Business finance 862 (GIE 862)

Qualification	Postgraduate
Faculty	Gordon Institute of Business Science
Module credits	9.00
Language of tuition	English
Academic organisation	Gordon Institute of Business S
Period of presentation	Semester 1 or Semester 2

Module content

In this module students will be introduced to the principles of finance that are relevant for a startup venture. The module will provide an introduction to the theories and practical realities pertaining to raising and structuring finance, investment decisions and managing working capital within early-stage ventures. In addition to this the module will introduce students to the principles and practices of valuing young companies. The first part of the module will focus on raising capital, including whether the firm should rely on equity or debt financing, and what different financial structures will mean for the management, profitability and sustainability of the entity over time. The second part of the module will focus on investment decision making within an early stage venture to highlight how entrepreneurs can use different tools and techniques to make wise investment choices. The third part of the module will focus on the management of working capital to maximise profitability and minimise risk in an early stage venture. Finally students will be required to value early stage investments and negotiate on a price for an entity in which they have an interest.
