- BSocSci specialising in Industrial Sociology and Labour Studies

The Bachelor of Social Science specialising in Industrial Sociology and Labour Studies programme aims to provide students with in-depth knowledge of the world of work's broader socio-political and socio-economic context. Students will be taught substantive knowledge of industrial sociology around matters of management, organisation and labour. They will also acquire the skills needed to critically evaluate the many issues that characterise the world of work in transforming South African society. Topics such as the organisation of work, the changing South African workplace, gender, race, employment equity, productivity, dismissals and the globalised economy are dealt with in the broader social context of the world milieu.

This programme is unique as it brings together knowledge and analysis about the workplace from both the humanities (industrial sociology) and economics and management (business studies, labour law and economics) spheres. This gives graduates a unique strength in both analytical and thinking skills as well as business knowledge.

You should be interested in the broader society, economics and politics, as well as workplace issues. You should enjoy reading and be an independent learner.
