

# University of Pretoria Yearbook 2020

## PGDip Laboratory Animal Science (08220062)

**Minimum duration of study** 1 year

**Total credits** 120

**NQF level** 08

### Programme information

- The following persons may benefit from enrolling for the PGDip:
- The Department of Agriculture, Forestry and Fisheries (DAFF) identified a need for further theoretical training for their staff in veterinary public health, veterinary epidemiology and animal disease management. This one-year diploma provides for their training needs.
- BTech (or National Higher Diploma) graduates in Animal Health may apply for the diploma programme in order to prepare for masters' study.
- Veterinarians, who are undertaking or have completed their compulsory community service and require refreshment training in preparation for private practice, may benefit from enrolling for the diploma programme.
- Registered veterinarians who require further education towards their continued registration as professionals with the South African Veterinary Council (Continual Professional Development) will benefit by obtaining a PGDip as another means to obtaining their CPD requirements.
- Veterinarians who are in single person practices, who do not have the intention of being specialists due to the time commitments of specialist training, will gain advanced veterinary knowledge at a level above that of an undergraduate while they are still resident at their practices.
- Staff members of veterinary schools in Africa may enrol for the PGDip. As online modules are available to people who have the need for training, but do not necessarily have the funding for contact study in South Africa.
- The curriculum consists of four compulsory core and elective theoretical modules of 30 credits each to the value of 120 credits.
- **Also consult General Regulations.**
- Students are required to confirm whether a module will be presented in any particular year. This enquiry should be directed to the relevant head of department according to the syllabi information provided in the list of modules in this publication.

### Admission requirements

- The minimum admission requirement is an appropriate bachelor's degree, an appropriate advanced diploma or a bachelor of technology degree (SAQA level 7). Entry into clinical modules will however be restricted to persons with the relevant veterinary qualification.
- **Additional requirements:**
- In cases where web-based/online modules are offered, basic computer skills are required in order to

successfully participate in the diploma programme.

- In certain cases, it remains the prerogative of the head of department to require, in addition to the entrance requirements, the successful completion of an admissions test before registration. A student may also be required to pass a proficiency test in English (TOEFL).

## Examinations and pass requirements

The PGDip is conferred by virtue of the successful completion of tests/assignments and an examination on four 30 credit coursework modules.

Every module will be evaluated by a written or oral test or assignment or practical work (a year mark will be determined) and an examination. The year mark and examination mark will each contribute 50% to the final mark. A subminimum of 40% is required in the examination and a final mark of at least 50% to pass the module. Instructions regarding requirements for year or examination marks are published in the study guides. If a student fails a module, he/she will have to repeat the module the following year. A candidate has two chances to pass a module.

## Pass with distinction

The diploma is conferred with distinction on a student who has obtained an average of at least 75%, provided that a minimum final mark of 60% in each of the modules have been obtained.

## Curriculum: Final year

### Minimum credits: 120

The two core modules are compulsory.

Choose 2 elective modules from the list of electives.

(Clinical subjects are limited to veterinary graduates only.)

### Core modules

Laboratory animal science 702 (LAS 702) - Credits: 30.00

Research ethics for laboratory animal science 704 (LAS 704) - Credits: 30.00

### Elective modules

African wildlife disease management 701 (AWD 701) - Credits: 30.00

Controlled and notifiable diseases 701 (CND 701) - Credits: 30.00

Clinical pharmacology 701 (FAK 701) - Credits: 30.00

Mechanisms of drug action 702 (FAK 702) - Credits: 30.00

Physiology 701 (FSL 701) - Credits: 30.00

Herd and primary animal health 701 (HAH 701) - Credits: 30.00

Histology 701 (HTY 701) - Credits: 30.00

Clinical pathology 704 (KPA 704) - Credits: 30.00

Clinical pathology 705 (KPA 705) - Credits: 30.00

Laboratory diagnostics procedures 703 (LAS 703) - Credits: 30.00

Necropsy technique and interpretation 701 (NTI 701) - Credits: 30.00

Production animal management 701 (PAM 701) - Credits: 30.00

Mechanisms of disease 711 (PAT 711) - Credits: 30.00

Poultry health and nutrition 701 (PVT 701) - Credits: 30.00

Reproductive biology 701 (RPT 701) - Credits: 30.00

Organic and inorganic toxicology 705 (TOK 705) - Credits: 30.00

Basic veterinary toxicology 706 (TOK 706) - Credits: 30.00

Porcine health, production and nutrition 701 (VKH 701) - Credits: 30.00

Veterinary milk and meat hygiene 701 (VPH 701) - Credits: 30.00
