

## University of Pretoria Yearbook 2016

## Fluid mechanics in geological media 725 (GTX 725)

Qualification	Postgraduate
Faculty	Faculty of Natural and Agricultural Sciences
Module credits	12.00
Programmes	BScHons Option: Engineering Geology
	BScHons Option: Hydrogeology
Prerequisites	GLY 363 and GLY 265
Contact time	2 lectures per week for 3 weeks, 2 practicals per week (3 weeks)
Language of tuition	English
Academic organisation	Geology
Period of presentation	Year

## Module content

Statics and dynamics of fluids, including water, aqueous phase liquids (saline water), non-aqueous phase liquids (petroleum hydrocarbons), gases (atmospheric air) and man-made fluids (gout) through natural and man-made porous media (eg soil, rock, concrete). Single phase flow and multiphase flow; saturated and unsaturated flow. Quantification of hydrological parameters. South African hydrostratigraphy. Drainage and dewatering.

The information published here is subject to change and may be amended after the publication of this information. The **General Regulations (G Regulations)** apply to all faculties of the University of Pretoria. It is expected of students to familiarise themselves well with these regulations as well as with the information contained in the **General Rules** section. Ignorance concerning these regulations and rules will not be accepted as an excuse for any transgression.
