Module content

In this module students are expected to produce a research paper under weekly supervision. In the first instance, the paper ought to demonstrate a student's ability to conduct empirical research. However, with the necessary permission a student may also base the paper on the analysis of secondary data or draw on archival and/or documentary sources. The research paper needs to demonstrate students' understanding of and competence in all aspects of the research process, including making an argument, writing a report, analysing data, integrating research findings with the literature, and research ethics.
