

## University of Pretoria Yearbook 2018

## Numerical analysis 123 (WTW 123)

| Qualification          | Undergraduate                                                        |
|------------------------|----------------------------------------------------------------------|
| Faculty                | Faculty of Natural and Agricultural Sciences                         |
| Module credits         | 8.00                                                                 |
| Programmes             | BSc Information and Knowledge Systems                                |
|                        | BSc Actuarial and Financial Mathematics                              |
|                        | BSc Applied Mathematics                                              |
|                        | BSc Extended programme - Mathematical Sciences                       |
|                        | BSc Extended programme - Physical Sciences                           |
|                        | BSc Mathematical Statistics                                          |
|                        | BSc Mathematics                                                      |
|                        | BSc Meteorology                                                      |
|                        | BSc Physics                                                          |
| Service modules        | Faculty of Engineering, Built Environment and Information Technology |
| Prerequisites          | WTW 114 GS                                                           |
| Contact time           | 1 tutorial per week, 2 lectures per week                             |
| Language of tuition    | Module is presented in English                                       |
| Department             | Mathematics and Applied Mathematics                                  |
| Period of presentation | Semester 2                                                           |

## **Module content**

Non-linear equations, numerical integration, initial value problems for differential equations, systems of linear equations. Algorithms for elementary numerical techniques are derived and implemented in computer programmes. Error estimates and convergence results are treated.

The information published here is subject to change and may be amended after the publication of this information. The **General Regulations (G Regulations)** apply to all faculties of the University of Pretoria. It is expected of students to familiarise themselves well with these regulations as well as with the information contained in the **General Rules** section. Ignorance concerning these regulations and rules will not be accepted as an excuse for any transgression.
