Non-radiological diagnostic imaging of dogs and cats 782 (DIM 782)

Qualification	Postgraduate
Faculty	Faculty of Veterinary Science
Module credits	30.00
Programmes	BVeterinary Science (Hons) Veterinary Science
Prerequisites	No prerequisites.
Language of tuition	English
Academic organisation	Companion Animal Clin Studies
Period of presentation	Year

Module content

Advanced study in non-radiological diagnostic imaging of dogs and cats.

The module extends over a period of about 8 months. Approximately 12 lectures/group discussions are presented fortnightly on Wednesday mornings. Approximately 76% is allocated to diagnostic ultrasound; 8% to MRI, CT and Scintigraphy each respectively. Training is done mainly by means of interactive lectures and discussions and practical interpretation of a variety of images and the presentation of two case reports.

The pathophysiology, diagnosis and prognosis of pathological conditions are discussed, as well as ways in which this field of study is linked to other diagnostic methods in order to confirm a diagnosis.

The module is normally only presented in alternate years.
