## University of Pretoria Yearbook 2016

## Chemical engineering design 320 (CIO 320)

| Qualification | Undergraduate |
| :--- | :--- |
| Faculty | Faculty of Engineering, Built Environment and Information Technology |
| Module credits | 16.00 |
| Programmes | BEng Chemical Engineering |
|  | BEng Chemical Engineering Engage |
| Prerequisites | (CTD 223), (COP 311) |
| Contact time | 3 tutorials per week, 4 lectures per week |
| Language of tuition | Both Afr and Eng |
| Academic organisation | Chemical Engineering |
| Period of presentation | Semester 2 |
| Module content |  |
| Steady and unsteady state conductive heat transfer in one to three dimensions. Temperature distributions. |  |
| Convective heat transfer. Application of boundary layer theory. Determination of film coefficients. Design of heat |  |
| transfer equipment. Radiant heat transfer. Application of the mechanical energy balance to single phase |  |
| Newtonian fluids in steady state systems. Adjustment for multiphase, non-Newtonian as well as pulsating |  |
| systems. Orifice design. Optimal economic choice of pipe diameters, pumps and control valves. |  |

The information published here is subject to change and may be amended after the publication of this information. The General Regulations (G Regulations) apply to all faculties of the University of Pretoria. It is expected of students to familiarise themselves well with these regulations as well as with the information contained in the General Rules section. Ignorance concerning these regulations and rules will not be accepted as an excuse for any transgression.
