## Gordon Institute of Business Science

### Welcome to the Gordon Institute of Business Science

The **University of Pretoria's Gordon Institute of Business Science (GIBS)** is a leading business school in the heart of Illovo, Johannesburg, close to the Sandton business hub. We offer academic programmes as well as a wide range of executive courses which can be custom-designed to suit specific company needs. GIBS is a faculty of the University of Pretoria.

For further information please visit: [www.GIBS.co.za](http://www.GIBS.co.za).

### Faculty regulations and information

*The rules for the degrees published here are subject to change and may be amended after the publication of this information.*

*The General Regulations (G. Regulations) and General Rules apply to all faculties of the University of Pretoria. It is expected of all students to familiarise themselves well with these regulations and rules as well as all faculty-specific and programme-specific regulations and information as stipulated in the online yearbook. Ignorance concerning these regulations will not be accepted as an excuse for any transgression.*

**Please note:** Due to the continuous restructuring of the Faculty and the accompanying phased-in introduction of modules and credits, some of the information in this publication may not fully reflect the most recent developments in the Faculty. Problems that are experienced as a result of this situation may be taken up with GIBS.

#### Admission

Any person who wishes to register at GIBS for the first time, or after an interruption of studies, should apply or reapply for admission.

#### Selection

A selection procedure takes place prior to admission. Application forms are available at [www.GIBS.co.za](http://www.GIBS.co.za).

#### General

The Dean has the right of authorisation regarding matters not provided for in the General Regulations or in the GIBS regulations.

#### Language of tuition

All GIBS modules will be conducted in English.

#### Amendment of regulations and fees

GIBS retains the right to amend the regulations and to change tuition fees without prior notification.

**Please note:** The fees advertised and thus levied in respect of a module or study programme presentation represents a combination of the costs associated with the formal services rendered (for example lectures, module material, field trips, simulations, etc.) as well as associated indirect overheads such as the provision of Information Centre and recreation facilities, security and cleaning services, electricity and water supply, etc. Therefore the fees in respect of a module or study programme presentation cannot simply be reconciled with visible services that are rendered in respect of such module or study programme.

## 1.1 Registration for a particular year of study

(Also consult General Regulation G.2)

At the beginning of an academic year, a student registers for all the modules he or she intends taking in that particular year. A student may also only register for modules that fit into the lecture, test and examination timetables. For renewal of registration, see General Regulation G.3 and for termination of registration, General Regulation G.4.

## 1.2 Examinations

- i. A student is admitted to an examination only if the lecturer of that module in consultation with the Dean, certifies that the student has prepared himself or herself satisfactorily by due performance in his/her work and fulfilled the attendance requirements. Class attendance in all modules and for the full duration of all programmes is compulsory for all students.
- ii. The minimum mark to be admitted to an examination is 45%.
- iii. The examination dates are set at the beginning of each year. Students must make arrangements with their organisations to be available on those dates as no alternative dates are offered. Should a student be unable to write an examination for reasons of serious illness, family crisis or unavoidable travel outside of South Africa, the Programme Manager must be informed in writing, preferably before the examination date or, failing that, within three days of the examination.
- iv. A written application for an aegrotat examination must be made to the Programme Manager, accompanied by proof of the reason for missing the examination (for example medical certificate, copy of passport, subpoena). Aegrotat examinations are written in December. The examination papers (or orals) are completely different to the original papers. The applicant will be informed of the dates during the year.
- v. Case studies for examinations will be distributed an hour before each examination to allow for reading, under examination conditions, in the examination venue.
- vi. (Also consult General Regulation G.12.1 and G.12.2). As far as repetition of modules is concerned, General Regulation G.11.2 (c) does not apply to GIBS.

## 1.3 Pass requirements and subminimum in examinations

A final weighted average mark of at least 50% in a module is required to pass. A subminimum of 45% is required in the examination for each module. Should the student fail to achieve the required subminimum, the student will be considered to have failed the module. To pass the Master of Business Administration or the Postgraduate Diploma in Business Administration with distinction, a student must obtain a final weighted average mark of at least 75%.

## 1.4 Aegrotat examinations

(Also consult General Regulation G. 12, par. 5.1 and 5.2)

- i. A student who was prevented from preparing for an examination, or from sitting for it, owing to unforeseen circumstances or illness, may be granted permission by the Dean to write an aegrotat examination in the particular module(s).
- ii. An application to sit for an aegrotat examination, supported by applicable corroborative proof (e.g. an original medical certificate), must be submitted to the Programme Manager's office, not later than 3 (three) days after the module exam should have been written.
- iii. Once a student has sat for an examination, he or she may not afterwards apply for an aegrotat examination on the basis of unforeseen circumstances or illness.
- iv. A student who has been granted permission to write an aegrotat examination and then fails to write the examination, will not be allowed another opportunity to write any further examination in the specific module.
- v. GIBS does not offer supplementary examinations.

## **General**

It is the responsibility of all students to familiarise themselves with the General and GIBS Regulations of the University, as well as the procedures, rules, and instructions pertaining to study at GIBS. Ignorance of the applicable regulations, rules and instructions, or the incorrect interpretation thereof will not be accepted as an excuse for not complying with the stipulations of such regulations, rules and instructions.

## **Application of old and new regulations**

(See General Regulation G.5)

Subject to transitional measures laid down by GIBS, a student must complete his or her degree in accordance with the regulations that were applicable when he or she first registered for a specific field of study or specialisation. If a student interrupts his or her studies or changes a field of study or specialisation, the regulations applicable in the following year in which studies are resumed, or the field of study is changed, apply.

## Master's

### MBA Full-time (07254009)

**Minimum duration of study** 1 year

#### Programme information

See General Regulation G.31.

The Dean has the right of authorisation regarding matters not provided for in the General Regulations or the GIBS regulations.

Prescribed modules, LEAD 1 and 2, a compulsory research project (which has to be completed in the final year of study) and a compulsory international tour are required.

The language of tuition for the MBA is English.

In the event of deferral of studies due to extenuating circumstances, a student must complete the degree one year after the graduation of his/her cohort class. Failure to complete the degree within this period will disqualify a student from further registration. Any student who fails more than two core modules will be deregistered from the programme.

#### Admission requirements

1. Relevant bachelor's (or equivalent) degree
2. Mathematics passed at NSC-level (or equivalent)  
or
3. Mathematics or Statistics or Mathematical Statistics passed at first year-level
4. Relevant work experience

#### Other programme-specific information

Students are required to complete 5 electives of 6 credits each during the final year of study. More information on electives will be shared in class.

#### Examinations and pass requirements

- i. The minimum pass mark for each module is 50%, provided that a subminimum of 45% has been obtained in the examination. The minimum pass mark for the research project is 50%.
- ii. A candidate who has failed more than two core modules may not continue his studies for the MBA degree, except with the approval of the Dean of the Institute. Such a student may appeal the decision with the GIBS Academic Committee. If the Academic Committee rules in favour of re-admission of the student for the next academic year due to extenuating circumstances, the student may be granted credits for modules.
- iii. Should a candidate fail an elective module, he/she may repeat the elective module or an equivalent as determined by the Dean of the Institute.
- iv. Full attendance, and completion and assessment of all requirements, are necessary for the Global module and Business strategy courses.

## Doctorate

### DBA (07264003)

**Minimum duration of study** 2 years

#### Programme information

The DBA (Doctor of Business Administration) is a doctoral degree with a focus on application. Students submit an independent thesis on an area of research that is of interest to practitioners. The doctorate is the terminal academic degree, and it is expected that the thesis will build on existing scholarly work. Students who are accepted onto the DBA will be offered support through online and contact sessions, and it is expected that they will also contribute to their peer community.

#### Admission requirements

1. MBA degree or master's degree in a business-related discipline
2. Two referee reports from professional referees

#### Additional requirements

An application pack comprising the following must reach the Director of Research at GIBS before the due date:

- A completed and signed hard copy of the application form and contract.
- An application fee relevant for the year of admission, payable to the Gordon Institute of Business Science.
- Official academic transcripts of all academic qualifications obtained to date. (Please note that a degree certificate is not a transcript.)
- A 20-page research proposal, containing:
  - The research question;
  - A concise review of the literature most relevant to the research;
  - The proposed research design;
  - The proposed data source(s) and data gathering strategy.
- Reports from two independent professional referees with whom the candidate is well acquainted, commenting on the candidate's suitability for advanced academic study towards a doctorate. The signed referees reports should be marked "Admissions and the year of study" and sent directly to the Director of Research.
- Successful candidates will be required to pay a non-refundable deposit relevant to the year of application, deductible from their subsequent tuition fees.
- Assessments will be conducted to establish if candidates are capable of doctoral study. Continued study on the doctoral programme will be contingent upon meeting the requirements of the assessment.

#### Research information

Progress on the research will be guided by a supervisor and monitored through regular engagement with the student. In order to complete the research, candidates need to share their research, at a practitioner-based forum.

The completed research study must be presented in the form of a doctoral thesis. Manuscript based on the thesis must be prepared for submission to an accredited academic journal, local or international, for publication as an empirical research paper. The successful completion of the doctorate depends on having the academic

publication accepted into the process of review, as well as passing the thesis.

This module examines statistical tools used in business decision-making. Statistical methods will be introduced in a non-technical manner and developed in business contexts. Topics will include understanding differences, predictions and associations when using statistical analysis for business decision-making. These techniques will underpin the use of univariate and multivariate techniques. Statistical computer packages play a major supporting role in statistical applications, and frequently-encountered spreadsheet and software packages will be utilised during the course of the module. You will learn how to interpret the information contained in management data, and to define and analyse management problems quantitatively. You will develop an intuitive understanding of statistical techniques through explanations of methods and interpretation of real business problems. Ultimately, if you need to consult experts in this area, you will be better able to select, evaluate and use their services.

## Applied business project 751 (GIA 751)

## Module content

This module aims: to expose students to some of the underlying philosophy of qualitative research and why this is relevant for research in Africa; to help students understand the difference between quantitative research and qualitative research; and to provide guidelines for conducting research using i) grounded theory ii) case study methods iii) narrative research. By the end of the module, students will: i) have an appreciation of the richness of qualitative research methodology, and will be better able to assess whether a qualitative research method is appropriate for their own research, ii) receive broad guidelines how to conduct rigorous qualitative research employing case study, grounded theory methods or narrative research, and iii) have practice designing and performing a qualitative research study.

## Research design 795 (GIA 795)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	16.00
<b>NQF Level</b>	08
<b>Programmes</b>	<a href="#">PGDip in Business Administration Business Studies</a>
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	24 Hours
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Gordon Institute of Business Science

**Period of presentation** Semester 1 or Semester 2

### Module content

This module helps students to conceptualise a research design. It covers how the choice of a research design relates to the chosen analytic method (Qualitative Research, Quantitative Research or Mixed Methods). Students are expected to relate the research question to the research design and to justify the selection of a given design for a given problem. The objectives of the module are to help students: make informed decisions about their research design; and understand the implications of selecting a given research design in particular around the research questions that can be answered.

## Thematic studies module 1 796 (GIA 796)

### Module content

A working knowledge of the law is an incredibly empowering tool. The law operates in the daily lives of all of us, as a natural product of our interaction with one another. Sometimes in our dealings with other people we encounter problems that may be brought about by any one of a variety of factors: incompetence, dishonesty and misunderstanding are the most common causes. The consequences of these problems can, at times, be rather severe. Business transactions, for example, carry high risks. The consequences of a mistake in the business world can be costly. Knowledge of the law becomes a very useful tool when it helps us to recognise the potential dangers so that we can avoid them, and equip us with a means of dealing with mistakes once they have already happened. A sound understanding of the law is both a privilege as well as an advantage in coping with the various problems that life in the business world may throw our way.

The course aims to equip candidates with an understanding of these dangers and an ability to identify what to do when things go wrong.

## International business strategy 850 (GIA 850)

**Qualification** Postgraduate

**Module credits** 12.00

**NQF Level** 09

**Prerequisites** No prerequisites.

**Contact time** 28 contact hours per 3 week cycle

**Language of tuition** Module is presented in English

**Department** Gordon Institute of Business Science

**Period of presentation** Semester 1 or Semester 2

### Module content

The rationale for the course is that all businesses are increasingly exposed to the global context, whether in terms of their competitors, their markets or their supply chains. As such, it is incumbent upon all managers to have an appreciation of the opportunities and threats that exist in doing business on an international scale. To operate effectively in a global context, managers need to be able to evaluate differences between countries and the impacts of these differences on firm behaviour. This module aims to provide students with the skills necessary to develop global business strategies and meet the challenges entailed.

## Business analysis and communication 856 (GIA 856)

**Qualification** Postgraduate

**Module credits** 0.00

**NQF Level** 09

**Contact time** Twenty four hours

**Language of tuition** Module is presented in English

**Department** Gordon Institute of Business Science

**Period of presentation** Semester 2

### Module content

This module is designed to enable students to analyse business problems, derive appropriate solutions, and communicate them effectively. There are two parts to it:

Part A deals with the written analysis of business cases. Through classroom instruction and individual feedback, students learn to analyse a business case, generate and review solutions, and prepare a clear, logical written summary of their analysis. The skills learnt include the cognitive skills of analysing, evaluating and synthesising complex material, and the communication skills of presenting findings in oral and written English.

Part B applies the same skills to the analysis and solution of an actual business situation. Students are required to conduct research into a problem posed in a company. They analyse the problem, conduct the appropriate research in the industry, apply the models and techniques covered in their MBA core courses, and prepare a consulting report for presentation to management and faculty.

## Analytical tools and techniques 861 (GIA 861)

**Qualification** Postgraduate

**Module credits** 9.00

**NQF Level** 09

**Contact time** Twenty four hours

**Language of tuition** Module is presented in English

**Department** Gordon Institute of Business Science

**Period of presentation** Semester 1 or Semester 2

## Module content

This module examines statistical tools used in business decision-making. Statistical methods will be introduced in a non-technical manner and developed in business contexts. Topics will include understanding the differences, predictions and associations when using statistical analysis for business decision making. These techniques will underpin the use of univariate and multivariate techniques. Statistical computer packages play a major supporting role in statistical applications, and frequently-encountered spreadsheet and software packages will be utilised during the module. You will learn how to interpret the information contained in management data, and to define and analyse management problems quantitatively. You will develop an intuitive understanding of statistical techniques through explanations of methods and interpretation of real business problems. Ultimately, if you need to consult experts in this area, you will be better able to select, evaluate and use their services.

## Microeconomics: Prices and markets 862 (GIA 862)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	9.00

<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	28 contact hours per 3 week cycle
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Gordon Institute of Business Science
<b>Period of presentation</b>	Semester 1 or Semester 2

## Module content

This module introduces microeconomic theory and its application to real business situations. The aim of the module is to establish a rigorous appreciation for the main drivers of any business and to show how different variables will impact the company bottom line. The module begins by examining consumer demand and covers why consumers act in a particular way, how they may react to market changes and what strategies a company may undertake to maximise their revenue in both the short and the long term. The course then shifts to the production decisions of a company and examines in detail the different types of costs within an organisation, what variables positively and negatively affect these costs and how these costs can be managed to maximise profits and profitability. Different market structures are analysed to assist students in placing their firm and sector in an appropriate market structure thus providing useful insight into options regarding inter-firm rivalry, firm interdependence, and strategies to deal with competition from similar firms. The module is designed to give the student a set of tools, models and causal chains which will help them make more informed strategic decisions regarding: the pricing of their goods, their cost management, their competition strategies and options to maximise profitability.

## Financial accounting 863 (GIA 863)

<b>Qualification</b>	Postgraduate

## Module content

This module is designed to equip participants with the necessary skills to analyse and interpret financial information. Actual financial statements are analysed, and participants are expected to be familiar with real cases in the current financial press. You will become familiar with how financial statements such as balance sheets, income statements, and cash flow statements are structured. Various methods of critically evaluating them in order to make conclusions about the company's financial strength or weakness, and future possibilities such as financial failure or the probability of takeover will be discussed. Management accounting provides managers with timely and appropriate information – firstly in order to understand the cause and behaviour of costs and to meaningfully allocate these costs to products, customers and inventories; secondly to assist in planning, budgeting and decision making; and finally in order to measure performance. This module is intended as an introduction for individuals who will plan, make business decisions and evaluate the performance of business units using information derived from the accounting system.

### Module content

In this module 'technology' and 'emerging markets' will be brought together. The module will explore the challenges that business face when entering emerging markets with a technology enabled offering. The module will not be a theoretical discussion but will take students through practical application of frameworks and tools. The module will start with a technology trends analysis – looking at technology developments over the last 5-10 years and assessing how new and emerging technologies could change the way business is done. If emerging markets are “how” right now, they are certainly not all equally “hot” and the elective will look at emerging country assessment to determine how managers should go about assessing an emerging country.

<b>Contact time</b>	28 contact hours per 3 week cycle
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Gordon Institute of Business Science
<b>Period of presentation</b>	Semester 2

## Module content

This course examines how an organisation's structures, systems and processes contribute to its competitive position. This involves management of the processes whereby inputs such as labour, materials and equipment are converted to products or services that meet customers' needs at an acceptable cost. Improving performance cross-functionally and across the value chain is an important focus. Topics include functional versus corporate operations strategy, operations' reactive role, service-delivery systems design, process choice, quality management and improving operations, time and productivity, aligning operations to markets, and the impact of technology developments on the service delivery system. You will be able to analyse an operating system's efficiency in terms of process design, capacity and quality of service, and make recommendations to improve its design or operation. You will have a greater appreciation of the need to manage integrated processes across the value chain to achieve business success.

## Macroeconomics: National competitiveness 851 (GIB 851)

<b>Contact time</b>	28 contact hours per 3 week cycle
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Gordon Institute of Business Science
<b>Period of presentation</b>	Semester 2

## Module content

This course examines the macroeconomic and socio-political environment in which business operates. Its aims are, firstly, to demonstrate the multi-faceted way in which global economic trends and domestic socio-political strategies impact on the private sector. Secondly, the course aims to provide participants with an insight into, and understanding of, the major causal relationships encountered in the macroeconomic equation. The key topics include the political/economic cycle, a concise profile of the South African economy, aggregate supply analysis, aggregate demand analysis, public sector economics, international economics, globalisation and international competitiveness, monetary economics, and economic indicators (including the business cycle, inflation and unemployment). This course will provide you with the conceptual frameworks and analytical tools needed to understand and predict the impact of macroeconomics. The focus on the South African economy within the context of the global environment and the resultant challenges for business will provide you with an important perspective on doing business in South Africa in the future.

### Module content

To create new wealth, an enterprise or start-up needs to be truly customer focused. What this means and how to go about achieving this is what this module is all about. First, we look at the principles and practice of customer-focused strategy, and how it differs from some of the traditional models being used, holding organisations back. Then, sessions will demonstrate how to uncover new “market spaces” and a tried and tested methodology called the “customer activity cycle” will be used to discover and uncover innovative products and services opportunities. The final part of the module looks at a systematic process for implementation of customer focus – i.e., making it happen. What shapes success and failure? What makes a person an energizer driving change? What kinds of teams are needed when, how to involve silos, how and with whom to partner? How to test new ideas, pace and prioritize, and how internal and market take-up and scale-up can be achieved and sustained.

## Module content

This module is about international business and the strategies of MNEs. This module is from the perspective of the MNE and should not be confused with economics or country competitiveness. Globalisation is not an option for any business; it is a strategic imperative. The same is true for countries, which cannot grow rapidly without access to global capital and skills. The current global economic crisis has highlighted the interconnectedness of businesses (local and international) and requires an understanding and appreciation of global business. This module aims to provide students with the skills necessary to develop global business strategies and meet the challenges entailed.

### Module content

This module helps students to conceptualise a research design. It covers how the choice of a research design relates to the chosen analytic method (Qualitative Research, Quantitative Research or Mixed Methods). Students are expected to relate the business challenge to the research design and to justify the selection of a given design for a given problem. The objectives of the module are to help students: make informed decisions about their research design; and understand the implications of selecting a given research design in particular around the questions that can be answered.

## Module content

The supply chain plays a vital role in the success of organisations. Supply chain management is responsible for ensuring the flow of products, information and money to ensure value is added to the end consumers and return on capital employed for the entire supply chain is improved. As the networks become more complex, with more variability and the customer's expectation of shorter lead times, there is a need to give students a more in-depth understanding of this function, viewed from a systems perspective. This means the focus has to change from make and sell what can be made (push-and -promote) to make and sell what can be sold (position-and-pull). More detail is provided in the elective manual.

The objective of this course is to create the opportunity for students to enhance their ability to work with others and help them reflect on their individual beliefs, attitudes, and responses to others. At the individual level the course will focus on two key areas of leadership: Managing yourself (self awareness and understanding) and managing relationships (the impact you have on others). These two aspects involve a high level of self-awareness, the willingness to risk new behaviours, and the capacity to be flexible and make changes as the environment changes. The course is integrative and focuses on different aspects important for success. It provides perspectives, frameworks and concepts from the different management disciplines that you have encountered during your MBA. Furthermore, it is dedicated to developing self-aware leaders who are able to effectively manage relationships and positively impact global business and society.

**Department** Gordon Institute of Business Science

**Period of presentation** Semester 1 or Semester 2

## Module content

This course focuses on knowing oneself and the impact of one's history or background on business effectiveness in the environment in which the students are or will be working. This course is designed around a road trip undertaken by all students at the end of year one, and provides them with an opportunity to analyse the current dynamics, challenges, social and political nuances and the history of the area they visit. By immersing the students in the culture and history of the places they visit, this experiential approach is designed to illustrate how history shapes peoples' outlook and the way they feel, think and act, enabling them to comprehend what has made South Africa what it is today. The analytic framework is the political economy of business, economic inclusion and connectivity between the South African economy and the region, the continent and the world. Emphasis will be placed on the businesses driving the economic and social dynamics of the locations which are visited.

## Module content

Dynamic markets encompass a broad range of countries that exhibit exciting economic growth prospects, have undergone significant political, social and cultural change and show encouraging signs of innovation along with policy and institutional developments to address the voids and complexities prevalent in these markets. Despite some progress, these fast growing markets tend to defy the norm of doing business.

In this integrative course students will be introduced to the particular opportunities and challenges of managing a business in countries where the accepted norms of doing business may not apply - countries that exhibit exciting growth opportunities, have undergone significant political social and cultural change, and show encouraging signs of innovation. The course will address political, social and cultural issues and the policy and institutional developments that address the complexities of these markets. Students will be given the skills to draw on the business functions introduced during the previous modules to execute effectively in environments where their business acumen has to be attuned to the unexpected and where outcomes that go well beyond the financial bottom line need to be considered.

## Module content

In this module students will be introduced to micro-economic theory and its application to real business situations. The aim of the course is to establish a rigorous appreciation for the main drivers of any business and to show how different variables will impact the company bottom line. The course begins by examining consumer demand. Students will examine why consumers act in a particular way, how they may react to market changes and what strategies a startup company or corporate may undertake to maximise its revenue in both the short and the long term. The course then shifts to focus on the production decisions of a company and examines in detail the different types of costs within an organisation, what variables positively and negatively affect these costs and how these costs can be managed to maximise profits and profitability. Different market structures are analysed to assist students in placing their firm and sector in an appropriate market structure thus providing useful insight into options regarding inter firm rivalry, firm interdependence and strategies to deal with competition from similar firms. The course is designed to give the student a set of tools, models and causal chains which will help them make more informed strategic decisions regarding: the pricing of their goods, their cost management, their competition strategies and options to maximise profitability.

## Human resources strategy 782 (GIE 782)

<b>Period of presentation</b>	Semester 1 or Semester 2

## Module content

This module explains both how human resource systems should support the achievement of strategic objectives in context, and how line managers should manage people to achieve those objectives. Module topics include the management of strategic human resources (aligning HR and business strategy, succession planning, and the war for talent), management of HR-firm infrastructure, training and development, managing employee contributions (performance management and industrial relations), and integrating HR strategies and business strategies. The role of the line manager in managing performance will be considered, and underpinned by an overview of the causes of human behaviour in organisations. The module will include case studies to illustrate unique problems and approaches to HR strategy. You will learn the strategic value of effective management of human resources and how alternative HR strategies deliver different results.

## Human behaviour and performance 783 (GIE 783)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	10.00
<b>NQF Level</b>	08

**Programmes** PGDip in General Management

**Prerequisites** No prerequisites.

**Contact time** Twenty four hours

**Language of tuition** Module is presented in English

**Department** Gordon Institute of Business Science

**Period of presentation** Semester 1 or Semester 2

### Module content

In this module students will be introduced to the dynamics of human behaviour in South African society and organisations. It will explore the dynamics of interpersonal relationships, the diversity of South African culture, the impact of the political and economic history of South Africa on human behaviour, the current and future dynamics of human interaction and processes that affect organisations, markets and society. Students will explore issues related to race, ethnicity, gender and economic status and their impact on the economy and society as a whole. Building on this understanding, students will examine effective ways of attracting, retaining and managing talented individuals when building or growing a new company in a South African context.

## Marketing 784 (GIE 784)

**Qualification** Postgraduate

**Module credits** 10.00

**NQF Level** 08

**Programmes** PGDip in General Management

**Prerequisites** No prerequisites.

**Contact time** Twenty four hours

**Language of tuition** Module is presented in English

**Department** Gordon Institute of Business Science

**Period of presentation** Semester 1 or Semester 2

### Module content

This module teaches a systematic approach to marketing decision making in order to match continuously changing market opportunities with the internal resources of the company in terms of production capacity, people and finance. Key topics include understanding the market and the customers, analysing marketing opportunities, developing marketing strategies, planning marketing programmes, and assessing new directions for marketing, particularly the impact of e-business. By critically examining an extensive theoretical base of marketing literature, and reviewing local and international case studies, you will develop the skills and insights required to formulate and evaluate an effective marketing strategy within the context of overall corporate objectives. You will evaluate the changing role of marketing in the knowledge economy, and how marketing interfaces with other functional areas within the organisation.

<b>Department</b>	Gordon Institute of Business Science
<b>Period of presentation</b>	Semester 1 or Semester 2

### Module content

In this module students will examine the macroeconomic and socio-political environment in which business operates. Its aims are, firstly, to demonstrate the multi-faceted way in which global economic trends and domestic socio-political strategies impact existing and startup businesses in the private sector. Secondly, the module aims to provide participants with an insight into, and understanding of, the major causal relationships encountered in the macroeconomic equation. The key topics include the political/economic cycle, a concise profile of the South African economy, aggregate supply analysis, aggregate demand analysis, public sector economics, international economics, globalisation and international competitiveness, monetary economics, and economic indicators (including the business cycle, inflation and unemployment). This course will provide students with the conceptual frameworks and analytical tools needed to understand and predict the impact of macroeconomics on their businesses. The focus on the South African economy within the context of the global environment and the resultant challenges for business will provide students with an important perspective on doing business in South Africa in the future

## Module content

The supply chain plays a vital role in the success of organisations. Supply chain management is responsible for ensuring the flow of products, information and money to ensure value is added to the end consumers and return on capital employed for the entire supply chain is improved. As the networks become more complex, with more variability and the customer's expectation of shorter lead times, there is a need to give students a more in-depth understanding of this function, viewed from a systems perspective. This means the focus has to change from make and sell what can be made (push-and -promote) to make and sell what can be sold (position-and-pull). More detail is provided in the elective manual.

## Module content

The rationale for the module is that all businesses are increasingly exposed to the global context, whether in terms of their competitors, their markets or their supply chains. As such, it is incumbent upon all managers to have an appreciation of the opportunities and threats that exist in doing business on an international scale. To operate effectively in a global context, managers need to be able to evaluate differences between countries in terms of issues such as economic policy, cluster development, industry structure, and the impact of these differences on firm behaviour. This module aims to provide students with the skills necessary to develop global business strategies and meet the challenges entailed.

In contrast to a long only fund trying to beat the market, a hedge fund has the task of having its long portfolio beat its short portfolio. The benefit of being able to have a negative exposure to shares, allows for two major advantages a hedge fund has over vanilla long only funds: The first is the ability of the short portfolio to be the source of funding for the long portfolio - thus the strategies can be self-funding. The second is that by careful choice of the weights of constituent stocks, the hedge fund can be made neutral, not only to the market itself, but also to several macro-economic factors. This elective teaches students how to select stocks for both long and short portfolios, how to choose weights so as to make it market and factor neutral, and finally, how to manage the whole hedge fund, managing risk on a day to day basis.

This module is intended for students who are interested in the role and application of strategic management in the private equity industry. The module will examine the range of strategic choices that need to be made by the private equity fund manager at each of the stages in the private equity process (pre-investment, investment, post-investment venture management and exit). The underlying question that the module seeks to address is: What strategies are required for the private equity fund manager to produce superior returns on investment, to meet investor expectations and to build wealth for the fund manager? The setting for the module is the private equity industry on a global basis, including both developed and emerging markets, with an orientation toward the local South African market.

### Module content

The aim is to better understand and gain a feeling of trade and business in and around Southern Africa – through a practical first-hand experience by road from Johannesburg to a neighbouring country (Zimbabwe or Mozambique). The goals and objectives include the gaining of some insight into the life blood of the region: the movement of goods and services between South Africa and surrounding countries. The role of infrastructure, policy, bureaucracy and security on trade and general economic activities will be witnessed first-hand and discussed in detail – with perspectives and solutions offered and exchanged among the group.

### Personal leadership development 850 (GIL 850)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	6.00
<b>NQF Level</b>	09
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Gordon Institute of Business Science
<b>Period of presentation</b>	Semester 1 or Semester 2

### Module content

The objective of this module is to create the opportunity for students to enhance their ability to work with others and help them reflect on their individual beliefs, attitudes, and responses to others. At the individual level the module will focus on two key areas of leadership: Managing yourself (self-awareness and understanding) and managing relationships (the impact you have on others). These two aspects involve a high level of self-awareness, the willingness to risk new behaviours, and the capacity to be flexible and make changes as the environment changes. The module is integrative and focuses on different aspects important for success. It provides perspectives, frameworks and concepts from the different management disciplines that you have encountered during your MBA. Furthermore, it is dedicated to developing self-aware leaders who are able to effectively manage relationships and positively impact global business and society.

### Macroeconomics: National competitiveness 851 (GIL 851)

<b>Contact time</b>	28 contact hours per 3 week cycle
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Gordon Institute of Business Science
<b>Period of presentation</b>	Semester 2

## Module content

This course examines the macroeconomic and socio-political environment in which business operates. Its aims are, firstly, to demonstrate the multi-faceted way in which global economic trends and domestic socio-political strategies impact on the private sector. Secondly, the course aims to provide participants with an insight into, and understanding of, the major causal relationships encountered in the macroeconomic equation. The key topics include the political/economic cycle, a concise profile of the South African economy, aggregate supply analysis, aggregate demand analysis, public sector economics, international economics, globalisation and international competitiveness, monetary economics, and economic indicators (including the business cycle, inflation and unemployment). This course will provide you with the conceptual frameworks and analytical tools needed to understand and predict the impact of macroeconomics. The focus on the South African economy within the context of the global environment and the resultant challenges for business will provide you with an important perspective on doing business in South Africa in the future.

## Strategic renewal 852 (GIL 852)

<b>Contact time</b>	28 contact hours per 3 week cycle
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Gordon Institute of Business Science
<b>Period of presentation</b>	Semester 1 or Semester 2

## Module content

To create new wealth, an enterprise or start-up needs to be truly customer focused. What this means and how to go about achieving this is what this module is all about. First, we look at the principles and practice of customer-focused strategy, and how it differs from some of the traditional models being used, holding organisations back. Then, sessions will demonstrate how to uncover new “market spaces” and a tried and tested methodology called the “customer activity cycle” will be used to discover and uncover innovative products and services opportunities. The final part of the module looks at a systematic process for implementation of customer focus – i.e., making it happen. What shapes success and failure? What makes a person an energizer driving change? What kinds of teams are needed when, how to involve silos, how and with whom to partner? How to test new ideas, pace and prioritize, and how internal and market take-up and scale-up can be achieved and sustained.

## Multinational enterprise business strategy 856 (GIL 856)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	6.00
<b>NQF Level</b>	09
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Gordon Institute of Business Science
<b>Period of presentation</b>	Semester 1 or Semester 2

## Module content

This module is about international business and the strategies of MNEs. This module is from the perspective of the MNE and should not be confused with economics or country competitiveness. Globalisation is not an option for any business; it is a strategic imperative. The same is true for countries, which cannot grow rapidly without access to global capital and skills. The current global economic crisis has highlighted the interconnectedness of businesses (local and international) and requires an understanding and appreciation of global business. This module aims to provide students with the skills necessary to develop global business strategies and meet the challenges entailed.

## Corporate entrepreneurship and innovation 857 (GIL 857)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	6.00
