

University of Pretoria Yearbook 2022

Introductory veterinary diagnostics 300 (IVD 300)

Qualification	Undergraduate
Faculty	Faculty of Veterinary Science
Module credits	20.00
NQF Level	07
Programmes	BVSc
Prerequisites	Third year academic level and admission to relevant programme.
Contact time	3 lectures per week, 6 practicals per semester
Language of tuition	Module is presented in English
Department	Production Animal Studies
Period of presentation	Year

Module content

The module introduces the student to clinical diagnostics in the normal animal patient, and evidence-based approaches of veterinary science. It consists of 3 integrated content components being the diagnostic focus, the clinical physiology focus and the research focus. The evidence-based approach acts as the integration of the clinical physiology and research focus areas, and is presented using group assignments where students have to critically appraise and interpret research papers using their knowledge of normal and abnormal physiological processes or clinical findings.

The regulations and rules for the degrees published here are subject to change and may be amended after the publication of this information.

The [General Academic Regulations \(G Regulations\)](#) and [General Student Rules](#) apply to all faculties and registered students of the University, as well as all prospective students who have accepted an offer of a place at the University of Pretoria. On registering for a programme, the student bears the responsibility of ensuring that they familiarise themselves with the General Academic Regulations applicable to their registration, as well as the relevant faculty-specific and programme-specific regulations and information as stipulated in the relevant yearbook. Ignorance concerning these regulations will not be accepted as an excuse for any transgression, or basis for an exception to any of the aforementioned regulations.
