
University of Pretoria Yearbook 2016

BScHons Option: Geography and Environmental Science (02240413)

Duration of study 1 year

Total credits 135

Programme information

Please note that the curriculum may change each year at the discretion of the head of department or the honours coordinator in the Department of Geography, Geoinformatics and Meteorology.

Renewal of registration

- i. Subject to exceptions approved by the Dean, on the recommendation of the head of department, and in the case of distance education where the Dean formulates the stipulations that will apply, a student may not sit for an examination for the honours degree more than twice in the same module.
- ii. A student for an honours degree must complete his or her study, in the case of full-time students, within two years and, in the case of after-hours students, within three years of first registering for the degree and, in the case of distance education students, within the period stipulated by the Dean. Under special circumstances, the Dean, on the recommendation of the head of department, may give approval for a limited extension of this period.

In calculating marks, General Regulation G.12.2 applies.

Apart from the prescribed coursework, a research project is an integral part of the study.

Admission requirements

- An appropriate bachelor's degree, with an overall average of 60% for 300- and 400-level modules. Prospective students may be required to do additional modules to enable them to reach the desired level of study. Selection takes place before admission.

Other programme-specific information

Appropriate modules, other than the above and approved by the honours coordinator or head of department, may be taken. However, a minimum of 45 elective module credits should come from the Department of Geography, Geoinformatics and Meteorology.

Pass with distinction

The BScHons degree is awarded with distinction to a candidate who obtains a weighted average of at least 75% in all the prescribed modules and a minimum of 65% in any one module.

Curriculum: Final year

Minimum credits: 135

Fundamental modules

Geographical and environmental principles 710 (GGY 710)

Module credits 25.00

Prerequisites No prerequisites.

Contact time 1 lecture per week

Language of tuition English

Academic organisation Geography, Geoinf + Meteor

Period of presentation Semester 2

Module content

The module provides a critical review of the structures and paradigms in which the geographical and environmental sciences are practised. Particular reference is made to the development and impact of paradigms and the interdependence of systems within space and time.

Core modules

Research project 702 (GGY 702)

Module credits 35.00

Prerequisites No prerequisites.

Language of tuition English

Academic organisation Geography, Geoinf + Meteor

Period of presentation Year

Module content

An approved individual research project, carried out under the guidance of a lecturer. The project culminates in a research report in the format of a research paper and presentation. The student is expected to obtain the respective skills (theoretical and practical research techniques, data analysis, communication and computer skills) necessary for the research topic.

Elective modules

Selected theme 701 (GGY 701)

Module credits 15.00

Prerequisites No prerequisites.

Contact time 1 discussion class per week, 1 web-based period per week

Language of tuition English

Academic organisation Geography, Geoinf + Meteor

Period of presentation Year

Module content

A self-study module on an aspect or aspects of geographical or environmental science selected in consultation with the head of the department from: (a) themes not covered in existing options;
or (b) educational subjects.

Applied geomorphology 718 (GGY 718)

Module credits 15.00

Prerequisites No prerequisites.

Contact time 1 lecture per week

Language of tuition English

Academic organisation Geography, Geoinf + Meteor

Period of presentation Semester 2

Module content

This module focuses on processes and applications of geomorphology. Topics that may be studied include: soil erosion and conservation, weathering, geomorphic response to environmental change, slope processes and geomorphological hazards. The module includes practical fieldwork and field assessments.

Urban geography 780 (GGY 780)

Module credits 15.00

Prerequisites No prerequisites.

Contact time 1 discussion class per week

Language of tuition English

Academic organisation Geography, Geoinf + Meteor

Period of presentation Year

Module content

The main themes of the module include: overview of global urbanisation theories and processes; urban morphology and change; the administrative structure and functions of African cities and; the quality of urban life in the developing world.

Environmental change 789 (GGY 789)

Module credits 15.00

Service modules Faculty of Health Sciences

Prerequisites No prerequisites.

Contact time 1 lecture per week, 2 discussion classes per week

Language of tuition English

Academic organisation Geography, Geoinf + Meteor

Period of presentation Year

Module content

Study themes include past environmental change, causes and consequences of human-induced environmental change and South Africa and climate change.

Aspects of land reform and the environment 793 (GGY 793)

Module credits 15.00

Prerequisites No prerequisites.

Contact time 1 lecture per week

Language of tuition English

Academic organisation Geography, Geoinf + Meteor

Period of presentation Year

Module content

The module aims to provide students with an understanding and knowledge of contemporary land reform issues against the background of international land reform experiences. The module also touches on other rural development strategies and ultimately aims to enhance the student's ability to conceptualise and analyse policy in the context of broader environmental issues.

Environmental assessments 785 (ENV 785)

Module credits 15.00

Service modules Faculty of Health Sciences

Prerequisites No prerequisites.

Contact time 5 lectures for period of one week, 5 practical sessions per week

Language of tuition English

Academic organisation Geography, Geoinf + Meteor

Period of presentation Semester 1

Module content

The aim of this module is to understand the principles and processes behind environmental assessments. The module will give an overview of the history of assessments, compare assessment processes internationally, evaluate the strengths and weaknesses of different approaches, provide an overview of the South African regulatory context and the environmental authorisation process.

The information published here is subject to change and may be amended after the publication of this information. The [General Regulations \(G Regulations\)](#) apply to all faculties of the University of Pretoria. It is expected of students to familiarise themselves well with these regulations as well as with the information contained in the [General Rules](#) section. Ignorance concerning these regulations and rules will not be accepted as an excuse for any transgression.
