitted for approval to the Postgraduate Committee and if necessary, also to the Ethics Committee. The thesis must deal with a problem from any field of study in Medicine and must satisfy the supervisor and the examiners that it represents advanced original research and/or creative work in the field of Medicine. It must give an overview of the literature that was used on the topic and contain a description of the observations made and experiments done by the student, as well as a discussion of the conclusions reached.

Contact Prof CM Kgokolo mahlatse.kgokolo@up.ac.za +27 (0)123543041

Programme information

The MD degree is conferred by virtue of a thesis and, if the Dean deems it necessary, an examination on the field of study of the thesis. Also consult General Regulations. Please note: All MD students must register for, and attend (TNM 800) Applied research methodology 800 satisfactorily. (Exemption may be granted if Applied research methodology 800 has already been passed for the master's degree.) The maximum period for completion of the degree is five years. Under exceptional circumstances, a student may apply to the head of department, in writing, for a fixed, limited extension of this period.

Admission requirements

For admission to the study for the MD degree a candidate must be in possession of the MMed or the PhD degree or a qualification of equivalent status following a MBChB degree – in the case of Family Medicine the MMed in Family Medicine; and in the case of Pharmacology the MPharmMed degree of the University of Pretoria. Alternatively the student must comply with the stipulations as set out in the General Regulations.

Programme information

The MD degree is conferred by virtue of a thesis and, if the Dean deems it necessary, an examination on the field of study of the thesis. Also consult General Regulations. Please note: All MD students must register for, and attend (TNM 800) Applied research methodology 800 satisfactorily. (Exemption may be granted if Applied research methodology 800 has already been passed for the master's degree.) The maximum period for completion of the degree is five years. Under exceptional circumstances, a student may apply to the head of department, in writing, for a fixed, limited extension of this period.

Admission requirements

For admission to the study for the MD degree a candidate must be in possession of the MMed or the PhD degree or a qualification of equivalent status following a MBChB degree – in the case of Family Medicine the MMed in Family Medicine; and in the case of Pharmacology the MPharmMed degree of the University of Pretoria. Alternatively the student must comply with the stipulations as set out in the General Regulations.

DSc Dietetics (10262001)

Duration of study 2 years

Programme information

The degree is conferred by virtue of publications.

Also consult the General Regulations.

Admission requirements

Subject to the stipulations of General Regulations G.45 and G.62 a candidate will only be admitted to the studies for the doctoral degree if he or she holds a MBChB or a master's degree or has been granted the equivalent status.

DSc Health Sciences (10262000)

Duration of study 2 years

Programme information

The DSc degree is conferred on the basis of publications (consult the General Regulations).

The collective publications submitted must deal with a central theme.

The candidate must already hold a PhD degree or an equivalent qualification.

Curriculum: Final year

Core modules

Applied research methodology 800 (TNM 800) - Credits: 5.00

PhD Anaesthesiology (10260521)

Duration of study 2 years

Contact Prof AJ Rantloane arthur.rantloane@up.ac.za +27 (0)123192108

Programme information

A PhD student must:

- under the supervision of a supervisor at the university or another institution approved by the Senate, undertake original research to the satisfaction of the examiners; and
- submit a thesis which will prove, according to the opinion of the examiners, that he or she has, on the grounds of independent critical judgement, made a distinct contribution towards the enrichment of knowledge in the chosen subject.

A student for the PhD degree must be registered for the doctoral degree study at the University for at least one academic year before the degree can be conferred.

The PhD degree is conferred by virtue of a thesis and, should the Dean deem it necessary, an examination on the field of study of the thesis.

The maximum period for completion of a doctoral degree is three years. Under exceptional circumstances, a student may apply to the head of the department, in writing, for a fixed, limited extension of this period.

Admission requirements

Subject to the stipulations of the General Regulations, a candidate will only be admitted to the studies for the doctoral degree if he or she holds a MBChB or a master's degree or has been granted the equivalent status.

Additional requirements

Also consult General Regulations. Please note: All PhD students must register for, and attend TNM 800 Applied research methodology 800 satisfactorily. (Exemption will be granted if Applied research methodology 800 had been passed for the master's degree.) However, students following the specialisation Pharmacology for this degree, register for (FAR 872) Pharmacology: Introduction to laboratory research and techniques 872, instead of TNM 800.

Examinations and pass requirements

The doctoral examination will be oral and/or written and will deal with the content of the thesis as well as those subdivisions of the field of study on which the thesis is based, if requested.

Research information

A complete research protocol regarding the proposed thesis (as well as the curriculum vitae of the candidate) must be submitted to the Postgraduate committee of the School in question and if necessary, also to the Ethics Committee for approval. The thesis must deal with a problem from any field of study in the Health Sciences and must satisfy the supervisor and the examiners that it represents advanced original research and/or creative work in the field of the Health Sciences. It must give an overview of the literature that was used on the topic and contain a description of the observations made and experiments done by the student, as well as a discussion of the conclusions reached.

Curriculum: Year 1

PhD Community Health (10260401)

Duration of study 2 years

Programme information

The PhD degree is conferred by virtue of a thesis and, should the Dean deem it necessary, an examination on the field of study of the thesis. The maximum period for completion of a doctoral degree is five years. Under exceptional circumstances, a student may apply to the head of the

department, in writing, for a fixed, limited extension of this period.

Admission requirements

Subject to the stipulations of the General Regulations, a candidate will only be admitted to the studies for the doctoral degree if he or she holds a MBChB or a master's degree or has been granted the equivalent status.

Additional requirements

Also consult General Regulations.

Please note: All PhD students must register for, and attend TNM 800 Applied research methodology 800 satisfactorily. (Exemption will be granted if Applied research methodology 800 had been passed for the master's degree.)

A PhD student must

- i. under the supervision of a supervisor at the University or another institution approved by the Senate, undertake original research to the satisfaction of the examiners; and
- ii. submit a thesis which will prove, according to the opinion of the examiners, that he or she has, on the grounds of independent critical judgement, made a distinct contribution towards the enrichment of knowledge in the chosen subject.

A student for the PhD degree must be registered for the doctoral degree study at the University for at least one academic year before the degree can be conferred.

The following additional requirement is set in respect of the PhD degree completed in the School of Health Systems and Public Health:

All PhD students in the School are required to have a successful oral defence of their research protocol before the end of the first academic year of study. Students who do not meet this requirement will be considered as not making adequate progress and will not be admitted to a second year of study.

Examinations and pass requirements

The doctoral examination will be oral and/or written and will deal with the content of the thesis as well as those subdivisions of the field of study on which the thesis is based, if requested.

Research information

A complete research protocol regarding the proposed thesis (as well as the curriculum vitae of the candidate) must be submitted to the Academic Advisory Committee and, if necessary, also to the Ethics Committee for approval. The thesis must deal with a problem from a field of study in Health Systems and Public Health and must satisfy the supervisor and the examiners that it represents advanced original research and/or creative work in the field of Health Systems and Public Health. It must give an overview of the literature that was used on the topic and contain a description of the observations made and experiments done by the student, as well as a discussion of the conclusions reached.

PhD Dentistry (11261001)

Duration of study 2 years

Programme information

The degree PhD is conferred by virtue of a thesis, with the proviso that the Faculty Board, on the recommendation of the examination panel, may require an oral examination which deals with the topic of the thesis.

Also consult the General Regulations.

Admission requirements

Subject to the stipulations of the General Regulations a candidate will only be admitted to doctoral study if he or she holds a master's degree. If Maxillo-Facial and Oral Surgery is chosen as main field of study a minimum pass mark of 65% in either MScDent or MChD (Maxillo-facial and Oral Surgery) or an equivalent qualification will be required.

No online applications for the PhD will be accepted. Students have to follow the correct procedure and apply through the respective departments.

All application forms first need to be approved by the Head of Department before students hand them in at Student Administration in the HW Snyman Building (Postgraduate Enquiries).

PhD Environmental Health (10260405)

Duration of study 2 years

Programme information

The PhD degree is conferred by virtue of a thesis and, should the Dean deem it necessary, an examination on the field of study of the thesis. The maximum period for completion of a doctoral degree is five years. Under exceptional circumstances, a student may apply to the head of the department, in writing, for a fixed, limited extension of this period.

Admission requirements

Subject to the stipulations of General Regulations G.45 and G.62 a candidate will only be admitted to the studies for the doctoral degree if he or she holds a MBChB or a master's degree or has been granted the equivalent status.

The following additional requirements are set in respect of the PhD degree completed in the School of Health Systems and Public Health:

- All PhD students in the School are required to register as a Health Sciences Special (Postgraduate) student for the first year. This will allow the student time to complete any additional coursework the head of department and/or supervisor may require to be completed and which is deemed applicable to the particular research field and to prepare a pre-final research protocol.
- A review will be done by a school committee and only students who have made adequate progress will be allowed to register as a PhD student in the following year.

Additional requirements

Also consult General Regulations.

Please note: All PhD students must register for, and attend TNM 800 Applied research methodology 800 satisfactorily. (Exemption will be granted if Applied research methodology 800 had been passed for the master's degree.)

A PhD student must

- i. under the supervision of a supervisor at the University or another institution approved by the Senate, undertake original research to the satisfaction of the examiners; and
- ii. submit a thesis which will prove, according to the opinion of the examiners, that he or she has, on the grounds of independent critical judgement, made a distinct contribution towards the enrichment of knowledge in the chosen subject.

A student for the PhD degree must be registered for the doctoral degree study at the University for at least one academic year before the degree can be conferred.

The following additional requirement is set in respect of the PhD degree completed in the School of Health Systems and Public Health:

All PhD students in the School are required to have a successful oral defence of their research protocol before the end of the first academic year of study. Students who do not meet this requirement will be considered as not

making adequate progress and will not be admitted to a second year of study.

Examinations and pass requirements

The doctoral examination will be oral and/or written and will deal with the content of the thesis as well as those subdivisions of the field of study on which the thesis is based, if requested.

Research information

A complete research protocol regarding the proposed thesis (as well as the curriculum vitae of the candidate) must be submitted to the Academic Advisory Committee and, if necessary, also to the Ethics Committee for approval. The thesis must deal with a problem from a field of study in Health Systems and Public Health and must satisfy the supervisor and the examiners that it represents advanced original research and/or creative work in the field of Health Systems and Public Health. The doctoral examination will be oral and/or written and will deal with the content of the thesis as well as those subdivisions of the field of study on which the thesis is based, if requested.

Research information

A complete research protocol regarding the proposed thesis (as well as the curriculum vitae of the candidate) must be submitted to the Postgraduate committee of the School in question and if necessary, also to the Ethics Committee for approval. The thesis must deal with a problem from any field of study in the Health Sciences and must satisfy the supervisor and the examiners that it represents advanced original research and/or creative work in the field of the Health Sciences. It must give an overview of the literature that was used on the topic and contain a description of the observations made and experiments done by the student, as well as a discussion of the conclusions reached.

PhD Forensic Pathology (10260611)

Duration of study 2 years

Contact Prof G Saayman gsaayman@up.ac.za +27 (0)123192260

Programme information

A PhD student must:

- i. under the supervision of a supervisor at the university or another institution approved by the Senate, undertake original research to the satisfaction of the examiners; and
- ii. submit a thesis which will prove, according to the opinion of the examiners, that he or she has, on the grounds of independent critical judgement, made a distinct contribution towards the enrichment of knowledge in the chosen subject.

A student for the PhD degree must be registered for the doctoral degree study at the University for at least one academic year before the degree can be conferred.

The PhD degree is conferred by virtue of a thesis and, should the Dean deem it necessary, an examination on the field of study of the thesis.

The maximum period for completion of a doctoral degree is three years. Under exceptional circumstances, a student may apply to the head of the department, in writing, for a fixed, limited extension of this period.

Admission requirements

Subject to the stipulations of the General Regulations, a candidate will only be admitted to the studies for the doctoral degree if he or she holds a MBChB or a master's degree or has been granted the equivalent status.

Additional requirements

Also consult General Regulations. Please note: All PhD students must register for, and attend TNM 800 Applied research methodology 800 satisfactorily. (Exemption will be granted if Applied research methodology 800 had been passed for the master's degree.) However, students following the specialisation Pharmacology for this degree, register for (FAR 872) Pharmacology: Introduction to laboratory research and techniques 872, instead of TNM 800.

Examinations and pass requirements

The doctoral examination will be oral and/or written and will deal with the content of the thesis as well as those subdivisions of the field of study on which the thesis is based, if requested.

PhD Health Systems (10260402)

Duration of study 2 years

Programme information

The PhD degree is conferred by virtue of a thesis and, should the Dean deem it necessary, an examination on the field of study of the thesis. The maximum period for completion of a doctoral degree is five years. Under exceptional circumstances, a student may apply to the head of the department, in writing, for a fixed, limited extension of this period.

Admission requirements

Subject to the stipulations of the General Regulations, a candidate will only be admitted to the studies for the doctoral degree if he or she holds a MBChB or a master's degree or has been granted the equivalent status.

Also consult General Regulations.

Please note: All PhD students must register for, and attend TNM 800 Applied research methodology 800 satisfactorily. (Exemption will be granted if Applied research methodology 800 had been passed for the master's degree.)

Contact department before application.

A PhD student must

- (i) under the supervision of a supervisor at the University or another institution approved by the Senate, undertake original research to the satisfaction of the examiners; and
- (ii) submit a thesis which will prove, according to the opinion of the examiners, that he or she has, on the grounds of independent critical judgement, made a distinct contribution towards the enrichment of knowledge in the chosen subject.

A student for the PhD degree must be registered for the doctoral degree study at the University for at least one academic year before the degree can be conferred.

The following additional requirement is set in respect of the PhD degree completed in the School of Health Systems and Public Health:

All PhD students in the School are required to have a successful oral defence of their research protocol before the end of the first academic year of study. Students who do not meet this requirement will be considered as not making adequate progress and will not be admitted to a second year of study.

Additional requirements

Also consult General Regulations.

Please note: All PhD students must register for, and attend TNM 800 Applied research methodology 800 satisfactorily. (Exemption will be granted if Applied research methodology 800 had been passed for the master's degree.)

Examinations and pass requirements

The doctoral examination will be oral and/or written and will deal with the content of the thesis as well as those subdivisions of the field of study on which the thesis is based, if requested.

Research information

A complete research protocol regarding the proposed thesis (as well as the curriculum vitae of the candidate) must be submitted to the Postgraduate committee of the School in question and if necessary, also to the Ethics Committee for approval. The thesis must deal with a problem from any field of study in the Health Sciences and must satisfy the supervisor and the examiners that it represents advanced original research and/or creative work in the field of the Health Sciences. It must give an overview of the literature that was used on the topic and contain a description of the observations made and experiments done by the student, as well as a discussion of the conclusions reached.

PhD Medical Physics (10260541)

Duration of study 2 years

Contact Prof RH Lakier roy.lakier@up.ac.za +27 (0)123541184

Programme information

A PhD student must:

- under the supervision of a supervisor at the university or another institution approved by the Senate, undertake original research to the satisfaction of the examiners; and
- submit a thesis which will prove, according to the opinion of the examiners, that he or she has, on the grounds of independent critical judgement, made a distinct contribution towards the enrichment of knowledge in the chosen subject.

A student for the PhD degree must be registered for the doctoral degree study at the University for at least one academic year before the degree can be conferred.

The PhD degree is conferred by virtue of a thesis and, should the Dean deem it necessary, an examination on the field of study of the thesis.

The maximum period for completion of a doctoral degree is three years. Under exceptional circumstances, a

student may apply to the head of the department, in writing, for a fixed, limited extension of this period.

Admission requirements

Subject to the stipulations of the General Regulations, a candidate will only be admitted to the studies for the doctoral degree if he or she holds a MBChB or a master's degree or has been granted the equivalent status.

Additional requirements

Also consult General Regulations. Please note: All PhD students must register for, and attend TNM 800 Applied research methodology 800 satisfactorily. (Exemption will be granted if Applied research methodology 800 had been passed for the master's degree.) However, students following the specialisation Pharmacology for this degree, register for (FAR 872) Pharmacology: Introduction to laboratory research and techniques 872, instead of TNM 800.

Examinations and pass requirements

The doctoral examination will be oral and/or written and will deal with the content of the thesis as well as those subdivisions of the field of study on which the thesis is based, if requested.

PhD Nursing Science (10260311)

Duration of study 2 years

Programme information

All PhD students must register for, and attend (TNM 800) Applied research methodology 800 satisfactorily. (Exemption will be granted if (VNM 800) Nursing research methodology 800 has already been passed for the MCur degree.)

The PhD degree study in the field of Nursing Science is conferred by virtue of a thesis and, if the Dean decides otherwise, an examination (VGK 900) which deals with the field of study of the thesis.

Admission requirements

Subject to the stipulations of the General Regulations, a student will only be admitted to doctoral degree studies if he or she is in possession of a master's degree.

Research information

- (a) The thesis (VGK 990) deals with a problem from one or other field of Nursing Science, it must give an overview of the literature on the topic, and a description of the observations made and experiments done by the student, as well as a discussion of the conclusions reached. It must furthermore convince the promoter and examiners that it represents original research.
- (b) A complete research protocol in respect of the proposed thesis must be submitted to an evaluation committee at the commencement of the doctoral studies, and if necessary, also to the Ethics Committee for approval.
- (c) The evaluation committee is constituted by the head of department, in conjunction with the Chairperson of the School, and will consist of experienced persons in research in the proposed field of study of the candidate.
- (d) At least two committee members will be appointed from other national and/or international tertiary institutions. Due to financial constraints, technological aids will be used in the case of committee members from foreign universities who will therefore not be able to attend the meeting. The report of the evaluation committee will be made available to the candidate in writing.

PhD Physiotherapy (10260451)

Duration of study 2 years

Programme information

The PhD is conferred by virtue of a thesis (FTP 990) and, unless the Dean decides otherwise, an examination on the field of study covered by the thesis (FTP 900).

The maximum period for the completion of a doctoral degree is five years. However, in accordance with the stipulations of the General Regulations and in extraordinary circumstances, the Chairperson of a School may, on the recommendation of the head of department, approve a fixed, limited extension of the period.

Admission requirements

Subject to the stipulations of the General Regulations, a candidate must be in possession of a master's degree in Physiotherapy or an equivalent qualification for admission to doctoral studies.

Additional requirements

Also consult General Regulations.

Note: All students must register for, and attend (TNM 800) Applied research methodology 800 satisfactorily. (Exemption will be granted if (TNM 800) Applied research methodology 800 has been passed for the MPhysT degree.)

Research information

(a) A complete research protocol with regard to the thesis must be submitted to an evaluation committee and, if necessary, also to the Ethics Committee for approval. The evaluation committee is constituted by the head of department in conjunction with the Chairperson of the School and will consist of experienced persons in research in the proposed field of study of the candidate.

At least two committee members will be appointed from other national and/or international tertiary institutions. Due to financial constraints, technological aids will be used in the case of committee members from foreign universities, who will for this reason be unable to attend the meeting. The report of the evaluation committee will be made available to the candidate in writing.

(b) The thesis must deal with a problem from one or other field of Physiotherapy and must be proof to the promoter and examiners that it represents original research.

A complete research protocol regarding the proposed thesis (as well as the curriculum vitae of the candidate) must be submitted to the Postgraduate committee of the School in question and if necessary, also to the Ethics Committee for approval. The thesis must deal with a problem from any field of study in the Health Sciences and must satisfy the supervisor and the examiners that it represents advanced original research and/or creative work in the field of the Health Sciences. It must give an overview of the literature that was used on the topic and contain a description of the observations made and experiments done by the student, as well as a discussion of the conclusions reached.

Thesis: Psychiatry 990 (PSI 990) - Credits: 480.00

Applied research methodology 800 (TNM 800) - Credits: 5.00

PhD Public Health (10260403)

Duration of study 2 years

Programme information

The PhD degree is conferred by virtue of a thesis and, should the Dean deem it necessary, an examination on the field of study of the thesis. The maximum period for completion of a doctoral degree is five years. Under exceptional circumstances, a student may apply to the head of the department, in writing, for a fixed, limited extension of this period.

Admission requirements

Subject to the stipulations of General Regulations, a candidate will only be admitted to the studies for the doctoral degree if he or she holds a MBChB or a master's degree or has been granted the equivalent status.

Additional requirements

Also consult General Regulations.

Please note: All PhD students must register for, and attend TNM 800 Applied research methodology 800

satisfactorily. (Exemption will be granted if Applied research methodology 800 had been passed for the master's degree.)

A PhD student must

- i. under the supervision of a supervisor at the University or another institution approved by the Senate, undertake original research to the satisfaction of the examiners; and
- ii. submit a thesis which will prove, according to the opinion of the examiners, that he or she has, on the grounds of independent critical judgement, made a distinct contribution towards the enrichment of knowledge in the chosen subject.

A student for the PhD degree must be registered for the doctoral degree study at the University for at least one academic year before the degree can be conferred.

The following additional requirement is set in respect of the PhD degree completed in the School of Health Systems and Public Health:

All PhD students in the School are required to have a successful oral defence of their research protocol before the end of the first academic year of study. Students who do not meet this requirement will be considered as not making adequate progress and will not be admitted to a second year of study.

Examinations and pass requirements

The doctoral examination will be oral and/or written and will deal with the content of the thesis as well as those subdivisions of the field of study on which the thesis is based, if requested.

Research information

A complete research protocol regarding the proposed thesis (as well as the curriculum vitae of the candidate) must be submitted to the Academic Advisory Committee and, if necessary, also to the Ethics Committee for approval. The thesis must deal with a problem from a field of study in Health Systems and Public Health and must satisfy the supervisor and the examiners that it represents advanced original research and/or creative work in the field of Health Systems and Public Health. It must give an overview of the literature that was used on the topic and contain a description of the observations made and experiments done by the student, as well as a discussion of the conclusions reached.

Curriculum: Year 1

Core modules

Public health 990 (OGD 990) - Credits: 480.00

Applied research methodology 800 (TNM 800) - Credits: 5.00

Curriculum: Final year

Core modules

Public health 990 (OGD 990) - Credits: 480.00

Applied research methodology 800 (TNM 800) - Credits: 5.00

PhD Radiography (10260571)

Duration of study 2 years

Programme information

Also consult the General Regulations.

The PhD degree study in the field Radiography is conferred by virtue of a thesis and, unless the Dean decides otherwise, an examination (RAD 900) which deals with the field of the thesis.

Note: All PhD students must register for, and attend (TNM 800) Applied research methodology 800 satisfactorily. (Exemption will be granted if the module has already been passed for the MRad degree.)

Admission requirements

Subject to the stipulations of the General Regulations, a student will only be admitted to doctoral degree studies if he or she is in possession of a master's degree.

Research information

- (a) The thesis (RAD 990) must deal with a problem from one or other field of Radiography, it must give an overview of the literature on the topic, and a description of the observations made and experiments done by the student, as well as a discussion of the conclusions reached, and furthermore convince the promoter and examiners that it represents original research.
- (b) A complete research protocol in respect of the proposed thesis must be submitted to an evaluation committee at the commencement of the doctoral studies, and also to the Ethics Committee for approval.
- (c) The evaluation committee is constituted by the head of department, in conjunction with the Chairperson of the School, and will consist of experienced persons in research in the proposed field of study of the candidate.
- (d) At least two committee members will be appointed from other national and/or international tertiary institutions. Due to financial constraints, technological aids will be used in the case of committee members from foreign universities who will therefore be unable to attend the meeting. The report of the evaluation committee will be made available to the candidate in writing.

Curriculum: Year 1

PhD Sports Science Biokinetics (10260585)

Duration of study 2 years

Programme information

A PhD student must:

- i. under the supervision of a supervisor at the university or another institution approved by the Senate, undertake original research to the satisfaction of the examiners; and
- ii. submit a thesis which will prove, according to the opinion of the examiners, that he or she has, on the grounds of independent critical judgement, made a distinct contribution towards the enrichment of knowledge in the chosen subject.

A student for the PhD degree must be registered for the doctoral degree study at the University for at least one academic year before the degree can be conferred.

The PhD degree is conferred by virtue of a thesis and, should the Dean deem it necessary, an examination on the field of study of the thesis.

The maximum period for completion of a doctoral degree is three years. Under exceptional circumstances, a student may apply to the head of the department, in writing, for a fixed, limited extension of this period.

Admission requirements

A minimum of 60% for the dissertation in the related master's degree programme articulating with the specific doctoral degree programme. An acceptable level of proficiency in English or Afrikaans is required.

Additional requirements

Admission to this programme requires a master's degree in Sports Science with focus area Biokinetics with a minimum mark of 60% and a research proposal that has been accepted by the Departmental Research Committee, and the Ethical Committee of the Faculty of Health Sciences.

Also consult General Regulations. Please note: All PhD students must register for, and attend TNM 800 Applied research methodology 800 satisfactorily. (Exemption will be granted if Applied research methodology 800 had been passed for the master's degree.) However, students following the specialisation Pharmacology for this degree, register for (FAR 872) Pharmacology: Introduction to laboratory research and techniques 872, instead of TNM 800.

This module will introduce the new oral hygiene student to the dental and university environment. It will also serve as the foundation for the total oral hygiene programme and will assist the student to feel more comfortable and settled in the new environment. This module entails the following:

- Professionalism and ethics
- Group work and communication
- Use of the library and correct referencing in assignments
- Academic skills such as academic writing and reading, effective studying and how to do assignments
- Dental terminology
- Dental specialities
- Dental instruments, equipment and materials
- Dental charting
- Infection control
- Occupational health and safety
- Brushing and flossing

Faculty of Engineering, Built Environment and Information Technology
Faculty of Education
Faculty of Economic and Management Sciences
Faculty of Law
Faculty of Health Sciences

Prerequisites No prerequisites.

Contact time 2 lectures per week, 2 discussion classes per week

Language of tuition Afrikaans

Academic organisation Afrikaans

Period of presentation Semester 1

Module content

Taalkundekomponent: Inleiding tot die Afrikaanse taalkunde met klem op lees-en skryfvaardigheid.

Letterkundekomponent: Inleiding tot die Afrikaanse en Nederlandse letterkunde aan die hand van kortverhale en gedigte.

Basic conversational Afrikaans 111 (AFR 111)

Qualification Undergraduate

Module credits	12.00
Programmes	BChD Dentistry BOH Oral Hygiene
Service modules	Faculty of Health Sciences
Prerequisites	No prerequisites.
Contact time	1 lecture per week
Language of tuition	Double Medium
Academic organisation	Afrikaans
Period of presentation	Semester 1

Module content

Basic Afrikaans grammar and pronunciation and a specific technical (oral health) vocabulary is studied and practised to enable students to converse with patients in the professional environment. In this practical module, students are required to memorise phrases and to practise conversation skills under close observation.

Module content

Taalkundekomponent: Inleiding tot die Afrikaanse sintaksis, fonetiek en taalgeskiedenis.

Letterkundekomponent: Inleiding tot die Romankuns Inleiding tot die Drama

Communication for sustainable rural development 413 (AGV 413)

Qualification Undergraduate

Module credits 20.00

Service modules Faculty of Health Sciences

Prerequisites Second year - academic level

Contact time 2 lectures per week

Language of tuition English

Academic organisation Agric Econ, Ext + Rural Dev

Period of presentation Year

Module content

Introduction to the communication process and its importance for sustainable development; the models of communication; critical elements and factors in communication; Communication and perception. Use of non-verbal communication. Persuasion and Credibility. Messages and message treatment; audience and audience identification; channels and methods of communication. Effective listening and feedback. Practical training in communication: Effective speaking; visual aids in communication; managing conflict; report writing. Introduction to Appreciative Inquiry as a communication approach.

Thesis: General health sciences 990 (AGW 990)

Qualification Postgraduate

Module credits 480.00

Prerequisites No prerequisites.

Period of presentation Year

Research report 771 (AHM 771)

Qualification Postgraduate

Module credits 30.00

Programmes PGDip Option: Executive Leadership
PGDip Option: General Operations

Prerequisites	No prerequisites.
Contact time	50 hours per week
Language of tuition	English
Academic organisation	School of Health Syst & Public
Period of presentation	Year

Module content

Executive/Emerging Leadership

Participants will be required to write up a project which can consist of a Strategic Plan for Leadership at the workplace which they will be required to implement and monitor over a period of 6 months and then write up the strengths and weaknesses of whether this plan made a difference and to what extent they have been able to influence and change the approach of decision-making at their workplaces. A report from supervisors will be required and the project will include a literature review and a detailed analysis of what was achieved, what value-added difference the project made at the workplace, what were the sustainability factors built into the plan and how it had improved service delivery. The health leadership strategies that arise out of the project will be discussed and how its broader application can be implemented towards transforming healthcare delivery at district or hospital level.

Reproductive health epidemiology 870 (AHM 870)

Qualification	Postgraduate
Module credits	10.00

Module content

Apply effective search strategies in different technological environments. Demonstrate the ethical and fair use of information resources. Integrate 21st-century communications into the management of academic information.

Occupational science 100 (AKU 100)

Qualification	Undergraduate
Module credits	25.00
Programmes	BOccTher Occupational Therapy
Prerequisites	No prerequisites.
Contact time	8 practicals per week, 2 lectures per week
Language of tuition	Double Medium
Academic organisation	Occupational Therapy
Period of presentation	Year

Module content

Theory of occupational science. Application of creative ability principles during activity participation. Application of a variety of elective activities which promotes the engagement of clients in meaningful occupation.

Occupational science 200 (AKU 200)

Qualification	Undergraduate
Module credits	15.00
Programmes	BOccTher Occupational Therapy
Prerequisites	ANA 151, ANA 152, ANA 161, ANA 162, FSG 161, FSG 162, AKU 100, ART 100, MTL 180, GNK 286, CIL 111 and 121 or AIM 101 or AIM 111 and 121 EOT 110 and 120 or ELH 121 and 122
Contact time	4 practicals per week, 1 lecture per week
Language of tuition	Double Medium
Academic organisation	Occupational Therapy

Period of presentation Year

Module content

The theory on the science of occupation. Application of activities in the areas of ADL (Activities of Daily Living) and leisure, as well as elective activities that promote the engagement of clients in meaningful occupation.

Occupational science 303 (AKU 303)

Qualification Undergraduate

Module credits 15.00

Programmes [BOccTher Occupational Therapy](#)

Prerequisites FSG 251, FSG 252, FSG 261, FSG 262, AKU 200, ART 282, ART 284, RPD 200, ART 281, ART 283

Contact time 1 practical per week, 1 lecture per week, 1 discussion class per week, 1 other contact session per week, 1 seminar per week

Language of tuition Both Afr and Eng

Academic organisation Occupational Therapy

Period of presentation Year

Module content

The study of normal development and the effect on ill health and disability in the areas of play and school. The science and application of occupational therapy principles to promote engagement in meaningful occupation taking into consideration personal and environmental context. Includes pathology, causes, clinical picture and prognosis of selected conditions.

Occupational science 381 (AKU 381)

Qualification Undergraduate

Module credits 25.00

Programmes [BOccTher Occupational Therapy](#)

Prerequisites FSG 251, FSG 252, FSG 261, FSG 262, AKU 200, ART 282, ART 284, RPD 200, ART 281, ART 283

Contact time 2 seminars per week, 2 practicals per week, 5 discussion classes per week

Language of tuition Double Medium

Academic organisation Occupational Therapy

Period of presentation Semester 1

Module content

The study of the effect of ill health and disability in the area of Activities of Daily Living (ADL). The science and application of occupational therapy principles to promote engagement in meaningful occupation, taking into consideration personal and environmental contexts. Includes the pathology, causes, clinical picture and prognosis of selected conditions.

Occupational science 382 (AKU 382)

Qualification	Undergraduate
Module credits	25.00
Programmes	BOccTher Occupational Therapy
Prerequisites	FSG 251, FSG 252, FSG 261, FSG 262, AKU 200, ART 282, ART 284, RPD 200, ART 281, ART 283
Contact time	2 practicals per week, 4 lectures per week
Language of tuition	Double Medium
Academic organisation	Occupational Therapy
Period of presentation	Semester 2

Module content

The study of the effect of ill health and disability in the area of work. The science and application of occupational therapy principles to promote engagement in meaningful occupation within the context of South African Disability Equity Legislation. Includes the pathology, causes, clinical picture and prognosis of selected conditions.

Occupational science 400 (AKU 400)

Qualification	Undergraduate
Module credits	40.00
Programmes	BOccTher Occupational Therapy
Prerequisites	ANP 210, RPD 380, AKU 381, AKU 382, ART 381, ART 382, ART 303, AIM 101, ELH 121, ELH 122 and [SEP 110 of ZUL 110]
Contact time	2 other contact sessions per week, 1 discussion class per week, 1 seminar per week
Language of tuition	Double Medium
Academic organisation	Occupational Therapy
Period of presentation	Year

Module content

Continued study in occupational science with emphasis on the areas of occupation. Integration and application of knowledge and skills in a community fieldwork setting, an elective vocational rehabilitation fieldwork setting and in an elective paediatric fieldwork setting.

Anatomy 111 (ANA 111)

Qualification	Undergraduate
Module credits	5.00
Programmes	BA Audiology
Service modules	Faculty of Humanities
Prerequisites	No prerequisites.
Contact time	1 practical per week, 2 lectures per week
Language of tuition	English
Academic organisation	Anatomy
Period of presentation	Semester 1

Module content

Anatomy for communication pathology This module is on the theory and practical experience of the structure of the organs involved with speech production and hearing excluding neuro-anatomy. Anatomical terminology and elementary study of tissues; gross anatomy of structures involved with speech production and hearing: larynx, skeletal components and muscles involved with respiration, viscera of the respiratory system, bones and paranasal sinuses of the skull, synopsis of the cranial nerves, structure of the viscera of the vocal tract, structure of the ear; embryology of the face, palate, tongue, larynx and ear.

Introduction: Human anatomy and embryology 121 (ANA 121)

Qualification	Undergraduate
Module credits	4.00
Programmes	BSc Medical Sciences
Service modules	Faculty of Natural and Agricultural Sciences
Prerequisites	MLB111 and CMY117
Contact time	1 practical per week, 1 lecture per week
Language of tuition	English
Academic organisation	Anatomy
Period of presentation	Semester 2

Module content

Terminology, musculo-skeletal system, nervous system, surface anatomy, cardiovascular system, respiratory system, urogenital system, gastro-intestinal system, endocrine system, introductory osteology and joints, introductory embryology.

Human osteology 122 (ANA 122)

Qualification	Undergraduate
Module credits	4.00
Programmes	BSc Medical Sciences BScHons Anatomy
Service modules	Faculty of Natural and Agricultural Sciences
Prerequisites	No prerequisites.
Contact time	1 practical per week, 1 lecture per week
Language of tuition	English
Academic organisation	Anatomy
Period of presentation	Semester 2

Module content

Introduction to osteology, bone function and classification, humerus, radius, ulna, femur, tibia, fibula, clavicle, scapula, ribs, sternum, vertebrae, pelvis, hand and foot bones, sesamoid bones, skull, mandible, joints.

Introduction to human anatomy 123 (ANA 123)

Qualification	Undergraduate
Module credits	8.00
Programmes	BSportSci BSportSci
Contact time	2 lectures per week
Language of tuition	English
Academic organisation	Biokinetics and Sports Science
Period of presentation	Year

Module content

*Closed - requires departmental selection This module introduces the student to basic anatomical concepts regarding body areas, levels, axes of motion and anatomical terminology. Development anatomy forms the first part of the module. From there the student continues to the study of osteology, anthropometry, musculo-skeletal system, bone function and classification, nerve innervation, anatomy of the brain, the cardio-respiratory system and the endocrine system. An important aspect of the module is movement anatomy and its application.

Basic human histology 126 (ANA 126)

Qualification	Undergraduate
Module credits	4.00
Programmes	BSc Medical Sciences
Service modules	Faculty of Natural and Agricultural Sciences
Prerequisites	CMY117 and MLB111

Contact time 1 lecture per week, 1 practical per week

Language of tuition English

Academic organisation Anatomy

Period of presentation Semester 2

Module content

General introduction to cells and tissue, terminology, the cell and cytoplasm, organelles and inclusions, surface and glandular epithelium, general connective tissue, specialised connective tissue, namely cartilage, bone, blood and haemopoietic tissue, muscle and nervous tissue.

Introduction to anatomy 151 (ANA 151)

Qualification Undergraduate

Module credits 6.00

Programmes [BCur Nursing Science](#)
[BOccTher Occupational Therapy](#)
[BPhysT Physiotherapy](#)

Prerequisites No prerequisites.

Contact time 1 practical per week, 3 lectures per week, 1 discussion class per week

Language of tuition English

Academic organisation Anatomy

Period of presentation Quarter 1

Module content

A systematic approach to Anatomy, including general terminology, embryology and osteology, with the use of wet specimens. Introductory histology includes cytology, the nucleus and cell division, epithelial tissue, general connective tissue, cartilage and bone.

Anatomy of the limbs 152 (ANA 152)

Qualification Undergraduate

Module credits 6.00

Programmes [BCur Nursing Science](#)
[BOccTher Occupational Therapy](#)
[BPhysT Physiotherapy](#)

Prerequisites No prerequisites.

Contact time 1 practical per week, 3 lectures per week, 1 discussion class per week

Language of tuition English

Academic organisation Anatomy

Period of presentation Quarter 2

Module content

Anatomy of the appendicular skeleton

A systematic approach to the Anatomy of the muscles, blood vessels, nerve supply, lymph drainage and joints of the upper and lower limbs, as well as surface anatomy, with the use of wet specimens. Introductory histology includes muscle tissue, nerve tissue, and blood and haemopoietic tissue.

Anatomy of the torso 161 (ANA 161)

Qualification Undergraduate

Module credits 6.00

Programmes
[BCur Nursing Science](#)
[BDietetics Dietetics](#)
[BOccTher Occupational Therapy](#)
[BPhysT Physiotherapy](#)

Prerequisites No prerequisites.

Contact time 1 discussion class per week, 3 lectures per week, 1 practical per week

Language of tuition English

Academic organisation Anatomy

Period of presentation Quarter 3

Module content

A systematic approach to the anatomy of the thorax and its contents, the abdomen and its contents and the pelvis and its contents (organs, vascular systems, nerve supply, lymph drainage, muscles and joints), as well as surface anatomy, with the use of wet specimens. Introductory histology includes the histology of the lungs, liver and kidneys.

Anatomy of the head and neck 162 (ANA 162)

Qualification Undergraduate

Module credits 6.00

Programmes
[BCur Nursing Science](#)
[BOccTher Occupational Therapy](#)
[BPhysT Physiotherapy](#)

Prerequisites No prerequisites.

Contact time 3 lectures per week, 1 practical per week, 1 discussion class per week

Language of tuition English

Academic organisation Anatomy

Period of presentation Quarter 4

Module content

Anatomy of the head and neck, and neuroanatomy

A systematic approach to the anatomy of the head and neck regions, the senses and the central and peripheral nervous system (cranial nerves, autonomic nervous system), as well as surface anatomy, with the use of wet specimens.

Anatomy 171 (ANA 171)

Qualification	Undergraduate
Module credits	8.00
Programmes	BOH Oral Hygiene
Prerequisites	No prerequisites.
Contact time	1 discussion class per week, 3 lectures per week
Language of tuition	Double Medium
Academic organisation	Anatomy
Period of presentation	Semester 1

Module content

The emphasis of the study in anatomy is particularly focused on all aspects of the oral cavity, but certain aspects of the anatomy of the head and neck is also included. This involves aspects of the osteology of the skull and jaw bones, the anatomy of the temporomandibular joint, salivary glands, nose, paranasal sinuses, pharynx, larynx and specific muscle groups as well as the cranial nerves, vascular supply and lymphatic drainage of the head and neck, as well as the radiographic features of some of the above.

Anatomy 185 (ANA 185)

Qualification	Undergraduate
Module credits	21.00
Programmes	BCMP Clinical Medical Practice
Prerequisites	No prerequisites.
Contact time	1 discussion class per week, 3 practicals per week, 8 lectures per week
Language of tuition	English
Academic organisation	Anatomy
Period of presentation	Semester 1

Module content

Systemic clinical anatomy: cardiovascular, respiratory, digestive, urogenital, eye, ear nose and throat, nervous, musculoskeletal, skin and endocrine systems.

Surface and regional anatomy confined to specific diagnostic, therapeutic and emergency procedures.

Human cell and developmental biology 214 (ANA 214)

Qualification	Undergraduate
----------------------	---------------

Module credits	12.00
Programmes	BSc Medical Sciences
Service modules	Faculty of Natural and Agricultural Sciences
Prerequisites	ANA121 and ANA126 and CMY127
Contact time	1 practical per week, 2 lectures per week
Language of tuition	English
Academic organisation	Anatomy
Period of presentation	Semester 1

Module content

Functional review of the cell and cell content. Normal and abnormal cell function in relation to structure. Control of the human cell, heredity and the human genome. Cell communication, growth and development, adhesion and division. Aspects of cellular research. Techniques on how to study cells. Medical cell and molecular biology application. NOTE: This module is not open to all students and may only be taken by BSc: Medical Sciences students.

Paleoanthropology 215 (ANA 215)

Qualification	Undergraduate
Module credits	12.00
Programmes	BSc Medical Sciences
Service modules	Faculty of Natural and Agricultural Sciences
Prerequisites	No prerequisites.
Contact time	2 lectures per week, 1 practical per week
Language of tuition	English
Academic organisation	Anatomy
Period of presentation	Semester 1

Module content

Introduction to paleoanthropology, focusing on hominid fossil record, principles of evolution, principles of heredity, human variation, introduction to primatology, hominid taxonomy, time-frames and dating methods, fossilisation and taphonomy, trends in hominid evolution, hominid sites. Australopithecus, homo habilis, homo erectus, homo sapiens neanderthalensis, the origin of anatomically modern human beings, DNA studies, palaeo-environments, hominid diets, introduction to the development of culture, South African populations, human adaptation and modernisation.

Human histology 226 (ANA 226)

Qualification	Undergraduate
Module credits	12.00
Programmes	BSc Medical Sciences

Service modules	Faculty of Natural and Agricultural Sciences
Prerequisites	ANA 126
Contact time	1 practical per week, 2 lectures per week
Language of tuition	English
Academic organisation	Anatomy
Period of presentation	Semester 2

Module content

General introduction to organ structure.

Terminology. The eye, ear, skin, circulatory system, nervous system, lymphoid system, gastrointestinal tract, gastrointestinal tract glands, respiratory system, urinary system, male and female reproductive systems, endocrine system.

NOTE: This module is not open to all students and may only be taken by BSc: Medical Sciences students.

Human anatomy Part 1 247 (ANA 247)

Qualification	Undergraduate
Module credits	12.00
Programmes	BSc Medical Sciences
Service modules	Faculty of Natural and Agricultural Sciences
Prerequisites	ANA 121, ANA 122 and CMY 127
Contact time	2 practicals per week, 2 lectures per week
Language of tuition	English
Academic organisation	Anatomy
Period of presentation	Semester 2

Module content

Regional approach to human anatomy. Cadaver dissection of the head, neck as well as neuro-anatomy. Anatomical techniques.

NOTE: This module is not open to all students and may only be taken by BSc (Medical Sciences) students.

Forensic anthropology 315 (ANA 315)

Qualification	Undergraduate
Module credits	18.00
Programmes	BSc Medical Sciences
Service modules	Faculty of Natural and Agricultural Sciences
Prerequisites	ANA 122, ANA 215
Contact time	2 lectures per week, 1 practical per week

Language of tuition	English
Academic organisation	Anatomy
Period of presentation	Semester 1

Module content

Introduction to forensic anthropology, detection of graves, excavation of graves, human vs. animal bone, forensic entomology, osteometry, cranial and post-cranial measurements, non-metric features of the skeleton, age determination, sex determination, race determination, ante-mortem stature, dental analysis, osteopathology, factors of individualisation, measurements of the face, introduction to face mapping and skull-photo superimposition, legal aspects. NOTE: This module is not open to all students and may only be taken by BSc: Medical Sciences students.

Cell and tissue techniques 316 (ANA 316)

Qualification	Undergraduate
Module credits	18.00
Programmes	BSc Medical Sciences
Service modules	Faculty of Natural and Agricultural Sciences
Prerequisites	ANA 226
Contact time	1 practical per week, 2 lectures per week
Language of tuition	English
Academic organisation	Anatomy
Period of presentation	Semester 1

Module content

General introduction to light and electron microscopic techniques: fixation, processing, imbedding, staining. Principles of different staining techniques for LM and EM: routine stains, proteins, carbohydrates, amino acids, metachromasia, immunocytochemistry, lectin stains, specialised stains. Principles of the operation of LM and EM: general LM, fluorescent microscopy, differential contrast microscopy, dark field microscopy, phase contrast microscopy, transmission and scanning electron microscopy.

Human cell and developmental biology 324 (ANA 324)

Qualification	Undergraduate
Module credits	18.00
Programmes	BSc Medical Sciences
Service modules	Faculty of Natural and Agricultural Sciences
Prerequisites	ANA 214, ANA 226
Contact time	1 practical per week, 3 lectures per week
Language of tuition	English
Academic organisation	Anatomy

Period of presentation Semester 2

Module content

Practical aspects of cell biology. Cell, tissue, organ, and organism culture. The biology of the culture environment. Cellular basis of morphogenesis, cleavage patterns and gastrulation. The early vertebrate development; neurulation, ecto-, meso- and endoderm derivatives. Cell destiny and embryonic axis including malformations. Development of the tetrapod limb and cell death. Cell interactions at a distance through hormones and metamorphosis.

NOTE: This module is not open to all students and may only be taken by BSc: Medical Sciences students.

Histology techniques 326 (ANA 326)

Qualification Undergraduate

Module credits 6.00

Prerequisites No prerequisites.

Contact time 2 lectures per week, 2 practicals per week

Language of tuition English

Academic organisation Anatomy

Period of presentation Semester 2

Comparative anatomy 327 (ANA 327)

Qualification Undergraduate

Module credits 18.00

Service modules Faculty of Natural and Agricultural Sciences

Prerequisites ANA 121, ANA 122, ANA 217, ANA 227

Contact time 1 practical per week, 2 lectures per week

Language of tuition English

Academic organisation Anatomy

Period of presentation Semester 2

Module content

Introduction to comparative anatomy. Introduction to comparative osteology. Comparative anatomy of the appendicular skeleton. Comparative anatomy of the axial skeleton.

NOTE: This module is not open to all students and may only be taken by BSc: Medical Sciences students.

Applied research techniques 328 (ANA 328)

Qualification Undergraduate

Module credits 8.00

Service modules Faculty of Natural and Agricultural Sciences

Prerequisites ANA 315#, ANA 316#

Contact time 1 practical per week, 2 lectures per week

Language of tuition English

Academic organisation Anatomy

Period of presentation Semester 2

Module content

Introduction to research. Development of research project. Research skills. Completion of literature review.

NOTE: This module is not open to all students and may only be taken by BSc: Medical Sciences students.

Human anatomy Part 2 347 (ANA 347)

Qualification Undergraduate

Module credits 18.00

Programmes [BSc Medical Sciences](#)

Service modules Faculty of Natural and Agricultural Sciences

Prerequisites ANA 247 GS

Contact time 2 lectures per week, 2 practicals per week

Language of tuition English

Academic organisation Anatomy

Period of presentation Semester 2

Module content

Regional approach to human anatomy.

Cadaver dissection of the head, neck as well as neuro-anatomy. Anatomical techniques.

NOTE: This module is not open to all students and may only be taken by BSc: Medical Sciences students.

Anatomy 700 (ANA 700)

Qualification Postgraduate

Module credits 96.00

Programmes [BScHons Anatomy](#)

Prerequisites No prerequisites.

Contact time 2 practicals per week, 1 discussion class per week, 1 lecture per week

Language of tuition Double Medium

Academic organisation Anatomy

Period of presentation Year

Module content

A complete synopsis of all anatomy modules at postgraduate level is published in the study guide for postgraduate anatomy courses, which is available on request from the Department of Anatomy.

Developmental biology 711 (ANA 711)

Qualification	Postgraduate
Module credits	96.00
Programmes	BScHons Developmental Biology
Prerequisites	No prerequisites.
Language of tuition	Double Medium
Academic organisation	Anatomy
Period of presentation	Year

Comparative anatomy 712 (ANA 712)

Qualification	Postgraduate
Module credits	96.00
Programmes	BScHons Comparative Anatomy
Prerequisites	No prerequisites.
Language of tuition	Double Medium
Academic organisation	Anatomy
Period of presentation	Year

Neuro-anatomy 713 (ANA 713)

Qualification	Postgraduate
Module credits	96.00
Programmes	BScHons Neuro-anatomy
Prerequisites	No prerequisites.
Language of tuition	Double Medium
Academic organisation	Anatomy
Period of presentation	Year

Human cell biology 714 (ANA 714)

Qualification	Postgraduate
Module credits	96.00
Programmes	BScHons Human Cell Biology
Prerequisites	No prerequisites.
Language of tuition	Double Medium
Academic organisation	Anatomy
Period of presentation	Year

Physical anthropology 715 (ANA 715)

Qualification	Postgraduate
Module credits	96.00
Programmes	BScHons Physical Anthropology
Prerequisites	No prerequisites.
Language of tuition	Double Medium
Academic organisation	Anatomy
Period of presentation	Year

Human histology 716 (ANA 716)

Qualification	Postgraduate
Module credits	96.00
Programmes	BScHons Human Histology
Prerequisites	No prerequisites.
Language of tuition	Double Medium
Academic organisation	Anatomy
Period of presentation	Year

Macro-anatomy 717 (ANA 717)

Qualification	Postgraduate
Module credits	96.00
Programmes	BScHons Macro-anatomy
Prerequisites	No prerequisites.
Language of tuition	Double Medium
Academic organisation	Anatomy
Period of presentation	Year

Anatomy 770 (ANA 770)

Qualification	Postgraduate
Module credits	12.00
Prerequisites	No prerequisites.
Contact time	2 lectures per week, 1 discussion class per week
Language of tuition	Double Medium
Academic organisation	Anatomy
Period of presentation	Semester 1

Anatomy 800 (ANA 800)

Qualification	Postgraduate
Module credits	36.00
Programmes	MMed Anatomical Pathology MMed Forensic Pathology MMed Internal Medicine MMed Medical Oncology
Prerequisites	No prerequisites.
Contact time	1 lecture per week, 1 discussion class per week
Language of tuition	Double Medium
Academic organisation	Anatomy
Period of presentation	Year

Anatomy 802 (ANA 802)

Qualification	Postgraduate
Module credits	36.00
Programmes	MMed Emergency Medicine MMed Option: Paediatric Surgery MMed Surgery
Prerequisites	No prerequisites.
Contact time	1 lecture per week, 1 discussion class per week
Language of tuition	Double Medium
Academic organisation	Anatomy
Period of presentation	Year

Anatomy 803 (ANA 803)

Qualification	Postgraduate
Module credits	36.00
Programmes	MMed Obstetrics and Gynaecology
Prerequisites	No prerequisites.
Contact time	1 lecture per week, 1 discussion class per week
Language of tuition	Double Medium
Academic organisation	Anatomy
Period of presentation	Year

Anatomy 804 (ANA 804)

Qualification	Postgraduate
---------------	--------------

Module credits	36.00
Programmes	MMed Psychiatry
Prerequisites	No prerequisites.
Contact time	1 discussion class per week, 1 lecture per week
Language of tuition	Double Medium
Academic organisation	Anatomy
Period of presentation	Year

Anatomy 805 (ANA 805)

Qualification	Postgraduate
Module credits	36.00
Programmes	MMed Paediatrics
Prerequisites	No prerequisites.
Contact time	1 lecture per week, 1 discussion class per week
Language of tuition	Double Medium
Academic organisation	Anatomy
Period of presentation	Year

Anatomy 807 (ANA 807)

Qualification	Postgraduate
Module credits	36.00
Programmes	MMed Dermatology
Prerequisites	No prerequisites.
Contact time	1 discussion class per week, 1 lecture per week
Language of tuition	Double Medium
Academic organisation	Anatomy
Period of presentation	Year

Anatomy 808 (ANA 808)

Qualification	Postgraduate
Module credits	36.00
Programmes	MMed Radiological Diagnostics
Prerequisites	No prerequisites.
Contact time	1 lecture per week, 1 discussion class per week
Language of tuition	Double Medium

Academic organisation Anatomy

Period of presentation Year

Anatomy 809 (ANA 809)

Qualification Postgraduate

Module credits 36.00

Programmes [MMed Nuclear Medicine](#)
[MMed Radiation Oncology](#)

Prerequisites No prerequisites.

Contact time 1 lecture per week, 1 discussion class per week

Language of tuition Double Medium

Academic organisation Anatomy

Period of presentation Year

Anatomy 870 (ANA 870)

Qualification Postgraduate

Module credits 36.00

Programmes [MScDent Oral Surgery](#)

Prerequisites No prerequisites.

Language of tuition Double Medium

Academic organisation Anatomy

Period of presentation Year

Anatomy 871 (ANA 871)

Qualification Postgraduate

Module credits 36.00

Programmes [MChD Orthodontics](#)

Prerequisites No prerequisites.

Contact time 1 lecture per week, 1 discussion class per week

Language of tuition Double Medium

Academic organisation Anatomy

Period of presentation Year

Anatomy 872 (ANA 872)

Qualification Postgraduate

Module credits 36.00

Prerequisites No prerequisites.

Language of tuition Double Medium

Academic organisation Anatomy

Period of presentation Year

Anatomy 873 (ANA 873)

Qualification Postgraduate

Module credits 36.00

Programmes [MChD Periodontics and Oral Medicine](#)

Prerequisites No prerequisites.

Language of tuition Double Medium

Academic organisation Anatomy

Period of presentation Year

Anatomy 874 (ANA 874)

Qualification Postgraduate

Module credits 36.00

Programmes [MChD Prosthodontics](#)

Prerequisites No prerequisites.

Language of tuition Double Medium

Academic organisation Anatomy

Period of presentation Year

Anatomy 875 (ANA 875)

Qualification Postgraduate

Module credits 36.00

Programmes [MMed Otorhinolaryngology](#)

Prerequisites No prerequisites.

Contact time 1 lecture per week, 1 discussion class per week

Language of tuition Double Medium

Academic organisation Anatomy

Period of presentation Year

Anatomy 876 (ANA 876)

Qualification Postgraduate

Module credits 36.00

Programmes	MMed Ophthalmology
Prerequisites	No prerequisites.
Contact time	1 lecture per week, 1 discussion class per week
Language of tuition	Double Medium
Academic organisation	Anatomy
Period of presentation	Year

Dissertation: Anatomy 890 (ANA 890)

Qualification	Postgraduate
Module credits	240.00
Programmes	MSc Anatomy
Prerequisites	No prerequisites.
Language of tuition	Both Afr and Eng
Academic organisation	Anatomy
Period of presentation	Year

Anatomy 891 (ANA 891)

Qualification	Postgraduate
Module credits	36.00
Programmes	MMed Neurology
Prerequisites	No prerequisites.
Contact time	1 lecture per week, 1 discussion class per week
Language of tuition	Double Medium
Academic organisation	Anatomy
Period of presentation	Year

Anatomy 893 (ANA 893)

Qualification	Postgraduate
Module credits	36.00
Programmes	MMed Geriatrics
Prerequisites	No prerequisites.
Language of tuition	Double Medium
Academic organisation	Anatomy
Period of presentation	Year

Anatomy 894 (ANA 894)

Qualification	Postgraduate
Module credits	36.00
Programmes	MMed Neurosurgery
Prerequisites	No prerequisites.
Contact time	1 lecture per week, 1 discussion class per week
Language of tuition	Double Medium
Academic organisation	Anatomy
Period of presentation	Year

Anatomy 895 (ANA 895)

Qualification	Postgraduate
Module credits	36.00
Programmes	MMed Orthopaedics
Prerequisites	No prerequisites.
Language of tuition	Double Medium
Academic organisation	Anatomy
Period of presentation	Year

Anatomy 896 (ANA 896)

Qualification	Postgraduate
Module credits	36.00
Programmes	MMed Plastic Surgery
Prerequisites	No prerequisites.
Contact time	1 lecture per week, 1 discussion class per week
Language of tuition	Double Medium
Academic organisation	Anatomy
Period of presentation	Year

Anatomy 897 (ANA 897)

Qualification	Postgraduate
Module credits	36.00
Programmes	MMed Urology
Prerequisites	No prerequisites.
Language of tuition	Double Medium

Academic organisation Anatomy

Period of presentation Year

Anatomy 898 (ANA 898)

Qualification Postgraduate

Module credits 36.00

Programmes [MMed Thoracic Surgery](#)

Prerequisites No prerequisites.

Contact time 1 discussion class per week, 1 lecture per week

Language of tuition Double Medium

Academic organisation Anatomy

Period of presentation Year

Thesis: Anatomy 990 (ANA 990)

Qualification Postgraduate

Module credits 480.00

Programmes [DMedicine Anatomy](#)
[PhD Anatomy](#)

Prerequisites No prerequisites.

Language of tuition Both Afr and Eng

Academic organisation Anatomy

Period of presentation Year

Anaesthesiology 801 (ANE 801)

Qualification Postgraduate

Module credits 300.00

Programmes [MMed Anaesthesiology](#)

Prerequisites FSG 801, FAR 802, FSK 808

Contact time 1 seminar per week

Language of tuition Both Afr and Eng

Academic organisation Anaesthesiology

Period of presentation Year

Thesis: Anaesthesiology 990 (ANE 990)

Qualification Postgraduate

Module credits 480.00

Programmes DMedicine Anaesthesiology
PhD Anaesthesiology

Prerequisites No prerequisites.

Language of tuition Both Afr and Eng

Academic organisation Anaesthesiology

Period of presentation Year

Advanced neonatal nursing science 851 (ANN 851)

Qualification Postgraduate

Module credits 23.00

Prerequisites No prerequisites.

Contact time 1 lecture per week, 2 discussion classes per week

Language of tuition English

Academic organisation Nursing Science

Period of presentation Quarter 1

Advanced neonatal nursing science 852 (ANN 852)

Qualification Postgraduate

Module credits 23.00

Prerequisites No prerequisites.

Contact time 2 discussion classes per week, 1 lecture per week

Language of tuition English

Academic organisation Nursing Science

Period of presentation Quarter 2

Advanced neonatal nursing science 853 (ANN 853)

Qualification Postgraduate

Module credits 23.00

Prerequisites No prerequisites.

Contact time 1 lecture per week, 2 discussion classes per week

Language of tuition English

Academic organisation Nursing Science

Period of presentation Quarter 3

Advanced neonatal nursing science 854 (ANN 854)

Qualification Postgraduate

Module credits	23.00
Prerequisites	No prerequisites.
Contact time	1 lecture per week, 2 discussion classes per week
Language of tuition	English
Academic organisation	Nursing Science
Period of presentation	Quarter 4

Advanced neonatal nursing science 860 (ANN 860)

Qualification	Postgraduate
Module credits	50.00
Programmes	MCur Clinical Fields of Study (Coursework)
Prerequisites	No prerequisites.
Contact time	1 other contact session per week, 2 practicals per week
Language of tuition	English
Academic organisation	Nursing Science
Period of presentation	Year

Advanced neonatal nursing science 861 (ANN 861)

Qualification	Postgraduate
Module credits	30.00
Programmes	MCur Clinical Fields of Study (Coursework)
Prerequisites	No prerequisites.
Contact time	2 discussion classes per week, 1 lecture per week
Language of tuition	English
Academic organisation	Nursing Science
Period of presentation	Semester 1

Advanced neonatal nursing science 862 (ANN 862)

Qualification	Postgraduate
Module credits	30.00
Programmes	MCur Clinical Fields of Study (Coursework)
Prerequisites	No prerequisites.
Contact time	1 lecture per week, 2 discussion classes per week
Language of tuition	English
Academic organisation	Nursing Science

Period of presentation Semester 2

Advanced neonatal nursing science 870 (ANN 870)

Qualification Postgraduate

Module credits 40.00

Programmes [MCur Clinical Fields of Study \(Coursework\)](#)

Prerequisites No prerequisites.

Contact time 2 practicals per week, 1 other contact session per week

Language of tuition English

Academic organisation Nursing Science

Period of presentation Year

Advanced neonatal nursing science 871 (ANN 871)

Qualification Postgraduate

Module credits 40.00

Programmes [MCur Clinical Fields of Study \(Coursework\)](#)

Prerequisites No prerequisites.

Contact time 2 discussion classes per week, 1 lecture per week

Language of tuition English

Academic organisation Nursing Science

Period of presentation Semester 1

Advanced neonatal nursing science 872 (ANN 872)

Qualification Postgraduate

Module credits 40.00

Programmes [MCur Clinical Fields of Study \(Coursework\)](#)

Prerequisites No prerequisites.

Contact time 1 lecture per week, 2 discussion classes per week

Language of tuition English

Academic organisation Nursing Science

Period of presentation Semester 2

Anatomical pathology 210 (ANP 210)

Qualification Undergraduate

Module credits 10.00

Programmes	BOccTher Occupational Therapy BPhysT Physiotherapy
Prerequisites	[PHY 131, CMY 151, FSG 161, FSG 162, FTP 100, ANA 152, ANA 162] or [FSG 251, FSG 252, FSG 261, FSG 262, AKU 200, ART 282, ART 284, RPD 200, ART 281, ART 283] or [RAN 280, RAW 281, RAW 282, RAW 283]
Contact time	1 seminar per week, 2 lectures per week
Language of tuition	Both Afr and Eng
Academic organisation	Anatomical Pathology
Period of presentation	Semester 1

Module content

General principles of pathology, including necroses, reversible cell damage, reparation and abnormalities of growth, circulation disturbances, acute and chronic infections, classification of the spreading of tumours and carcinogenesis. Directed course in systematic pathology, with specific reference to cardiovascular system, respiratory system, locomotor system and neurophathology.

Anatomical pathology 370 (ANP 370)

Qualification	Undergraduate
Module credits	22.00
Programmes	BChD Dentistry
Prerequisites	No prerequisites.
Contact time	2 lectures per week S2, 4 lectures per week S1
Language of tuition	English
Academic organisation	Anatomical Pathology
Period of presentation	Year

Module content

General pathology

- Cell injury, death and adaptation
- Acute and chronic inflammation
- Repair: Cell regeneration, fibrosis and wound healing
- Hemodynamic disorders, thrombosis and shock
- Disorders of the immune system
- Neoplasia
- Environmental diseases
- General pathology of infectious diseases

Diseases of the following organ systems

- Blood vessels
- Heart
- Haemopoietic and lymphoid systems
- Respiratory tract
- Urinary tract
- Gastrointestinal tract
- Liver and biliary tract
- Pancreas
- Male genital system
- Female genital system and breast
- Endocrine system
- Musculoskeletal system
- Skin
- Nervous system

Anatomical pathology 700 (ANP 700)

Qualification	Postgraduate
Module credits	24.00
Prerequisites	No prerequisites.
Language of tuition	Both Afr and Eng
Academic organisation	Anatomical Pathology
Period of presentation	Year

Anatomical pathology 702 (ANP 702)

Qualification	Postgraduate
Module credits	24.00
Prerequisites	No prerequisites.
Contact time	2 discussion classes per week, 1 lecture per week
Language of tuition	Both Afr and Eng
Academic organisation	Anatomical Pathology

Period of presentation Year

Anatomical pathology 703 (ANP 703)

Qualification Postgraduate

Module credits 5.00

Programmes [BRadHons Diagnostics](#)

Prerequisites No prerequisites.

Contact time 1 discussion class per week

Language of tuition English

Academic organisation Anatomical Pathology

Period of presentation Semester 1

Anatomical pathology 800 (ANP 800)

Qualification Postgraduate

Module credits 300.00

Programmes [MMed Anatomical Pathology](#)

Prerequisites ANP 801, ANA 800

Contact time 20 other contact sessions per week, 2 seminars per week, 10 discussion classes per week

Language of tuition Both Afr and Eng

Academic organisation Anatomical Pathology

Period of presentation Year

Anatomical pathology 801 (ANP 801)

Qualification Postgraduate

Module credits 36.00

Programmes [MMed Anatomical Pathology](#)

Prerequisites No prerequisites.

Language of tuition Both Afr and Eng

Academic organisation Anatomical Pathology

Period of presentation Year

Anatomical pathology 802 (ANP 802)

Qualification Postgraduate

Module credits 36.00

Programmes [MMed Option: Paediatric Surgery](#)
[MMed Surgery](#)

Prerequisites	No prerequisites.
Contact time	1 discussion class per week, 1 other contact session per week
Language of tuition	Both Afr and Eng
Academic organisation	Anatomical Pathology
Period of presentation	Year

Anatomical pathology 803 (ANP 803)

Qualification	Postgraduate
Module credits	36.00
Programmes	MMed Obstetrics and Gynaecology
Prerequisites	No prerequisites.
Contact time	1 discussion class per week, 1 other contact session per week
Language of tuition	Both Afr and Eng
Academic organisation	Anatomical Pathology
Period of presentation	Year

Anatomical pathology 807 (ANP 807)

Qualification	Postgraduate
Module credits	36.00
Programmes	MMed Radiological Diagnostics
Prerequisites	No prerequisites.
Contact time	1 other contact session per week, 1 discussion class per week
Language of tuition	Both Afr and Eng
Academic organisation	Anatomical Pathology
Period of presentation	Year

Anatomical pathology 808 (ANP 808)

Qualification	Postgraduate
Module credits	48.00
Programmes	MChD Oral Pathology
Prerequisites	No prerequisites.
Language of tuition	Both Afr and Eng
Academic organisation	Anatomical Pathology
Period of presentation	Year

Anatomical pathology 809 (ANP 809)

Qualification	Postgraduate
Module credits	36.00
Prerequisites	No prerequisites.
Contact time	1 discussion class per week
Language of tuition	Both Afr and Eng
Academic organisation	Anatomical Pathology
Period of presentation	Year

Anatomical pathology 870 (ANP 870)

Qualification	Postgraduate
Module credits	36.00
Programmes	MMed Otorhinolaryngology
Prerequisites	No prerequisites.
Contact time	1 discussion class per week
Language of tuition	Both Afr and Eng
Academic organisation	Anatomical Pathology
Period of presentation	Year

Anatomical pathology 871 (ANP 871)

Qualification	Postgraduate
Module credits	36.00
Programmes	MMed Ophthalmology
Prerequisites	No prerequisites.
Language of tuition	Both Afr and Eng
Academic organisation	Anatomical Pathology
Period of presentation	Year

Anatomical pathology 872 (ANP 872)

Qualification	Postgraduate
Module credits	36.00
Programmes	MMed Psychiatry
Prerequisites	No prerequisites.
Contact time	1 lecture per week, 1 discussion class per week
Language of tuition	Both Afr and Eng

Academic organisation Anatomical Pathology

Period of presentation Year

Anatomical pathology 874 (ANP 874)

Qualification Postgraduate

Module credits 36.00

Programmes [MMed Forensic Pathology](#)

Prerequisites No prerequisites.

Contact time 2 seminars per week

Language of tuition Both Afr and Eng

Academic organisation Anatomical Pathology

Period of presentation Year

Anatomical pathology 875 (ANP 875)

Qualification Postgraduate

Module credits 36.00

Programmes [MMed Neurosurgery](#)

Prerequisites No prerequisites.

Contact time 1 discussion class per week

Language of tuition Both Afr and Eng

Academic organisation Anatomical Pathology

Period of presentation Year

Anatomical pathology 876 (ANP 876)

Qualification Postgraduate

Module credits 36.00

Programmes [MMed Plastic Surgery](#)

Prerequisites No prerequisites.

Contact time 1 discussion class per week

Language of tuition Both Afr and Eng

Academic organisation Anatomical Pathology

Period of presentation Year

Anatomical pathology 877 (ANP 877)

Qualification Postgraduate

Module credits 36.00

Programmes	MMed Urology
Prerequisites	No prerequisites.
Language of tuition	Both Afr and Eng
Academic organisation	Anatomical Pathology
Period of presentation	Year

Anatomical pathology 878 (ANP 878)

Qualification	Postgraduate
Module credits	36.00
Programmes	MMed Thoracic Surgery
Prerequisites	No prerequisites.
Contact time	1 discussion class per week
Language of tuition	Both Afr and Eng
Academic organisation	Anatomical Pathology
Period of presentation	Year

Anatomical pathology 879 (ANP 879)

Qualification	Postgraduate
Module credits	36.00
Programmes	MMed Orthopaedics
Prerequisites	No prerequisites.
Contact time	1 discussion class per week, 1 other contact session per week
Language of tuition	Both Afr and Eng
Academic organisation	Anatomical Pathology
Period of presentation	Year

Anatomical pathology 891 (ANP 891)

Qualification	Postgraduate
Module credits	28.00
Programmes	MOccTher Hand Therapy MOccTher Neurology MOccTher Paediatrics
Prerequisites	No prerequisites.
Language of tuition	Both Afr and Eng
Academic organisation	Anatomical Pathology
Period of presentation	Year

Module content

An in-depth knowledge of the pathology of selected conditions.

Anatomical pathology 892 (ANP 892)

Qualification	Postgraduate
Module credits	36.00
Prerequisites	No prerequisites.
Contact time	1 discussion class per week
Language of tuition	Double Medium
Academic organisation	Anatomical Pathology
Period of presentation	Year

Thesis: Anatomical pathology 990 (ANP 990)

Qualification	Postgraduate
Module credits	480.00
Programmes	PhD Anatomical Pathology
Prerequisites	No prerequisites.
Language of tuition	Both Afr and Eng
Academic organisation	Anatomical Pathology
Period of presentation	Year

Advanced nursing management 861 (ANX 861)

Qualification	Postgraduate
Module credits	40.00
Programmes	MCur Nursing Management (Coursework)
Prerequisites	No prerequisites.
Contact time	2 discussion classes per week, 1 lecture per week
Language of tuition	English
Academic organisation	Nursing Science
Period of presentation	Semester 1

Advanced nursing management 862 (ANX 862)

Qualification	Postgraduate
Module credits	40.00
Programmes	MCur Nursing Management (Coursework)
Prerequisites	No prerequisites.

Contact time	1 lecture per week, 2 discussion classes per week
Language of tuition	English
Academic organisation	Nursing Science
Period of presentation	Semester 2

Advanced nursing management 871 (ANX 871)

Qualification	Postgraduate
Module credits	40.00
Programmes	MCur Nursing Management (Coursework)
Prerequisites	No prerequisites.
Contact time	1 lecture per week, 2 discussion classes per week
Language of tuition	English

Occupational therapy 100 (ART 100)

Qualification	Undergraduate
Module credits	16.00
Programmes	BOccTher Occupational Therapy
Prerequisites	No prerequisites.
Contact time	2 lectures per week, 2 discussion classes per week, 1 other contact session per week
Language of tuition	Double Medium
Academic organisation	Occupational Therapy
Period of presentation	Year

Module content

The study of occupational therapy roles, scope, domain, core knowledge and professional ethics. Includes the application of the process of occupational therapy intervention, tools of practice and theoretical frameworks.

Occupational therapy 281 (ART 281)

Qualification	Undergraduate
Module credits	12.00
Programmes	BOccTher Occupational Therapy
Prerequisites	ANA 151, ANA 152, ANA 161, ANA 162, FSG 161, FSG 162, AKU 100, ART 100, MTL 180, GNK 286, CIL 111 and 121 or AIM 101 of AIM 111 and 121 EOT 110 and 120 or ELH 121 and 122
Contact time	2 practicals per week, 2 other contact sessions per week, 2 seminars per week, 4 discussion classes per week
Language of tuition	Double Medium

Academic organisation Occupational Therapy

Period of presentation Quarter 4

Module content

Neurology: The study of occupational therapy evaluation and intervention of neurological conditions in all age groups. Includes the pathology, causes, clinical picture and prognosis of selected conditions.

Occupational therapy 282 (ART 282)

Qualification Undergraduate

Module credits 12.00

Programmes BOccTher Occupational Therapy

Prerequisites ANA 151, ANA 152, ANA 161, ANA 162, FSG 161, FSG 162, AKU 100, ART 100, MTL 180, GNK 286, CIL 111 and 121 or AIM 101 of AIM 111 and 121 EOT 110 and 120 or ELH 121 and 122

Contact time 4 discussion classes per week, 2 practicals per week, 2 other contact sessions per week, 2 seminars per week

Language of tuition Double Medium

Academic organisation Occupational Therapy

Period of presentation Quarter 3

Module content

Mental health: The study of occupational therapy evaluation and intervention of psychosocial disorders in all age groups. Includes the pathology, causes, clinical picture and prognosis of selected disorders.

Occupational therapy 283 (ART 283)

Qualification Undergraduate

Module credits 12.00

Programmes BOccTher Occupational Therapy

Prerequisites ANA 151, ANA 152, ANA 161, ANA 162, FSG 161, FSG 162, AKU 100, ART 100, MTL 180, GNK 286, CIL 111 and 121 or AIM 101 of AIM 111 and 121 EOT 110 and 120 or ELH 121 and 122

Contact time 2 seminars per week, 4 discussion classes per week, 2 practicals per week, 2 other contact sessions per week

Language of tuition Double Medium

Academic organisation Occupational Therapy

Period of presentation Quarter 1

Module content

Biomechanics: The study of occupational therapy evaluation and intervention of the conditions of the musculoskeletal system in all age groups. Includes the pathology, causes, clinical picture and prognosis of selected conditions.

Occupational therapy 284 (ART 284)

Qualification	Undergraduate
Module credits	14.00
Programmes	BOccTher Occupational Therapy
Prerequisites	ANA 151, ANA 152, ANA 161, ANA 162, FSG 161, FSG 163, AKU 100, ART 100, MTL 180, GNK 286, CIL 111 and 121 or AIM 101 or AIM 111 and 121 EOT 110 and 120 or ELH 121 and 122
Contact time	2 other contact sessions per week, 2 practicals per week, 2 seminars per week, 4 discussion classes per week
Language of tuition	Double Medium
Academic organisation	Occupational Therapy
Period of presentation	Quarter 2

Module content

Sensory-motor and cognition: The study of occupational therapy evaluation and intervention of sensory-motor and cognitive disorders in all age groups. Includes the pathology, causes, clinical picture and prognosis of selected disorders.

Occupational therapy 381 (ART 381)

Qualification	Undergraduate
Module credits	20.00
Programmes	BOccTher Occupational Therapy
Prerequisites	FSG 251, FSG 252, FSG 261, FSG 262, AKU 200, ART 282, ART 284, RPD 200, ART 281, ART 283
Contact time	2 practicals per week, 20 other contact sessions per week, 5 discussion classes per week
Language of tuition	Double Medium
Academic organisation	Occupational Therapy
Period of presentation	Semester 1

Module content

Continued study of occupational therapy for patients/clients with physical and neurological conditions. Facilitation of occupational performance through the application of assistive technologies and adaptations. Includes therapeutic apparatus, control interfaces, prosthesis and the selection, design and manufacture of splints.

Occupational therapy 382 (ART 382)

Qualification	Undergraduate
Module credits	20.00
Programmes	BOccTher Occupational Therapy

Prerequisites	FSG 251, FSG 252, FSG 261, FSG 262, AKU 200, ART 282, ART 284, RPD 200, ART 281, ART 283
Contact time	5 discussion classes per week, 2 practicals per week, 4 other contact sessions per week
Language of tuition	Double Medium
Academic organisation	Occupational Therapy
Period of presentation	Semester 2

Module content

The application of therapeutic group techniques, stress management and interpersonal techniques in counselling. Includes the study of occupational therapy evaluation and intervention of psychiatric disorders in childhood.

Occupational therapy 401 (ART 401)

Qualification	Undergraduate
Module credits	45.00
Programmes	BOccTher Occupational Therapy
Prerequisites	ANP 210, RPD 380, SEP 110/ZUL 110, AKU 303, AKU 381, AKU 382, ART 381, ART 382, ELH 121, ELH 122
Contact time	1 discussion class per week, 4 other contact sessions per week
Language of tuition	Double Medium
Academic organisation	Occupational Therapy
Period of presentation	Year

Module content

Continued study of occupational therapy for patients/clients with physical and neurological conditions. Integration and application of knowledge and skills in a physical/neurological fieldwork setting.

Occupational therapy 402 (ART 402)

Qualification	Undergraduate
Module credits	45.00
Programmes	BOccTher Occupational Therapy
Prerequisites	ANP 210, RPD 380, SEP 110/ZUL 110, AKU 303, AKU 381, AKU 382, ART 381, ART 382, ELH 121, ELH 122
Contact time	1 discussion class per week, 4 other contact sessions per week
Language of tuition	Double Medium
Academic organisation	Occupational Therapy
Period of presentation	Year

Module content

Continued study of occupational therapy for mental healthcare users. Integration and application of knowledge and skills in a mental health fieldwork setting.

Occupational therapy 800 (ART 800)

Qualification	Postgraduate
Module credits	28.00
Programmes	MOccTher Occupational Therapy
Prerequisites	No prerequisites.
Contact time	1 other contact session per week
Language of tuition	Double Medium
Academic organisation	Occupational Therapy
Period of presentation	Year

Module content

*Attendance module only

Participation in discussion classes, ward rounds and clinics.

Occupational therapy 801 (ART 801)

Qualification	Postgraduate
Module credits	100.00
Programmes	MOccTher Hand Therapy
Prerequisites	No prerequisites.
Language of tuition	Double Medium
Academic organisation	Occupational Therapy
Period of presentation	Year

Module content

An in-depth study of upper limb biomechanics and ergonomics, evaluation and treatment techniques for hand and upper limb injuries and conditions; advanced clinical management.

Occupational therapy 802 (ART 802)

Qualification	Postgraduate
Module credits	100.00
Programmes	MOccTher Neurology

-------------------------------	------------

Module content

Biochemistry of nutrition and toxicology. Proximate analysis of nutrients. Review of energy requirements and expenditure. Respiratory quotient. Requirements and function of water, vitamins and minerals. Interpretation and modification of RDA values for specific diets, eg growth, exercise, pregnancy and lactation, aging and starvation. Interactions between nutrients. Comparison of monogastric and ruminant metabolism. Cholesterol, polyunsaturated, essential fatty acids and dietary anti-oxidants. Oxidation of fats. Biochemical mechanisms of water- and fat-soluble vitamins and assessment of vitamin status. Mineral requirements, biochemical mechanisms, imbalances and diarrhoea. Biochemistry of xenobiotics: absorption, distribution, metabolism and excretion (ADME); detoxification reactions: oxidation/reduction (Phase I), conjugations (Phase II), export from cells (Phase III); factors affecting metabolism and disposition. Toxic responses: tissue damage and physiological effects, teratogenesis, immunotoxicity, mutagenesis and carcinogenesis. Examples of toxins: biochemical mechanisms of common toxins and their antidotes. Antibiotics and resistance. Natural toxins from fungi, plants and animals: goitrogens, cyanogens, cholineesterase inhibitors, ergotoxin, aflatoxins Practical training in analyses of nutrients, fatty acids separations, antioxidant determination, and enzyme activity measurements, PO ratio of mitochondria, electrophoresis, extraction, solubility and gel permeation techniques.

Industrial and organisational psychology 110 (BDO 110)

Qualification	Undergraduate
Module credits	10.00
Programmes	BAdmin International Relations BAdmin Public Management BCom Communication Management BCom Economic and Management Sc BCom Human Resource Management BCur Nursing Science (Education and Administration) BIS Information Science
Service modules	Faculty of Health Sciences
Prerequisites	May not be included in the same curriculum as SLK 110/120
Contact time	4 lectures per week
Language of tuition	Both Afr and Eng
Academic organisation	Human Resource Management
Period of presentation	Semester 1

Module content

Introduction to industrial and organisational psychology

This section is an introduction to the various schools of thought in psychology with particular emphasis on industrial and organisational psychology and its fields of application. The basic principles of scientifically systematising industrial psychological knowledge will be discussed. The biological basis of behaviour will be addressed in order to lay the foundation for the application of ergonomical principles.

Individual processes

This section consists of the principles of learning as found in the work context. The role of perception in the work environment will be discussed by considering aspects such as shape, depth, distance and colour perceptions. Cognition, thought, reasoning, memory, creativity and decision-making will be included. Intelligence will be addressed and placed in an Industrial and organisational psychology perspective.

Module content

Development and personality

This module consists of a discussion of the life span and important periods in human development with emphasis on their meaning in the work context. With regard to personality, the following themes will be addressed: the cultural context of personality, its formation and determinants of personality; personality as determinant of behaviour as well as the development and maintenance of self-image. Attention will be given to the basic methods of personality measuring and personality assessment.

Man in interaction

This theme deals with some central aspects in human interaction. These aspects should be known and understood by prospective human resource management practitioners and Industrial Psychologists, as they are acknowledged as human behaviour specialists in the work context who can assist employers/organisations to enhance the performance, productivity and wellness of human resources in the workplace. Effective human interaction plays a pivotal role in this environment. Thus this module covers aspects like the self-concept, social roles, social perception, time structuring and management, motivation and frustration and psychological adaptation processes and how it relates to human interaction in general and with reference to the workplace. Both theory and practical implications are covered.

Industrial and organisational psychology 219 (BDO 219)

Qualification Undergraduate

Module credits 16.00

Service modules Faculty of Health Sciences

Prerequisites BDO 110 GS, 120 GS

Contact time 3 lectures per week

Language of tuition Both Afr and Eng

Academic organisation Human Resource Management

Period of presentation Semester 1

Module content

Group behaviour and leadership

This module will focus on organisational behaviour with specific reference to the principles of group behaviour and the role of work teams in the organisation. Particular attention will be paid to group development, group interaction, group structures, group processes and the promotion of team performance in the organisation. Leadership and the effect of power and politics in the organisation will be studied. The function of leadership in individual, group and task-oriented behaviour will also be addressed.

Organisational behaviour

The behavioural basis for organisational structuring and organisation design will be addressed. This will include organisational culture as an important facet in any organisation. The dynamics and approaches to organisational change will be addressed with specific reference to the role of change agents, resistance to change and organisational development with a practical discussion of the contemporary problems of organisational change.

Industrial and organisational psychology 229 (BDO 229)

Academic organisation Human Resource Management

Period of presentation Semester 2

Module content

Employee health and ergonomics

This section focuses on actual and important aspects of safety and health management in organisations, as well as the nature and role of ergonomics therein. These aspects are theoretically and practically covered, providing the student with the knowledge and skills required in the organisational psychology and human resource management field.

Workforce diversity

This section will focus on the development of sensitivity towards a diverse employee corps and the development of mutual respect and tolerance between individuals and groups in any organisation. Particular attention will be given to the prerequisites for the effective implementation of a diversity management programme in an organisation.

Industrial and organisational psychology 319 (BDO 319)

Language of tuition	English
Academic organisation	Human Resource Management
Period of presentation	Semester 1

Module content

Human resource management systems

This section provides an introduction to human resource management systems and addresses current developments and problems in the field, which will be comprehensively addressed and include the following: job analysis, description, specification, and design, remuneration theory and systems, job evaluation and grading as well as benefit and fringe-benefit systems. Remuneration systems as motivation for employees will also be included.

Human resources provision

Human resources provision will be presented from an industrial psychological perspective and will include the following themes: human resources planning; macro and micro variables which could affect personnel forecasting and provision; human resource information systems; the auditing of skills as well as techniques such as recruitment, selection, placement and induction.

Module content

Motivation and performance management

This section will address the main characteristics of a performance management system and will focus on the strategic and motivational value of the process. Performance management will be addressed under the following headings: criteria development; performance planning; data gathering; observation and documenting; performance appraisal; appraisal instruments; performance feedback to promote motivation.

People and career development

This section will address current methods that can be used to develop human resources and to present career development programmes in order to promote performance at both an individual and organisational level. Emphasis will be on needs analysis, curriculum design, goal setting for learning, programme development, preparation of materials, training interventions, presentation and facilitation skills as well as course evaluation. The integration of individual career expectations with the organisation's requirements and strategies will be illustrated based on career development.

Biomechanics and ergonomics 701 (BEX 701)

Qualification	Postgraduate
Module credits	10.00
Programmes	PGDip Hand Therapy
Prerequisites	No prerequisites.
Contact time	1 practical per week, 14 lectures per week
Language of tuition	Double Medium
Academic organisation	Occupational Therapy
Period of presentation	Year

Module content

Biomechanics of the upper limb and disturbance thereof; the biomechanics of splints. Environmental factors for effective posture and handgrip; relationship between man and environment; disturbance of this relationship.

Industrial physiology and pathology 700 (BFP 700)

Qualification	Postgraduate
Module credits	24.00
Prerequisites	No prerequisites.
Language of tuition	Both Afr and Eng
Academic organisation	Physiology
Period of presentation	Year

Applied exercise science (gymnasium) 310 (BGN 310)

Qualification	Undergraduate
Module credits	15.00
Programmes	BSportSci BSportSci

Contact time 1 practical per week, 1 lecture per week

Language of tuition English

Academic organisation Biokinetics and Sports Science

Period of presentation Semester 1

Module content

*Closed – requires departmental selection The student will be taught on disciplines such as gymnasium layout, warm-up techniques and training methods with reference to traditional anatomical areas.

Testing and evaluation (laboratory) 320 (BGN 320)

Molecule to organism 121 (BOK 121)

Qualification	Undergraduate
Module credits	40.00
Programmes	MBChB Medicine
Prerequisites	No prerequisites.
Contact time	7 lectures per week
Language of tuition	English
Academic organisation	Anatomy
Period of presentation	Semester 2

Module content

(a) Molecule to cell (2 weeks)

The principles of physiology, chemistry and genetics applicable to man. Macro molecules, lipids, carbohydrates and protein. Introductory genetics: molecular evolution, gene structure and transmission, genetic control of the cell cycle and genetic defects. Impulse conduction and muscle contraction. Nerve potentials.

(b) Cell to tissue (4 weeks)

Gametogenesis, embryogenesis, embryopathy, histology and incidence of tissue types. The immune system and its components. Tissue specificity, genetic control of expression and factors influencing gene expressions.

(c) Tissue to organism (2 weeks)

Anatomical terminology and introduction to the systemic and functional organisation of the human body. Arrangement of tissues in organs. Life stages of man.

Homeostasis 280 (BOK 280)

Qualification	Undergraduate
Module credits	42.00
Programmes	MBChB Medicine
Prerequisites	CMY 151, GNK 120, GNK 127, MLB 111, PHY 131, GNK 128, BOK 121, MGW 112, FIL 155, MTL 180, SMO 121, AIM 101, ELH 111, ELH 112
Contact time	18 lectures per week
Language of tuition	Both Afr and Eng
Academic organisation	Forensic Medicine
Period of presentation	Semester 1

Module content

(a) Intermediary metabolism (3 weeks)

Carbohydrate and lipid metabolism; protein and energy metabolism; vitamins and minerals. Integration of metabolism. Practical work: Protein electrophoresis.

(b) Control (3 weeks)

Nerve control; endocrine control.

(c) Internal milieu (3 weeks)

Water balance and blood physiology. Acid-base equilibrium, clinical haematology. Practical work: Haematology.

Pathological conditions and infectious diseases 281 (BOK 281)

Qualification Undergraduate

Module credits 45.00

Prerequisites CMY 151, GNK 120, GNK 127, MLB 111, P HY 131, GNK 128, BOK 121, MGW 112, FIL 155, MTL 180, SMO 121, AIM 101, ELH 111, ELH 112

Contact time 12 lectures per week

Language of tuition English

Academic organisation Anatomical Pathology

Period of presentation Semester 2

Module content

a) General pathology and immunology (4 weeks) Cell damage; growth and repair; infection; disturbances in circulation; HLA system; immune response; hypersensitivity; auto-immunity and transplant immunology. Anatomy of the lymphatic system. (b) Principles of malignancies (1 week) Oncogenesis; terminology and biological behaviour of tumours; principles of therapy. (c) Principles of infectious diseases (3 weeks) This module deals with the basic principles and systematic classification and clinical picture of bacteria, viral parasitic and fungal infections of importance to man. The pharmacological aspects of antibacterial and antiviral chemotherapy will also be dealt with. A short introduction to epidemiology will also be presented. The practical aspects of the microbiology which includes virology, will be demonstrated in the practical sessions. (d) Infectious diseases (2 weeks) This comprehensive module covers all aspects of the most prominent infectious diseases in man, such as tuberculosis, immuno-deficiency syndrome, malaria, gastro-enteritis, haemorrhagic fever, typhoid, bilharzia and sexually transmitted diseases. The module is problem-orientated, multidisciplinary and presented in the form of case studies and group discussions. The module also deals with certain important topics such as surgical infections, nosocomial infections, opportunistic infections, trauma and associated infection. The microbiology of special environments will also be discussed.

Academic organisation Surgery

Period of presentation Semester 1

Module content

- (a) Abdomen and abdominal problems
- (b) Mamma

A study of the anatomy and functions, as well as the diseases of the different organs in the abdominal cavity including conditions of the abdominal wall. Furthermore, lectures on the clinical conditions of the mamma will be presented.

Pregnancy and neonatology 382 (BOK 382)

Qualification Undergraduate

Module credits	55.00
Programmes	MBChB Medicine
Prerequisites	BOK 280,GNK 288,BOK 284,GPS 280,GNK 283,GNK 286, (BOK 281 or (BOK 285, BOK 287)), LCP 280
Contact time	12 lectures per week
Language of tuition	Both Afr and Eng
Academic organisation	Obstetrics and Gynaecology
Period of presentation	Semester 2

Module content

(a) Pregnancy (b) Neonatology The study of the natural physiological complexes and pathological conditions concerning pregnancy and birth. Different learning opportunities and situations are used, including prenatal clinics, labour wards and neonatal units. Emphasis is placed on acquiring scientifically-based information, as well as important practical and clinical skills. The behavioural sciences are also included in the block, as well as the social, family and community-related aspects. (c) Growth and development (2 weeks) A study of the unique aspects of the physical growth and neuro-development of a normal child. Learning opportunities are presented to the student to identify problems concerning growth and development, as well evaluating and handling children with abnormal growth and development. Emphasis is placed on the prevention, evaluation and handling, as well as the effective treatment with a decided result. This block integrates with the previous block in order to enable the student to understand the continuum of growth and neuro-development from the prenatal to the post-natal milieu.

Genital and urinary tract diseases 480 (BOK 480)

Qualification	Undergraduate
Module credits	62.00
Programmes	MBChB Medicine

Module credits 1.00

Prerequisites No prerequisites.

Language of tuition English

Academic organisation School of Health Syst & Public

Period of presentation Year

Introduction to disease control 870 (CDC 870)

Qualification Postgraduate

Module credits 5.00

Prerequisites No prerequisites.

Contact time 16 lectures per week, 1 practical per week

Language of tuition English

Academic organisation School of Health Syst & Public

Period of presentation Year

Principles of communicable disease control 871 (CDC 871)

Qualification Postgraduate

Module credits	10.00
Prerequisites	No prerequisites.
Contact time	1 discussion class per week, 3 lectures per week, 1 practical per week, 18 seminars per week
Language of tuition	English
Academic organisation	School of Health Syst & Public
Period of presentation	Year

Seminars in tropical health (Agent) 872 (CDC 872)

Qualification	Postgraduate
Module credits	10.00
Prerequisites	No prerequisites.
Contact time	3 lectures per week, 18 seminars per week, 1 practical per week
Language of tuition	English
Academic organisation	School of Health Syst & Public
Period of presentation	Year

Seminars in tropical health (Environment) 873 (CDC 873)

Qualification	Postgraduate
Module credits	10.00
Prerequisites	No prerequisites.
Contact time	1 practical per week, 18 seminars per week, 3 lectures per week
Language of tuition	English
Academic organisation	School of Health Syst & Public
Period of presentation	Year

Seminars in tropical health (Host) 874 (CDC 874)

Qualification	Postgraduate
Module credits	10.00
Prerequisites	No prerequisites.
Contact time	3 lectures per week, 1 practical per week, 18 seminars per week
Language of tuition	English
Academic organisation	School of Health Syst & Public
Period of presentation	Year

Principles: Chronic disease epidemiology 870 (CDE 870)

Qualification	Postgraduate
Module credits	5.00
Programmes	MSc Biostatistics MSc Clinical Epidemiology MSc Epidemiology
Prerequisites	No prerequisites.
Contact time	1 practical per week, 3 discussion classes per week, 3 seminars per week
Language of tuition	English
Academic organisation	School of Health Syst & Public
Period of presentation	Year

Clinical tropical medicine 770 (CDS 770)

Qualification	Postgraduate
Module credits	5.00
Programmes	PGDip Public Health Medicine PGDip Tropical Medicine and Health
Prerequisites	No prerequisites.
Contact time	1 practical per week, 16 lectures per week
Language of tuition	English
Academic organisation	School of Health Syst & Public
Period of presentation	Year

Human nutrition and public health 773 (CDS 773)

Qualification	Postgraduate
Module credits	5.00
Programmes	PGDip Occupational Health PGDip Occupational Medicine and Health PGDip Public Health
Contact time	16 lectures per week
Language of tuition	English
Academic organisation	School of Health Syst & Public
Period of presentation	Year

Module content

Principles of nutrition science, factors influencing food choices and nutrition in the life cycle. Main nutrition challenges in public health and interventions to address these. Development and management of public health nutrition interventions as well as a practicum in one aspect of public health nutrition practise in local communities.

Clinical tropical medicine 870 (CDS 870)

Qualification	Postgraduate
Module credits	5.00
Prerequisites	No prerequisites.
Contact time	1 practical per week, 16 lectures per week
Language of tuition	English
Academic organisation	School of Health Syst & Public
Period of presentation	Year

Disease outbreak and control 871 (CDS 871)

Qualification	Postgraduate
Module credits	10.00
Prerequisites	HME 870
Contact time	40 lectures per week
Language of tuition	English
Academic organisation	School of Health Syst & Public
Period of presentation	Year

Economic evaluation of disease control intervention 872 (CDS 872)

Qualification	Postgraduate
Module credits	5.00
Service modules	Faculty of Veterinary Science
Prerequisites	No prerequisites.
Contact time	40 discussion classes per week
Language of tuition	English
Academic organisation	School of Health Syst & Public
Period of presentation	Year

Module content

Students learn when and how to perform economic analyses.

Human nutrition and public health 873 (CDS 873)

Qualification	Postgraduate
Module credits	10.00
Prerequisites	No prerequisites.
Contact time	16 lectures per week
Language of tuition	English
Academic organisation	School of Health Syst & Public
Period of presentation	Year

Infectious disease epidemiology 870 (CDT 870)

Qualification	Postgraduate
Module credits	5.00
Programmes	MSc Clinical Epidemiology MSc Epidemiology
Prerequisites	HME 870
Contact time	40 lectures per week
Language of tuition	English
Academic organisation	School of Health Syst & Public
Period of presentation	Year

Module content

Students learn about the special rates applicable with outbreak and ID investigations. They learn about basic vaccinology (the epidemiology of) and introductory compartmental modelling terms and skills. They also learn basic clinical epidemiology concepts as applicable for screening and public health programmes. Finally they learn about the composition, duties and roles of the infection control team in a hospital.

Prevention and control of HIV/Aids 870 (CDX 870)

Qualification	Postgraduate
Module credits	10.00
Prerequisites	No prerequisites.
Contact time	3 seminars per week, 1 practical per week, 3 discussion classes per week
Language of tuition	English
Academic organisation	School of Health Syst & Public
Period of presentation	Year

Chemical pathology 700 (CHP 700)

Qualification	Postgraduate

Information literacy 121 (CIL 121)

Qualification	Undergraduate
Module credits	4.00

Service modules Faculty of Education
Faculty of Law
Faculty of Health Sciences
Faculty of Natural and Agricultural Sciences
Faculty of Veterinary Science

Prerequisites No prerequisites.

Contact time 2 lectures per week

Language of tuition Both Afr and Eng

Academic organisation School of Information Technolo

Period of presentation Semester 1 and Semester 2

Module content

*No exemption examination

Why computers matter to you? Networking. Information resources (including the Department of Library Services). Quality of information. Ethics, plagiarism and copy right. Searching the Internet. Information-seeking strategies. Location and access. Specific search environments (including all electronic databases and journals in the Department of Library Services applicable to the relevant faculties). Referencing techniques. Use, synthesis and evaluation of information. New trends. Content specific to the University of Pretoria.

Principles of clinical epidemiology 870 (CLI 870)

Qualification Postgraduate

Module credits 10.00

Programmes MMed Medical Pharmacology PharmMed
MSc Biostatistics
MSc Clinical Epidemiology
MSc Epidemiology
MSc Public Health

Prerequisites HME 870

Contact time 3 discussion classes per week, 3 seminars per week, 1 practical per week

Language of tuition English

Academic organisation School of Health Syst & Public

Period of presentation Year

Evidence-based medicine 871 (CLI 871)

Qualification Postgraduate

Module credits 12.00

Programmes MMed Medical Pharmacology PharmMed
MSc Biostatistics
MSc Clinical Epidemiology

Prerequisites CLI 870

Contact time	1 practical per week, 16 lectures per week
Language of tuition	English
Academic organisation	School of Health Syst & Public
Period of presentation	Year

Clinical medical practice 181 (CMP 181)

Qualification	Undergraduate
Module credits	17.00
Programmes	BCMP Clinical Medical Practice
Prerequisites	No prerequisites.
Contact time	1 practical per week, 3 seminars per week, Community Engagement, 1 discussion class per week
Language of tuition	English
Academic organisation	Family Medicine
Period of presentation	Semester 1

Module content

Introduction to the Faculty of Health Sciences, curriculum and cultural differences. Basic theory and skills in respect of health assessment and physical examination, health promotion and disease prevention by means of self-tuition and practical sessions in the hospital and skills laboratory. A problem-oriented and interdisciplinary approach is emphasised.

Clinical medical practice 182 (CMP 182)

Qualification	Undergraduate
Module credits	56.00
Programmes	BCMP Clinical Medical Practice
Prerequisites	No prerequisites.
Contact time	2 discussion classes per week, Community Engagement, 1 practical per week
Language of tuition	English
Academic organisation	Family Medicine
Period of presentation	Semester 2

Module content

Basic theory and skills in respect of health assessment and physical examination, health promotion and disease prevention of the cardio/peripheral, reticulo-endothelial, respiratory, gastro-intestinal, genito-urinary, central nervous system, head, neck, eye, ear, nose, throat, musculo-skeletal, endocrine, dermatological systems by means of group discussion, self-tuition and practical sessions in the hospital and skills laboratory. A problem-oriented and interdisciplinary approach is emphasised.

Clinical medical practice 281 (CMP 281)

Qualification	Undergraduate
Module credits	68.00
Programmes	BCMP Clinical Medical Practice
Prerequisites	CMP 181, CMP 182
Contact time	Community Engagement, 2 discussion classes per week, 3 seminars per week, 2 lectures per week, 2 web-based periods per week
Language of tuition	English
Academic organisation	Family Medicine
Period of presentation	Semester 1

Module content

Basic theory and skills in respect of the health promotion, disease prevention, diagnosis and treatment of diseases of cardio/peripheral, vascular, reticulo-endothelial, endocrine, respiratory, genito-urinary and gastro-intestinal systems by means of group discussions, self-tuition and practical sessions in the hospital and skills laboratory. A problem-oriented and interdisciplinary approach is emphasised. Emphasis is placed on the diagnosis and treatment of the most prominent conditions as well as the acquiring of practical and clinical skills.

Clinical medical practice 282 (CMP 282)

Qualification	Undergraduate
Module credits	68.00
Programmes	BCMP Clinical Medical Practice
Prerequisites	CMP 281
Contact time	4 lectures per week, 2 web-based periods per week, 2 discussion classes per week, 4 seminars per week, 2 practicals per week
Language of tuition	English
Academic organisation	Family Medicine
Period of presentation	Semester 2

Module content

Basic theory and skills in respect of the health promotion, disease prevention, diagnosis and treatment of diseases of the central nervous system, head, neck, eye, ear, nose, throat, skin and musculo-skeletal systems by means of group discussions, self-tuition and practical sessions in the hospital and skills laboratory. A problem-oriented and interdisciplinary approach is emphasised. Emphasis is placed on the diagnosis and treatment of the most prominent conditions as well as the acquiring of practical and clinical skills.

Healthcare systems 380 (CMP 380)

Qualification	Undergraduate
Module credits	16.00
Programmes	BCMP Clinical Medical Practice

Prerequisites	CMP 281, CMP 282, FAR 280
Contact time	4 practicals per week, 2 lectures per week
Language of tuition	English
Academic organisation	Family Medicine
Period of presentation	Year

Module content

Study of healthcare systems with emphasis on district health systems.

Women's health 381 (CMP 381)

Qualification	Undergraduate
Module credits	24.00
Programmes	BCMP Clinical Medical Practice
Prerequisites	CMP 281, CMP 282, FAR 280
Contact time	1 practical per week, 1 discussion class per week, 1 seminar per week
Language of tuition	English
Academic organisation	Family Medicine
Period of presentation	Year

Module content

Theory and skills in respect of the health promotion, disease prevention, diagnosis and treatment of diseases affecting women by means of group discussions, self-tuition and practical sessions in the hospital and skills laboratory. A problem-oriented and interdisciplinary approach is emphasised. Emphasis is placed on the diagnosis and treatment of the most prominent conditions as well as the acquiring of practical and clinical skills.

Child health 382 (CMP 382)

Qualification	Undergraduate
Module credits	24.00
Programmes	BCMP Clinical Medical Practice
Prerequisites	CMP 281, CMP 282, FAR 280
Contact time	2 discussion classes per week, 3 seminars per week, 1 practical per week
Language of tuition	English
Academic organisation	Family Medicine
Period of presentation	Year

Module content

Basic theory and skills in respect of the health promotion, disease prevention, diagnosis and treatment of diseases of children by means of group discussions, self-tuition and practical sessions in the hospital and skills laboratory. A problem-oriented and interdisciplinary approach is emphasised. Emphasis is placed on the diagnosis and treatment of the most prominent conditions as well as the acquiring of practical and clinical skills.

Emergency care 383 (CMP 383)

Qualification	Undergraduate
Module credits	24.00
Programmes	BCMP Clinical Medical Practice
Prerequisites	CMP 281, CMP 282, FAR 280
Contact time	1 discussion class per week, 1 practical per week
Language of tuition	English
Academic organisation	Family Medicine
Period of presentation	Year

Module content

Theory and skills training in basic emergency care.

Infectious and chronic diseases 384 (CMP 384)

Qualification	Undergraduate
Module credits	36.00
Programmes	BCMP Clinical Medical Practice
Prerequisites	CMP 281, CMP 282, FAR 280
Contact time	2 discussion classes per week, 4 seminars per week, 5 practical per week
Language of tuition	English
Academic organisation	Family Medicine
Period of presentation	Year

Module content

Theory and skills in respect of the disease prevention, diagnosis and treatment of infectious diseases by means of group discussions, self-tuition and practical sessions in the hospital and skills laboratory. A problem-oriented and interdisciplinary approach is emphasised. Emphasis is placed on the diagnosis and treatment of the most prominent conditions as well as the acquiring of practical and clinical skills.

Anaesthetics 385 (CMP 385)

Qualification	Undergraduate
Module credits	12.00
Programmes	BCMP Clinical Medical Practice

Prerequisites	CMP 281, CMP 282, FAR 280
Contact time	5 practicals per week, 2 discussion classes per week
Language of tuition	English
Academic organisation	Family Medicine
Period of presentation	Year

Module content

An introduction to the underlying principles of the theory and practice of anaesthesiology applicable to the clinical associate practice.

Mental health 386 (CMP 386)

Qualification	Undergraduate
Module credits	36.00
Programmes	BCMP Clinical Medical Practice
Prerequisites	CMP 281, CMP 282, FAR 280
Contact time	2 discussion classes per week, 1 seminar per week, 1 practical per week
Language of tuition	English
Academic organisation	Family Medicine
Period of presentation	Year

Module content

Theory and skills in respect of the disease prevention, diagnosis and treatment of mental health problems by means of lectures, seminars, self-tuition and practical sessions in the hospital and skills laboratory. A problem-oriented and interdisciplinary approach is emphasised. Emphasis is placed on the diagnosis and treatment of the most prominent conditions as well as the acquiring of practical and clinical skills.

Orthopaedics 387 (CMP 387)

Qualification	Undergraduate
Module credits	12.00
Programmes	BCMP Clinical Medical Practice
Prerequisites	CMP 281, CMP 282, FAR 280
Contact time	4 practicals per week, 2 discussion classes per week
Language of tuition	English
Academic organisation	Family Medicine
Period of presentation	Year

Module content

Theory and skills in respect of the disease prevention, diagnosis and treatment of orthopaedic diseases and problems by means of group discussions, self-tuition and practical sessions in the hospital and skills laboratory. A problem-oriented and interdisciplinary approach is emphasised. Emphasis is placed on the diagnosis and treatment of the most prominent conditions as well as the acquiring of practical and clinical skills.

Faculty of Engineering, Built Environment and Information Technology
 Faculty of Education
 Faculty of Health Sciences
 Faculty of Veterinary Science

Prerequisites Final Grade 12 marks of at least 60% for Mathematics and 60% for Physical Sciences.

Contact time 1 practical per week, 4 lectures per week

Language of tuition Both Afr and Eng

Academic organisation Chemistry

Period of presentation Semester 1

Module content

General introduction to inorganic, analytical and physical chemistry. Atomic structure and periodicity. Molecular structure and chemical bonding using the VSEOR model. Nomenclature of iorganic ions and compounds. Classification of reactions: precipitation, acid-base, redox reactions and gas-forming reactions. Mole concept and stoichiometric calculations concerning chemical formulas and chemical reactions. Principles of reactivity: energy and chemical reactions. Physical behaviour gases, liquids, solids and solutions and the role of intermolecular forces. Rate of reactions: Introduction to chemical kinetics.

Service modules

Faculty of Engineering, Built Environment and Information Technology
 Faculty of Education
 Faculty of Health Sciences
 Faculty of Veterinary Science

Prerequisites

Natural and Agricultural Sciences students: CMY 117 GS or CMY 154 GS Health
 Sciences students: none

Contact time

1 practical per week, 4 lectures per week

Language of tuition

Both Afr and Eng

Academic organisation

Chemistry

Period of presentation

Semester 2

Module content

Theory: General physical-analytical chemistry: Physical behaviour of gases, liquids and solids, intermolecular forces, solutions. Principles of reactivity: energy and chemical reactions, entropy and free energy, electrochemistry. Organic chemistry: Structure (bonding), nomenclature, isomerism, introductory stereochemistry, introduction to chemical reactions and chemical properties of organic compounds and biological compounds, i.e. carbohydrates and amino acids. Practical: Molecular structure (model building), synthesis and properties of simple organic compounds.

Chemistry 151 (CMY 151)

Qualification Undergraduate

Module credits 16.00

Programmes BChD Dentistry
BPhysT Physiotherapy
MBChB Medicine

Service modules Faculty of Health Sciences

Prerequisites Refer to Regulation 1.2

Contact time 1 practical per week, 4 lectures per week

Language of tuition Both Afr and Eng

Academic organisation Chemistry

Period of presentation Semester 1

Module content

Theory: Introduction to general chemistry: Measurement in chemistry, matter and energy, atomic theory and the periodic table, chemical compounds and chemical bonds; quantitative relationships in chemical reactions, states of matter and the kinetic theory; solutions and colloids, acids, bases and ionic compounds, chemical equilibria. Introduction to organic chemistry: Chemical bonding in organic compounds, nature, physical properties and nomenclature of simple organic molecules, isomerism, chemical properties of alkanes and cycloalkanes, alkenes, alcohols, aldehydes and ketones, carboxylic acids and esters, amines and amides, carbohydrates, proteins, and lipids. Practicals.

Community nutrition 310 (CNT 310)

Qualification Undergraduate

Module credits 12.00

Programmes BDietetics Dietetics

Service modules Faculty of Natural and Agricultural Sciences

Prerequisites Second-year status or TDH

Language of tuition English

Academic organisation Human Nutrition

Period of presentation Semester 1

Module content

Community nutrition practice within the larger public health realm. Nutrition within primary health care. Nutrition and community development as well as project planning and management

Community nutrition 320 (CNT 320)

Qualification	Undergraduate
Module credits	10.00
Programmes	BDietetics Dietetics
Service modules	Faculty of Natural and Agricultural Sciences
Prerequisites	3rd-year status
Contact time	1 discussion class per week
Language of tuition	English
Academic organisation	Human Nutrition
Period of presentation	Semester 2

Module content

Community nutrition practice within the larger public health realm. Nutrition within primary healthcare. Nutrition and community development as well as project planning and management.

Community nutrition 411 (CNT 411)

Qualification	Undergraduate
Module credits	25.00
Programmes	BDietetics Dietetics
Service modules	Faculty of Natural and Agricultural Sciences
Prerequisites	4th-year status
Contact time	4 lectures per week, Community Engagement, 1 discussion class per week
Language of tuition	English
Academic organisation	Human Nutrition
Period of presentation	Semester 1

Module content

Global nutrition challenges e.g. food security, protein-energy and micronutrient malnutrition, non communicable diseases of lifestyle, etc. Public health approaches and general nutrition interventions to address these challenges. Nutrition program development including assessment, analysis and interventions in the South African context as well as Nutrition Policy formulation

Internship training in community nutrition 480 (CNT 480)

Qualification	Undergraduate
Module credits	35.00

Programmes [BDietetics Dietetics](#)

Prerequisites CNT 411

Contact time Five times 8hrs per day for 7 weeks, Community Engagement

Language of tuition Double Medium

Academic organisation Human Nutrition

Period of presentation Semester 2

Module content

Academic service learning project in community-based programme development (i.e. planning, implementation and evaluation). Facility-based primary healthcare service delivery.

Counselling 371 (COU 371)

Qualification Undergraduate

Module credits 5.00

Programmes [BOH Oral Hygiene](#)

Prerequisites ODO 271, OFC 271, RAD 271, PDL 271, ORD 271, GAP 271, VKM 271, TBW 271

Contact time 1 lecture per week

Language of tuition English

Academic organisation Community Dentistry

Period of presentation Year

Module content

This module will equip the oral hygiene student with the theoretical underpinning for behavioural change and the necessary skills to counsel a patient on lifestyle behavioural change. This would include, but not limited to promoting a healthy diet and smoking cessation. This would consist of both lectures and practical sessions with clients/patients.

Critical care for medical subspecialties Part 1 801 (CRT 801)

Qualification Postgraduate

Module credits 120.00

Programmes [MPhil Critical Care \(Coursework\)](#)

Prerequisites Relevant base speciality registration with HPCSA

Contact time 24 months

Language of tuition English

Academic organisation Family Medicine

Period of presentation Year

Module content

Curriculum as designated by the relevant College of Medicine at www.collegemedsa.ac.za

Essay 795 (DBG 795)

Qualification	Postgraduate
Module credits	24.00
Prerequisites	No prerequisites.
Language of tuition	English
Academic organisation	Public Health Medicine
Period of presentation	Year

Normal development 701 (DCD 701)

Qualification	Postgraduate
Module credits	20.00
Programmes	PGDip Handling of Childhood Disability
Prerequisites	No prerequisites.
Contact time	10 practicals per week, 5 discussion classes per week, 15 lectures per week
Language of tuition	Double Medium
Academic organisation	Occupational Therapy
Period of presentation	Quarter 1

Module content

Sensory development. Motor development. Cognitive/perceptual development. Communication development. Socio-emotional development.

Identification 702 (DCD 702)

Qualification	Postgraduate
Module credits	30.00
Programmes	PGDip Handling of Childhood Disability
Prerequisites	No prerequisites.
Contact time	15 lectures per week, 5 discussion classes per week, 5 seminars per week, 10 practicals per week
Language of tuition	Double Medium
Academic organisation	Occupational Therapy
Period of presentation	Quarter 2

Module content

Early identification and the clinical picture of developmental delay of the somato-sensory system. Early identification and the clinical picture of developmental delay of the motor system. Early identification and the clinical picture of developmental delay of the visual system including pre-perceptual and perceptual skills.

Intervention for developmental disabilities 703 (DCD 703)

Qualification	Postgraduate
Module credits	35.00
Programmes	PGDip Handling of Childhood Disability
Prerequisites	No prerequisites.
Contact time	5 seminars per week, 10 practicals per week, 5 discussion classes per week, 15 lectures per week
Language of tuition	Double Medium
Academic organisation	Occupational Therapy
Period of presentation	Quarter 3

Module content

Intervention strategies within the school setting. Adaptation of activity programmes. Facilitation of social interaction.

Intervention for disabilities 704 (DCD 704)

Qualification	Postgraduate
Module credits	35.00
Programmes	PGDip Handling of Childhood Disability
Prerequisites	No prerequisites.
Contact time	5 discussion classes per week, 5 seminars per week, 10 practicals per week, 15 lectures per week
Language of tuition	Double Medium
Academic organisation	Occupational Therapy
Period of presentation	Quarter 4

Module content

Handling techniques for the child with severe disabilities. Positioning for functioning. Environmental adaptations. Play as intervention medium. Integration into main stream schools.

Principles of demography 770 (DEG 770)

Qualification	Postgraduate
Module credits	10.00
Programmes	PGDip Public Health PGDip Public Health Medicine
Prerequisites	No prerequisites.
Contact time	1 lecture per week, 1 discussion class per week, 1 seminar per week, 1 practical per week, 1 other contact session per week
Language of tuition	English

Academic organisation Public Health Medicine

Period of presentation Year

Programmes

Prerequisites	Relevant base speciality registration with HPCSA
Contact time	24 months
Language of tuition	English
Academic organisation	School of Medicine
Period of presentation	Year

Module content

A dissertation in a relevant topic or equivalent publication produced under supervision in the appropriate department.

Didactics of nursing education 110 (DNE 110)

Qualification	Undergraduate
Module credits	20.00
Programmes	BCur Nursing Science (Education and Administration)
Prerequisites	No prerequisites.

Contact time 1 other contact session per week, 2 lectures per week

Language of tuition English

Academic organisation Nursing Science

Period of presentation Semester 1

Module content

Learning strategies and educational media.

Developing teaching strategies and designing audiovisual aids and evaluation tools. Theory of didactics.

Cognitive and intellectual functioning of adults. Educational relations.

Didactics of nursing education 120 (DNE 120)

Qualification Undergraduate

Module credits 20.00

Programmes [BCur Nursing Science \(Education and Administration\)](#)

Prerequisites No prerequisites.

Contact time 2 lectures per week, 1 other contact session per week

Language of tuition English

Academic organisation Nursing Science

Period of presentation Semester 2

Module content

Curriculum and programme development.

Application of the principles of curriculum building. Management of curricula, programmes and nursing schools.

Student guidance.

Learning problems and remedial practices. Student support systems. Learning theories.

Didactics of nursing education 160 (DNE 160)

Qualification Undergraduate

Module credits 10.00

Programmes [BCur Nursing Science \(Education and Administration\)](#)

Prerequisites No prerequisites.

Contact time 1 practical per week

Language of tuition English

Academic organisation Nursing Science

Period of presentation Year

Module content

*Attendance modules only Nursing education practical work. Compulsory practical work, including the preparation and presentation of at least ten (10) lectures and five (5) clinical teaching sessions.

Dynamics of nursing practice 151 (DNP 151)

Qualification	Undergraduate
Module credits	13.00
Programmes	BCur Nursing Science
Prerequisites	No prerequisites.
Language of tuition	English
Academic organisation	Nursing Science
Period of presentation	Quarter 1

Module content

Intra and interpersonal dimensions of the nurse.

Self-discovery, self-disclosure and self-awareness, professional socialisation and self-development. Self-evaluation and own journal assessment. Compilation of a personal portfolio. Interpersonal communication and contact: from the self to relationships. Therapeutic use of the self. The therapeutic milieu. Contemporary dilemmas of identity. The multiple self and multiple realities. Communication skills: a communication model for nursing. Management of conflict. Day planning and time management. Development of a personal philosophy. Problem-solving and critical thinking skills.

NB: Only for selected BCur students.

Dynamics of nursing practice 152 (DNP 152)

Qualification	Undergraduate
Module credits	13.00
Programmes	BCur Nursing Science
Prerequisites	No prerequisites.
Language of tuition	English
Academic organisation	Nursing Science
Period of presentation	Quarter 2

Module content

Assessment skills (including the assessment interview, assessment of mental needs, basic examination skills and vital signs), compilation of a database and needs list and the prioritisation of needs. Application of the scientific approach to nursing.

NB: Only for selected BCur students.

Dynamics of nursing practice 153 (DNP 153)

Qualification	Undergraduate
Module credits	13.00
Programmes	BCur Nursing Science
Prerequisites	No prerequisites.

Language of tuition English

Academic organisation Nursing Science

Period of presentation Quarter 3

Module content

Nursing management of emergency situations and disasters in the community. The need for emergency care. Provision of emergency medical services. The impact of emergency situations and disasters on the community. Unique needs in situations of exceptional distress. First aid and basic pre-hospital emergency care. Psychiatric emergencies: suicide risk, aggression, self-destructive behaviour and emotional trauma.

NB: Only for selected BCur students.

Dynamics of nursing practice 154 (DNP 154)

Qualification Undergraduate

Module credits 13.00

Programmes [BCur Nursing Science](#)

Prerequisites No prerequisites.

Language of tuition English

Academic organisation Nursing Science

Period of presentation Quarter 4

Module content

Nursing facilitation of health promotion and illness prevention.

The Primary health care (PHC) approach and its underlying principles. Health promotion as part of the PHC approach. Models and approaches, planning and implementation of health promotion and illness prevention programmes. Health screening and its relevant assessment skills. Educational skills and the health service consumer in the teaching-learning situation. Disability and rehabilitation care as preventative and health promotive modality. The principles underlying rehabilitation care. Evaluation of health promotion and illness prevention programmes. Promotion of mental well-being: stress, conflict, substance abuse, violence and physical abuse.

NB: Only for selected BCur students.

Dynamics of nursing practice 251 (DNP 251)

Qualification Undergraduate

Module credits 9.00

Programmes [BCur Nursing Science](#)

Prerequisites ANA 151,ANA 152,ANA 161,ANA 162,FSG 161,FSG 162,NUR 151,NUR 152,NUR 153,NUR 154,CIL 111 and 121 or AIM 101 or AIM 111 and 121 EOT 110 and 120 or ELH 121 and 122

Language of tuition English

Academic organisation Nursing Science

Period of presentation Quarter 1

Module content

Nurse-therapeutic contexts.

Ethical-legal aspects and health policy regarding mental illness. Organisation and institutions in psychiatric health care. Theoretical foundations of psychiatric nursing practice. The DSM classification system of mental disorders.

NB: Only for selected BCur students.

Dynamics of nursing practice 252 (DNP 252)

Qualification Undergraduate

Module credits 9.00

Programmes [BCur Nursing Science](#)

Prerequisites ANA 151,ANA 152,ANA 161,ANA 162,FSG 161,FSG 162,NUR 151,NUR 152,NUR 153,NUR 154,CIL 111 and 121 or AIM 101 or AIM 111 and 121 EOT 110 and 120 or ELH 121 and 122

Language of tuition English

Academic organisation Nursing Science

Period of presentation Quarter 2

Module content

Acute and chronic mental disorders.

Nursing process applied in the psychiatric context. Psychopathology, abnormal and deviant behaviour. Common mental disorders: schizophrenia, affective, cognitive and anxiety disorders.

NB: Only for selected BCur students.

Dynamics of nursing practice 253 (DNP 253)

Qualification Undergraduate

Module credits 9.00

Programmes [BCur Nursing Science](#)

Prerequisites ANA 151,ANA 152,ANA 161,ANA 162,FSG 161,FSG 162,NUR 151,NUR 152,NUR 153,NUR 154,CIL 111 and 121 or AIM 101 or AIM 111 and 121 EOT 110 and 120 or ELH 121 and 122

Language of tuition English

Academic organisation Nursing Science

Period of presentation Quarter 3

Module content

Nurse-therapeutic conversations, group therapy and comprehensive care.

Individual therapy: Facilitative communication and the one-to-one relationship.

Group: the group process, group dynamics, leadership and leadership functions and relevant assessment skills.

Mental health education. Therapeutic milieu.

NB: Only for selected BCur students.

Dynamics of nursing practice 254 (DNP 254)

Module credits	9.00
Programmes	BCur Nursing Science
Prerequisites	ANA 151,ANA 152,ANA 161,ANA 162,FSG 161,FSG 162,NUR 151,NUR 152,NUR 153,NUR 154,CIL 111 and 121 or AIM 101 or AIM 111 and 121 EOT 110 and 120 or ELH 121 and 122
Language of tuition	English
Academic organisation	Nursing Science
Period of presentation	Quarter 4

Module content

Therapeutic skills, mentally challenged and cultural issues.

Crisis intervention. Loss and grieving process. Mentally challenged individuals. Cultural sensitivity in mental health nursing.

NB: Only for selected BCur students.

Dynamics of nursing practice 351 (DNP 351)

Qualification	Undergraduate
Module credits	15.00
Programmes	BCur Nursing Science
Prerequisites	NUR 251,NUR 252,NUR 253,NUR 254,DNP 251,DNP 252,DNP 253,DNP 254,NPE 261,NPE 262
Language of tuition	English
Academic organisation	Nursing Science
Period of presentation	Quarter 1

Module content

Comprehensive family nursing.

Family life and family dynamics. Alternative families and lifestyles. Perspectives and approaches to comprehensive nursing care and support of families. Family violence and pathology. Marriage counselling and family therapy. Families in the perinatal period: unique needs and support (including basic antenatal and postnatal care).

NB: Only for selected BCur students.

Dynamics of nursing practice 352 (DNP 352)

Qualification	Undergraduate
Module credits	15.00
Programmes	BCur Nursing Science

Prerequisites	NUR 251,NUR 252,NUR 253,NUR 254,DNP 251,DNP 252,DNP 253,DNP 254,NPE 261,NPE 262
Language of tuition	English
Academic organisation	Nursing Science
Period of presentation	Quarter 2

Module content

Comprehensive community nursing.

Perspectives and approaches to comprehensive nursing care and support of communities. Relevant statutory control over primary health care (PHC) practices in South Africa. Relevant assessment skills. Sexually transmitted infections and communicable diseases. Therapeutic support of the community. Rehabilitative support of communities in need. Emphasis is placed on the facilitation and support of self-care related to physical, mental and environmental health and well-being.

NB: Only for selected BCur students.

Dynamics of nursing practice 353 (DNP 353)

Qualification	Undergraduate
Module credits	15.00
Programmes	BCur Nursing Science
Prerequisites	NUR 251,NUR 252,NUR 253,NUR 254,DNP 251,DNP 252,DNP 253,DNP 254,NPE 261,NPE 262
Language of tuition	English
Academic organisation	Nursing Science
Period of presentation	Quarter 4

Module content

NOTE: DNP 353 must be completed after DNP 354.

Principles of patient care management.

Planning, organising, leading and control in areas of direct patient care. Management in the rendering of patient care. Co-ordination of the multi- and transdisciplinary programme of treatment and rehabilitation. Aspects of professional practice. Introduction to labour law. Inspections of nursing and patient care units. The clinical practice setting as a teaching-learning situation and the principles of adult learning.

NB: Only for selected BCur students.

Dynamics of nursing practice 354 (DNP 354)

Qualification	Undergraduate
Module credits	15.00
Programmes	BCur Nursing Science
Prerequisites	NUR 251,NUR 252,NUR 253,NUR 254,DNP 251,DNP 252,DNP 253,DNP 254,NPE 261,NPE 262
Language of tuition	English

Academic organisation Nursing Science

Period of presentation Quarter 3

Module content

Note: DNP 354 must be completed prior to DNP 353.

Primary curative nursing for common and uncomplicated disease conditions.

Common and uncomplicated health problems related to the cardiovascular, respiratory, digestive, neurological, musculo-skeletal and genito-urinary system and infectious diseases of infancy and childhood, adulthood and the elderly. Complaints of the eyes. Musculoskeletal pain/dysfunction and non-traumatic bone/joint pain. Relevant assessment skills. Applied human nutrition.

NB: Only for selected BCur students.

Dynamics of nursing practice 451 (DNP 451)

Qualification Undergraduate

Module credits 10.00

Programmes [BCur Nursing Science](#)

Academic organisation	Human Nutrition
Period of presentation	Semester 2

Module content

Philosophy, development and challenges.

Dietetic application of communication principles 222 (DTT 222)

Qualification	Undergraduate
Module credits	12.00

Programmes	BDietetics Dietetics
Service modules	Faculty of Natural and Agricultural Sciences
Prerequisites	2nd-year status
Contact time	1 lecture per week, 1 discussion class per week
Language of tuition	English
Academic organisation	Human Nutrition
Period of presentation	Semester 2

Module content

A total diet approach to communicating food and nutrition messages using theoretical frameworks, including planning and evaluation of content as well as presentation skills.

Nutrition education 223 (DTT 223)

Qualification	Undergraduate
Module credits	12.00
Programmes	BDietetics Dietetics
Contact time	1 discussion class per week, 1 lecture per week
Language of tuition	English
Academic organisation	Human Nutrition
Period of presentation	Semester 2

Module content

A total diet approach to communicating food and nutrition messages using theoretical frameworks, including planning and evaluation of content as well as presentation skills.

Dietetic counselling 310 (DTT 310)

Qualification	Undergraduate
Module credits	20.00
Programmes	BDietetics Dietetics
Prerequisites	3rd-year status
Contact time	1 discussion class per week, 2 lectures per week
Language of tuition	Double Medium
Academic organisation	Human Nutrition
Period of presentation	Semester 1

Module content

Theory of counselling. Interviewing: Interview; the consultation process; verbal, written and non-verbal communication to clients, patients, employees as individuals or groups in different stages of the life cycle in health and disease in homogenic and trans/multi-cultural situations by means of applicable theoretical frameworks.

Clinic and discussion class 320 (DTT 320)

Qualification	Undergraduate
Module credits	6.00
Programmes	BDietetics Dietetics
Prerequisites	DTT 310
Contact time	1 discussion class per week
Language of tuition	Double Medium
Academic organisation	Human Nutrition
Period of presentation	Semester 2

Module content

Practice training: Management of a dietetics clinic. Practising the consultation process and practice management in a dietetics clinic.

Basis of environmental health 880 (EHM 880)

Qualification	Postgraduate
Module credits	10.00
Programmes	MPublic Health Public Health
Language of tuition	English
Academic organisation	School of Health Syst & Public
Period of presentation	Year

Module content

The principles of environmental health and environmental measures to prevent and control disease, both infectious and non-infectious diseases. The syllabus also includes ethical concepts previously learned during part of the discontinued module HET 870.

Dissertation: Environmental health 890 (EHM 890)

Qualification	Postgraduate
Module credits	180.00
Programmes	MSc Environmental Health
Language of tuition	Both Afr and Eng
Academic organisation	Health Sciences Dean's Office
Period of presentation	Year

Academic English for Health Sciences 111 (ELH 111)

Qualification	Undergraduate
Module credits	6.00
Programmes	BChD Dentistry MBChB Medicine
Service modules	Faculty of Health Sciences
Prerequisites	No prerequisites.
Contact time	2 lectures per week
Language of tuition	English
Academic organisation	Unit for Academic Literacy
Period of presentation	Semester 1

Module content

Proficiency in academic English by interpreting and contextualising philosophical and sociological texts prescribed during the first semester; medical ethics; study skill improvement.

**Presented to students in Health Sciences only.*

Academic English for Health Sciences (MBChB and BChD) 112 (ELH 112)

Qualification	Undergraduate
Module credits	6.00
Programmes	BChD Dentistry MBChB Medicine
Service modules	Faculty of Health Sciences
Prerequisites	No prerequisites.
Contact time	2 lectures per week
Language of tuition	English
Academic organisation	Unit for Academic Literacy
Period of presentation	Semester 2

Module content

Proficiency in Academic English used in the basic medical sciences; analysis, synthesis and presentation of select texts prescribed in the second semester. **Presented to students in Health Sciences only.*

Academic English for Health Sciences (BCur, BDietetics, BOH, BOccTher, BRad and BPhysT) 121 (ELH 121)

Qualification	Undergraduate
Module credits	6.00
Programmes	BCur Nursing Science BDietetics Dietetics BOH Oral Hygiene BOccTher Occupational Therapy BPhysT Physiotherapy BRad Diagnostics BSportSci BSportSci
Service modules	Faculty of Health Sciences
Prerequisites	No prerequisites.
Contact time	1 discussion class per week, 2 lectures per week
Language of tuition	English
Academic organisation	Unit for Academic Literacy
Period of presentation	Semester 1

Module content

Academic reading as well as academic writing and presentation skills, based on the approach followed in the healthcare sciences. **Presented to students in Health Sciences only.*

Academic English for Health Sciences122 (ELH 122)

Qualification	Undergraduate
----------------------	---------------

Module credits	6.00
Programmes	BCur Nursing Science BDietetics Dietetics BOH Oral Hygiene BOccTher Occupational Therapy BPhysT Physiotherapy BRad Diagnostics BSportSci BSportSci
Service modules	Faculty of Health Sciences
Prerequisites	No prerequisites.
Contact time	2 lectures per week, 1 discussion class per week
Language of tuition	English
Academic organisation	Unit for Academic Literacy
Period of presentation	Semester 2

Module content

Study of specific language skills required in the Health Care Sciences, including interviewing and report-writing skills. *Presented to students in Health Sciences only. (BCur, BDietetics, BOH, BOT, Brad, BPhysT)*

Academic English for Health Sciences (BClinical Medical Practice) 131 (ELH 131)

Qualification	Undergraduate
Module credits	6.00
Programmes	BCMP Clinical Medical Practice
Service modules	Faculty of Health Sciences
Prerequisites	No prerequisites.
Contact time	2 lectures per week, 1 discussion class per week
Language of tuition	English
Academic organisation	Unit for Academic Literacy
Period of presentation	Semester 1

Module content

Study of English used in medicine, aimed at developing reading, writing and interviewing skills in clinical situations. *Presented to students in Health Sciences only.

Academic English for Health Sciences (BClinical Medical Practice) 132 (ELH 132)

Qualification	Undergraduate
Module credits	6.00
Programmes	BCMP Clinical Medical Practice
Service modules	Faculty of Health Sciences

Prerequisites	No prerequisites.
Contact time	2 lectures per week, 1 discussion class per week
Language of tuition	English
Academic organisation	Unit for Academic Literacy
Period of presentation	Semester 2

Module content

Further study of English in medicine, with emphasis on language skills required in clinical contexts. **Presented to students in Health Sciences only.*

Endodontics 700 (END 700)

Qualification	Postgraduate
Module credits	100.00
Programmes	Postgrad Dipl in Dentistry Endodontics
Prerequisites	No prerequisites.
Contact time	1 seminar per week, 5 practical sessions per week, 1 discussion class per week
Language of tuition	Both Afr and Eng
Academic organisation	Odontology
Period of presentation	Year

*Alternative evening classes - 2 discussion classes per week Introduction to Literature in English (1) This module introduces the study of literature by examining a number of texts representing different genres (poetry, prose, drama). The texts studied here will be mainly from the pre-twentieth century era and may include texts written in English from both Africa and other parts of the world. The aim of this module is to equip students with the critical and analytical skills required for a perceptive reading of poetry, novels and plays.

*Alternative evening classes: 2 discussion classes per week

Introduction to Literature in English (2)

This module introduces the study of post-nineteenth century literature by examining a number of texts representing different genres (poetry, drama, prose). Texts will be from both Africa and other parts of the world. By the end of this module students should have the background and analytical skills to perceptively read modern and contemporary poetry, novels and plays.

Environmental assessments 785 (ENV 785)

Qualification	Postgraduate
Module credits	15.00
Programmes	BScHons Environmental Health BScHons Option: Geography and Environmental Science BSocSciHons Geography and Environmental Science
Service modules	Faculty of Health Sciences
Prerequisites	No prerequisites.
Contact time	5 lectures for period of one week, 5 practical sessions per week
Language of tuition	English
Academic organisation	Geography, Geoinf + Meteor
Period of presentation	Semester 1

Module content

The aim of this module is to understand the principles and processes behind environmental assessments. The module will give an overview of the history of assessments, compare assessment processes internationally, evaluate the strengths and weaknesses of different approaches, provide an overview of the South African regulatory context and the environmental authorisation process.

Ethics and values in healthcare, organisational behaviour change and strategy in health 770 (EOC 770)

Qualification	Postgraduate
Module credits	10.00
Programmes	PGDip Option: Executive Leadership
Prerequisites	No prerequisites.
Contact time	50 hours per week

Language of tuition	English
Academic organisation	Public Health Medicine
Period of presentation	Year

Module content

The delivery of healthcare services require high ethical values and standards to promote quality of life which improve patient outcomes. The innovative and creative leader in the health sector will be provided with skills in dealing with organisational behaviour patterns which influence behaviour change and policy strategy. The module will focus on the difficulties in changing workplace behaviour and mechanisms of how to sustain change strategies which are workable and enabling.

Introduction to environmental and occupational health 770 (EOH 770)

Qualification	Postgraduate
Module credits	10.00
Programmes	BScHons Environmental Health BScHons Occupational Hygiene PGDip Occupational Health PGDip Occupational Medicine and Health
Prerequisites	No prerequisites.
Contact time	1 practical per week, 1 other contact session per week, 16 lectures per week
Language of tuition	English
Academic organisation	Public Health Medicine
Period of presentation	Year

Environmental and occupational hygiene measuring techniques 771 (EOH 771)

Qualification	Postgraduate
Module credits	20.00
Programmes	BScHons Occupational Hygiene
Language of tuition	English
Academic organisation	School of Health Syst & Public
Period of presentation	Year

Module content

The module involves the in depth study of environmental and occupational hygiene measuring techniques. The focus of this module is the theoretical principles and the practical application of measuring techniques used to conduct environmental and occupational hygiene surveys. Relevant standards and guidelines to determine legal compliance are also discussed. Students must also complete practical coursework in the air quality laboratory to obtain competency in occupational hygiene equipment, calculations and interpretation of occupational hygiene survey results. Students will have to take a competency test after completing all practical coursework.

Occupational health and safety legislation in South Africa 772 (EOH 772)

Qualification	Postgraduate
Module credits	10.00
Programmes	BScHons Occupational Hygiene
Language of tuition	English
Academic organisation	School of Health Syst & Public
Period of presentation	Year

Module content

The module involves the study of current relevant occupational health and safety legislation in South Africa. The focus is to enable learners to have a working knowledge of current Acts. Scenarios and case studies to illustrate the application of the Acts will be discussed.

Occupational Hygiene examination 773 (EOH 773)

Qualification	Postgraduate
Module credits	1.00
Programmes	BScHons Occupational Hygiene
Language of tuition	English
Academic organisation	School of Health Syst & Public
Period of presentation	Year

Environmental health examination 774 (EOH 774)

Qualification	Postgraduate
Module credits	1.00
Programmes	BScHons Environmental Health
Language of tuition	English
Academic organisation	School of Health Syst & Public
Period of presentation	Year

Introduction to environmental and occupational health 870 (EOH 870)

Qualification	Postgraduate
Module credits	10.00
Prerequisites	No prerequisites.
Contact time	16 lectures per week, 1 practical per week
Language of tuition	English
Academic organisation	School of Health Syst & Public
Period of presentation	Year

Introduction to toxicology 871 (EOH 871)

Qualification	Postgraduate
Module credits	5.00
Programmes	MSc Public Health
Prerequisites	HME 870
Contact time	1 practical per week, 16 lectures per week
Language of tuition	English
Academic organisation	School of Health Syst & Public
Period of presentation	Year

Environmental epidemiology 870 (EOM 870)

Qualification	Postgraduate
Module credits	10.00
Programmes	MSc Epidemiology MSc Public Health
Prerequisites	HME 870, BOS 870
Contact time	16 lectures per week, 1 practical per week
Language of tuition	English
Academic organisation	School of Health Syst & Public
Period of presentation	Year

Module content

This module is an introduction of the various types of epidemiological study designs that are applied in the investigation of the association between environmental exposures and health outcomes. Apart from the classical epidemiological study designs (cross-sectional, case-control and cohort designs that are introduced in HME 870), other study designs such as the time-series, case-crossover, panel, spatial, genetic and molecular study designs are introduced and discussed. The statistical techniques that are applied in the time-series, case-crossover, panel, spatial, genetic and molecular study designs are discussed as well as the implication of random and systematic errors in exposure/health assessment on the measures of associations; hence a basic biostatistics vocabulary (introduced in BOS 870) is required.

Epidemiology 800 (EPI 800)

Qualification	Postgraduate
Module credits	24.00
Prerequisites	No prerequisites.
Language of tuition	Both Afr and Eng
Academic organisation	Public Health Medicine
Period of presentation	Year

Module content

The following epidemiology modules are compulsory: - Introduction to health measuring and informatics - Basic epidemiology and biostatistics - Analytical epidemiology - Taking of surveys - Introduction to health informatics - Basic quality assurance - Intermediary biostatistics - Introduction to health system research - Research ethics - Obtaining research awards - Scientific writing and reporting - Introduction to quantitative research - Community participation in research - Experimental epidemiology: clinical experiments

Dissertation: Epidemiology 890 (EPI 890)

Qualification	Postgraduate
Module credits	100.00
Programmes	MSc Epidemiology
Prerequisites	No prerequisites.

Academic organisation	Biokinetics and Sports Science
Period of presentation	Semester 2

Module content

*Closed – requires departmental selection Nutrition and health, digestion, absorption and metabolism, carbohydrates, fats, proteins, energy balance and weight management. Food environment, nutrition during growth, nutrition and physical fitness, nutrition and stress management.

Motor learning and development II 221 (EXE 221)

Qualification	Undergraduate
Module credits	16.00
Programmes	BSportSci BSportSci
Prerequisites	EXE 120
Contact time	3 lectures per week
Language of tuition	English
Academic organisation	Biokinetics and Sports Science
Period of presentation	Semester 2

Module content

*Closed – requires departmental selection This module introduces the field-based professional to the processes that underlie human movement learning. Principles of performance assessment, effective instruction, designing practice, rehabilitation and guidelines to optimise training experience, skill acquisition and performance will be included. Opportunities to apply principles and concepts will be incorporated.

Research methodology II 301 (EXE 301)

Qualification	Undergraduate
Module credits	20.00
Programmes	BSportSci BSportSci
Prerequisites	EXE 311
Contact time	2 lectures per week
Language of tuition	English
Academic organisation	Biokinetics and Sports Science
Period of presentation	Year

Module content

*Closed – requires departmental selection In this module the focus will be on fundamental quantitative or experimental research methodology, and statistics. The student will have the opportunity to demonstrate an understanding of the module through the medium of a written theoretical examination and a research proposal.

Functional anatomy 302 (EXE 302)

Qualification	Undergraduate
Module credits	20.00

Prerequisites	SMC 210
Contact time	3 lectures per week
Language of tuition	Double Medium
Academic organisation	Biokinetics and Sports Science
Period of presentation	Year

Module content

Closed – requires departmental selection Practical application of anatomical knowledge in the evaluation and treatment of sport and orthopaedic injuries and conditions. The student will apply this knowledge in the writing of rehabilitation and exercise programmes.

Sports injuries (upper and lower quarter) 310 (EXE 310)

Qualification	Undergraduate
Module credits	15.00
Programmes	BSportSci BSportSci
Prerequisites	EXE 210
Contact time	3 lectures per week
Language of tuition	English
Academic organisation	Biokinetics and Sports Science
Period of presentation	Semester 1

Module content

*Closed – requires departmental selection This module focuses primarily on preparing the student for specialisation in biokinetics at postgraduate level. The focus is primarily on the anatomical position, symptoms and identification of the most important soft tissue injuries in sport and the use of exercise as a rehabilitation modality in the final phase of rehabilitation.

Measurement and evaluation 320 (EXE 320)

Qualification	Undergraduate
Module credits	15.00
Programmes	BSportSci BSportSci
Contact time	3 lectures per week
Language of tuition	Double Medium
Academic organisation	Biokinetics and Sports Science
Period of presentation	Semester 2

Module content

*Closed – requires departmental selection Selecting appropriate tests, testing protocols and procedures, and evaluation of test data.

Applied nutrition 321 (EXE 321)

Qualification	Undergraduate
Module credits	20.00
Language of tuition	Double Medium
Academic organisation	Biokinetics and Sports Science
Period of presentation	Semester 2

Module content

*Closed - requires departmental selection Drug-nutrient interaction, gastrointestinal diseases, diseases and the heart, diabetes mellitus, and nutrition and Aids.

Sports injuries (III) 352 (EXE 352)

Qualification	Undergraduate
Module credits	15.00
Prerequisites	EXE 253
Language of tuition	Double Medium
Academic organisation	Sport and Leisure Studies
Period of presentation	Quarter 2

Module content

*Closed - requires departmental selection

This module focuses primarily on preparing the student for specialisation in biokinetics at postgraduate level. The focus is primarily on the anatomical position, symptoms and identification of the most important soft tissue injuries in sport and the use of exercise as a rehabilitation modality in the final phase of rehabilitation.

Research methodology II 361 (EXE 361)

Module content

*Closed - requires departmental selection Practical application of anatomical knowledge in the evaluation and treatment of sport and orthopaedic injuries and conditions. The student will apply this knowledge in the writing of rehabilitation and exercise programmes.

Pharmacology 171 (FAR 171)

Qualification	Undergraduate
Module credits	5.00
Programmes	BOH Oral Hygiene
Prerequisites	No prerequisites.
Contact time	2 lectures per week
Language of tuition	Double Medium
Academic organisation	Pharmacology
Period of presentation	Semester 2

Module content

The module will provide the oral hygiene student with appropriate pharmacological knowledge and understanding of drugs that necessitate treatment modification to the patient's treatment plan. The oral hygiene student will be equipped with a practical understanding of pharmaco-therapeutic concepts which are essential for prescribing medicaments used for oral hygiene, and to make an informed choice of a safe suitable local anaesthetic drug for the administering thereof to a patient. He/she must be able to apply knowledge of pharmacology in the clinical setting and in performing procedures pertaining to the scope of oral hygiene.

Period of presentation Semester 2

Module content

Introductory principles to clinical pharmacotherapy. Core pharmacotherapy and applicable clinical aspects of the most general and prominent diseases and conditions.

Clinical pharmacology 280 (FAR 280)

Qualification Undergraduate

Module credits 2.00

Programmes [BCMP Clinical Medical Practice](#)

Prerequisites FAR 180

Contact time 1 lecture per week

Language of tuition English

Academic organisation Pharmacology

Period of presentation Semester 2

Module content

Clinical pharmacotherapeutics including indications, contra-indications, side-effects and interactions of commonly prescribed medicines in South Africa. Rational prescribing and critique of prescriptions.

Clinical pharmacotherapy 370 (FAR 370)

Qualification Undergraduate

Module credits 8.00

Programmes [BChD Dentistry](#)

Prerequisites BOK 280,(BOK 281 or (BOK 285,287)),BOK 283,GNK 286,GNK 288,GPS 280,IKT 200,SMO 211,SMO 281

Contact time 2 lectures per week, 1 discussion class per week

Language of tuition Double Medium

Academic organisation Pharmacology

Period of presentation Year

Module content

Introductory principles of clinical pharmacotherapy in view of applicable patient problems, receptors for medicines, principles of structure activity relationships, dynamic and kinetic principles to bring pharmacological principles and clinical therapy together in a problem-based curriculum.

Clinical pharmacology 380 (FAR 380)

Qualification Undergraduate

Module credits 4.00

Programmes BCMP Clinical Medical Practice

Prerequisites FAR 280

Contact time 2 lectures per week

Language of tuition English

Academic organisation Pharmacology

Period of presentation Year

Module content

Clinical pharmacotherapeutics including indications, contra-indications, side-effects and interactions of commonly prescribed medicines in South Africa. Rational prescribing and critique of prescriptions.

Pharmacology 381 (FAR 381)

Qualification Undergraduate

Module credits 18.00

Programmes

BCur Nursing Science
BDietetics Dietetics
BPhysT Physiotherapy
BSc Biochemistry
BSc Human Genetics
BSc Human Physiology
BSc Medical Sciences
BScHons Pharmacology

Service modules Faculty of Natural and Agricultural Sciences

Prerequisites FLG 211, FLG 212, FLG 221, FLG 222 GS

Contact time 2 lectures per week

Language of tuition Double Medium

Academic organisation Pharmacology

Period of presentation Semester 1

Module content

Introduction, receptors, antagonism, kinetic principles, drugs that impact upon the autonomic and central nervous system, pharmacotherapy of hypertension, angina pectoris, myocardial infarction, heart failure, arrhythmias, and epilepsy. Diuretics, glucocorticosteroids, local anaesthetics, anaesthetic drugs, analgesics, iron and vitamins, oncostatics and immuno suppressants.

Pharmacology 382 (FAR 382)

Qualification Undergraduate

Module credits 18.00

Programmes	BCur Nursing Science BDietetics Dietetics BPhysT Physiotherapy BSc Biochemistry BSc Human Genetics BSc Human Physiology BSc Medical Sciences BScHons Pharmacology

Qualification	Postgraduate
Module credits	30.00
Programmes	MMed Medical Pharmacology PharmMed
Prerequisites	No prerequisites.
Language of tuition	Double Medium

Academic organisation Pharmacology

Period of presentation Year

Family-oriented patient care 780 (FFM 780)

Qualification Postgraduate

Module credits 20.00

Programmes [PGDip Family Medicine](#)

Prerequisites No prerequisites.

Language of tuition Both Afr and Eng

Academic organisation Family Medicine

Period of presentation Semester 1

Module content

Study of the family as the object of care; family systems theory; tools for family-oriented care; family life-cycle; ethics of treating families; family conference; the family and chronic illness; family violence and alcohol abuse in the family.

Financial administration 702 (FIA 702)

Qualification Postgraduate

Module credits 30.00

Programmes [PGDip Vocational Rehabilitation](#)

Prerequisites No prerequisites.

Contact time 4 discussion classes per week, 2 lectures per week, 1 seminar per week

Language of tuition Double Medium

Academic organisation Occupational Therapy

Period of presentation Year

Module content

Financial statements; budget; decision-making; behaviour of costs; cost-volume relation; allocation of costs; manufacturing costs, process of costs; activity costs; overhead costs; business planning.

Science and world views 155 (FIL 155)

Qualification Undergraduate

Module credits 6.00

Programmes [BChD Dentistry](#)
[BSc Extended programme - Biological and Agricultural Sciences](#)
[BSc Medical Sciences](#)
[BSc Physics](#)
[MBChB Medicine](#)

Service modules	Faculty of Health Sciences Faculty of Natural and Agricultural Sciences
Prerequisites	No prerequisites.
Contact time	1 lecture per week
Language of tuition	English
Academic organisation	Philosophy
Period of presentation	Semester 1

Module content

This is a broad introduction to the philosophy and history of science. Examples of themes and historical periods which are covered include: world views in ancient Greece; Socrates; Plato – the founder of Western thought; Aristotle – the foundation of a new tradition; Leonardo da Vinci; the foundation of modern science; the wonder years of the seventeenth century – the flourishing of the sciences and philosophy; the rising of mechanization; a drastic turn in man's vision – the rise of psychology; how the theory of relativity changed our view of the cosmos; quantum theory and its implications for the modern world view; the biological sciences and the secrets of life; the rise and role of psychology; the neuro-sciences; the place, role and benefit of philosophical thought in the sciences.

Physiology and pathophysiology 701 (FIP 701)

Qualification	Postgraduate
Module credits	10.00
Programmes	PGDip Hand Therapy
Prerequisites	No prerequisites.
Contact time	1 lecture per week
Language of tuition	Double Medium
Academic organisation	Physiology
Period of presentation	Year

Module content

Physiology of the integration of hand function; brain plasticity, pain. Regeneration of skin, bone, muscle and nerve tissue; infection; inflammation.

Physiology 171 (FLG 171)

Qualification	Undergraduate
Module credits	8.00
Programmes	BOH Oral Hygiene
Prerequisites	No prerequisites.
Contact time	2 lectures per week
Language of tuition	English

Academic organisation Physiology

Period of presentation Semester 1

Module content

Physiology is the study of organisms at a cellular and system level. Physiology will provide the oral hygiene student with the necessary knowledge to understand functioning and abnormalities of the human body, the vital organs necessary for normal functioning and the systems that provide essential communication for the control of the body functions and homeostasis. The module content will serve as pre-knowledge for clinical subjects.

Introductory and neurophysiology 211 (FLG 211)

Qualification Undergraduate

Module credits 12.00

Programmes

BDietetics Dietetics
BSc Biochemistry
BSc Human Genetics
BSc Human Physiology
BSc Human Physiology, Genetics and Psychology
BSc Medical Sciences
BSc Microbiology
BSc Nutrition

Service modules Faculty of Natural and Agricultural Sciences

Prerequisites CMY 117, CMY 127, MLB 111 and PHY 131

Contact time 2 lectures per week, 1 practical per week

Language of tuition English

Academic organisation Physiology

Period of presentation Semester 1

Module content

Orientation in physiology, homeostasis, cells and tissue, muscle and neurophysiology, cerebrospinal fluid and the special senses.

Practical work: Practical exercises to complement the theory

Circulatory physiology 212 (FLG 212)

Qualification Undergraduate

Module credits 12.00

Programmes

BDietetics Dietetics
BSc Biochemistry
BSc Human Genetics
BSc Human Physiology
BSc Human Physiology, Genetics and Psychology
BSc Medical Sciences
BSc Microbiology
BSc Nutrition

Service modules Faculty of Natural and Agricultural Sciences

Prerequisites CMY 117, CMY 127, MLB 111 and PHY 131

Contact time 1 practical per week, 2 lectures per week

Language of tuition English

Academic organisation Physiology

Period of presentation Semester 1

Module content

Body fluids; haematology; cardiovascular physiology and the lymphatic system. Practical work: Practical exercises to complement the theory.

Lung and renal physiology, acid-base balance and temperature 221 (FLG 221)

Qualification Undergraduate

Module credits 12.00

Programmes

BDietetics Dietetics
BSc Biochemistry
BSc Human Genetics
BSc Human Physiology
BSc Human Physiology, Genetics and Psychology
BSc Medical Sciences
BSc Microbiology
BSc Nutrition

Service modules Faculty of Natural and Agricultural Sciences

Prerequisites FLG 211 and FLG 212

Contact time 1 practical per week, 2 lectures per week

Language of tuition English

Academic organisation Physiology

Period of presentation Semester 2

Module content

Structure, gas exchange and non-respiratory functions of the lungs; structure, excretory and non-urinary functions of the kidneys, acid-base balance, as well as the skin and body temperature control. Practical work: Practical exercises to complement the theory.

Digestion, endocrinology and reproductive systems 222 (FLG 222)

Qualification Undergraduate

Module credits 12.00

Programmes	BDietetics Dietetics
	BSc Biochemistry
	BSc Human Genetics
	BSc Human Physiology
	BSc Human Physiology, Genetics and Psychology
	BSc Medical Sciences
	BSc Microbiology
	BSc Nutrition

Service modules	Faculty of Natural and Agricultural Sciences
------------------------	----------------------------------------------

Prerequisites	FLG 211 and FLG 212
----------------------	---------------------

Contact time	1 practical per week, 2 lectures per week
---------------------	-------------------------------------------

Language of tuition	English
----------------------------	---------

Academic organisation	Physiology
------------------------------	------------

Period of presentation	Semester 2
-------------------------------	------------

Module content

Nutrition, digestion and metabolism; hormonal control of the body functions and the reproductive systems.
Practical work: Practical exercises to complement the theory.

Industrial physiology 322 (FLG 322)

Qualification	Undergraduate
----------------------	---------------

Module credits	18.00
-----------------------	-------

Programmes	BSc Biochemistry
	BSc Human Genetics
	BSc Human Physiology
	BSc Medical Sciences

Service modules	Faculty of Natural and Agricultural Sciences
------------------------	----------------------------------------------

Prerequisites	BCM 253 GS, BCM 254 GS, BCM 255 GS, BCM 256 GS, BCM 263 GS, BCM 264 GS, BCM 265 GS, BCM 266 GS, OF (BCM 251 GS, BCM 252 GS, BCM 261 GS, BCM 262 GS), FLG 221 and FLG 222
----------------------	--------------------------------------------------------------------------------------------------------------------------------------------------------------------------

Contact time	1 lecture per week, 1 practical per week
---------------------	------------------------------------------

Language of tuition	English
----------------------------	---------

Academic organisation	Physiology
------------------------------	------------

Period of presentation	Semester 2
-------------------------------	------------

Module content

Problem-orientated module, with the emphasis on occupational health and safety in the industrial environment. Integration of different physiological systems is required. Practical work: Exposure to occupational hygiene measurement techniques. *This module is reserved for students that intend studying the honours in OHS.

Higher neurological functions 327 (FLG 327)

Qualification	Undergraduate
----------------------	---------------

Module credits 18.00

Programmes

BSc Biochemistry
BSc Human Genetics
BSc Human Physiology
BSc Human Physiology, Genetics and Psychology
BSc Medical Sciences

Service modules Faculty of Natural and Agricultural Sciences

Prerequisites BCM 251 GS, BCM 252 GS, BCM 261 GS, BCM 262 GS and FLG 221 and FLG 222

Contact time 2 lectures per week, 1 practical per week

Language of tuition English

Academic organisation Physiology

Period of presentation Semester 1

Module content

Overview of higher cognitive functions and the relationship between psyche, brain and immune system.
Practical work: Applied practical work.

Cellular and developmental physiology 330 (FLG 330)

Qualification Undergraduate

Module credits 18.00

Programmes

BSc Biochemistry
BSc Human Genetics
BSc Human Physiology
BSc Medical Sciences

Service modules Faculty of Natural and Agricultural Sciences

Prerequisites BCM 251 GS, BCM 252 GS, BCM 261 GS, BCM 262 GS and FLG 221 and FLG 222

Contact time 1 practical per week, 2 lectures per week

Language of tuition English

Academic organisation Physiology

Period of presentation Semester 1

Module content

This module comprises of studies of cell cycle regulation and signal transduction upon induction of growth or types of cell death. Study of the physiological development and adaptations from the foetus through to the aged. Practical work: Exposure to applied cellular- and in vitro cell culture techniques

Exercise and nutrition science 331 (FLG 331)

Qualification Undergraduate

Module credits 18.00

Programmes	BSc Biochemistry BSc Human Genetics BSc Human Physiology BSc Human Physiology, Genetics and Psychology BSc Medical Sciences
-------------------	-----------------------------------------------------------------------------------------------------------------------------------------

Service modules	Faculty of Natural and Agricultural Sciences
Prerequisites	BCM 251 GS, BCM 252 GS, BCM 261 GS, BCM 262 GS and FLG 221 and FLG 222
Language of tuition	English
Academic organisation	Physiology
Period of presentation	Semester 2

Module content

*Closed - requires departmental selection. Mechanisms of muscle contraction and energy sources. Cardio-respiratory changes, thermo-regulation and other adjustments during exercise. Use and misuse of substances to improve performance. Practical work: Applied practical work.

Applied and pathophysiology 332 (FLG 332)

Qualification	Undergraduate
----------------------	---------------

Module credits	18.00
-----------------------	-------

Programmes	BSc Biochemistry BSc Human Genetics BSc Human Physiology BSc Human Physiology, Genetics and Psychology BSc Medical Sciences
-------------------	-----------------------------------------------------------------------------------------------------------------------------------------

Service modules	Faculty of Natural and Agricultural Sciences
Prerequisites	BCM 251 GS, BCM 252 GS, BCM 261 GS, BCM 262 GS, FLG 221 and FLG 222
Contact time	2 lectures per week, 1 practical per week
Language of tuition	English
Academic organisation	Physiology
Period of presentation	Semester 2

Module content

Integration of all the human physiological systems.
Practical work: Applied practical work.

Clinically applied anatomy 781 (FMA 781)

Qualification	Postgraduate
Module credits	12.00
Prerequisites	No prerequisites.
Language of tuition	Both Afr and Eng

Academic organisation Family Medicine

Period of presentation Semester 1

Module content

Study of the upper limb, including the breast; head and neck; thorax; abdomen; pelvis; lower limb; embryology and histology.

Clinically applied anatomy 782 (FMA 782)

Qualification Postgraduate

Module credits 10.00

Programmes [PGDip Family Medicine](#)

Prerequisites No prerequisites.

Contact time 1 seminar per week

Language of tuition Both Afr and Eng

Academic organisation Family Medicine

Period of presentation Semester 1

Cardiovascular diseases 781 (FMC 781)

Qualification Postgraduate

Module credits 12.00

Prerequisites No prerequisites.

Language of tuition Both Afr and Eng

Academic organisation Family Medicine

Period of presentation Semester 1

Chronic diseases 781 (FMD 781)

Qualification Postgraduate

Module credits 10.00

Programmes [PGDip Family Medicine](#)

Prerequisites No prerequisites.

Language of tuition Both Afr and Eng

Academic organisation Family Medicine

Period of presentation Semester 1 and/or 2

Module content

Study of diabetes mellitus, asthma, epilepsy, hypertension, cardiac failure, obesity and chronic pain.

Medical ethics 781 (FME 781)

Qualification	Postgraduate
Module credits	12.00
Prerequisites	No prerequisites.
Language of tuition	Both Afr and Eng
Academic organisation	Family Medicine
Period of presentation	Semester 1

Psychiatry 781 (FMF 781)

Qualification	Postgraduate
Module credits	10.00
Programmes	PGDip Family Medicine
Prerequisites	No prerequisites.
Language of tuition	Both Afr and Eng
Academic organisation	Family Medicine
Period of presentation	Semester 1

Module content

Psychiatry in family practice Study of depression, anxiety; suicide; the difficult adolescent; substance use and abuse; schizophrenia; dementia and delirium.

Geriatrics 781 (FMG 781)

Qualification	Postgraduate
Module credits	10.00
Prerequisites	No prerequisites.
Language of tuition	Both Afr and Eng
Academic organisation	Family Medicine
Period of presentation	Semester 1

Module content

Study of theories of ageing; physiology of ageing; demography; presentation of disease in the aged; cardiovascular system; conditions of the joints; respiratory system; central and peripheral nervous system; digestive tract; urinary tract; endocrine system; haematology; skin and sense organs; psycho-geriatrics; falls in the elderly; infections; cancer; terminal care; nutrition; rehabilitation; drugs and preventive geriatrics.

Infectious diseases 781 (FMI 781)

Qualification	Postgraduate
Module credits	10.00
Programmes	PGDip Family Medicine

Prerequisites No prerequisites.

Language of tuition Both Afr and Eng

Academic organisation Family Medicine

Period of presentation Semester 1

Module content

Introduction; study of contagious disease important to the traveller; contagious diseases in the tropical regions; viral illnesses in children; fever of unknown origin; sexually transmitted diseases; haemorrhagic fever; infective diarrhoea; meningitis; leprosy; HIV/Aids; tuberculosis; rabies; school attendance and infectious diseases; community-acquired pneumonia (GVP); acute virus hepatitis; rational use of antibiotics and other exogenous infections.

Physiology 781 (FMP 781)

Qualification Postgraduate

Module credits 10.00

Prerequisites No prerequisites.

Language of tuition Double Medium

Academic organisation Family Medicine

Period of presentation Semester 1

Module content

Study of the nervous system; muscle physiology (skeletal, smooth and heart muscle); endocrine physiology; physiology of reproduction (age-related); cardiovascular physiology; thermoregulation; nutrition and digestion; acid-base balance; kidney, salt and water balance; blood and respiration.

Sports medicine 781 (FMS 781)

Qualification Postgraduate

Module credits 10.00

Programmes [PGDip Family Medicine](#)

Prerequisites No prerequisites.

Language of tuition Both Afr and Eng

Academic organisation Family Medicine

Period of presentation Semester 1

Module content

An approach to sports injuries: concepts of training and fitness; energy systems and transfer of energy, nutrition, health and training; special investigations; injury; strapping and wrapping; stress fractures; examination and clinical conditions of different areas, upper limb, lower limb, pelvis; trunk and head: special considerations of age and gender – the child, the female athlete and the elderly exerciser; exercising under certain conditions – heat, cold, underwater altitude and time zones; sport and medical conditions – diabetes mellitus; HIV/Aids; drugs, alcohol; the tired athlete; concussion/boxing; exercise induced headache and medical coverage of sports events.

Rheumatology 781 (FMU 781)

Qualification	Postgraduate
Module credits	10.00
Prerequisites	No prerequisites.
Language of tuition	Both Afr and Eng
Academic organisation	Family Medicine
Period of presentation	Semester 1

Module content

Study of rheumatoid arthritis; osteoarthritis; gout; ceronegative spondilo-arthropathy; collagen diseases; lower back pain; fibromyalgia and osteoporosis.

Practice management 780 (FMX 780)

Qualification	Postgraduate
Module credits	20.00
Programmes	PGDip Family Medicine
Prerequisites	No prerequisites.
Language of tuition	Both Afr and Eng
Academic organisation	Family Medicine
Period of presentation	Semester 1

Module content

Study of human resource management; financial management; auditing of management and services management.

Forensic odontology 700 (FOT 700)

Qualification	Postgraduate
Module credits	100.00
Programmes	Postgrad Dipl in Dentistry Forensic Odontology
Prerequisites	No prerequisites.
Language of tuition	Both Afr and Eng
Academic organisation	Oral Pathology and Oral Biolog
Period of presentation	Year

Child and adolescent psychiatry Part 1 801 (FPY 801)

Qualification	Postgraduate
Module credits	120.00
Programmes	MPhil Child and Adolescent Psychiatry (Coursework)

Prerequisites	Relevant base speciality registration with HPCSA
Contact time	24 months
Language of tuition	English
Academic organisation	Psychiatry
Period of presentation	Year

Module content

Curriculum as designated by the relevant College of Medicine at www.collegemedsa.ac.za

Forensic psychiatry for medical subspecialities Part 1 802 (FPY 802)

Qualification	Postgraduate
Module credits	120.00
Prerequisites	Relevant base speciality registration with HPCSA
Contact time	24 months
Language of tuition	English
Academic organisation	Psychiatry
Period of presentation	Year

Module content

Curriculum as designated by the relevant College of Medicine at www.collegemedsa.ac.za

Physiology 110 (FSG 110)

Qualification Undergraduate

Module credits 6.00

Programmes

BA Audiology
BConsumer Science Foods: Retail Management
BConsumer Science Hospitality Management
BSc Extended programme - Biological and Agricultural Sciences
BSc Food Management (4 years)
BSportSci BSportSci

Service modules

Faculty of Humanities
Faculty of Natural and Agricultural Sciences

Prerequisites No prerequisites.

Contact time 3 lectures per week

Language of tuition Both Afr and Eng

Academic organisation Physiology

Period of presentation Semester 1

Module content

Introduction (terminology and anatomical orientation); chemical principles; cytology and histology; neuro-physiology and the senses; haematology and body fluids; cardiovascular system.

Physiology 120 (FSG 120)

Qualification Undergraduate

Module credits 6.00

Programmes

BA Audiology
BConsumer Science Foods: Retail Management
BConsumer Science Hospitality Management
BSc Extended programme - Biological and Agricultural Sciences
BSc Food Management (4 years)
BSportSci BSportSci

Service modules	Faculty of Humanities Faculty of Natural and Agricultural Sciences
Prerequisites	FSG 110
Contact time	3 lectures per week
Language of tuition	Both Afr and Eng
Academic organisation	Physiology
Period of presentation	Semester 2

Module content

Respiratory system; nutrition; digestion and metabolism; kidneys and acid-base equilibrium; endocrinology; reproduction physiology and reproduction; skin and body temperatures.

Physiology 161 (FSG 161)

Qualification	Undergraduate
Module credits	12.00
Programmes	BCur Nursing Science BOccTher Occupational Therapy BPhysT Physiotherapy BRad Diagnostics
Prerequisites	No prerequisites.
Contact time	1 practical per week, 4 lectures per week
Language of tuition	Double Medium
Academic organisation	Physiology
Period of presentation	Quarter 3

Module content

Introduction and neurophysiology: homeostasis, cytology and histology, muscles and neurophysiology, cerebrospinal fluid, the special senses.

Physiology 162 (FSG 162)

Qualification	Undergraduate
Module credits	12.00
Programmes	BCur Nursing Science BOccTher Occupational Therapy BPhysT Physiotherapy BRad Diagnostics
Prerequisites	No prerequisites.
Contact time	4 lectures per week, 1 practical per week
Language of tuition	Double Medium

Academic organisation Physiology

Period of presentation Quarter 4

Module content

Circulatory physiology: Body fluids, haematology, body defence mechanisms, cardio-vascular physiology, lymphatic system.

Physiology 185 (FSG 185)

Qualification Undergraduate

Module credits 12.00

Programmes [BCMP Clinical Medical Practice](#)

Prerequisites No prerequisites.

Contact time 1 discussion class per week, 6 lectures per week

Language of tuition English

Academic organisation Physiology

Period of presentation Semester 1

Module content

Introduction to Physiology, homeostasis and body fluids, cell physiology, haematology and immunology, cardiovascular system, respiration, neurophysiology and senses, gastrointestinal physiology and nutrition, kidneys, endocrinology, reproduction, skin and body temperature.

Physiology 251 (FSG 251)

Qualification Undergraduate

Module credits 6.00

Programmes [BCur Nursing Science](#)
[BOccTher Occupational Therapy](#)
[BPhysT Physiotherapy](#)
[BRad Diagnostics](#)

Prerequisites RAN 100, RFI 110, FSG 161, FSG 162, MTL 180, RAW 180, RAW 182

Contact time 4 lectures per week, 1 practical per week

Language of tuition Double Medium

Academic organisation Physiology

Period of presentation Quarter 1

Module content

Structure, gas exchange and secretory functions of the lungs; build, excretory and non-urinary functions of the kidneys, acid-base balance, as well as the skin and body temperature control.

Practical work: lung functions/spirometry, kidney function tests – side-room urine examinations. Digestion. Metabolism. Pathophysiology.

Physiology 252 (FSG 252)

Qualification	Undergraduate
Module credits	6.00
Programmes	BCur Nursing Science BOccTher Occupational Therapy BPhysT Physiotherapy BRad Diagnostics
Prerequisites	RAN 100,RFI 110,FSG 161,FSG 162,RAW 180,RAW 182,MTL 180,
Contact time	1 practical per week, 4 lectures per week
Language of tuition	Double Medium
Academic organisation	Physiology
Period of presentation	Quarter 2

Module content

Nutrition, digestion and metabolism, hormonal control of body functions and the reproductive systems.
Practical work: endocrine system, reproductive system, pregnancy test.

Physiology 261 (FSG 261)

Qualification	Undergraduate
Module credits	6.00
Programmes	BOccTher Occupational Therapy BPhysT Physiotherapy
Prerequisites	PHY 131, CMY 151, ANA 151, ANA 152, ANA 161, ANA 162, FSG 161, FSG 162, FTP 100
Contact time	2 lectures per week
Language of tuition	Double Medium
Academic organisation	Physiology
Period of presentation	Quarter 3

Module content

Special neuro and muscle physiology.

Physiology 262 (FSG 262)

Qualification	Undergraduate
Module credits	6.00
Programmes	BOccTher Occupational Therapy BPhysT Physiotherapy BRad Diagnostics
Prerequisites	RAN 100, RFI 110, FSG 161, FSG 162, RAW 180, RAW 182, MTL 180

Contact time 3 lectures per week

Language of tuition Double Medium

Academic organisation Physiology

Period of presentation Quarter 4

Module content

Applied pathophysiology.

Physiology 270 (FSG 270)

Qualification Undergraduate

Module credits 72.00

Programmes BChD Dentistry

Prerequisites GNK 286, GNK 289, GPS 280, MDB 270, POH 270, ODO 270, PRD 270, ZUL 110, AFR 111, IDE 270

Contact time 1 practical per week, 6 lectures per week

Language of tuition English

Academic organisation Physiology

Period of presentation Semester 1 and Semester 2

Module content

- Metabolism
- Neurophysiology
- The somatic sensory system, pain and special senses
- Muscle physiology
- Haematology
- Cardiovascular system
- Respiratory system
- The Urinary system
- The Gastro intestinal system
- The Endocrine system
- The Reproductive system
- Temperature homeostasis, sickness behaviour and skin
- Immunology
- Bone and cartilage metabolism and fracture healing
- Pathophysiology

Applied physiology 370 (FSG 370)

Qualification Undergraduate

Module credits 12.00

Prerequisites BOK 280,(BOK 281 or BOK 285,287)),BOK 283,GNK 286,GNK 288,GPS 280,IKT 200,SMO 211,SMO 281

Contact time 4 lectures per week, 1 discussion class per week

Language of tuition Both Afr and Eng

Academic organisation Physiology

Period of presentation Semester 1

Qualification Postgraduate

Module credits 28.00

Programmes [MOccTher Activity Theory](#)
[MOccTher Hand Therapy](#)
[MOccTher Neurology](#)
[MOccTher Paediatrics](#)
[MOccTher Psychiatry](#)

Prerequisites No prerequisites.

Contact time 1 seminar per week, 1 discussion class per week, 1 lecture per week

Language of tuition Double Medium

Academic organisation Physiology

Period of presentation Year

Module content

An indepth knowledge of applicable physiological aspects.

Mathematical methods 710 (FSK 710)

Qualification Postgraduate

Module credits 15.00

Programmes [BScHons Medical Physics](#)

Prerequisites No prerequisites.

Contact time 6 lectures per week

Language of tuition Both Afr and Eng

Academic organisation Physics

Period of presentation Semester 1

Module content

Series; complex analysis; Bessel and other special functions; integral transforms; Green functions

Classical dynamics 711 (FSK 711)

Qualification Postgraduate

Module credits 15.00

Programmes [BScHons Medical Physics](#)

Prerequisites No prerequisites.

Contact time 6 lectures per week

Language of tuition Both Afr and Eng

Academic organisation Physics

Period of presentation Semester 1

Module content

Advanced problems in classical dynamics; Hamilton formalism; canonical transformations; continuum mechanics

Quantum mechanics (I) 713 (FSK 713)

Qualification Postgraduate

Module credits 15.00

Programmes [BScHons Medical Physics](#)

Prerequisites No prerequisites.

Contact time 4 lectures per week

Language of tuition Both Afr and Eng

Academic organisation Physics

Period of presentation Semester 1

Module content

Measurement process, General indefinite relations, Harmonic oscillator, symmetry, invariants and conservation laws, angular momentum, spin, perturbation theory, Schrödinger-Heisenberg and interaction pictures

Electrodynamics (I) 714 (FSK 714)

Qualification Postgraduate

Module credits 15.00

Programmes [BScHons Medical Physics](#)

Prerequisites No prerequisites.

Contact time 4 lectures per week

Language of tuition Both Afr and Eng

Prerequisites	No prerequisites.
Contact time	1 lecture per week
Language of tuition	Both Afr and Eng
Academic organisation	Physiotherapy
Period of presentation	Year

Clinical physiotherapy: Orthopaedic manual therapy 807 (FTK 807)

Qualification	Postgraduate
Module credits	160.00
Programmes	MPhyst Orthopaedic Manual Therapy
Prerequisites	No prerequisites.
Contact time	1 lecture per week
Language of tuition	Both Afr and Eng
Academic organisation	Physiotherapy
Period of presentation	Year

Clinical physiotherapy: Sports medicine 808 (FTK 808)

Qualification	Postgraduate
Module credits	160.00
Programmes	MPhyst Sports Medicine
Prerequisites	No prerequisites.
Contact time	1 seminar per week, 1 lecture per week
Language of tuition	Both Afr and Eng
Academic organisation	Physiotherapy
Period of presentation	Year

Physiotherapy 100 (FTP 100)

Qualification	Undergraduate
Module credits	15.00
Programmes	BPhysT Physiotherapy
Prerequisites	No prerequisites.

Contact time Community Engagement, 4 practicals per week, 3 lectures per week, 1 web-based period per week

Language of tuition Both Afr and Eng

Academic organisation Physiotherapy

Period of presentation Year

Module content

General introduction and orientation to physiotherapy, PBL skills and evidence-based approach to physiotherapy. Introduction to biomechanics, terminology, passive movements, measurement of the range of movement, clinical visits and patient-handling.

Kinetics: axis, planes, levers, effect of gravity on the human body.

Applied electro biomechanics: introduction to radiation, high-frequency, ultrasound, shortwave diathermy, laser, ultraviolet, infrared radiation.

Introduction to manual therapy: general introduction to massaging, evaluation of soft tissue, types applications and effects of massage techniques on various types of tissue, modalities application to the human body.

Human movement science: introduction to biomechanics, study of human movement, functional evaluation, muscle-testing, types of muscular activity, kinematics: analysis of movement, motor control and posture, characteristics of normal movement. Applied electrobiomechanics, introduction to medium frequency currents, Russian currents. Pulmonology.

Note: Physiotherapy is presented in a problem-based and integrated manner.

Physiotherapy 203 (FTP 203)

Qualification Undergraduate

Module credits 45.00

Programmes BPhyST Physiotherapy

Prerequisites No prerequisites.

Contact time 1 web-based period per week, Community Engagement, 8 lectures per week, 4 practicals per week

Language of tuition Double Medium

Academic organisation Physiotherapy

Period of presentation Year

Module content

The problem-based learning approach to the principles of human movement science manual therapy for soft tissue and electro-biomechanics. This approach is applied by using selected clinical conditions of the thorax, pelvis and hip-joint over the total life spectrum.

The problem-based approach to the treatment of selected clinical conditions of the knee, ankle and foot complex, the pectoral girdle and gleno-humeral joint, the elbow, forearm and wrist and hand complex over the total life-cycle, through the application of the principles of human movement science manual therapy for soft tissue and electro-biomechanic.

Physiotherapy clinical practice 220 (FTP 220)

Qualification	Undergraduate
Module credits	13.00
Programmes	BPhyst Physiotherapy
Prerequisites	PHY 131,CMY 151,FSG 161,FSG 162,ANA 151,FTP 100,ANA 152,SLK 110,ANA 161,ANA 162,CIL 111 and 121 or AIM 101 or AIM 111 and 121 or ELH 121 and 122
Contact time	1 lecture per week, Community Engagement, 1 other contact session per week
Language of tuition	Both Afr and Eng
Academic organisation	Physiotherapy
Period of presentation	Semester 2

Module content

Study of the epidemiology, prevalence and incidence of selected clinical conditions. Students acquire clinical experience through the treatment of selected clinical conditions in various health care institutions, practices and clinics.

A theoretical and clinical examination will take place after conclusion of the module.

Physiotherapy 300 (FTP 300)

Qualification	Undergraduate
Module credits	25.00
Programmes	BPhyst Physiotherapy
Prerequisites	FSG 251,FSG 252,FSG 261,FSG 262,ANP 210,GMB 252,GMB 253,FTP 241,POL 251,FTP 231,
Contact time	3 practicals per week, 2 other contact sessions per week, 2 lectures per week, 3 web-based periods per week, 1 discussion class per week
Language of tuition	Both Afr and Eng
Academic organisation	Physiotherapy
Period of presentation	Year

Module content

Theory of comprehensive physiotherapeutic management (prevention, promotion, restoration, and rehabilitation) of notifiable, non-notifiable and infectious conditions.

Diseases of lifestyle, chronic disease, the impact of HIV on disability and on patients with trauma, mental health.

Impact of physical/economic/political/

psychosocial environment on health and well-being, health promotion and development and sports science.

Comprehensive physiotherapy management is applied to infant health, during childhood, adolescent health, women's and men's health, health and disease in middle age and geriatrics.

Physiotherapy clinical practice 301 (FTP 301)

Qualification	Undergraduate
Module credits	50.00

Programmes	BPhysT Physiotherapy
Prerequisites	FSG 251,FSG 252,FSG 261,FSG 262,ANP 210,GMB 252,GMB 253,FTP 231,FTP 241,POL 251
Contact time	2 web-based periods per week, 2 practicals per week, 3 lectures per week, 1 discussion class per week, Community Engagement
Language of tuition	Both Afr and Eng
Academic organisation	Physiotherapy
Period of presentation	Year

Module content

Comprehensive clinical management of patients with communicable and non-communicable diseases and conditions, patients with an impairment or disability as a result of the impact of physical/economic/political and psychosocial environment on health and well-being, health promotion, and development and sports science. Comprehensive clinical management is applied where relevant on infant health, during childhood, adolescence, in women's and men's health, and health and disease in middle age and geriatrics, diseases of lifestyle, chronic disease, impact of HIV on disability, victims of trauma, and/or a mental health condition.

Physiotherapy 400 (FTP 400)

Qualification	Undergraduate
Module credits	20.00
Programmes	BPhysT Physiotherapy
Prerequisites	RHC 451, RHC 452, FAR 381, FAR 382, FTP 300, FTP 301, POL 300
Contact time	1 lecture per week, 1 discussion class per week, 2 practicals per week, 1 web-based period per week, Community Engagement
Language of tuition	Both Afr and Eng
Academic organisation	Physiotherapy
Period of presentation	Year

Module content

Advanced comprehensive physiotherapeutic management of communicable and non-communicable diseases and conditions. This includes diseases of lifestyle, chronic disease, impact of HIV on disability, victims of trauma, and mental health. Impact of physical/economic/political/psychosocial environment of health and well-being, health promotion and development, and sport science. The comprehensive physiotherapeutic management is applied to patients of all ages where relevant: in infant health, childhood, adolescent health, women's and men's health, health and disease in middle age and geriatrics and is based on the epidemiology of disease. The module includes 800 hours clinical experience in a variety of health care scenarios.

Examination period: October/November.

Physiotherapy research 401 (FTP 401)

Qualification	Undergraduate
Module credits	20.00

Programmes BPhysT Physiotherapy

Prerequisites RHC 451,RHC 452,FAR 382,FAR 381,FTP 300,FTP 301,POL 300

Language of tuition Both Afr and Eng

Academic organisation Physiotherapy

Period of presentation Year

Module content

The theoretical and practical application of research principles in physiotherapy and submission of an article based on research.

Examination period: October/November.

Physiotherapy clinical practice 402 (FTP 402)

Qualification Undergraduate

Module credits 88.00

Programmes BPhysT Physiotherapy

Prerequisites RHC 451, RHC 452, FAR 381, FAR 382, FTP 300, FTP 301, POL 300

Community as patient 270 (GAP 270)

Qualification	Undergraduate
Module credits	11.00
Prerequisites	FLG 170,GMB 170,MDB 170,TBW 170,ODO 170,PDL 170,DFA 170,VKM 170,GAP 170,RAD 170
Contact time	1 practical per week, 1 lecture per week
Language of tuition	English
Academic organisation	Community Dentistry
Period of presentation	Year

Module content

The module will enable the recently qualified oral hygienist to diagnose the oral health problems of any given community. Application of the knowledge gained from the module will enable him/her to participate in relevant primary and secondary preventive programmes to improve the oral health of that community in accordance with the Public Oral Health Policy of South Africa.

Community as patient 271 (GAP 271)

Qualification	Undergraduate
Module credits	14.00
Programmes	BOH Oral Hygiene
Prerequisites	ELH 121, ELH 122, AIM 101, ACO 171, ANA 171, FAR 171, FLG 171, GMB 171, MDB 171, ODO 171, ORD 171, PDL 171, TBW 171, VKM 171, NHS 171
Contact time	Community Engagement, 1 lecture per week for 24 weeks, 2 practicals per week (30 week period)
Language of tuition	Double Medium
Academic organisation	Community Dentistry
Period of presentation	Year

Module content

The module will enable the oral hygiene student to diagnose the oral health problems of any given community. Application of the knowledge gained from the module will enable him/her to participate in relevant primary and secondary preventive programmes to improve the oral health of that community in accordance with the public Oral Health Policy of the RSA. Oral hygiene students will visit special schools, nursery schools and hospitals where oral health programmes are implemented and maintained.

Community as patient 371 (GAP 371)

Qualification	Undergraduate
Module credits	13.00
Programmes	BOH Oral Hygiene
Prerequisites	ODO 271, OFC 271, RAD 271, PDL 271, ORD 271, GAP 271, VKM 271, TBW 271
Contact time	2 practicals, 2 practicals per week (30 week period)
Language of tuition	Double Medium
Academic organisation	Community Dentistry
Period of presentation	Year

Module content

This module consists of practical work in the community only and is a continuation of Community as Patient 271.

Community as patient 470 (GAP 470)

Qualification	Undergraduate
Module credits	4.00
Programmes	BChD Dentistry
Prerequisites	GNK 388, MDB 370, TGG 370, FSG 370, FAR 370, RAD 370, TBW 370, ODO 370, PDL 370, DFA 370

Prerequisites No prerequisites.

Contact time 15 practicals per week, 6 lectures per week, 2 discussion classes per week, 5 seminars per week

Language of tuition Both Afr and Eng

Academic organisation Health Sciences Dean's Office

Period of presentation Semester 2

Module content

The bio-psychosocial approach to health care; patients in their family and community environment; the role of psychology in the work of a generalist; how patients adapt to sickness and cope with stress; the health care system in rural South Africa; health promotion and health education; the use of electronic databases.

Introduction to clinical pharmacotherapy 128 (GNK 128)

Qualification Undergraduate

Module credits 10.00

Programmes [MBChB Medicine](#)

Prerequisites No prerequisites.

Contact time 5 discussion classes per week, 5 lectures per week

Language of tuition Double Medium

Academic organisation Pharmacology

Period of presentation Semester 2

Module content

Introductory principles to clinical pharmacotherapy on the grounds of applicable patient problems/disease processes; receptors for medicines; principles of structure activity relationships; dynamic and kinetic principles to bring pharmacological principles and clinical therapy together in a problem-based curriculum.

Anatomy 188 (GNK 188)

Qualification Undergraduate

Module credits 56.00

Programmes [BChD Dentistry](#)

Prerequisites No prerequisites.

Contact time 2 practicals per week, 18 lectures per week

Language of tuition	English
Academic organisation	Anatomy
Period of presentation	Semester 2

Module content

Systemic anatomy and embryology:

An introduction to anatomical terminology, the musculoskeletal system, nervous system, surface anatomy, cardiovascular system, respiratory system, urogenital system, gastro-intestinal system, the endocrine system and human embryology.

Human osteology:

Introduction to osteology, bone function and classification, humerus, radius, ulna, femur, tibia, fibula, clavicle, scapula, ribs, sternum, vertebrae, pelvis, hand and foot bones, sesamoid bones, skull, mandible, joints.

Human histology:

General introduction to cells and tissue, terminology, the cell and cytoplasm, organelles and inclusions, surface and glandular epithelium, general connective tissue, specialised connective tissue, namely cartilage, bone, blood and haemopoietic tissue, muscle and nervous tissue.

Medical preparatory module 200 (GNK 200)

Qualification	Undergraduate
Module credits	0.00
Language of tuition	English
Academic organisation	Health Sciences Dean's Office
Period of presentation	Semester 2

Introduction to clinical medicine 283 (GNK 283)

Qualification	Undergraduate
Module credits	10.00
Programmes	MBChB Medicine
Prerequisites	CMY 151, FIL 155, MGW 112, MLB 111, PHY 131, MTL 180, GNK 120, BOK 121, GNK 127, GNK 128, CIL 111 and 121 or AIM 101 or AIM 111 and 121 EOT 110 and 120 or ELH 121 and 122
Contact time	2 lectures per week
Language of tuition	Both Afr and Eng
Academic organisation	Obstetrics and Gynaecology
Period of presentation	Semester 2

Module content

The bio-psychosocial model of illness; the SIAMS framework for the consultation; surface anatomy: the integrated management of childhood illness (IMCI); general physical examination skills and introduction to clinical departments.

Blood 285 (GNK 285)

Qualification	Undergraduate
Module credits	4.00
Prerequisites	CMY 151,GNK 121,GNK 122,MLB 111,PHY 131,GNK 126,BOK 120,MTL 180,MGW 111,FIL 182,CIL 111 and 121 or AIM 101 or AIM 111 and 121 EOT 110 and 120 or ELH 111 and 112

Period of presentation	Year

Basic emergency care 286 (GNK 286)

Qualification	Undergraduate
Module credits	5.00
Programmes	BChD Dentistry BOccTher Occupational Therapy BPhysT Physiotherapy BRad Diagnostics MBChB Medicine
Prerequisites	CMY 151,FIL 155,MGW 112,MLB 111,PHY 131,MTL 180,GNK 120,BOK 121,GNK 127,GNK 128,CIL 111 and 121 or AIM 101 or AIM 111 and 121 EOT 110 and 120 or ELH 111 and 112
Contact time	8 practicals per week, 1 other contact session per week
Language of tuition	Both Afr and Eng
Academic organisation	Health Sciences Dean's Office
Period of presentation	Semester 1 and/or 2

Module content

Theory and practical training in basic emergency care.

Anatomy (Dissection) 288 (GNK 288)

Qualification	Undergraduate
Module credits	37.00
Programmes	MBChB Medicine
Prerequisites	CMY 151,GNK 120,GNK 127,MLB 111,PHY 131,GNK 128,BOK 121,MGW 112,FIL 155,MTL 180,CIL 111 and 121 or AIM 101 or AIM 111 and 121 EOT 110 and 120 or ELH 111 and 112
Contact time	14 lectures per week
Language of tuition	English

Academic organisation Anatomy

Period of presentation Semester 1

Module content

Clinically applied regional dissection of the upper limb, neck and back, head, brain, thorax, abdomen, pelvis and lower limb.

Anatomy 289 (GNK 289)

Qualification Undergraduate

Module credits 40.00

Programmes [BChD Dentistry](#)

Prerequisites GNK 286, GPS 280, FSG 270, MDB 270, POH 270, ODO 270, PRD 270, ZUL 110, AFR 111, IDE 270

Contact time 15 lectures per week

Language of tuition English

Academic organisation Anatomy

Period of presentation Semester 1

Module content

Clinically applied regional approach to human anatomy. Detailed cadaveric dissection of the head and neck, brain and spinal cord, axilla, upper limb, thorax, back and abdomen. Particular emphasis will be given to the head and neck region. The perineum, pelvis and lower limb will not be dissected, but taught with the aid of prosected specimens.

Heart and blood vessels 381 (GNK 381)

Qualification Undergraduate

Module credits 25.00

Programmes [MBChB Medicine](#)

Prerequisites BOK 280,GNK 288,BOK 284,GPS 280,(BOK 281 or (BOK 285,BOK 287)),GNK 283,GNK 286, LCP 280, SMO 281,SMO 211

Contact time 16 lectures per week

Language of tuition Both Afr and Eng

Academic organisation Internal Medicine

Period of presentation Semester 1

Module content

Discussion of the important diseases in order to obtain a complete overview of the disease, which will include anatomy, physiology, pathology, pharmacology and clinical medicine.

Lungs and chest 383 (GNK 383)

Qualification Undergraduate

Module credits	20.00
Programmes	MBChB Medicine
Prerequisites	BOK 280,GNK 288,BOK 284,GPS 280,(BOK 281 or (BOK 285,BOK 287)),GNK 283,GNK 286, LCP 280, SMO 281, SMO 211
Contact time	12 lectures per week
Language of tuition	Both Afr and Eng
Academic organisation	Internal Medicine
Period of presentation	Semester 1

Module content

Lungs and chest. Discussion of the significant diseases in order to obtain a complete overview of the disease, which will include anatomy, physiology, pathology, pharmacology and clinical medicine.

Preceptorship 385 (GNK 385)

Qualification	Undergraduate
Module credits	10.00
Programmes	MBChB Medicine
Prerequisites	BOK 280,GNK 288,BOK 284,GPS 280,(BOK 281or (BOK 285,BOK 287)),GNK 283,GNK 286, LCP 280, SMO 281, SMO 211
Contact time	2 lectures per week
Language of tuition	Both Afr and Eng
Academic organisation	Family Medicine
Period of presentation	Semester 2

Module content

A learning opportunity for the undergraduate student to:

- (i) experience in practice, the general practitioner or family physician,
- (ii) meet the unselected patient and
- (iii) observe first-hand, the problems which have to be contended within primary care. The problems comprise biomedical, psycho-social and managerial challenges.

Haematological malignancies 386 (GNK 386)

Qualification	Undergraduate
Module credits	5.00
Programmes	MBChB Medicine
Prerequisites	BOK 280,GNK 288,BOK 284,GPS 280,(BOK 281 or (BOK 285,287)),GNK 283,GNK 286, LCP 280, SMO 281, SMO 211
Contact time	1 lecture per week

Language of tuition Both Afr and Eng

Academic organisation Paediatrics

Period of presentation Semester 1

Module content

Haematological malignant neoplasia: Basic and clinical information with regard to this group of diseases, including healing ability with regard to lymphoma, leukaemia, myeloproliferative diseases; and immunoproliferative diseases.

Head and neck anatomy 388 (GNK 388)

Qualification Undergraduate

Module credits 12.00

Prerequisites GNK 288,BOK 283,(BOK 281or (BOK 285,287)),GNK 286,GPS 280,IKT 200,BOK 280,SMO 211,SMO 281, LCP 280

Contact time 8 seminars per week, 12 practicals, 16 discussion classes per week, 4 lectures per week

Language of tuition English

Academic organisation Anatomy

Period of presentation Semester 1

Module content

A relevant head-and-neck anatomy module for dental students, detailing essential information applicable to the practice of clinical dentistry.

Medical preparatory module 400 (GNK 400)

Qualification Undergraduate

Module credits 0.00

Language of tuition English

Academic organisation Health Sciences Dean's Office

Period of presentation Semester 2

Disorders of childhood 481 (GNK 481)

Qualification Undergraduate

Module credits 31.00

Programmes MBChB Medicine

Prerequisites GNK 381,GNK 383,BOK 380,GNK 386,GPS 380,BOK 382,GNK 488,SMO 311,SMO 380,SMO 382

Contact time 6 lectures per week

Language of tuition Both Afr and Eng

Academic organisation Paediatrics

Period of presentation Semester 1

Module content

The module is designed to help students gain knowledge, skills and attitudes in order to understand and respond to the special needs and vulnerability of children in relation to development, nutrition, environment and adaptation; recognise by means of history and examination, common and important abnormalities of development, nutrition, environment and adaptation and be able to deal with them effectively; recognise by means of history and examination, common and important health problems of infancy and childhood and be able to deal with them effectively.

The mornings are devoted to direct contact with paediatric patients and their problems by means of small-group activities at a variety of experimental learning sites.

The afternoon periods are used for representative case studies with regard to a series of general or important themes, illustrated by multidisciplinary symposia, lectures, problem-solving exercises and self-tuition.

Forensic medicine 482 (GNK 482)

Qualification Undergraduate

Module credits 6.00

Programmes [MBChB Medicine](#)

Prerequisites GPS 380, LCP 380, GNK 381, GNK 383, BOK 380, GNK 386, SMO 311, SMO 380, LCP 380, BOK 382, GNK 488, SMO 382.

Language of tuition English

Academic organisation Health Sciences Dean's Office

Period of presentation Semester 2

Module content

- Forensic pathology, thanatology taumatology
- Medicine and law, medical law

Musculoskeletal conditions 483 (GNK 483)

Qualification Undergraduate

Module credits 28.00

Programmes [MBChB Medicine](#)

Prerequisites GNK 381,GNK 383,BOK 380,GNK 386,GPS 380,BOK 382,SMO 380,SMO 311,SMO 382

Contact time 7 lectures per week

Language of tuition Both Afr and Eng

Academic organisation Orthopaedics

Period of presentation Semester 2

Module content

A study of the build and functions as well as the diseases of the musculo-skeletal movement apparatus in adults and children. Emphasis is placed on the diagnosis and treatment of the most prominent conditions as well as the acquiring of practical and clinical skills.

Endocrinology 484 (GNK 484)

Qualification	Undergraduate
Module credits	6.00
Programmes	MBChB Medicine
Prerequisites	GNK 381,GNK 383,BOK 380,GNK 386,GPS 380,BOK 382,SMO 380,SMO 311,SMO 382
Contact time	1 lecture per week
Language of tuition	Both Afr and Eng
Academic organisation	Health Sciences Dean's Office
Period of presentation	Semester 2

Module content

An opportunity for the student to become familiarised with the most common endocrinology problems in practice, including diabetes and obesity. The focus is on the recognition of these conditions and their practical handling.

Head and neck 485 (GNK 485)

Qualification	Undergraduate
Module credits	33.00
Programmes	MBChB Medicine
Prerequisites	GNK 381,GNK 383,BOK 380,GNK 386,GPS 380,BOK 382,SMO 311,SMO 380,SMO 382
Contact time	5 lectures per week
Language of tuition	Double Medium
Academic organisation	Otorhinolaryngology
Period of presentation	Semester 2

Module content

An opportunity for the undergraduate student to acquire knowledge and skills in respect of the prevention, diagnosis and treatment of diseases of the head and neck region by means of lectures, seminars, self-tuition and practical sessions in the clinic, ward, theatre as well as the skills laboratory. A problem-based and inter-disciplinary approach is emphasised.

Ageing 486 (GNK 486)

Qualification	Undergraduate
----------------------	---------------

Module credits	8.00
Programmes	MBChB Medicine
Prerequisites	GNK 381,GNK 383,BOK 380,GNK 386,GPS 380,BOK 382,SMO 311,SMO 380,SMO 382
Contact time	2 lectures per week
Language of tuition	English
Academic organisation	Psychiatry
Period of presentation	Semester 2

Module content

Discussion of the physiology and psychology of ageing and an overview of diseases commonly found in the elderly, with a biomedical psycho-social approach.

Skin 487 (GNK 487)

Qualification	Undergraduate
Module credits	5.00
Programmes	MBChB Medicine
Prerequisites	GNK 381,GNK 383,BOK 380,GNK 386,GPS 380,BOK 382,SMO 311,SMO 380,SMO 382
Contact time	1 lecture per week
Language of tuition	English
Academic organisation	Internal Medicine
Period of presentation	Semester 2

Module content

Clinical manifestations and management.

Elective 488 (GNK 488)

Qualification	Undergraduate
Module credits	23.00
Programmes	MBChB Medicine
Prerequisites	BOK 280,BOK 284,GNK 286,GPS 280,SMO 281,(BOK 281 or (BOK 285,287)),GNK 283,GNK 288,SMO 211, LCP 280
Contact time	1 lecture per week
Language of tuition	Both Afr and Eng
Academic organisation	Health Sciences Dean's Office
Period of presentation	Semester 2

Module content

An opportunity for the undergraduate student to acquire knowledge, skills and experience in the medical practice environment.

Psychiatry and social dysfunction 581 (GNK 581)

Qualification	Undergraduate
Module credits	34.00
Programmes	MBChB Medicine
Prerequisites	GNK 481,BOK 480,BOK 482,GNK 485,GNK 483,GNK 487,GNK 486,GNK 484,GNK 385,SMO 411
Contact time	5 ppw, 18 lectures per week
Language of tuition	English
Academic organisation	Psychiatry
Period of presentation	Semester 1

Module content

The module will help students to acquire knowledge, skills and attitudes that will enable them to diagnose and manage certain psychiatric conditions. Preventive and promotive aspects of management are also emphasised. These psychiatric conditions include the following: mood disorders, anxiety disorders, alcohol and substance-related disorders, sexual disorders, schizophrenia and other psychotic disorders, mental disorders due to general medical conditions, personality disorders, eating disorders and sleep disorders. These topics will be handled as applicable to children, adolescents and adults. Additional topics include: legal aspects, aggression, child abuse, child development, mental retardation and interpersonal skills. During morning lectures, students are directly exposed to psychiatric patients and their problems by means of small-group activities. The afternoon lectures are used for the solution of problem-orientated case studies and accompanied exploration of the themes mentioned above. The module is student-oriented, with the emphasis on self-tuition.

Health and healthcare 582 (GNK 582)

Qualification	Undergraduate
Module credits	27.00
Programmes	MBChB Medicine
Prerequisites	BOK 480,BOK 482,GNK 481,GNK 483,GNK 484,GNK 485,GNK 486,GNK 487,GNK 385,SMO 411
Contact time	3 practicals per week, 15 lectures per week, 2 discussion classes per week
Language of tuition	Both Afr and Eng
Academic organisation	Family Medicine
Period of presentation	Semester 1

Module content

This module aims to integrate the concepts of Family Medicine and Community Medicine for the delivery of health care in South Africa. The module content covers medico-legal aspects of practice, ethical issues, as well as approaches to common problems in practice, with emphasis on the application of the bio-psychosocial model of care in the South African district health system.

Traumatology 583 (GNK 583)

Qualification	Undergraduate
Module credits	25.00
Programmes	MBChB Medicine
Prerequisites	BOK 480,BOK 482,GNK 481,GNK 483,GNK 484,GNK 485,GNK 486,GNK 487,GNK 385,SMO 411
Contact time	1.5 seminars per week, 1 practical per week, 10 lectures per week, 3 discussion classes per week, 1 other contact session per week
Language of tuition	Double Medium
Academic organisation	Surgery
Period of presentation	Semester 1

Module content

The block consists of two modules, one practical and the other theoretical. The objective of the trauma practicals is to introduce students to clinical recognition of trauma emergencies, institution of emergency resuscitation, application of life saving and life support manoeuvres and emergency treatment of the trauma victim. Using actors/models, students are taught the application of the Advanced trauma life support (ATLS) (ABCDE) type approach to trauma. The trauma theory comprises the introduction to the full spectrum of trauma as a disease. Epidemiology of trauma, mechanisms of wounding, including ballistics, the biological response to trauma, wound healing and complications of trauma will be taught. Emergency treatment, resuscitation and intensive care treatment of the trauma victim will be covered. A systematic course on a thematic basis will be given to cover the major organ systems prioritised according to the ATLS type approach of life threatening, limb threatening or disfiguring injuries. Thus, thoracic, cardiovascular, abdominal, head and neck trauma will be dealt with as potential life threatening injuries, orthopaedic as limb threatening trauma and skin injuries are mainly disfiguring. Thermal, electrical and chemical burns and hypothermia will be covered. Introduction to physical and psychological rehabilitation and nutrition of the trauma victim will be taught.

Pharmacotherapy 585 (GNK 585)

Qualification	Undergraduate
Module credits	7.00
Programmes	MBChB Medicine
Prerequisites	BOK 480,BOK 482,GNK 481,GNK 483,GNK 484,GNK 485,GNK 486,GNK 487,GNK 385,SMO 411
Contact time	1 practical per week, 8 lectures per week, 1 discussion class per week
Language of tuition	Double Medium

Academic organisation Pharmacology

Period of presentation Semester 1

Module content

Core pharmacotherapy and applicable clinical aspects of the most general and prominent diseases and conditions, principles of toxicology and medical-forensic aspects of substance abuse, court proceedings and iatrogenic deaths.

Anaesthesiology 586 (GNK 586)

Qualification Undergraduate

Module credits 13.00

Programmes MBChB Medicine

Prerequisites BOK 480, BOK 482, GNK 481, GNK 483, GNK 484, GNK 485, GNK 486, GNK 487, GNK 385, SMO 411

Contact time 8 lectures per week, 1 practical per week, 1 discussion class per week

Language of tuition Both Afr and Eng

Academic organisation Anaesthesiology

Period of presentation Semester 1

Module content

A basic introduction to the underlying principles of the theory and practice of anaesthesiology applicable to the generalist. Learning experiences comprise practical residency (prior to Block 18), formal interactive lectures, workshops and case studies (during Block 18).

Forensic medicine morning rotation 587 (GNK 587)

Qualification Undergraduate

Module credits 4.00

Programmes MBChB Medicine

Prerequisites LCP 480, BOK 480, BOK 482, GNK 385, GNK 481, GNK 483, GNK 484, GNK 485, GNK 486, GNK 487, SMO 411

Contact time 5 practicals per week (2 week period), 4 lectures over period of 2 weeks, 1 a weeks for period of 2 weeks

Language of tuition Double Medium

Academic organisation Forensic Medicine

Period of presentation Semester 1

Module content

Forensic medicine morning rotation.

Surgery 680 (GNK 680)

Qualification	Undergraduate
Module credits	52.00
Programmes	MBChB Medicine
Prerequisites	GNK 581,GNK 582,GNK 583,GNK 585,GNK 586,SMO 511,SMO 512
Contact time	40 practicals per week
Language of tuition	Double Medium
Academic organisation	Surgery
Period of presentation	Semester 1

Module content

Surgery (7 weeks) in the Student Intern Complex: General surgery, vascular surgery, plastic surgery, paediatric surgery, cardiothoracic surgery.

Orthopaedics 681 (GNK 681)

Qualification	Undergraduate
Module credits	17.00
Programmes	MBChB Medicine
Prerequisites	GNK 581,GNK 582,GNK 583,GNK 585,GNK 586,SMO 511,SMO 512
Contact time	40 practicals per week
Language of tuition	Double Medium
Academic organisation	Surgery
Period of presentation	Semester 1

Module content

Orthopaedics (three weeks) in the Student Intern Complex.

Anaesthesiology 682 (GNK 682)

Qualification	Undergraduate
Module credits	20.00
Programmes	MBChB Medicine
Prerequisites	GNK 581,GNK 582,GNK 583,GNK 585,GNK 586,SMO 511,SMO 512
Contact time	40 practicals per week
Language of tuition	Both Afr and Eng
Academic organisation	Anaesthesiology
Period of presentation	Semester 1

Module content

Anaesthesiology (3½ weeks) in the Student Intern Complex.

Internal medicine 683 (GNK 683)

Qualification	Undergraduate
Module credits	45.00
Programmes	MBChB Medicine
Prerequisites	GNK 581,GNK 582,GNK 583,GNK 585,GNK 586,SMO 511,SMO 512
Contact time	40 practicals per week
Language of tuition	Both Afr and Eng
Academic organisation	Internal Medicine
Period of presentation	Semester 1

Module content

Internal medicine (7 weeks) in the Student Intern Complex.

Internal medicine related sub-disciplines 684 (GNK 684)

Qualification	Undergraduate
Module credits	20.00
Programmes	MBChB Medicine
Prerequisites	GNK 581,GNK 582,GNK 583,GNK 585,GNK 586,SMO 511,SMO 512

Language of tuition	Both Afr and Eng
Academic organisation	Obstetrics and Gynaecology
Period of presentation	Semester 1

Module content

Obstetrics and gynaecology (7 weeks) in the Student Intern Complex.

Paediatrics 687 (GNK 687)

Qualification	Undergraduate
Module credits	40.00
Programmes	MBChB Medicine
Prerequisites	GNK 581,GNK 582,GNK 583,GNK 585,GNK 586,SMO 511,SMO 512
Contact time	40 practicals per week
Language of tuition	Both Afr and Eng
Academic organisation	Paediatrics
Period of presentation	Semester 1

Module content

Paediatrics (7 weeks) in the Student Intern Complex.

Community-based education 688 (GNK 688)

Qualification	Undergraduate
Module credits	20.00
Programmes	MBChB Medicine
Prerequisites	GNK 581,GNK 582,GNK 583,GNK 585,GNK 586,SMO 511,SMO 512
Contact time	40 practicals per week
Language of tuition	Both Afr and Eng
Academic organisation	Obstetrics and Gynaecology
Period of presentation	Semester 1

Module content

Community-based education (3½ weeks) in the Student Intern Complex.

Diagnostic laboratory medicine 689 (GNK 689)

Qualification	Undergraduate
----------------------	---------------

Module credits	11.00
Programmes	MBChB Medicine
Prerequisites	No prerequisites.
Contact time	40 practicals per week
Language of tuition	Both Afr and Eng
Academic organisation	Health Sciences Dean's Office
Period of presentation	Semester 1

Module content

Diagnostic laboratory medicine (2 weeks); image-forming medicine; evidence-based medicine and bio-ethics (two days) in the Student Intern Complex.

Urology 690 (GNK 690)

Qualification	Undergraduate
Module credits	11.00
Programmes	MBChB Medicine
Prerequisites	GNK 581,GNK 582,GNK 583,GNK 585,GNK 586
Contact time	40 practicals per week
Language of tuition	Both Afr and Eng
Academic organisation	Urology
Period of presentation	Semester 1

Module content

Urology (2 weeks) in the Student Intern Complex.

Family medicine 691 (GNK 691)

Qualification	Undergraduate
Module credits	20.00
Programmes	MBChB Medicine
Prerequisites	GNK 581,GNK 582,GNK 583,GNK 585,GNK 586
Contact time	40 practicals per week
Language of tuition	Both Afr and Eng
Academic organisation	Family Medicine
Period of presentation	Semester 1

Module content

Family medicine (3½ weeks) in the Student intern complex.

Community obstetrics 692 (GNK 692)

Qualification	Undergraduate
Module credits	20.00
Programmes	MBChB Medicine
Prerequisites	GNK 581,GNK 582,GNK 583,GNK 585,GNK 586
Contact time	Community Engagement, 40 practicals per week
Language of tuition	Both Afr and Eng
Academic organisation	Obstetrics and Gynaecology
Period of presentation	Semester 1

Module content

Community obstetrics (3½ weeks) in the Student Intern Complex.

Neurology 693 (GNK 693)

Qualification	Undergraduate
Module credits	15.00
Programmes	MBChB Medicine
Prerequisites	GNK 581, GNK 582, GNK 583, GNK 585, GNK 586, SMO 511, SMO 512
Contact time	40 practicals per week
Language of tuition	Both Afr and Eng
Academic organisation	Neurology
Period of presentation	Semester 1 or Semester 2

Module content

Neurology in the Student Intern Complex.

General and oral microbiology 370 (GOM 370)

Qualification	Undergraduate
Module credits	23.00
Programmes	BChD Dentistry
Prerequisites	No prerequisites.
Contact time	Lectures, tutorials, practicals and symposia
Language of tuition	English
Academic organisation	Medical Microbiology
Period of presentation	Year

Module content

Infectious diseases in the various body systems:

This module is an introduction to infectious diseases occurring in the various body systems. The block will cover the diseases caused by the organisms, pathogenesis, specimen collection, laboratory diagnosis as well as management (treatment, prevention and control) of these infections.

Oral microbiology:

This module will provide knowledge to dental students about clinical microbiology and infectious diseases as well as basic principles for the recognition and identification of infectious agents relevant to the discipline of dentistry. Furthermore, the role of relevant organisms that are associated with the oral cavity in health and disease and understand diagnosis and be able to recognise patients with infections related to dentistry.

Academic organisation	Public Health Medicine
Period of presentation	Year

Culture and healthcare 180 (GSO 180)

Qualification	Undergraduate
Module credits	6.00
Service modules	Faculty of Health Sciences
Prerequisites	No prerequisites.
Contact time	2 lectures per week
Language of tuition	English
Academic organisation	Anthropology and Archaeology
Period of presentation	Quarter 1

Module content

*Only for students in communication pathology and health sciences

Impact of multiculturalism on healthcare in South Africa; world view and value systems; religious beliefs; beliefs with regard to illness, health and death.

Project planning and management 181 (GSO 181)

Qualification	Undergraduate
Module credits	6.00
Service modules	Faculty of Health Sciences

Prerequisites	No prerequisites.
Contact time	2 lectures per week
Language of tuition	English
Academic organisation	Anthropology and Archaeology
Period of presentation	Quarter 3

Module content

*Only for students in health sciences

Determination of the needs on community level: cause-consequence in project planning. Conversion of needs into objectives and capacity analysis. Identification of viable community development programmes and projects. Determination of projects activities, indicators for monitoring and risk factors. Project budget and compilation of a project business plan.

Development process 182 (GSO 182)

Qualification	Undergraduate
Module credits	6.00
Service modules	Faculty of Health Sciences
Prerequisites	No prerequisites.
Contact time	2 lectures per week
Language of tuition	English
Academic organisation	Anthropology and Archaeology
Period of presentation	Quarter 2

Module content

*Only for students in communication pathology and health sciences

Introduction to key concepts and processes in community development, with special reference to the most prominent theories and supporters. Debate on the applicability of the community development approach in diverse local and regional contexts. Overview of debatable assumptions with regard to communities, community developers, and the process of community development.

Health research 183 (GSO 183)

Qualification	Undergraduate
Module credits	6.00
Service modules	Faculty of Health Sciences
Prerequisites	No prerequisites.
Contact time	2 lectures per week
Language of tuition	English
Academic organisation	Anthropology and Archaeology
Period of presentation	Quarter 4

Module content

*Only for students in health sciences

Categories of data and applicable methods of data collection about the social aspects of disease, health, and health care. Field research; creation of rapport, accurate observation; utilisation of additional research aids (questionnaires; research schedules, interpreters, audio-visual aids and field notes).

Qualification Undergraduate

Module credits 25.00

Programmes BCur Nursing Science (Education and Administration)

Prerequisites No prerequisites.

Contact time 2 lectures per week, 1 other contact session per week

Language of tuition English

Academic organisation Nursing Science

Period of presentation Semester 1

Module content

The community nursing context.

Community health, community-based nursing care and primary health care (PHC).

Processes in community nursing.

Assessment, diagnosis, intervention and evaluation. Health education and home healthcare nursing.

Community nursing science 120 (GVP 120)

Qualification	Undergraduate
Module credits	25.00
Programmes	BCur Nursing Science (Education and Administration)
Prerequisites	GVP 110
Contact time	2 lectures per week, 1 other contact session per week
Language of tuition	English
Academic organisation	Nursing Science
Period of presentation	Semester 2

Module content

Care of individuals, families and communities in the community nursing context. Comprehensive approach to the care of infants, children, women, men and those within unique settings or circumstances (e. g. the elderly, the homeless, marginalised communities, emergency situations and reproductive health). Common community health problems.

Communicable diseases and immunisation, HIV/Aids. Chronic physical and mental health problems. Social pathology in the community.

Community nursing science 160 (GVP 160)

Qualification	Undergraduate
Module credits	50.00
Programmes	BCur Nursing Science (Education and Administration)
Prerequisites	No prerequisites.
Contact time	2 practicals per week
Language of tuition	English
Academic organisation	Nursing Science
Period of presentation	Year

Module content

*Attendance module only

Community nursing science practical work.

Compulsory practical work, which includes mother and child health, school health, occupational health and safety, geriatric care, the prevention and control of communicable diseases, rehabilitation services and community resources, environmental safety, physical and nursing assessment of patients, diagnosis and care and health education.

Family study and community profile.

Community nursing science 250 (GVP 250)

Qualification	Undergraduate
Module credits	18.00
Programmes	BCur Nursing Science (Education and Administration)
Prerequisites	GVP 110,GVP 120
Contact time	2 lectures per week
Language of tuition	English

Public health, ethics and human rights 870 (HET 870)

Qualification	Postgraduate
----------------------	--------------

Module credits	5.00
Prerequisites	No prerequisites.
Contact time	1 practical per week, 3 discussion classes per week, 3 seminars per week
Language of tuition	English
Academic organisation	School of Health Syst & Public
Period of presentation	Semester 1

Module content

This module enables students to understand ethical and human rights reasoning in health interventions and research, and provides competence in ethical review of public health research and interventions. The module covers ethical and human rights approaches and applies them to public health. Students deal with threats to ethics or human rights in public health action, and with some specific areas: resource allocation, gender and research, environmental justice, international collaborative research.

Introduction to monitoring and evaluation for health managers 770 (HIN 770)

Qualification	Postgraduate
Module credits	10.00
Programmes	PGDip Option: General Operations
Prerequisites	No prerequisites.
Contact time	1 practical per week, 16 lectures per week
Language of tuition	English
Academic organisation	School of Health Syst & Public
Period of presentation	Year

Module content

This is an introductory module on Monitoring and Evaluation (M&E) designed to provide students with knowledge, attitudes and skills regarding M&E frameworks, health information and data systems and indicators, evaluation designs, development of M&E plans, data collection, processing and use and feedback of M&E results, within the context of health systems strengthening. At the end of the module the student should be able to define M&E concepts in the context of health systems strengthening; describe M&E frameworks; design an M&E plan; understand health information systems and data collection, processing and understand how M&E results can be used for health systems strengthening.

Reform in SA – What is the problem? To include variations among provinces and districts, measurement issues, etc. Financing NHI: Revenue sources (general taxes, payroll taxes, etc.) the role of private insurance, fiscal space and the public finance situation in SA, covering the informal sector, etc. Pay for performance as a policy tool: practical difficulties and the critical role for management in implementation. Overview of payment: Options for paying doctors and hospitals, the role of contracting, likely consequences and implementation issues. Politics and the reform process: Stakeholder analysis and mobilising support for reform. Financing NHI: Revenue sources (general taxes, payroll taxes, etc.) the role of private insurance, fiscal space and the public finance situation in S.A., covering the informal sector, etc. Organising NHI: national vs. provincial, public vs. quasi-public, roles for private administrators, choices about fiscal autonomy, relationship to various ministries. Government and market failures and the role of the public and private sectors – including corruption issues in both areas. Benefit package and targeting: Introduction to the ‘step pyramid’. What should be covered and for whom? What role for co-payments as incentive and revenue source. The developmental transformation of the healthcare system is informed by the political context and the constitutional imperatives for access to care which are the main function of the health system. This module will provide the participant with analytical tools to interpret the political economy of health and to develop strategies which can respond to the health needs on the ground in a practical manner so that the impact of the health policy is understood and how it informs the type of executive leader required to deliver the results of effective and efficient healthcare delivery. Participants will be trained in costing the pooling, provisioning and procurement of health services as District or Hospital Managers to allow for the effective and efficient running of the services over which they have authority. Training will focus on their Units becoming a Cost Centre for the management of the finances allocated by the Provincial Health Authority as well as capacity building in the event that delegations for autonomy is devolved of their level of employment. The importance of performance management will be the focus in relation to optimal budget performance, allocation within the institution as well as meeting performance targets and outcome measures.

Academic organisation Public Health Medicine

Period of presentation Year

Module content

Participants will be taught the critical importance of human resource development and management strategies required for an effective district healthcare system which is required for an effective NHI-based healthcare system. HR planning, forecasting, analysis, implementation and evaluation processes will be integrated into service delivery target achievement. The different types of human resources and their roles for effective service delivery in working in an integrated healthcare system will be used in case studies developed in the SA health context.

Period of presentation Year

Module content

(District) Health systems (and hospital) re-engineering including public sector centralisation and decentralisation.

The re-engineering of the health system is one of the key pillars of the SAELPH programme with focus on improvement of services in the DHS. The new thrust of the national DOH with PHC as a key focus requires a new type of health leader who can understand the central role of PHC in a future equitable and efficient healthcare system. This module will assist to reshape the thinking of public health leaders towards building sound foundation strategies for the delivery of essential healthcare services primarily at the DHS level and its impact on the overall healthcare system. Development of a decentralisation case – a South African example focused on a district as the ‘man in the middle’ of the decentralisation process including the need for information, problems of supervision. Understand the international experience in re-engineering public sector providers, with special emphasis on PHC and how they will function in a future NHI.

Integrated dentistry 170 (IDE 170)

Qualification Undergraduate

Module credits 28.00

Programmes [BChD Dentistry](#)

Prerequisites No prerequisites.

Contact time 1 lecture per week, 2 practicals per week

Language of tuition English

Academic organisation Dental Management Sciences

Period of presentation Semester 2

Module content

Introduction to clinical dentistry:

- Infection control training
- Occupational health and safety training
- Code of conduct, professionalism and ethical behaviour
- Academic skills training (library, goal-orientation, time management, etc)
- Basic dental assisting
- Basic tooth anatomy and terminology
- Dental terminology
- Psychomotor skills training (model casting, carving of teeth out of plaster, wax work)
- Introduction to the disciplines and specialities
- Third language training
- Clinic visits throughout the year
- Visits to a dental practice

Integrated dentistry 270 (IDE 270)

Qualification	Undergraduate
Module credits	37.00
Programmes	BChD Dentistry
Prerequisites	GNK 286, GNK 289, GPS 280, FSG 270, MDB 270, POH 270, ODO 270, PRD 270, ZUL 110, AFR 111
Contact time	1 lecture per week S1, 2 practicals per week S2, 2 lectures per week S2, 1 practical per week S1
Language of tuition	English
Academic organisation	Dental Management Sciences
Period of presentation	Year

Module content

- Clinic visits and visits to a dental practice
- Patient administration training
- Psychomotor skills training (model casting, carving of teeth out of plaster, wax work, wire bending)
- Pre-clinical communication training – building up rapport with a patient and interviewing skills (commences in the second semester)
- Examination skills training (commences in the second semester)

Internal medicine 800 (IGK 800)

Qualification	Postgraduate
Module credits	300.00
Programmes	MMed Internal Medicine
Prerequisites	ANA 800, FSG 801, FAR 806, PAG 808

Language of tuition Both Afr and Eng

Academic organisation Internal Medicine

Period of presentation Year

Internal medicine 804 (IGK 804)

Qualification Postgraduate

Integrated healthcare leadership 112 (IHL 112)

Qualification Undergraduate

Module credits 5.00

Contact time 3 lectures per week, 3 practicals per week

Language of tuition English

Academic organisation Nursing Science

Period of presentation Semester 1

Module content

Introduction to nursing and professional practice (including overview of nursing history). Principles of a therapeutic, safe and risk free practice. Therapeutic use of the self. Concepts related to quality of care NB: Only for BCur students.

Integrated healthcare leadership 120 (IHL 120)

Qualification Undergraduate

Module credits 8.00

Programmes [BDietetics Dietetics](#)
[BOccTher Occupational Therapy](#)
[BPhysT Physiotherapy](#)

Contact time 2 practicals per week, 2 lectures per week

Language of tuition English

Academic organisation Nursing Science

Period of presentation Semester 2

Module content

Multidisciplinary team work. Healthcare systems and legislation. Determinants of health. Introduction to healthcare models (e.g. community-based care, family-centred care, etc.). Professionalism, Ethical principles. Management of diversity. NB: Only for School of Healthcare Sciences students.

Integrated healthcare leadership 210 (IHL 210)

Qualification Undergraduate

Module credits 8.00

Programmes [BDietetics Dietetics](#)
[BOccTher Occupational Therapy](#)
[BPhysT Physiotherapy](#)

Prerequisites IHL 112/2/3/4, IHL 120

Contact time 2 lectures per week, 2 practicals per week

Language of tuition English

Academic organisation Nursing Science

Period of presentation Semester 1

Module content

Principles of project management. Communication principles. Health promotion and education, advocacy and literacy. Counselling for health behaviour change. NB: Only for School of Healthcare Sciences students.

Introduction to clinical dentistry 200 (IKT 200)

Qualification	Undergraduate
Module credits	10.00
Prerequisites	BOK 121,CMY 151,FIL 155,GNK 120,GNK 127,GNK 128,MGW 112,MLB 111,MTL 180,PHY 131
Contact time	3 practicals per week, 1 other contact session per week, 4 lectures per week
Language of tuition	Double Medium
Academic organisation	Dental Management Sciences
Period of presentation	Quarter 3

Interpersonal communication 700 (IKX 700)

Qualification	Postgraduate
Module credits	60.00
Programmes	PGDip Group Activities
Prerequisites	No prerequisites.
Contact time	6 seminars per week, 4 discussion classes per week, 4 practicals per week
Language of tuition	Double Medium
Academic organisation	Occupational Therapy
Period of presentation	Year

Module content

The interpersonal process. Factors influencing communication. Intervention strategies. Pathology factors which influence the communication process.

Instrumentation 700 (INX 700)

Qualification	Postgraduate
Module credits	30.00
Programmes	BRadHons Nuclear Medicine
Prerequisites	No prerequisites.
Contact time	1 practical per week, 1 discussion class per week, 1 lecture per week
Language of tuition	English
Academic organisation	Radiography
Period of presentation	Year

Life orientation 111 (JLO 111)

Qualification	Undergraduate
Module credits	12.00

Programmes HCert (Sports Science) Option: Education

Service modules Faculty of Health Sciences

Contact time 2 lectures per week

Language of tuition Both Afr and Eng

Academic organisation Early Childhood Education

Period of presentation Semester 1

Module content

To empower the student teacher to achieve and extend his/her personal potential by addressing changes in youth behaviour. The module focuses on characteristics that have been identified in research to bring about positive behaviour change. Students are guided to develop knowledge and skills with regard to physical development and movement as one of the topics of the subject Life Orientation. The module also focuses on certain aspects of sport psychology as well as physiological dimensions needed to assess the movement skills of learners. The practical component focuses on learning and teaching of sport and human movement development skills for the school sport teaching and training environment. This practical component forms the foundation for the following study years.

Life orientation 121 (JLO 121)

Qualification Undergraduate

Module credits 12.00

Programmes HCert (Sports Science) Option: Education

Service modules Faculty of Health Sciences

Contact time 2 lectures per week

Language of tuition Both Afr and Eng

Academic organisation Early Childhood Education

Period of presentation Semester 2

Module content

To empower student teachers to achieve and extend their personal potential and to guide them to develop knowledge and skills with regard to physical and psychological development as two of the topics of the subject Life Orientation. The topic of this module is also Personal Development but focuses on the interpersonal and intrapersonal skills of the student. Topics covered include: developmental stages, self-actualisation, self-concept, conflict management and personal management. The module also focuses on human anatomy and basic physiology as background to developing human movement. The practical component focuses on learning and teaching of sport and human movement development skills for the school sport teaching and training environment. It forms the foundation for the following study years where different disciplines are learnt. On attainment of the learning outcomes the student should be able to demonstrate his/her knowledge and understanding of the theory to be applied in the practical classes.

Human movement studies and sport management 114 (JMB 114)

Qualification Undergraduate

Module credits	8.00
Programmes	HCert (Sports Science) Option: Education
Prerequisites	No prerequisites.
Contact time	2 lectures per week
Language of tuition	Double Medium
Academic organisation	Humanities Education
Period of presentation	Semester 1

Module content

The purposes of physical activities as well as theories and philosophies of movement are studied. In addition, the coaching of young athletes and the challenges facing the teacher as coach receive attention. The importance of planning as the first phase of sports management is emphasised.

Human movement studies and sport management 115 (JMB 115)

Qualification	Undergraduate
Module credits	8.00
Programmes	HCert (Sports Science) Option: Education
Prerequisites	No prerequisites.
Contact time	2 practicals per week
Language of tuition	Double Medium
Academic organisation	Humanities Education
Period of presentation	Semester 1

Module content

In this module the student is required to master and apply basic swimming and life-saving techniques. Attention is also paid to motor skill development and games in the school context.

Human movement studies and sport management 125 (JMB 125)

Qualification	Undergraduate
Module credits	8.00
Programmes	HCert (Sports Science) Option: Education
Prerequisites	No prerequisites.
Contact time	2 lectures per week
Language of tuition	Double Medium
Academic organisation	Humanities Education
Period of presentation	Semester 2

Module content

In this module students are introduced to the structure and functions of systems in the human body. The skeletal system and the muscular system receive primary attention. Additionally, students acquire knowledge and skills in management – particularly organizational skills in the sports context.

Human movement studies and sport management 126 (JMB 126)

Qualification	Undergraduate
Module credits	8.00
Programmes	HCert (Sports Science) Option: Education
Prerequisites	No prerequisites.
Contact time	2 practicals per week
Language of tuition	Double Medium
Academic organisation	Humanities Education
Period of presentation	Semester 2

Module content

Skills and methods for hockey and mini hockey are taught and applied. In athletics the acquisition of skills in various track events receive attention.

Nuclear medicine 700 (KDE 700)

Qualification	Postgraduate
Module credits	50.00
Programmes	BRadHons Nuclear Medicine
Prerequisites	No prerequisites.

Clinical nursing science 110 (KVG 110)

Qualification	Undergraduate
Module credits	10.00
Programmes	BCur Nursing Science (Education and Administration)
Prerequisites	No prerequisites.
Contact time	2 lectures per week
Language of tuition	English
Academic organisation	Nursing Science
Period of presentation	Semester 1

Module content

Statutory framework and scientific basis for clinical nursing practice.

Clinical nursing practice: legal aspects, statutory and professional control. Homeostasis, basic sciences and critical thinking exercises in clinical nursing. Problem-driven clinical nursing practice.

Problem-solving: characteristics, advantages and the problem-solving process. Problem-solving and the nursing process. Aspects of systems-oriented nursing care: assessment, diagnosis, planning, implementing and evaluation.

Clinical nursing science 120 (KVG 120)

Qualification Undergraduate

Module credits 10.00

Programmes [BCur Nursing Science \(Education and Administration\)](#)

Prerequisites KVG 110

Contact time 2 lectures per week

Language of tuition English

Academic organisation Nursing Science

Period of presentation Semester 2

Module content

Clinical reasoning in nursing practice.

Clinical judgement and clinical decision-making. Contextual and task features of clinical decision-making.

Strategies to improve clinical reasoning. Clinical reasoning in the assessment of disease processes and in the evaluation of treatment modalities for disease processes in nursing practice.

Reflective clinical nursing practice.

Reflective nursing practice: principles and application. Delivery of problem-driven, problem-based and holistic nursing care within acute care settings.

Clinical nursing science 250 (KVG 250)

Qualification Undergraduate

Module credits 33.00

Programmes [BCur Nursing Science \(Education and Administration\)](#)

Prerequisites KVG 110, KVG 120

Contact time 2 lectures per week

Language of tuition English

Academic organisation Nursing Science

Period of presentation Semester 1

Module content

Theory of specialised nursing practice.

In one of the following clinical nursing speciality areas: critical care, emergency nursing, advanced midwifery, neonatal nursing science, child nursing science or operating theatre nursing science. Contemporary problems and practice issues.

Clinical nursing science 260 (KVG 260)

Period of presentation	Semester 2

Module content

Theory of specialised nursing practice.

In one of the following clinical nursing speciality areas: critical care, emergency nursing, advanced midwifery, neonatal nursing science, child nursing science or operating theatre nursing science. Contemporary problems and practice issues.

Clinical nursing science 300 (KVG 300)

Qualification	Undergraduate
Module credits	40.00
Programmes	BCur Nursing Science (Education and Administration)
Prerequisites	KVG 250, KVG 260
Contact time	2 lectures per week, 2 discussion classes per week
Language of tuition	English
Academic organisation	Nursing Science
Period of presentation	Year

Module content

Role and functions of clinical nursing specialists in their area of specialisation. Contemporary trends, issues and dilemmas in clinical nursing practice.

Clinical skills in hand therapy 701 (KVH 701)

Qualification	Postgraduate
Module credits	40.00

Programmes PGDip Hand Therapy

Prerequisites No prerequisites.

Contact time 12 practicals per week

Language of tuition Double Medium

Academic organisation Occupational Therapy

Period of presentation Year

Module content

Study and application of: • Evaluation methods and instruments for hand and upper limb injuries. • Current techniques in hand therapy.

Longitudinal clinic attachment programme 180 (LCP 180)

Qualification Undergraduate

Module credits 0.00

Programmes MBChB Medicine

Prerequisites No prerequisites.

Contact time 1 practical per week, Community Engagement

Language of tuition Both Afr and Eng

Academic organisation Health Sciences Dean's Office

Period of presentation Year

Module content

The longitudinal clinic attachment programme will link students to one of about 40 clinics in Pretoria and its surrounds. Each student is allocated to a specific clinic in Tshwane, Hammanskraal or Metsweding for a four-year period - medical students from the middle of the first year to the middle of the fifth year, and dentistry students from the middle of the first year to the end of the second year. Students will visit these clinics during the course of each block and special activity as negotiated with each block and rotation chair. The activities they do at the clinic will be the practical application of the theory they acquired in class with the added benefit of the experience of the context of the patient and the healthcare system.

Allergology for medical subspecialties Part 1 801 (LER 801)

Qualification	Postgraduate
Module credits	120.00
Programmes	MPhil Allergology (Coursework)
Prerequisites	Relevant base speciality registration with HPCSA
Contact time	24 months
Language of tuition	English
Academic organisation	Family Medicine
Period of presentation	Year

Module content

Curriculum as designated by the relevant College of Medicine at www.collegemedsa.ac.za

Executive leadership in health (including responsible leadership) 770 (LHE 770)

Qualification	Postgraduate
Module credits	10.00
Programmes	PGDip Option: Executive Leadership
Prerequisites	No prerequisites.
Contact time	50 hours per week
Language of tuition	English
Academic organisation	Public Health Medicine
Period of presentation	Year

Module content

The application of the principles of Executive Leadership in the health sector will be examined with focus on several modalities of leadership including meta-leadership with a focus on examining why its application by health leaders are met with so much difficulty. The challenges which prevail in the pilot districts for the National Health Insurance will be analysed. Participants will be expected to do precourse reading in preparation for the module as well as a postmodule assignment which may include the writing up and development of a strategic plan with a focus on executive leadership principles. Application of responsible leadership strategies in to the public health sector. The focus on contemporary views of responsible leadership in South Africa and measures to redress the shortcomings in taking responsibility and being accountable for your actions. What is the vision for responsible leadership on the horizon in the next 5 to 15 years and how can a health manager reposition his/her thinking to meet the demands and the role they are to play in the new NHI funded system in the position they presently occupy. What does it mean to lead in a responsible manner be it at district, provincial or national level. This will include the call for courageous scholarship and strategies to lead collectively in a responsible manner.

Laboratory management 700 (LMX 700)

Qualification	Postgraduate
Module credits	12.00
Prerequisites	No prerequisites.
Contact time	15 lectures per week
Language of tuition	Both Afr and Eng

Period of presentation	Year

Aerospace medicine 801 (LRG 801)

Qualification	Postgraduate
Module credits	25.00
Language of tuition	English
Academic organisation	Division of Aerospace Medicine
Period of presentation	Year

Module content

The purpose of this module is to teach the fundamental aspects of aerospace medicine

Topics addressed in this module include:

The atmosphere of the earth and other planets in the solar system; cardiovascular and respiratory physiology; hypoxia and hyperventilation; oxygen equipment, pressure clothing and spacesuits; spacecraft and aircraft cabin pressure, pressure change and it's biological effects; subatmospheric decompression sickness; effects of acceleration; head injury and protection; thermal stress; noise and vibration; physiology of sleep and wakefulness; optics and vision; spatial orientation in flight; cosmic radiation; physiological effects of microgravity.

Aerospace medicine 802 (LRG 802)

Qualification	Postgraduate
Module credits	20.00
Language of tuition	English
Academic organisation	Division of Aerospace Medicine
Period of presentation	Year

Module content

The purpose of this module is to teach operational aspects of the aerospace medicine.

Topics addressed in this module include:

Astronaut and aircrew selection, training and management; air traffic control – aeromedical aspects and human factors; errors and accidents; the flight deck and cockpit; the International Space Station; restraint systems and escape from aircraft and spacecraft; in-flight communication; passenger safety in transport aircraft; patient, human remains and medical sample transport by air – logistic considerations; aeromedical evacuation and transfer of the critical patient; aircraft accident investigations; identification of aircraft accident victims; aviation pathology and toxicology; disinfection, disinsection, decontamination and aircraft hygiene; hygiene in space; air support to naval operations; visits to airports and aerospace industry; aviation medical regulations (of both the International Civil Aviation Organisation and the South African Civil Aviation Authority.)

Aerospace medicine 803 (LRG 803)

Qualification	Postgraduate
Module credits	25.00
Language of tuition	English
Academic organisation	Division of Aerospace Medicine
Period of presentation	Year

Module content

The purpose of this module is to teach an understanding of the clinical aspects of aerospace medicine.

Topics addressed in this module include:

Motion sickness; medical aspects of long term low- and microgravity; cardiovascular disease; hypertension; respiratory disease; gastrointestinal disease; metabolic and endocrine disorders; renal disease; haematology; malignant disease; neurological disease; ophthalmology; otorhinolaryngology; aviation psychiatry; orthopaedics; clinical management of decompression illness; medication and aircrew; aviator fatigue and relevant fatigue countermeasures; the ageing pilot; commercial passenger fitness to fly; international travel and diseases that can be spread via aircraft passengers.

Dissertation: Aerospace medicine 890 (LRG 890)

Qualification	Postgraduate
Module credits	100.00
Programmes	MSc Aerospace Medicine
Prerequisites	No prerequisites.

Language of tuition	English
Academic organisation	Division of Aerospace Medicine
Period of presentation	Year

Aerospace medicine 990 (LRG 990)

Qualification	Postgraduate
Module credits	480.00

Sports psychology 210 (MBK 210)

Qualification Undergraduate

Module credits 10.00

Prerequisites No prerequisites.

Contact time 3 lectures per week

Language of tuition Double Medium

Academic organisation Biokinetics and Sports Science

Period of presentation Quarter 1 and Quarter 2

Module content

*Closed – requires departmental selection Sports psychology on second-year level is a general introductory module that orientates the student in sports psychology as a science. The module focuses on psychological principles and human behaviour in an exercise and sports context. This includes the study of sports and exercise behaviour, the psychology of coaching and exercise psychology. Sports psychology in this module focuses on the application of psychology in practical sports settings. The student is orientated in psychological sports questionnaires that determine motivation, activation levels as well as sports psychological techniques. The psychology of injuries and burnout form part of this module.

Functional anatomy 718 (MBK 718)

Qualification Postgraduate

Module credits 27.00

Contact time 2 practicals per week

Language of tuition English

Academic organisation Biokinetics and Sports Science

Period of presentation Year

Module content

The module will involve the practical application of anatomical knowledge to the diagnosis and exercise treatment of orthopaedic injuries and conditions. The student will practically apply their anatomical knowledge when executing the physical examination techniques used to assess specific injuries and/or conditions; as well as when prescribing exercise therapy for these injuries and conditions.

Dissertation: Biokinetics 891 (MBK 891)

Qualification	Postgraduate
Module credits	240.00
Programmes	MSc Sports Science Biokinetics
Prerequisites	*A minimum of 60% for the Honours dissertation in Biokinetics or Sport Sciences or Recreation and Sport Management.
Language of tuition	Double Medium
Academic organisation	Sport and Leisure Studies
Period of presentation	Year

Module content

A dissertation of at least 120 pages.

Human biology 120 (MBL 120)

Qualification	Undergraduate
Module credits	9.00
Prerequisites	MLB 111
Contact time	4 lectures per week

Oral biology 171 (MDB 171)

Qualification	Undergraduate
Module credits	10.00
Programmes	BOH Oral Hygiene
Prerequisites	No prerequisites.
Contact time	2 lectures per week
Language of tuition	Double Medium
Academic organisation	Oral Pathology and Oral Biolog
Period of presentation	Year

Module content

This module will provide the oral hygiene student with a broad basic knowledge on the development, normal macroscopic and microscopic structure and functions of the oral cavity, teeth and related structures. The module content will serve as pre-knowledge for clinical subjects and oral pathology in the oral hygiene programme.

Oral biology 270 (MDB 270)

Qualification	Undergraduate
Module credits	11.00
Programmes	BChD Dentistry
Prerequisites	GNK 286, GNK 289, GPS 280, FSG 270, IDE 270, POH 270, PRD 270, ZUL 110, AFR 111
Contact time	2 discussion classes per week, 2 lectures per week
Language of tuition	English
Academic organisation	Oral Pathology and Oral Biolog
Period of presentation	Year

Module content

This module is the study of the development, macroscopic and microscopic structure and function of tissue of the mouth and related structures with emphasis on the application in clinical dentistry. This module also includes the study of relevant molecular biology.

Oral biology 370 (MDB 370)

Qualification	Undergraduate
Module credits	11.00
Prerequisites	BOK 280,(BOK 281 or (BOK 285,287)),BOK 283,GNK 286,GNK 288,GPS 280,IKT 200,SMO 211,SMO 281

Health informatics, monitoring and evaluation 771 (MEH 771)

Qualification Postgraduate

Module credits 10.00

Programmes PGDip Option: Executive Leadership

Prerequisites No prerequisites.

Contact time 50 hours per week

Language of tuition English

Academic organisation Public Health Medicine

Period of presentation Year

Module content

Participants will be taught the importance of evidence-based public health and how to use health data, interpret the data, use the data for planning and for evaluation. The critical importance of how to strategically monitor and evaluate all programmes and systems, as well as how practical leadership requires in-depth knowledge of how to use review systems for forward planning. The use of knowledge management modalities will be used in health planning and participants will be required to design a Monitoring and Evaluation system that can be used at their workplace for better results in healthcare delivery.

Programmes	MChD in Maxillo-facial and Oral Surgery (endorsement ChirMaxFac-Med)
Prerequisites	No prerequisites.
Contact time	1 discussion class per week
Language of tuition	Both Afr and Eng
Academic organisation	Oral Pathology and Oral Biolog
Period of presentation	Year

Maxillo-facial and oral radiology 806 (MPG 806)

Qualification	Postgraduate
Module credits	24.00
Prerequisites	No prerequisites.
Contact time	1 discussion class per week
Language of tuition	Both Afr and Eng
Academic organisation	Oral Pathology and Oral Biolog
Period of presentation	Year

Dissertation: Oral pathology 890 (MPG 890)

Qualification	Postgraduate
Module credits	240.00
Prerequisites	No prerequisites.
Language of tuition	Both Afr and Eng
Academic organisation	Oral Pathology and Oral Biolog
Period of presentation	Year

Oral pathology and oral medicine 990 (MPG 990)

Qualification	Postgraduate
Module credits	110.00
Programmes	PhD Dentistry
Prerequisites	No prerequisites.
Language of tuition	Both Afr and Eng
Academic organisation	Oral Pathology and Oral Biolog
Period of presentation	Year

Molecular pathology 800 (MPX 800)

Qualification	Postgraduate
Module credits	120.00
Programmes	MChD Oral Pathology
Prerequisites	No prerequisites.
Contact time	1 practical per week, 1 discussion class per week
Language of tuition	Double Medium
Academic organisation	Oral Pathology and Oral Biolog
Period of presentation	Year

Medical terminology 180 (MTL 180)

Qualification	Undergraduate
Module credits	12.00
Programmes	BChD Dentistry BCur Nursing Science BOccTher Occupational Therapy BRad Diagnostics BSportSci BSportSci BVeterinary Science Veterinary Science MBChB Medicine
Service modules	Faculty of Health Sciences Faculty of Natural and Agricultural Sciences Faculty of Veterinary Science
Prerequisites	No prerequisites.
Contact time	2 lectures per week
Language of tuition	Double Medium
Academic organisation	Ancient Languages and Cultures
Period of presentation	Semester 1 and Semester 2

Module content

The acquisition of a basic medical orientated vocabulary compiled from Latin and Greek stem forms combined with prefixes and suffixes derived from those languages. The manner in which the meanings of medical terms can be determined by analysing the terms into their recognisable meaningful constituent parts, is taught and exercised. The functional use of medical terms in context as practical outcome of terminological application is continually attended to.

Medical applied psychology 801 (MTS 801)

Qualification	Postgraduate
Module credits	36.00
Programmes	MMed Psychiatry
Prerequisites	No prerequisites.
Language of tuition	Both Afr and Eng
Academic organisation	Psychiatry
Period of presentation	Year

Transcultural practice 802 (MTS 802)

Qualification	Postgraduate
Module credits	36.00
Programmes	MSc Medical Applied Psychology
Prerequisites	No prerequisites.
Language of tuition	English
Academic organisation	Psychiatry
Period of presentation	Year

Personality theory 803 (MTS 803)

Qualification	Postgraduate
Module credits	36.00
Programmes	MSc Medical Applied Psychology
Prerequisites	No prerequisites.
Language of tuition	English
Academic organisation	Psychiatry
Period of presentation	Year

Human development 804 (MTS 804)

Qualification	Postgraduate
Module credits	36.00

Programmes MSc Medical Applied Psychology

Prerequisites No prerequisites.

Multivariate analysis 710 (MVA 710)

Qualification Postgraduate

Module credits 15.00

Programmes BComHons Mathematical Statistics
BScHons Biostatistics
BScHons Financial Engineering
BScHons Mathematical Statistics
BScHons Mathematics of Finance

Service modules Faculty of Health Sciences

Prerequisites WST 311, WST 312, WST 321and WST 322

Contact time 1 lecture per week

Language of tuition English

Academic organisation Statistics

Period of presentation Semester 1

Module content

Matrix algebra. Some multivariate measures. Visualising multivariate data. Multivariate distributions. Samples from multivariate normal populations. The Wishart distribution. Hotelling's T^2 statistic. Inferences about mean vectors.

Multivariate analysis 720 (MVA 720)

Qualification Postgraduate

Module credits 15.00

Programmes [BScHons Biostatistics](#)

Service modules Faculty of Natural and Agricultural Sciences

Prerequisites MVA 710

Contact time 1 lecture per week

Language of tuition English

Academic organisation Statistics

Period of presentation Semester 2

Module content

The matrix normal distribution, correlation structures and inference of covariance matrices. Discriminant analysis. Principal component analysis. The biplot. Multidimensional scaling. Exploratory factor analysis. Confirmatory Factor analysis and structural equation models.

Neuro-anatomy for communication pathology 211 (NAN 211)

Qualification Undergraduate

Module credits 7.00

Programmes [BA Audiology](#)

Service modules Faculty of Humanities

Prerequisites No prerequisites.

Contact time 1 practical per week, 1 lecture per week

Language of tuition English

Academic organisation Anatomy

Period of presentation Semester 1

Module content

This module focuses on the theory and practical experience of the structure of the central nervous system, course and distribution of the cranial nerves and embryology of the central nervous system. Division; embryology of the central nervous system; histology of the nervous system; gross anatomy: spinal cord, brain stem, cerebral hemispheres, ventricles, meninges and circulation of cerebro-spinal fluid, blood circulation, cranial nerves, autonomic nervous system and tracts of the CNS.

Research report: Preparation 882 (NAV 882)

Qualification Postgraduate

Module credits 40.00

Programmes [MMed Medical Pharmacology PharmMed](#)

Prerequisites No prerequisites.

Contact time 1 practical per week, 1 lecture per week

Language of tuition Double Medium

Academic organisation Pharmacology

Period of presentation Semester 1

Period of presentation Semester 1

Neurosurgery 800 (NCR 800)

Qualification Postgraduate

Module credits 300.00

Programmes [MMed Neurosurgery](#)

Prerequisites ANA 894, FSG 801, ANP 875, BVC 801

Contact time 2 seminars per week, 1 practical per week, 3 discussion classes per week

Language of tuition Both Afr and Eng

Academic organisation Neurosurgery

Period of presentation Year

Thesis: Neurosurgery 990 (NCR 990)

Qualification Postgraduate

Module credits 480.00

Programmes [DMedicine Neurosurgery](#)

Prerequisites No prerequisites.

Language of tuition Both Afr and Eng

Academic organisation Neurosurgery

Period of presentation Year

Neuro-physiology 221 (NFG 221)

Qualification Undergraduate

Module credits 7.00

Programmes [BA Audiology](#)

Service modules Faculty of Humanities

Prerequisites FSG 110, FSG 120

Contact time 2 lectures per week

Language of tuition Double Medium

Academic organisation Physiology

Period of presentation Semester 2

Module content

*Requires FSG 110 and FSG 120

In this module neurophysiology is studied. Sections included are neuronal physiology, the central nervous system, the peripheral nervous system, which includes the afferent as well as the efferent parts.

Neuro-physiology 700 (NFG 700)

Qualification Postgraduate

Module credits 24.00

Prerequisites No prerequisites.

Language of tuition Both Afr and Eng

Academic organisation Physiology

Period of presentation Year

Neurophysiology 801 (NFG 801)

Qualification Postgraduate

Module credits 36.00

Programmes [MMed Psychiatry](#)

Language of tuition Both Afr and Eng

Academic organisation Physiology

Period of presentation Year

Module content

Study of neurophysiology from molecular to system level, as applicable to all aspects of general psychiatry, neuropsychiatry and psychopharmacology.

Emergency medicine 801 (NGK 801)

Qualification Postgraduate

Module credits 300.00

Programmes [MMed Emergency Medicine](#)

Prerequisites ANA 802, FSG 801, FAR 880, PAG 880

Contact time 1 practical per week, 1 lecture per week, 1 discussion class per week

Language of tuition	Double Medium
Academic organisation	Family Medicine
Period of presentation	Year

First aid 171 (NHS 171)

Qualification	Undergraduate
Module credits	5.00
Programmes	BOH Oral Hygiene
Prerequisites	No prerequisites.
Contact time	2.5 days of lectures
Language of tuition	Double Medium
Academic organisation	Community Dentistry
Period of presentation	Semester 1

Module content

The practical-orientated first-aid training will empower the oral hygiene student with a working knowledge of day-to-day emergencies, both in the workplace and at home. At this entry-level training the student will partake in the practical aspects of bleeding and wound management, cardio pulmonary resuscitation, care for unconscious patients and choking to name a few. The module content will assist the oral hygiene student in managing medical emergencies in the dental surgery.

Research 702 (NMR 702)

Qualification	Postgraduate
Module credits	27.00
Prerequisites	None
Contact time	1 lecture per week
Language of tuition	English
Academic organisation	Biokinetics and Sports Science
Period of presentation	Year

Module content

In this new module the focus will be on the execution of the research proposal and writing a research manuscript on the study executed, and presentation of the research project that includes an introduction, literature survey, methodology, results and discussion and conclusion and recommendations.

Neurology/Neuro-surgery 801 (NNC 801)

Qualification	Postgraduate
Module credits	24.00
Prerequisites	No prerequisites.

Contact time	5 seminars per week, 5 practicals per week
Language of tuition	Both Afr and Eng
Academic organisation	Neurosurgery
Period of presentation	Year

Nursing practice education 161 (NPE 161)

Qualification	Undergraduate
Module credits	24.00
Programmes	BCur Nursing Science
Prerequisites	No prerequisites.
Language of tuition	English
Academic organisation	Nursing Science
Period of presentation	Semester 1

Module content

Clinical learning experiences and laboratory work: these modules comprise 240 hours of compulsory clinical practical and laboratory work each (per semester). Students will complete these modules in specified healthcare units.

NB: Only selected BCur students may register for this module.

Nursing practice education 162 (NPE 162)

Service modules Faculty of Natural and Agricultural Sciences

Prerequisites 3rd-year status

Contact time 1 discussion class per week, 1 practical per week, 4 lectures per week

Language of tuition Double Medium

Academic organisation Human Nutrition

Period of presentation Semester 1

Module content

Evaluation of nutritional assessment.

Nutrition care process, overview of evaluation of nutritional status. Scientific principles of evaluation of nutritional status; nutritional screening; clinical, biochemical and dietary evaluation of nutritional status.

Practice training: practising of theoretical principles of nutrition status evaluation in hospital/clinic and/or skills laboratory.

Nursing studies 151 (NUR 151)

Qualification Undergraduate

Module credits 12.00

Programmes [BCur Nursing Science](#)

Prerequisites No prerequisites.

Language of tuition English

Academic organisation Nursing Science

Period of presentation Quarter 1

Module content

Fundamentals of nursing science

Introduction and concept clarification: nursing, nursing science, health and illness. Approaches to nursing and perspectives on human beings and their world. The art and science of nursing. Philosophical foundations of nursing. Overview of the history of nursing. Aspects of professional practice. The scientific approach to nursing. Human needs as the basis for nursing practice. The wellness-illness continuum.

NB: Only selected BCur students may register for this module.

Nursing studies 152 (NUR 152)

Qualification Undergraduate

Module credits 12.00

Programmes [BCur Nursing Science](#)

Prerequisites No prerequisites.

Language of tuition English

Period of presentation Quarter 2

Module content

Human needs and development in health and illness.

Humans as biological, psychological and spiritual beings within socio-economic and cultural contexts. Basic needs: nutrition, comfort and activity, rest and sleep, elimination, hygiene, oxygen, learning, sensory and interpersonal, pain management, safety, homeostasis, growth and development, medication needs, spiritual needs and the need for a dignified death. Self-image, own identity and self-actualisation. Relevant aspects of human nutrition. Human developmental stages and the unique needs associated with each stage.

NB: Only selected BCur students may register for this module.

Nursing studies 153 (NUR 153)

Qualification Undergraduate

Module credits 12.00

Programmes [BCur Nursing Science](#)

Prerequisites No prerequisites.

Language of tuition English

Academic organisation Nursing Science

Period of presentation Quarter 3

Module content

Environment, society and communities and its influence on nursing science.

The environment as determinant of health and wellness. Environmental hygiene. Societal and community phenomena, sectors, stratification and institutions. Marginalised communities in South Africa. The impact of disease on families, communities and society. Community-based health services and the role of the hospital as community institution.

NB: Only selected BCur students may register for this module.

Nursing studies 154 (NUR 154)

Qualification	Undergraduate
Module credits	12.00
Programmes	BCur Nursing Science
Prerequisites	No prerequisites.
Language of tuition	English
Academic organisation	Nursing Science
Period of presentation	Quarter 4

Module content

Provision of health care to communities and the nursing management of minor ailments.

Comprehensive health care and the multidisciplinary team approach. Community involvement and participation in the provision of health services. Community empowerment. Introduction to public health and systems of health care. Care of the elderly. Selected minor ailments of the upper respiratory tract, oral cavity and skin: earache, sore throat, colds and flu, sinusitis, tonsillitis, halitosis and oral and integumentary health.

NB: Only selected BCur students may register for this module.

Nursing studies 251 (NUR 251)

Qualification	Undergraduate
Module credits	11.00
Programmes	BCur Nursing Science
Prerequisites	FSG 161,FSG 162,NPE 161,NPE 162,NUR 151,NUR 152,NUR 153,NUR 154,DNP 151,DNP 152,CIL 111 and 121 or AIM 101 or AIM 111 and 121 EOT 110 and 120 or ELH 121 and 122
Language of tuition	English
Academic organisation	Nursing Science
Period of presentation	Quarter 1

Module content

Introduction to medical-surgical and trauma nursing science.

The medical and surgical approach to health care. Acute versus chronic illness. The influence of disease and hospitalisation on the adult health service consumer. Aspects of professional practice. Relevant assessment skills. Aspects of trauma nursing. Applied human nutrition. Intrinsic and extrinsic causes of disease. Cellular stressors, adaptive processes, abnormal cellular growth, cell damage, repair and cell death. Neoplasia and tumor pathology. General disturbances of homeostasis. Introduction to genetics and inheritance of disease. Aspects of medical emergency nursing.

NB: Only selected BCur students may register for this module.

Nursing studies 252 (NUR 252)

Qualification	Undergraduate
Module credits	11.00
Programmes	BCur Nursing Science
Prerequisites	NUR 151,NUR 152,NUR 153,NUR 154,DNP 151,DNP 152,DNP 153,DNP 154,NPE 161,NPE 162,CIL 111 and 121 or AIM 101 or AIM 111 and 121 EOT 110 and 120 or ELH 121 and 122
Language of tuition	English
Academic organisation	Nursing Science
Period of presentation	Quarter 2

Module content

Surgical nursing science.

Comprehensive perioperative nursing of patients with common surgical health problems of injuries related to the musculo-skeletal, neurological, gastro-intestinal and respiratory system, the eye and reproductive health.

Relevant assessment skills. Soft tissue injuries, surgical wounds and wound care techniques: wounds and wound healing, relevant assessment skills, aseptic wound care procedures (principles and techniques), modern wound care products and evidence-based practice, traumatic wounds (including burn trauma) and chronic wounds.

Applied human nutrition. Inflammation, infection and necrosis.

NB: Only selected BCur students may register for this module.

Nursing studies 253 (NUR 253)

Qualification	Undergraduate
Module credits	11.00
Programmes	BCur Nursing Science
Prerequisites	NUR 151,NUR 152,NUR 153,NUR 154,DNP 151,DNP 152,DNP 153,DNP 154,NPE 161,NPE 162,CIL 111 and 121 or AIM 101 or AIM 111 and 121 EOT 110 and 120 or ELH 121 and 122
Language of tuition	English
Academic organisation	Nursing Science
Period of presentation	Quarter 3

Module content

Medical nursing science.

Comprehensive medical nursing of patients with common medical health problems related to the respiratory, neurological, digestive, renal, endocrine and cardiovascular system, acute poisoning, cancer and haematological problems (anemia and leukemia) and metabolic disturbances. Disturbances of circulation and oedema formation. Overview of hypersensitivity reactions and auto-immune disorders. Examples from the clinical practice of nursing. Relevant assessment skills. Applied human nutrition.

NB: Only selected BCur students may register for this module.

Nursing studies 254 (NUR 254)

Qualification Undergraduate

Module credits 11.00

Programmes [BCur Nursing Science](#)

Module credits 18.00

Programmes [BCur Nursing Science](#)

Prerequisites NUR 351,NUR 352,NUR 353,NUR 354,DNP 351,DNP 352,DNP 353,DNP 354,NPE 361,NPE 362

Language of tuition English

Academic organisation Nursing Science

Period of presentation Quarter 2

Module content

Midwifery science: High-risk puerperium and the high-risk neonate.

High-risk post-natal care. Characteristics and needs of the neonates. Principles of nursing care in respect of healthy and sick or high-risk neonates. Comprehensive nursing of neonates with specific problems. Relevant assessment skills. Applied human nutrition.

NB: Only selected BCur students may register for this module.

Nursing studies 456 (NUR 456)

Qualification Undergraduate

Module credits 40.00

Programmes [BCur Nursing Science](#)

Prerequisites NUR 351,NUR 352,NUR 353,NUR 354,DNP 351,DNP 352,DNP 353,DNP 354,NPE 361,NPE 362

Language of tuition English

Academic organisation Nursing Science

Period of presentation Semester 2

Module content

Nursing elective.

An approved elective, chosen in consultation with the head of the department.

- Themes from community nursing science and primary health care
- Themes from psychiatric nursing science and therapeutic conversations
- Themes from general medical nursing science
- Themes from general surgical nursing science
- Themes from hospital-based midwifery science

The availability of electives will depend on student interest and the availability of staff and training facilities.

Students need to enquire about prospective electives before registering for this module.

Ten (10) credits of the above elective should include content on research-based practice (or a research project), contemporary practice issues, international nursing studies and ethical and legal aspects of health care practice within the chosen elective.

NB: Only selected BCur students may register for this module.

Research principles 700 (NVB 700)

Qualification Postgraduate

Module credits 20.00

Programmes [BRadHons Diagnostics](#)

Odontology 171 (ODO 171)

Qualification	Undergraduate
Module credits	12.00
Programmes	BOH Oral Hygiene
Prerequisites	No prerequisites.
Contact time	1 lecture per week, 1 other contact session per week, 1 seminar per week, 2 practicals per week, 1 discussion class per week
Language of tuition	Double Medium

Academic organisation Odontology

Period of presentation Semester 2

Module content

This module will enable the oral hygiene student to be competent in the evaluation of the oral health status of the child, adolescent, adult and geriatric patient in terms of diseases related to the hard tissues of the oral cavity plus the pulpa and peri-apical tissues, and be able to:

- correctly diagnose the diseases;
- correctly diagnose the patient's risk profile;
- instruct a patient to be capable of exercising self-protective measures;
- change the behavioural pattern of the patient through motivation;
- create resistant and optimally maintainable dental hard tissues for oral health;
- reverse early lesions where possible;
- refer patients for restorative and rehabilitative treatment.

Ondontology 270 (ODO 270)

Qualification Undergraduate

Module credits 6.00

Programmes BChD Dentistry

Prerequisites GNK 286, GNK 289, GPS 280, FSG 270, MDB 270, IDE 270, POH 270, PRD 270, ZUL 110, AFR 111

Contact time 1 clinical session per week

Language of tuition English

Academic organisation Odontology

Period of presentation Year

Module content

Chair-side assisting:

This clinical training entails the chair-side assisting of senior dental students during the treatment of patients.

Ondontology 271 (ODO 271)

Qualification Undergraduate

Module credits 7.00

Programmes BOH Oral Hygiene

Prerequisites ELH 121, ELH 122, AIM 101, ACO 171, ANA 171, FAR 171, FLG 171, GMB 171, MDB 171, ODO 171, ORD 171, PDL 171, TBW 171, VKM 171, NHS 171

Contact time 20 practicals (30 week period), 2 lectures per week for 15 weeks

Language of tuition Both Afr and Eng

Academic organisation Odontology

Period of presentation Year

Module content

This module is a continuation of Odontology 171. It will enable the oral hygiene student to be competent in the evaluation of the oral health status of the child, adolescent, adult and geriatric patient in terms of diseases related to the hard tissues of the oral cavity plus the pulpa and peril-apical tissues, and be able to:

- Correctly diagnose the diseases
- Correctly diagnose the patient's risk profile
- Instruct a patient to be capable of exercising self-protective measures
- Change the behavioural pattern of the patient through motivation
- Create resistant and optimally maintainable dental hard tissues for oral health
- Reverse early lesions where possible
- Refer patients for restorative and rehabilitative treatment

Odontology 370 (ODO 370)

Qualification	Undergraduate
Module credits	42.00
Programmes	BChD Dentistry
Prerequisites	BOK 280,(BOK 281 or (BOK 285,287)),BOK 283,GNK 286,GNK 288,GPS 280,IKT 200,SMO 211,SMO 281
Contact time	2 lectures per week, 1 discussion class per week, 2.6 practicals per week
Language of tuition	Both Afr and Eng
Academic organisation	Odontology
Period of presentation	Year

Module content

The modules in the subject odontology form an integrated curriculum that is structured and presented by various lecturers from different departments of the school. The modules consist of theoretical, practical and clinical training. The theoretical training includes anatomy, embryology, histology, microbiology and pathology of the teeth and teeth structure, while the clinical training is focused on the preventive, curative, and minor rehabilitative treatment of teeth development and eruption malformations, dental caries, pulpal and peri-radicular pathology, unerupted and impacted teeth, and tooth wear as part of the ageing process.

Postgraduate studies in occupational hygiene 1 873 (OHS 873)

Qualification	Postgraduate
Module credits	10.00
Prerequisites	FLG 322 or equivalent occupational hygiene coursework with 2 year practical experience in the field of occupational hygiene
Contact time	1 discussion class per week, 1 practical per week
Language of tuition	English
Academic organisation	School of Health Syst & Public
Period of presentation	Year

Module content

The purpose of this module is to introduce students to the basic concepts of occupational hygiene. Topics addressed in this module include occupational hygiene principles, legislation, risk management (including risk assessment), measuring environmental factors, ergonomics, biological environmental factors, psychological environmental factors, control of environmental factors, communication and report writing and toxicology. Problem-based assignments and practical work needs to be completed and submitted after completion of each unit standard.

Postgraduate studies in occupational hygiene 2 874 (OHS 874)

Qualification	Postgraduate
Module credits	5.00
Prerequisites	Satisfactory progress with submissions of OHS 873 assignments (unit standards 1 – 9)
Language of tuition	English
Academic organisation	School of Health Syst & Public
Period of presentation	Year

Module content

Introduction to laboratory practice, occupational health education, research and statistical methods, integrated management systems, quality systems, audits and occupational hygiene management. Problem-based assignments need to be completed and submitted within a month after each unit standard.

Individual studies in occupational hygiene 875 (OHS 875)

Qualification	Postgraduate
Module credits	5.00
Prerequisites	FLG 322 or equivalent Occupational hygiene coursework with 2 yrs practical experience, satisfactory progress in OHS 873.
Contact time	1 practical per week, 1 discussion class per week
Language of tuition	English
Academic organisation	School of Health Syst & Public

Period of presentation Year

Module content

In-depth knowledge in occupational hygiene concerning legislative requirements related to different occupational hygiene strategies and stressors, i.e. risk assessment, occupational stress, illumination, extreme thermal conditions, noise, airborne contaminants, ventilation and ergonomics. Students need to compile template reports and submit it for grading.

Principles of occupational hygiene and toxicology 770 (OHT 770)

Prerequisites	BOK 280, (BoK 281 or (BOK 285, 287)), BOK 283, GNK 286, GNK 288, GPS 280, IKT 200, SMO 211, SMO 281
Contact time	1 lecture per week, 1 discussion class per week, 1 seminar per week
Language of tuition	Both Afr and Eng
Academic organisation	Orthodontics
Period of presentation	Year

Module content

The modules in this subject extend over the third, fourth and fifth years of study. Lectures, practical and clinical work, seminars and discussions on the following: (a) Basic principles and therapeutic measures.

- (b) Occlusion: development and morphology.
- (c) Development and growth: cranium.
- (d) Stainless steel: properties and uses.
- (e) Orthodontic devices: requirements and types.
- (f) Changes in tissue.
- (g) Malocclusion: classification and aetiology.
- (h) Examination, aids, diagnosis and planning.
- (i) Bad habits.
- (j) Preventive and interceptive orthodontics.
- (k) Treatment: principles, problems with space, methods.
- (l) The role of extraction.
- (m) Retention.

Orthodontics 372 (ORD 372)

Qualification	Undergraduate

Language of tuition Double Medium

Academic organisation Periodontics and Oral Medicine

Period of presentation Semester 2

Module content

This module will provide the oral hygiene student with knowledge of the:

- Macro- and microscopic features of the periodontium
- Function of the periodontium
- Assessment and diagnosis of periodontal diseases
- Determine risk factors of periodontal diseases

Periodontology 271 (PDL 271)

Qualification Undergraduate

Module credits 11.00

Programmes [BOH Oral Hygiene](#)

Prerequisites ELH 121, ELH 122, AIM 101, ACO 171, ANA 171, FAR 171, FLG 171, GMB 171, MDB 171, ODO 171, ORD 171, PDL 171, TBW 171, VKM 171, NHS 171

Contact time 1 lecture per week for 16 weeks, 1 practical per week (30 week period)

Language of tuition Double Medium

Academic organisation Periodontics and Oral Medicine

Period of presentation Year

Module content

This module is a continuation of Periodontology 171 and will provide the oral hygiene student with knowledge of:

- Periodontal diseases • Pathogenesis of periodontal diseases • Implantology • Surgical procedures

The module will also enable the oral hygiene student to:

- Compile, exercise and evaluate a comprehensive and effective preventive, therapeutic and maintenance plan for the periodontal patient • Actively participate in the prevention, treatment and maintenance of periodontal conditions

Periodontology 370 (PDL 370)

Qualification	Undergraduate
Module credits	8.00
Programmes	BChD Dentistry
Prerequisites	BOK 280,(BOK 281 or (BOK 285,287)),BOK 283,GNK 286,GNK 288,GPS 280,IKT 200,SMO 211,SMO 281
Contact time	2 lectures per week
Language of tuition	Both Afr and Eng
Academic organisation	Periodontics and Oral Medicine
Period of presentation	Year

Module content

- The modules in the subject are offered in the third, fourth and fifth years of study.
- The depth and weighting of the knowledge base and the clinical application and interpretation of the modules will be dependent on the year of study.
- The goal is to educate and train general dental practitioners who will be able to apply their expertise and knowledge in the prevention and treatment of periodontal diseases in both the public and private sectors within the scope of the dental practitioner. In order to achieve this, the student must know the embryology, normal anatomy, histology and functions of the periodontium. The student must understand the aetiology, pathogenesis, the risk and other factors associated with the various forms of periodontal diseases, and their classification. The student must be able to perform a comprehensive clinical examination and use the information so gained to arrive at a diagnosis and treatment plan. The student must become proficient in applying preventive control methods, to supply oral hygiene methods and applicable instructions to the patient; motivating the patient; scaling and root planning; be able to correctly evaluate the tissue response to these procedures; be able to differentiate clinically between the various forms of periodontal disease and be able to perform clinical procedures associated with the treatment of early and moderate stages of periodontal diseases. The student must understand the treatment possibilities associated with established and advanced periodontal diseases, including regenerative procedures and implant treatment, and when and to whom, such patients should be referred for specialist diagnosis and treatment, should this be necessary.

Periodontology 372 (PDL 372)

Qualification	Undergraduate
Module credits	22.00
Programmes	BOH Oral Hygiene
Prerequisites	ODO 271, OFC 271, RAD 271, PDL 271, ORD 271, GAP 271, VKM 271, TBW 271
Contact time	1 lecture per week, 2 practicals per week, 1 discussion class per week
Language of tuition	English
Academic organisation	Periodontics and Oral Medicine
Period of presentation	Year

Module content

This module is chosen as an elective around the field of periodontics as main field of study. The module will provide the oral hygiene student with an in depth overview of the current status of Periodontics with the emphasis on the clinical application, understanding and role of the oral hygienist as part of the team. The purpose is to train the oral hygiene student to be competent in applying his/her expertise and knowledge in the prevention and treatment of periodontal diseases.

Periodontology 470 (PDL 470)

Qualification	Undergraduate
Module credits	8.00

Period of presentation	Year

Learning in public health 870 (PHM 870)

Qualification	Postgraduate
Module credits	5.00
Programmes	MMed Public Health Medicine MSc Aerospace Medicine MSc Biostatistics MSc Clinical Epidemiology MSc Environmental Health MSc Epidemiology MSc Public Health

Prerequisites	No prerequisites.
Contact time	1 seminar per week, 1 discussion class per week, 1 practical per week, 1 other contact session per week, 1 lecture per week
Language of tuition	English
Academic organisation	School of Health Syst & Public
Period of presentation	Year

Module content

This is the first (one-week) module at the beginning of the year focusing on learning. At the end of this week, you will have a much better understanding of what you actually want to achieve in public health and what you need to learn to get there. You will probably also have changed your views on learning: from individual surface learning and memorization, to valuing deep learning often in a group context. Finally, you will have achieved the ability to use the ever-increasing knowledge in health, philosophy, and ethics that are generated on the internet to your own best advantage.

Public health examination Part 1 871 (PHM 871)

Qualification	Postgraduate
----------------------	--------------

Module credits	1.00
Prerequisites	No prerequisites.
Language of tuition	English
Academic organisation	School of Health Syst & Public
Period of presentation	Semester 1

Public health examination Part 2 872 (PHM 872)

Qualification	Postgraduate
Module credits	1.00
Prerequisites	No prerequisites.
Language of tuition	English
Academic organisation	School of Health Syst & Public
Period of presentation	Semester 1

Learning in public health 880 (PHM 880)

Qualification	Postgraduate
Module credits	10.00
Programmes	MPublic Health Public Health
Prerequisites	None.
Language of tuition	English
Academic organisation	School of Health Syst & Public
Period of presentation	Year

Module content

The history and scope of public health. The importance of self-motivated "deep" learning as opposed to passive learning. Learning the value of group work. The use of the internet and the library to research areas of study. The writing of literature reviews and assignments, the avoidance of plagiarism. Improving English writing skills. Elements of human rights and public health ethics. Students will be given an assignment involving a short literature search and applied writing practice.

Dissertation: Public Health 890 (PHM 890)

Qualification	Postgraduate

Language of tuition	English
Academic organisation	Community Dentistry
Period of presentation	Year

Module content

This module is chosen as an elective to further studies in the field of community dentistry. This module will provide the oral hygiene student with a deeper understanding and skills in the fields of Preventive Dentistry, Oral Epidemiology, and Administration and Management. This will enable him/her to be able to develop and manage a needs-related preventive programme for the individual high risk patient and also for a specific community or population. It will be expected of the student to submit a minor research report demonstrating his/her understanding and skills in the field of public oral health. The main subject consists of four syllabus themes, namely:

- Preventive dentistry
- Oral epidemiology
- Project management
- Minor research report

Sport science 700 (POK 700)

Qualification	Postgraduate
Module credits	96.00
Programmes	BScHons Sports Science
Prerequisites	No prerequisites.
Language of tuition	Both Afr and Eng
Academic organisation	Centre of Sports Sciences
Period of presentation	Year

Dissertation: Sports science 890 (POK 890)

Qualification	Postgraduate
Module credits	240.00
Programmes	MSc Sports Science
Prerequisites	No prerequisites.
Language of tuition	Both Afr and Eng
Academic organisation	Centre of Sports Sciences
Period of presentation	Year

Dissertation: Biomechanics 892 (POK 892)

Qualification	Postgraduate
Module credits	180.00
Language of tuition	English
Academic organisation	Centre of Sports Sciences
Period of presentation	Year

Thesis: Sports science 990 (POK 990)

Qualification	Postgraduate
Module credits	480.00
Programmes	PhD Sports Science
Prerequisites	No prerequisites.
Language of tuition	Both Afr and Eng
Academic organisation	Centre of Sports Sciences
Period of presentation	Year

Thesis: Biokinetics 991 (POK 991)

Qualification	Postgraduate
Module credits	360.00
Language of tuition	English
Academic organisation	Centre of Sports Sciences
Period of presentation	Year

Thesis: Biomechanics 992 (POK 992)

Qualification	Postgraduate
Module credits	360.00
Language of tuition	English
Academic organisation	Centre of Sports Sciences
Period of presentation	Year

Professional development and leadership 300 (POL 300)

Qualification	Undergraduate
Module credits	13.00
Programmes	BPhysT Physiotherapy
Prerequisites	FSG 251,FSG 252,FSG 261,FSG 262,ANP 210,GMB 252,GMB 253,FTP 231,FTP 241,POL 251
Language of tuition	Both Afr and Eng
Academic organisation	Physiotherapy
Period of presentation	Year

Module content

Evidence-based practice, ethics in physiotherapy practice, counselling skills, group dynamics, management of human behaviour, medico-legal documentation. Introduction to marketing, information management, principles of research in physiotherapy, single subject design. Problem-solving in a variety of health and healthcare situations.

Professional development and leadership 400 (POL 400)

Qualification	Undergraduate
Module credits	19.00
Programmes	BPhysT Physiotherapy
Prerequisites	RHC 451,RHC 452,FAR 381,FAR 382,FTP 300,FTP 301,POL 300
Language of tuition	Both Afr and Eng
Academic organisation	Physiotherapy
Period of presentation	Year

Module content

Theoretical and practical handling of marketing, management models, financial management, presentation of a scientific paper, diversity in the workplace, continuing professional development, quality assurance, management human behaviour, private practice management, labour relations.

Examination period: October/November.

Policy practice seminar 770 (PPS 770)

Qualification	Postgraduate
Module credits	5.00
Programmes	PGDip Option: Executive Leadership
Prerequisites	No prerequisites.
Contact time	50 hours per week
Language of tuition	English
Academic organisation	Public Health Medicine
Period of presentation	Year

Module content

The fundamentals of health policy practice implementation will be discussed and methods of analysis will be linked to how the best effective health policy processes can be structured to respond to the health needs. The policy chain from inception to implementation will be analysed to establish why SA health policies, which are rated as very good, never gets implemented and where they are implemented, the results are less than optimal. How can policy practice assist executive leaders in health to work smarter, with fewer resources and achieve greater results for effective service delivery. The role of the community in the policy development and practice process will analysed to see what lessons can be learned to cut down on bureaucracy and red tape.

Sports practical (basic) 100 (PRC 100)

Qualification	Undergraduate
Module credits	12.00
Programmes	BSportSci BSportSci
Contact time	2 practicals per week

Language of tuition English

Academic organisation Biokinetics and Sports Science

Period of presentation Year

Module content

*Closed – requires departmental selection. Sports-specific skills, team situation; rules and regulations, refereeing; game analysis; coaching.

Prosthodontics 270 (PRD 270)

Qualification	Undergraduate
Module credits	3.00
Programmes	BChD Dentistry
Prerequisites	No prerequisites.
Contact time	1 practical per week
Language of tuition	English
Academic organisation	Prosthodontics
Period of presentation	Year

Module content

- Basic tooth morphology
- Introduction to dental laboratory procedures in Removable Prosthodontics

Prosthodontics 370 (PRD 370)

Qualification	Undergraduate
Module credits	41.00

Programmes	BChD Dentistry
Prerequisites	BOK 280,BOK 281,BOK 283,GNK 286,GNK 288,GPS 280,IKT 200,SMO 211,SMO 281
Contact time	3 practicals per week, 3 lectures per week, 2 discussion classes per week
Language of tuition	English
Academic organisation	Prosthodontics
Period of presentation	Year

Module content

Examination and evaluation of the denture patient, principles and taking of impressions, determination of vertical and horizontal jaw relations and facial bow recording. Aesthetics. Fitting and placing of the finished denture. Post treatment. Clinical aspects of manufacturing of complete and partial dentures, obturators and special apparatus.

Prosthodontics 470 (PRD 470)

Qualification	Undergraduate
Module credits	26.00
Programmes	BChD Dentistry
Prerequisites	GNK 388,MDB 370,TGG 370,FSG 370,FAR 370,RAD 370,TBW 370,ODO 370,PDL 370,GPS 370,ORD 370,OFC 370,PRD 370
Contact time	2 practicals per week, 1 lecture per week
Language of tuition	Double Medium
Academic organisation	Prosthodontics
Period of presentation	Year

Module content

Examination and evaluation of the denture patient, principles and taking of impressions, determination of vertical and horizontal jaw relations and facial bow recording. Aesthetics. Fitting and placing of the finished denture. Post treatment. Clinical aspects of manufacturing of complete and partial dentures, obturators and special apparatus.

Prosthodontics 570 (PRD 570)

Qualification	Undergraduate
Module credits	31.00
Programmes	BChD Dentistry
Prerequisites	TBW 470,ODO 470,MFP 470,PDL 470,DFA 470,OFC 470,PRD 470,GAP 470,TMZ 470
Contact time	4 practicals per week, 2 lectures per week, 1 discussion class per week
Language of tuition	Double Medium
Academic organisation	Prosthodontics

Period of presentation Year

Module content

Examination and evaluation of the denture patient, principles and taking of impressions, determination of vertical and horizontal jaw relations and facial bow recording. Aesthetics. Fitting and placing of the finished denture. Post treatment. Clinical aspects of manufacturing of complete and partial dentures, obturators and special apparatus. Pre-clinical crown and bridge techniques course. Examination and evaluation of patient's requiring crown and bridge treatment. Principles of tooth preparation and impression-making. Shade selection. Finishing and cementation of fixed restorations. Clinical aspects of manufacturing of single crowns and fixed prostheses. An introduction to lasers and implants.

The diploma will enable the postgraduate student to become competent in the area of practice management by developing an understanding of business skills. The student must demonstrate the ability to analyse and interpret practice-related management problems.

Practice management 800 (PRS 800)

Qualification	Postgraduate
Module credits	24.00
Prerequisites	No prerequisites.
Contact time	2 discussion classes per week, 2 seminars per week
Language of tuition	Both Afr and Eng
Academic organisation	Community Dentistry
Period of presentation	Year

Patients with special needs 371 (PSB 371)

Qualification	Undergraduate
Module credits	12.00
Programmes	BOH Oral Hygiene
Prerequisites	ODO 271, OFC 271, RAD 271, PDL 271, ORD 271, GAP 271, VKM 271, TBW 271
Contact time	2 lectures per week for 30 weeks, 1 seminar for 3 hours
Language of tuition	Double Medium
Academic organisation	Community Dentistry
Period of presentation	Year

Module content

Patients with special needs pose unique challenges, especially in relation to the need for an inventive and carefully planned approach suited to each individual's needs. This module will therefore equip the oral hygiene student to manage patients in this regard. The focus is on adapting and modifying the approach and management of the patient according to the specific need for instance pregnancy, physical and mental disabilities, medical conditions and age.

Psychiatry 800 (PSI 800)

Implementation of quality improvement modalities (strategies) in the health system 771 (QIM 771)

Qualification Postgraduate

Module credits 10.00

Programmes PGDip Option: Executive Leadership

Prerequisites No prerequisites.

Contact time 50 hours per week

Language of tuition English

Academic organisation Public Health Medicine

Period of presentation Year

Module content

Participants will be required to identify the current quality challenges at their place of work and develop an advanced quality improvement strategic plan which they can implement. The plan must respond to the recent audit of facilities conducted by the Department of Health. Participants will be required upon returning to their place of work to implement the plan and after 6 months report on the results and what improvements had occurred as a result of their plans. The key factors to be addressed include waiting times, availability of medication, cleanliness of facilities, the long queues and patient satisfaction. Participants will be taught quality improvement strategies related to executive leadership, learning and organisational change.

Radiography 271 (RAD 271)

Qualification Undergraduate

Module credits 20.00

Programmes	BOH Oral Hygiene
Prerequisites	ELH 121, ELH 122, AIM 101, ACO 171, ANA 171, FAR 171, FLG 171, GMB 171, MDB 171, ODO 171, ORD 171, PDL 171, TBW 171, VKM 171, NHS 171
Contact time	1 lecture per week for 30 weeks, 2 practicals per week (30 week period)
Language of tuition	Double Medium
Academic organisation	Oral Pathology and Oral Biolog
Period of presentation	Year

Module content

The oral hygiene student must be competent to produce a variety of intra- and extra-oral radiographs of good diagnostic quality. He/she must also recognise relevant anatomical landmarks on a radiograph and distinguish between normal and abnormal appearances. He/she must at all times be conscious of possible deleterious effects of radiation on biological systems.

Diagnostic imaging 370 (RAD 370)

Qualification	Undergraduate
Module credits	8.00
Programmes	BChD Dentistry
Prerequisites	BOK 280,(BOK 281 or (BOK 285,287)),BOK 283,GNK 286,GNK 288,GPS 280,IKT 200,SMO 211,SMO 281
Contact time	2 practicals per week, 1 lecture per week, 1 discussion class per week
Language of tuition	Both Afr and Eng
Academic organisation	Oral Pathology and Oral Biolog
Period of presentation	Year

Radiography 371 (RAD 371)

Qualification	Undergraduate
Module credits	20.00
Programmes	BOH Oral Hygiene
Prerequisites	ODO 271, OFC 271, RAD 271, PDL 271, ORD 271, GAP 271, VKM 271, TBW 271
Contact time	1 lecture per week, 2 practicals per week
Language of tuition	Double Medium
Academic organisation	Oral Pathology and Oral Biolog
Period of presentation	Year

Module content

This module is aimed at providing the oral hygiene student with the necessary skills, attitude and relevant knowledge by studying the following aspects in radiation physics relevant to dentistry:

- Electromagnetic waves – their properties and behaviour
- X-rays – their specific properties, sources of X-rays and production of X-rays
- Construction of the X-ray tube
- Accurate image formation
- Interaction of photons with living tissues
- Radiation biology
- Radiation protection
- ALARA principle
- Quality control measures

This module furthermore entails practical work in the Radiology section.

Diagnostic imaging 470 (RAD 470)

Qualification	Undergraduate
Module credits	13.00
Programmes	BChD Dentistry
Prerequisites	GNK 388,MDB 370,TGG 370,FSG 370,FAR 370,GPS 370,TBW 370,ODO 370,PDL 370,ORD 370,OFC 370,TK 370,RAD 370
Contact time	1 practical per week, 1 discussion class per week
Language of tuition	English
Academic organisation	Oral Pathology and Oral Biolog
Period of presentation	Year

Module content

Diagnostic imaging 370/470 is a two year course delivered during the 3rd and 4th years of the BChD programme. It deals with all aspects of radiographic imaging of the maxillofacial region appropriate to the Dentist. Diagnostic imaging 370 is delivered during BChD III as a promotion course. Diagnostic imaging 470 is an examination course delivered during BChD IV. The purpose of Diagnostic imaging 470 is: - To formalise teaching and examination of Diagnostic Imaging 370/470. - To certify students' ability to apply knowledge obtained in Diagnostic Imaging 370 to clinical and practical situations of Diagnostic Imaging. - To certify that students act professionally during clinical situations of Diagnostic Imaging.

Diagnostic imaging 570 (RAD 570)

Qualification	Undergraduate
Module credits	8.00
Programmes	BChD Dentistry
Prerequisites	TBW 470,ODO 470,MFP 470,PDL 470,ORD 470,OFC 470,PTK 470,GAP 470,TMZ 470,RAD 470
Contact time	1 discussion class per week, 1 practical per week

Language of tuition	English
Academic organisation	Oral Pathology and Oral Biolog
Period of presentation	Semester 1

Module content

Diagnostic imaging 570 is an attendance course presented during the first semester of BChD V. The purpose of the course is: - To formalise teaching and formative assessment of final year students' clinical and diagnostic skills in Diagnostic imaging. - To develop students' confidence in clinical aspects of Diagnostic imaging. - To ensure radiographic service rendering in Diagnostic imaging by senior (5th year) students while 4th year students are in training.

Radiography 700 (RAD 700)

Qualification	Postgraduate
Module credits	90.00
Programmes	Postgrad Dipl in Dentistry Radiography
Prerequisites	No prerequisites.
Language of tuition	Both Afr and Eng
Academic organisation	Oral Pathology and Oral Biolog
Period of presentation	Year

Module content

Advanced dental radiography.

Regression analysis 780 (RAL 780)

Qualification	Postgraduate
Module credits	15.00
Programmes	BComHons Statistics BScHons Biostatistics
Service modules	Faculty of Health Sciences Faculty of Natural and Agricultural Sciences
Prerequisites	STK 310 and STK 320
Contact time	1 lecture per week, 1 web-based period per week
Language of tuition	English
Academic organisation	Statistics
Period of presentation	Semester 1

Module content

Matrix methods in statistics. Simple and multiple regression models. Sums of squares of linear sets. Generalised t- and F-tests. Residual analysis. Diagnostics for leverage, influence and multicollinearity. Indicator variables. Regression approach to analysis of variance. Weighted least squares. Ridge regression. Theory is combined with practical work.

Radiographic anatomy 100 (RAN 100)

Qualification	Undergraduate
----------------------	---------------

Module credits	20.00
Programmes	BRad Diagnostics
Prerequisites	No prerequisites.
Contact time	1 practical per week, 2 lectures per week
Language of tuition	English
Academic organisation	Anatomy
Period of presentation	Year

Module content

General introduction to anatomy: Anatomical terminology, surface and regional anatomy, histology of basic tissues; ossification, healing and repair. Introduction to osteology. Regional anatomy I: Thoracic skeleton and thoracic soft tissues; osteology; joints and soft tissues of the extremities; osteology and joints of the vertebral column; abdominal surface anatomy; osteology and soft tissue of the pelvis. Skull I: Cranium and facial bones. Radiographic anatomy I: Regional radiographic anatomy, with emphasis on the skeletal components.

Radiographic anatomy 280 (RAN 280)

Qualification	Undergraduate
Module credits	10.00
Programmes	BRad Diagnostics
Prerequisites	RFI 110,MTL 180,RAN 100,FSG 161,FSG 162,RAW 182,RAW 180
Contact time	1 other contact session per week, 1 discussion class per week, 2 lectures per week
Language of tuition	English
Academic organisation	Anatomy
Period of presentation	Semester 1

Module content

Systemic anatomy I: Digestive and urogenital systems. Sensory organs: Skin; eye; ear; nose; tongue. Skull II: Advanced osteology; base of cranium; openings and sinuses. Radiographic anatomy II: Systemic anatomy with emphasis on soft tissue components.

Radiographic anatomy 380 (RAN 380)

Qualification	Undergraduate
Module credits	10.00
Programmes	BRad Diagnostics
Prerequisites	RFI 210,RFI 211,RAN 280,FSG 251,FSG 252,FSG 262
Contact time	2 lectures per week, 1 practical per week, 1 discussion class per week
Language of tuition	English
Academic organisation	Anatomy

Period of presentation Year

Module content

Systemic anatomy II: Female reproductive system and breast; Cardiovascular system; Cerebrospinal fluid system. Introduction to neuroanatomy.

Regional cross-sectional anatomy: Cranium, brain; thorax; abdomen; pelvis and limbs.

Radiographic anatomy III: Systemic and cross-sectional anatomy with emphasis on three-dimensional reconstruction.

Radiographic anatomy 700 (RAN 700)

Qualification Postgraduate

Module credits 20.00

Programmes [BRadHons Diagnostics](#)

Prerequisites No prerequisites.

Language of tuition English

Academic organisation Anatomy

Period of presentation Semester 1

Radiography 180 (RAW 180)

Qualification Undergraduate

Module credits 50.00

Programmes [BRad Diagnostics](#)

Prerequisites No prerequisites.

Contact time 4 discussion classes per week, 1 seminar per week, 1 lecture per week

Language of tuition English

Academic organisation Radiography

Period of presentation Year

Module content

(a) Introduction to radiography. Concepts of ethics, profession and professionalism. Professional standards in radiography. Communication skills: interpersonal and scientific. Radiation protection concepts and equipment. Principles of infection control. Radiographic procedures and positioning principles. Care of the patient. Pathological condition. Related imaging modalities. (b) Patients with special problems. Handling of paediatric patients and geriatric patients. (c) Radiographic examinations: thorax, abdomen, extremities, hip, pelvis, spine and skull. Theoretical and practical instruction is used to integrate basic sciences and clinical radiography. Procedural considerations and positioning techniques. Selection of technique factors. Radiation protection. Pathological conditions and film evaluation. Problem-solving. Execution of radiographic examinations and procedures. Trauma.

Radiographic imaging 182 (RAW 182)

Qualification Undergraduate

Module credits	20.00
Programmes	BRad Diagnostics
Prerequisites	No prerequisites.
Contact time	1 lecture per week, 1 seminar per week, 1 discussion class per week
Language of tuition	Both Afr and Eng
Academic organisation	Radiography
Period of presentation	Year

Module content

Introduction: Discovery of X-rays, processing principles, handling of X-ray equipment. X-beam: production of X-rays, attenuation. Properties of the radiographic image: visibility and geometric properties. Image formation: interaction between X-rays and the human body and subject contrast. Primary exposure factors: mAs, kVp and SID. AEC. Principles of technique charts. Image recording: darkrooms, cassettes, intensifying screens, efficiency of rare earth intensifying screens and X-ray film construction. Control of scatter radiation: production of scatter, effect of scattered radiation on the image, beam restriction devices, grids and grid efficiency. Geometry: focal spot size, SID, OID, X-ray beam/body part/film alignment, influence of distances and other variables on the geometric properties of the image. Introduction to digital radiography.

Radiography 280 (RAW 280)

Qualification	Undergraduate
Module credits	54.00
Programmes	BRad Diagnostics
Prerequisites	RAN 100,RFI 110,FSG 161,FSG 162,RAW 180,RAW 182,MTL 180
Contact time	1 lecture per week, Community Engagement, 3 discussion classes per week
Language of tuition	Double Medium
Academic organisation	Radiography
Period of presentation	Year

Module content

Skeletal system: Procedures and techniques for: positioning, patient care, selection of technique factors, radiation protection, pathological conditions and film evaluation. Problem-solving. Execution of radiographic examinations and procedures. Trauma. Alternative imaging and film principles and procedures. Apparatus. Radiation protection.

Radiographic procedures: Execution of radiographic examinations and procedures, selection of technique factors, radiation protection, problem-solving, pathological conditions and film evaluation for neonatal and mobile unit procedures. Orthopaedic theatre procedures. Soft tissue contrast media examinations. Applied nursing sciences. Research principles

Practical implementation: Compilation of a portfolio. Theoretical and practical tuition are used to integrate science and clinical radiography.

Radiographic imaging 282 (RAW 282)

Qualification	Undergraduate
Module credits	20.00
Programmes	BRad Diagnostics
Prerequisites	RAN 100,RFI 110,FSG 161,FSG 162,RAW 180,RAW 182,MTL 180
Contact time	1 discussion class per week, 1 lecture per week
Language of tuition	Double Medium
Academic organisation	Radiography
Period of presentation	Year

Module content

Film evaluation. Application of technique factors, compiling of technique charts. Films, film technology, image formation and sensitometric properties. Processing, monitoring the processor and processing area. Darkroom and design, chemicals. Quality assurance tests. Digital radiography: image formation and processing.

Radiation therapy and nuclear medicine 284 (RAW 284)

Qualification	Undergraduate

Language of tuition	Double Medium
Academic organisation	Radiography
Period of presentation	Quarter 4

Module content

(a) Radiobiology: Cell survival curves and target theories, radiation effects on tissue, tissue and organ radio sensitivity. Radiation pathology, acute and chronic effects, late effects of radiation. Clinical radiobiology: Radiation therapy, tumour radiobiology, fractionation, iso-effect formulae. (b) Introduction to radiation therapy: Origin and incidence of cancer, diagnoses and staging, treatment and modalities. Treatment methods in radiation therapy. Preparation for external beam irradiation. Dosage. Biological principles of radiation. Effects of radiation on normal tissue. (c) Introduction to nuclear medicine: Principles of nuclear physics and nuclear medicine, nuclear instrumentation, radio chemical pharmacology. Basic approach to clinical nuclear medicine and relevant techniques.

Radiography 380 (RAW 380)

Qualification	Undergraduate
Module credits	52.00
Programmes	BRad Diagnostics

Prerequisites	FSG 251,FSG 252,FSG 262,GNK 286,RAN 280,RAW 281,RAW 282,RAW 283,RGB 281,RFI 210
Contact time	4 discussion classes per week, 1 lecture per week, 1 seminar per week
Language of tuition	Double Medium
Academic organisation	Radiography
Period of presentation	Year

Module content

Cardiovascular system: Imaging equipment: laser imager and dry film imager, construction, operation and films. Digital subtraction and image manipulation, viewing, recording and storing of images. Principles and equipment considerations for cardioangiography and angiography. Selective angiography. Intervention techniques (vascular and non-vascular). Venography. Seldinger technique, contrast media, medication, catheters, guide wires and accessories. Quality assurance and quality control. Patient care. Medico-legal aspects. Research. Case presentations. Pattern recognition. Clinical experience and evaluation. Clinical evaluation of an excretory urogram that was done theoretically in the 2nd year. Mammography: Introduction. Principles of soft tissue radiography. Communication and health promotion. Medico-legal aspects. Management of breast disease, patient care and treatment options. Mammography equipment, radiation safety and technique factors. Image receptors. Processing requirements. Positioning principles and special procedures. Systematic evaluation of the images. Different modalities or equipment to demonstrate the breast. Quality assurance and quality control. Case presentation. Research. Pattern recognition. Clinical experience and evaluation. Hysterosalpingography: Booking procedures, patient-radiographer relationship, procedural considerations and evaluation criteria. Pattern recognition. Bone densitometry: Principles, bone biology and remodelling, osteoporosis, core competencies for radiographers, physical principles of dual X-ray absorptiometry and other bone densitometry techniques. Clinical experience. Ultrasound: General principles. Clinical experience. Computer Tomography: Imaging principles – conventional and spiral. Factors affecting image quality. Contrast media. Protocol for different examinations. Patient care. Case presentation. Research. Pattern recognition. Clinical experience and evaluation. Magnetic resonance imaging: Imaging principles and image characteristics. Contrast media. Protocol for the different examinations. Patient care. Clinical experience. Myelography. Research project. Clinical evaluation and film evaluation of examinations that were done theoretically in the first and second year.

Radiography practice 382 (RAW 382)

Qualification	Undergraduate
Module credits	30.00
Programmes	BRad Diagnostics
Prerequisites	No prerequisites.
Contact time	1 seminar per week, 2 discussion classes per week, 1 lecture per week
Language of tuition	Double Medium
Academic organisation	Radiography
Period of presentation	Year

Module content

Ethics. Law as applied to radiography. Health care. Healthcare delivery. Systems. Health policy (national and international).
Planning of health facilities and services.
General management principles as applied to a radiography department. Purchase specifications processors and basic x-ray equipment. Comparison for clinical use. Accepting criteria.
Radiation safety: Simplifying and standardizing technique. Radiation protection and control (personnel and patients).
Quality assurance: Introduction. Quality patient care and assessment. Reject film analysis and research report.
Quality control tests and corrective action.
Film evaluation.

Quality assurance 780 (RAW 780)

Qualification	Postgraduate
Module credits	30.00
Programmes	BRadHons Diagnostics
Prerequisites	No prerequisites.
Contact time	1 discussion class per week
Language of tuition	English
Academic organisation	Radiography
Period of presentation	Semester 2

Image interpretation 781 (RAW 781)

Qualification	Postgraduate
Module credits	30.00
Programmes	BRadHons Diagnostics
Prerequisites	No prerequisites.
Contact time	1 discussion class per week
Language of tuition	English
Academic organisation	Radiography
Period of presentation	Semester 2

Computer tomography 782 (RAW 782)

Qualification	Postgraduate
Module credits	30.00
Programmes	BRadHons Diagnostics
Prerequisites	No prerequisites.
Contact time	1 discussion class per week

Language of tuition	English
Academic organisation	Radiography
Period of presentation	Semester 1

Magnetic resonance 783 (RAW 783)

Qualification	Postgraduate
Module credits	30.00
Programmes	BRadHons Diagnostics
Prerequisites	No prerequisites.
Contact time	1 discussion class per week
Language of tuition	English
Academic organisation	Radiography
Period of presentation	Semester 2

Intervention 784 (RAW 784)

Qualification	Postgraduate
Module credits	30.00
Programmes	BRadHons Diagnostics
Prerequisites	No prerequisites.
Contact time	1 discussion class per week
Language of tuition	English

Research project 310 (RCH 310)

Qualification	Undergraduate
Module credits	20.00
Programmes	BDietetics Dietetics BSc Nutrition
Service modules	Faculty of Natural and Agricultural Sciences
Prerequisites	3rd-year status
Contact time	2 lectures per week, 1 discussion class per week
Language of tuition	Double Medium
Academic organisation	Human Nutrition
Period of presentation	Semester 1

Module content

Research methods and process.

Research project 320 (RCH 320)

Qualification	Undergraduate
Module credits	10.00
Programmes	BDietetics Dietetics BSc Nutrition
Service modules	Faculty of Natural and Agricultural Sciences
Prerequisites	RCH 310
Contact time	1 discussion class per week, 1 lecture per week
Language of tuition	Double Medium
Academic organisation	Human Nutrition
Period of presentation	Semester 2

Module content

Literature study, protocol and statistics (1 l + 1 x 2h discussion).

Preparation of protocol and submission for approval (1 x 2h discussion).

Research 371 (RCH 371)

Qualification	Undergraduate
Module credits	5.00
Programmes	BOH Oral Hygiene
Prerequisites	ODO 271, OFC 271, RAD 271, PDL 271, ORD 271, GAP 271, VKM 271, TBW 271
Contact time	10 lectures
Language of tuition	Double Medium
Academic organisation	Community Dentistry
Period of presentation	Year

Module content

This module will assist the oral hygienist student to become competent in the area of research by becoming active consumers of research to improve their practice and also taking part in research in the area of oral health. The student must demonstrate the ability to take part in an oral health research project under the guidance of an experienced researcher and report on aspects of the research project such as the type of research, the elements of a scientific research methodology, the data collection and the statistical method(s) used in the project and the results.

Research project 410 (RCH 410)

Qualification	Undergraduate
----------------------	---------------

Module credits	7.00
Programmes	BDietetics Dietetics
Service modules	Faculty of Natural and Agricultural Sciences
Prerequisites	RCH 320
Language of tuition	Double Medium
Academic organisation	Human Nutrition
Period of presentation	Semester 1

Module content

Execution and reporting.

Research project 480 (RCH 480)

Qualification	Undergraduate
Module credits	6.00
Prerequisites	No prerequisites.
Language of tuition	Both Afr and Eng
Academic organisation	Human Nutrition
Period of presentation	Semester 1

Radiotherapeutic dosage planning 700 (RDB 700)

Qualification	Postgraduate
Module credits	50.00
Programmes	BRadHons Radiation Therapy
Prerequisites	No prerequisites.
Contact time	1 lecture per week, 1 practical per week, 1 discussion class per week

Radiation physics 110 (RFI 110)

Qualification	Undergraduate
Module credits	10.00
Programmes	BRad Diagnostics
Service modules	Faculty of Health Sciences
Prerequisites	No prerequisites.
Contact time	2 lectures per week
Language of tuition	Both Afr and Eng
Academic organisation	Physics

Period of presentation Year

Module content

Units: converting, dimensional analysis. Mechanics: momentum, force, energy, circular motion, moment of inertia, angular momentum, simple harmonic motion. Electrostatics: Coulomb's law, electric field, potential. Direct currents: resistors, Ohm's law. Capacitors: capacitance, series, parallel energy. Magnetism: force on a moving charge, electric motor. Electromagnetic induction: Faraday's law, Lenz's Law, generators. Alternating currents: average and rms value, three phase, rectification, transformers. Electrical safety. Atomic structure: ionization, excitation. X-rays: production, absorption.

Radiation physics 210 (RFI 210)

Qualification	Undergraduate
Module credits	10.00
Programmes	BRad Diagnostics
Service modules	Faculty of Health Sciences
Prerequisites	RFI 110, MTL 180, RAN 100, FSG 161, FSG 162, RAW 182 and RAW 180
Contact time	3 lectures per week
Language of tuition	Afrikaans
Academic organisation	Physics

Period of presentation Semester 1

Module content

X-ray generator: transformer, energy losses, rectifiers, capacitor-discharge systems, kVp and mA control, high voltage cables. Image intensifiers: design, brightness gain, coupling systems. TV camera and monitor: design, video signal, scanning. Image quality. Optics: reflection, refraction, total internal reflection, mirrors, lenses, thin lens formula, lens aberrations, fibre optics, lasers, laser camera. Computers: basic hardware, digital principles and terminology, data storage.

Radiation physics 211 (RFI 211)

Qualification	Undergraduate
Module credits	10.00
Programmes	BRad Diagnostics
Service modules	Faculty of Health Sciences
Prerequisites	RFI 110, RAW 180, RAN 100, FSG 161, FSG 162, RAW 182 and MTL 180
Contact time	4 lectures per week
Language of tuition	Afrikaans
Academic organisation	Physics
Period of presentation	Semester 2

Module content

Radio-active decay: half-life, alfa decay, beta decay, gamma decay. Production of isotopes cyclotron, nuclear reactor, Van de Graaff accelerator. Absorption: nucleons, alfa particles, beta particles. Dosimetry: exposure, absorbed dose, equivalent dose, effective dose, dose limits. Radiation detectors: Geiger counter, scintillation counter, thermoluminescent detector, semi-conductor detectors. Radiopharmaceuticals. Biological effects: genetic and somatic effects.

Radiation physics 310 (RFI 310)

Qualification	Undergraduate
Module credits	10.00
Service modules	Faculty of Health Sciences
Prerequisites	FSG 251, RFI 210, RAW 281, RBG 281, RAN 280, RAW 282, FSG 252, FSG 262, RAW 284 and RFI 211
Contact time	3 lectures per week
Language of tuition	Afrikaans
Academic organisation	Physics
Period of presentation	Semester 1

Module content

Computed tomography: CT generations. Equipment: x-ray tube, collimators, detectors. Image reconstruction: fundamental equations, algorithms. Image properties: field size, image matrix, voxel, pixel, CT number, window width and height. Image quality: spatial resolution, contrast resolution, quantum mottle, spatial uniformity and frequency. Image processing: edge enhancement, pixel shifting and subtraction. Digital radiography: X-ray, equipment, analogue to digital conversion, linear and logarithmic subtraction, image noise. Ultrasound: theory, transducers, piezo-electric crystals, resonant frequency, interaction with matter, acoustic impedance, Doppler techniques. Magnetic resonance: medical applications.

Radiation therapy 801 (RGT 801)

Qualification	Postgraduate
Module credits	24.00
Prerequisites	No prerequisites.
Language of tuition	Both Afr and Eng
Academic organisation	Radiography
Period of presentation	Year

Research in healthcare sciences 480 (RHC 480)

Qualification	Undergraduate
Module credits	16.00
Programmes	BCur Nursing Science BPhysT Physiotherapy
Prerequisites	No prerequisites.
Language of tuition	Double Medium
Academic organisation	Physiotherapy
Period of presentation	Semester 1

Module content

Research in healthcare sciences:

- Understanding the importance of evidence-based clinical practice.
- Understanding the research process and general approaches to research.
- Knowledge of the methodologies commonly used in healthcare sciences.
- Reading and critiquing published research.
- Writing a literature review.
- Understanding and respecting research ethics and the criteria for good quality research.

Clinical haematology for medical subspecialties Part 1 801 (RHE 801)

Qualification	Postgraduate
Module credits	120.00
Programmes	MPhil Clinical Haematology (Coursework)
Prerequisites	Relevant base speciality registration with HPCSA
Contact time	18 Months
Language of tuition	English
Academic organisation	Internal Medicine
Period of presentation	Year

Module content

Curriculum as designated by the relevant College of Medicine at www.collegemedsa.ac.za

Endocrinology for medical subspecialities Part 1 802 (RHE 802)

Qualification	Postgraduate
Module credits	120.00
Programmes	MPhil Endocrinology and Metabolism (Coursework)
Prerequisites	Relevant base speciality registration with HPCSA
Contact time	24 months
Language of tuition	English
Academic organisation	Internal Medicine
Period of presentation	Year

Module content

Curriculum as designated by the relevant College of Medicine at www.collegemedsa.ac.za

Infectious diseases for medical subspecialities Part 1 803 (RHE 803)

Qualification	Postgraduate
Module credits	120.00
Programmes	MPhil Maternal and Fetal Medicine (Coursework)
Prerequisites	Relevant base speciality registration with HPCSA
Contact time	24 months
Language of tuition	English
Academic organisation	Internal Medicine
Period of presentation	Year

Module content

Curriculum as designated by the relevant College of Medicine at www.collegemedsa.ac.za

Medical gastroenterology for medical subspecialities Part 1 804 (RHE 804)

Qualification	Postgraduate
Module credits	120.00
Programmes	MPhil Neonatology (Coursework)
Prerequisites	Relevant base speciality registration with HPCSA
Contact time	24 months
Language of tuition	English
Academic organisation	Internal Medicine
Period of presentation	Year

Module content

Curriculum as designated by the relevant College of Medicine at www.collegemedsa.ac.za

Nephrology for medical subspecialties Part 1 805 (RHE 805)

Qualification	Postgraduate
Module credits	120.00
Programmes	MPhil Paediatric Cardiology (Coursework)
Prerequisites	Relevant base speciality registration with HPCSA
Contact time	24 months
Language of tuition	English
Academic organisation	Internal Medicine
Period of presentation	Year

Module content

Curriculum as designated by the relevant College of Medicine at www.collegemedsa.ac.za

Pulmonology for medical subspecialties Part 1 806 (RHE 806)

Qualification	Postgraduate
Module credits	120.00
Programmes	MPhil Surgical Gastroenterology (Coursework)
Prerequisites	Relevant base speciality registration with HPCSA
Contact time	24 months
Language of tuition	English
Academic organisation	Internal Medicine
Period of presentation	Year

Module content

Curriculum as designated by the relevant College of Medicine at www.collegemedsa.ac.za

Rheumatology for medical subspecialties Part 1 807 (RHE 807)

Qualification	Postgraduate
Module credits	120.00
Programmes	MPhil Vascular Surgery (Coursework)
Prerequisites	Relevant base speciality registration with HPCSA
Contact time	24 months
Language of tuition	English
Academic organisation	Internal Medicine
Period of presentation	Year

Module content

Curriculum as designated by the relevant College of Medicine at www.collegemedsa.ac.za

Ethics and jurisprudence 710 (RLE 710)

Qualification	Postgraduate
Module credits	30.00
Programmes	Postgrad Dipl in Dentistry Practice Management
Prerequisites	A minimum of one year practice experience
Contact time	determined by Head of Department
Language of tuition	Both Afr and Eng
Academic organisation	Dental Management Sciences
Period of presentation	Semester 1

Module content

To be a good healthcare practitioner requires a life-long commitment to sound professional and ethical practices and an overriding dedication to the interests of fellow human beings and society. The term "profession" means "a dedication, promise or commitment publicly made". Practice as a healthcare professional is based on a relationship of mutual trust between patients and healthcare practitioners. In the course of their professional work healthcare practitioners are required to subscribe to certain rules of conduct. To this end the Health Professionals Council of South Africa (HPCSA) has formulated a set of rules regarding professional conduct against which complaints of professional misconduct will be evaluated. These rules are presented in the basic subject, Ethics and jurisprudence.

Research and professional development 380 (RPD 380)

Qualification	Undergraduate
Module credits	20.00
Programmes	BOccTher Occupational Therapy
Prerequisites	FSG 251, FSG 252, FSG 261, FSG 262, AKU 200, ART 282, ART 284, RPD 200, ART 281, ART 283
Language of tuition	Double Medium
Academic organisation	Occupational Therapy
Period of presentation	Quarter 3

Module content

Development, submission and approval of an occupational therapy related research protocol. Continued study of occupational therapy professional ethics and management. Elective fieldwork to promote professional development.

Research and professional development 481 (RPD 481)

Qualification	Undergraduate
Module credits	15.00
Programmes	BOccTher Occupational Therapy

Prerequisites	ANP 210, RPD 380, SEP 110/ZUL 110, AKU 303, AKU 381, AKU 382, ART 381, ART 382, ELH 121, ELH 122, AIM 101
Language of tuition	Double Medium
Academic organisation	Occupational Therapy
Period of presentation	Semester 1

Module content

Continued study of the process of research. Includes the implementation of the approved research protocol and the documentation and presentation of the completed research project.

Dissertation: Diagnostics 890 (RSD 890)

Qualification	Postgraduate
Module credits	240.00
Programmes	MRad Diagnostics
Prerequisites	No prerequisites.

Module content

In this module human development from conception through adolescence to adulthood is discussed with reference to various psychological theories. Incorporated are the developmental changes related to cognitive, physical, emotional and social functioning of the individual and the context of work in adulthood. Traditional and contemporary theories of human development explaining and describing these stages are studied in order to address the key issues related to both childhood and adulthood.

Strategic marketing (and communication) in health 770 (SMH 770)

Qualification Postgraduate

Module credits 5.00

Programmes [PGDip Option: Executive Leadership](#)

Prerequisites No prerequisites.

Contact time 50 hours per week

Language of tuition English

Academic organisation Public Health Medicine

Period of presentation Year

Module content

The module will enable the participant to create a messaging strategy that can be used in all marketing materials. To develop a marketing programme appropriate for the target audience using the most effective possibilities such as public relations, advertising, website (and other internet platforms), promotional seminars, conferences and trade booth opportunities, downloadable materials, direct marketing (offline and online), packaging, event sponsorships and merchandising promotions. The participant will be taught the skills to develop a communications programme that complements the marketing programme and provides timely and comprehensive internal, external and strategic communications initiatives in an integrated approach. One of the key issues will be the level of the health message and whether it makes an impact on the improvement of uptake of healthcare services.

Contact time 3 lectures per week

Language of tuition Double Medium

Academic organisation Sport and Leisure Studies

Period of presentation Semester 1

Module content

This module is a broad introduction to sport and recreation as products in the market. Students discover the nature of sport and recreation, the difference between the concepts and policies, plans, strategies and structures of sport and recreation in South Africa and Zone VI in Africa. The dynamic scope and nature of recreation and sports management are introduced and discussed. Emphasis is placed on basic management tasks and functions in sport and recreation contexts, interpersonal skills, leadership and control systems and techniques in sport and recreation. The module establishes a foundation of management knowledge and skills on which subsequent sport and recreation management modules are built.

Comprehensive patient management 171 (TBW 171)

Qualification Undergraduate

Module credits 2.00

Programmes BOH Oral Hygiene

Prerequisites No prerequisites.

Contact time 1 other contact session per week, 1 practical per week

Language of tuition Double Medium

Academic organisation Dental Management Sciences

Period of presentation Semester 2

Module content

The purpose of this module is to:

- embed communication skills required during patient management; and
- facilitate an understanding of the patient's psycho-social dimensions that may influence health-related behaviour and customer demand.

Comprehensive patient management 271 (TBW 271)

Qualification Undergraduate

Module credits 3.00

Programmes BOH Oral Hygiene

Prerequisites ELH 121, ELH 122, AIM 101, ACO 171, ANA 171, FAR 171, FLG 171, GMB 171, MDB 171, ODO 171, ORD 171, PDL 171, TBW 171, VKM 171, NHS 171

Contact time 1 practical per week, 1 lecture per week

Language of tuition Double Medium

Academic organisation Dental Management Sciences

Period of presentation Year

Module content

The purpose of this module is to:

- Embed aspects related to occupational health and safety
- Embed communication skills required during patient management
- Develop presentation skills to address large audiences
- Facilitate an understanding of professionalism and ethical behaviour
- Embed knowledge about legal aspects that are related to dentistry
- Embed knowledge/skills in terms of administrative management and scheduling in a dental practice
- Embed psychological aspects pertaining to patient management
- Facilitate the management of a primary preventive treatment plan
- Provide primary preventive treatment in cooperation with senior BChD students

Comprehensive patient management 370 (TBW 370)

Qualification	Undergraduate
Module credits	10.00
Programmes	BChD Dentistry
Prerequisites	BOK 280,(BOK 281 or (BOK 285,287)),BOK 283,GNK 286,GNK 288,GPS 280,IKT 200,SMO 211,SMO 281
Contact time	1 lecture per week, 1 practical per week, 1 other contact session per week
Language of tuition	Double Medium
Academic organisation	Dental Management Sciences
Period of presentation	Year

Module content

Holistic evaluation of a patient, the clinical hypothetic-deductive reasoning processes, diagnosis, prognosis and treatment planning. Under the guidance of a tutor, and by utilising a special “practice patient” file, the students start treating a “practice patient” comprehensively. The student compiles a portfolio, on a continuous basis, on the clinical and administrative procedures concerning the “practice patient”. The portfolio contains the student’s year mark, which is determined on a 50:50 basis, with the examination mark as the final pass mark. The examination mark is determined when the student presents the practice patient case to an audience and a panel of adjudicators.

Application of business management principles during patient management. Preparing the student for a meaningful and successful career in an increasingly complex business and health care environment. Application of certain principles and skills in terms of:

- Psychology in the dentistry practice.
- Political parameters in dentistry.
- Sociology and dentistry.
- Ethics for the dentist.
- Career possibilities.
- Management of a practice.

Additional to this, students should understand the economic, cultural, legal and regulatory environment to establish and optimise patient management.

Comprehensive patient management 371 (TBW 371)

Qualification	Undergraduate
Module credits	3.00
Programmes	BOH Oral Hygiene
Prerequisites	ODO 271, OFC 271, RAD 271, PDL 271, ORD 271, GAP 271, VKM 271, TBW 271
Contact time	2 practicals per week, 1 other contact session per week, 1 lecture per week
Language of tuition	English
Academic organisation	Dental Management Sciences
Period of presentation	Year

Module content

The purpose of this module is to:

- Facilitate an understanding of technology management and maintenance
- Embed knowledge/skills in terms of administrative management and scheduling in a dental practice
- Facilitate an understanding of customer needs and demands
- Embed knowledge/skills regarding internal marketing in a dental practice
- Facilitate career management abilities
- Facilitate and understanding of an employee's rights in terms of the labour law
- Facilitate an understanding of an oral hygienist's role in the management of a dental practice
- Facilitate the management of a primary preventive treatment plan
- Provide primary preventive treatment in cooperation with senior BChD students

Module content

The purpose of this module is to enable the dentist to identify medical problems, which may have an effect on the dental treatment or may affect the patient's general health. The dentist must be able to interpret the patient's medical history, in order to modify the treatment plan accordingly to ensure a safe dental treatment and/or to refer the patient for medical or specialist care.

Essay: Dental health education 800 (TGO 800)

Qualification	Postgraduate
Module credits	24.00
Prerequisites	No prerequisites.
Language of tuition	Both Afr and Eng

Academic organisation Community Dentistry

Period of presentation Year

Dental materials 700 (THM 700)

Qualification Postgraduate

Module credits 100.00

Programmes [Postgrad Dipl in Dentistry Dental Materials](#)

Prerequisites No prerequisites.

Period of presentation Semester 2

Module content

Planning and layout of food service units for different food service systems. Equipment for food services. Factors influencing the choice and purchasing of equipment for different food service units. Hygiene and safety in food services. management in food service systems. Financial management in food services.

Nursing dynamics 110 (VDN 110)

Qualification Undergraduate

Module credits 14.00

Programmes [BCur Nursing Science \(Education and Administration\)](#)

Prerequisites No prerequisites.

Contact time 2 lectures per week, 1 other contact session per week

Language of tuition	English
Academic organisation	Nursing Science
Period of presentation	Semester 1

Module content

Healthcare environment: structure, dynamics and impact on the clinical standards of nursing practice. National population and health profiles. Epidemiological viewpoints on health. The healthcare environment and the dynamics of healthcare services. Factors influencing contemporary health service delivery. Policies and the rendering of healthcare in South Africa. Selected healthcare practice models (including the characteristics of nursing practice). The basic principles and methodology of nursing research. Applying research to nursing practice.

Leadership principles in nursing practice.

Leadership styles and skills. Directing in the nursing unit. Principles of human resource management and development. The principles of adult teaching and learning in clinical practice. The adult learner and evaluation.

Nursing dynamics 120 (VDN 120)

Qualification	Undergraduate
Module credits	14.00
Programmes	BCur Nursing Science (Education and Administration)
Prerequisites	VDN 110
Contact time	2 lectures per week, 1 other contact session per week
Language of tuition	English
Academic organisation	Nursing Science
Period of presentation	Semester 2

Module content

Communication and management principles for nursing practice.

Assertiveness and interpersonal communication, team building, and managing cultural diversity and change. Written communications. Management of conflict, crisis intervention and stress management. Facilitation of health, wellness and community development.

Basic first-level management principles in nursing practice. Quality assurance and standards for nursing practice. Principles of financial planning and management. Private nursing practice.

Ethical-legal framework for nursing practice.

Professional tasks and responsibilities of registered nurses and midwives/accoucheurs. Development of the nursing profession, nursing ethos and fundamental viewpoints. Principles of professional practice. Conduct, statutory control and professional self-regulation. Human rights, the rights of patients and international perspectives on patient care. Ethics, ethical dilemmas and ethical decision-making in nursing practice.

Preventive oral health 171 (VKM 171)

Qualification	Undergraduate
Module credits	15.00
Programmes	BOH Oral Hygiene
Prerequisites	No prerequisites.
Contact time	1 practical per week, 1 discussion class per week
Language of tuition	Double Medium
Academic organisation	Community Dentistry
Period of presentation	Year

Module content

This module entails lectures and clinical work, pertaining to the scope of oral hygiene, in the pre-clinical ward. It is aimed at enabling an oral hygiene student to develop his/her skills, knowledge and attitude by means of developing, implementing and evaluating a needs-driven primary and basic-secondary preventive programme for a patient.

Preventive oral health 271 (VKM 271)

Qualification	Undergraduate
Module credits	58.00
Programmes	BOH Oral Hygiene
Prerequisites	No prerequisites.
Contact time	1 lecture per week for 30 weeks, 6 practicals (30 week period)
Language of tuition	Double Medium
Academic organisation	Community Dentistry
Period of presentation	Semester 2

Module content

This module is a continuation of Preventive Oral Health 171 and is aimed at enabling an oral hygiene student to develop his/her skills, knowledge and attitude by means of devising, implementing and evaluating a needs-driven primary and basic-secondary preventive programme for a patient. This module entails lectures and clinical work, pertaining to the scope of oral hygiene, on real patients.

Preventive oral health 371 (VKM 371)

Qualification	Undergraduate
Module credits	36.00
Programmes	BOH Oral Hygiene
Prerequisites	ODO 271, OFC 271, RAD 271, PDL 271, ORD 271, GAP 271, VKM 271, TBW 271
Contact time	6 practicals (30 week period)
Language of tuition	Double Medium
Academic organisation	Community Dentistry
Period of presentation	Year

Module content

This module entails clinical work, pertaining to the scope of oral hygiene, on patients in the preventive clinic. The module is aimed at enabling an oral hygiene student to develop his/her skills, knowledge and attitude by means of devising, implementing and evaluating a primary and basic-secondary preventive programme for a patient.

Nursing research methodology 100 (VNM 100)

Qualification	Undergraduate
Module credits	22.00
Programmes	BCur Nursing Science (Education and Administration)
Prerequisites	No prerequisites.
Contact time	2 lectures per week
Language of tuition	English
Academic organisation	Nursing Science
Period of presentation	Year

Module content

Basic schooling in the nursing research process.

Nursing research methodology 800 (VNM 800)

Qualification	Postgraduate
Module credits	40.00

Programmes	MCur Clinical Fields of Study
	MCur Clinical Fields of Study (Coursework)

Period of presentation	Year

Module content

Advanced study of method study and work-measurement, including mastership of MODAPTS.
Business management is an existing subject for the Postgraduate Diploma in Health Administration.

Precalculus 133 (WTW 133)

Qualification	Undergraduate
Module credits	8.00
Programmes	BCom (M) Four-year programme BEd Intermediate Phase Teaching BEd Senior Phase and Further Education and Training Teaching BSc (Construction Management) Construction Management (3Years) BSc Extended programme - Biological and Agricultural Sciences BSc Extended programme - Mathematical Sciences BSc Extended programme - Physical Sciences BSc Real Estate BSc: Quantity Surveying (3Yrs) Quantity Surveying HCert (Sports Science) Option: Education
Service modules	Faculty of Engineering, Built Environment and Information Technology Faculty of Education Faculty of Economic and Management Sciences Faculty of Health Sciences
Prerequisites	BSc and BCom students: At least 3 (40-49%) in Mathematics in the Grade 12 examination and must be taken concurrently with WTW133
Contact time	3 lectures per week, Foundation Course, MAMELODI, 1 practical per week
Language of tuition	English

Academic organisation Mathematics and Applied Maths

Period of presentation Semester 1

Module content

Real numbers, elementary set notation, exponents and radicals. Algebraic expressions, fractional expressions, linear and quadratic equations, inequalities. Coordinate geometry: lines, circles. Functions: definition, notation, piecewise defined functions, domain and range, graphs, transformations of functions, symmetry, even and odd functions, combining functions, one-to-one functions and inverses, polynomial functions and zeros.

Sequences, summation notation, arithmetic, geometric sequences, infinite geometric series, annuities and instalments. Degrees and radians, unit circle, trigonometric functions, fundamental identities, trigonometric graphs, trigonometric identities, double-angle, half-angle formulae, trigonometric equations, applications.

This module is only offered in English at the Mamelodi Campus for the BSc Extended programme. At the Hatfield and Groenkloof campuses it is offered in English and Afrikaans.

Calculus 143 (WTW 143)

Qualification Undergraduate

Module credits 8.00

Programmes

- BCom (M) Four-year programme
- BEd Intermediate Phase Teaching
- BEd Senior Phase and Further Education and Training Teaching
- BSc Extended programme - Mathematical Sciences
- BSc Extended programme - Physical Sciences
