- BA in Audiology

Audiologists provide patient-centred care in the prevention, diagnosis and (re)habilitation of hearing, balance and other auditory disorders.

The Bachelor of Arts in Audiology programme is aimed at acquiring in-depth knowledge of the normal and pathological hearing and balance process within the framework of human communication. From the second year, in addition to theoretical modules, students do hands-on clinical training with patients (from infants to adults) in clinics, hospitals, schools, and at outreach centres.

The Bachelor of Arts in Audiology programme entails training in audiometry and hearing/balance therapy for persons of all ages experiencing hearing loss or imbalance. It includes the possible causes of hearing loss and imbalance, and the scientific basis of intervention for a person with hearing loss and imbalance or people at risk thereof.

Assessment includes both screening and diagnostic tests. Intervention (habilitation) may occur in a one-on-one situation, through group intervention, as part of a multidisciplinary team approach, or using community-based intervention programmes. Practical skills in assessment, hearing/balance therapy and techniques for improving hearing, balance, and general communication skills and health-related quality of life are acquired.

The Department is the first and only centre in Africa to become a World Health Organization Collaborating Centre for the Prevention of Deafness and Hearing Loss. The qualification complies with international requirements. Graduates are sought after by local and international employers.

Skills required of an audiology graduate:

- Communication skills
- Compassion and empathy
- Critical-thinking skills
- Patience
- Problem-solving skills
