

Universiteit van Pretoria Jaarboek 2017

Simulasiemodellering 780 (BUY 780)

| | |
|-------------------------------|---|
| Kwalifikasie | Nagraads |
| Fakulteit | Fakulteit Ingenieurswese, Bou-omgewing en Inligtingtegnologie |
| Modulekrediete | 32.00 |
| Voorvereistes | BAN 313 of BAN 780 |
| Kontaktyd | 48 Kontakure |
| Onderrigtaal | Module word in Engels aangebied |
| Akademiese organisasie | Bedryfs- en Sisteemingenieursw |
| Aanbiedingstydperk | Semester 1 of Semester 2 |

Module-inhoud

*Hierdie inligting is slegs in Engels beskikbaar.

In recent years the boundaries between different simulation paradigms such as discrete event simulation, system dynamics and agent-based models have become less distinct. Improvements in computational efficiency also allow much richer and complex models to be built. This course introduces agent-based models (ABM) as a class of computational models that deal with autonomous agents and their interactions with other agents, and their surrounding environments. Course content covers basic theoretical foundations of ABM and then focuses on a few specific application areas where ABM is used for decision-making: pedestrian and transport models; production and logistics; as well as biology.
