### Module-inhoud

This course is based on the premise that everyone has the capacity to succeed in an entrepreneurial setting, although some people may have a greater propensity to succeed than others. The intention of this course is to demystify the phenomenon broadly referred to as entrepreneurship; to make it easily understood as a business concept, readily accessible as a career option and practically applicable as a style of management. The three overall aims of this course are:

- To develop a new generation of professional entrepreneurs, by encouraging and developing your entrepreneurial capability, and helping you to better understand and manage the issues involved in pursuing an entrepreneurial career path
- To integrate learning about entrepreneurship with practical application, and to provide you with an opportunity to integrate different aspects of the MBA in developing a business plan for a potential entrepreneurial idea
- As well as to develop a broad perspective on entrepreneurship, and develop an awareness of the strategic importance and social relevance of entrepreneurship.
