

University of Pretoria Yearbook 2017

Introduction to database systems 221 (COS 221)

Qualification Undergraduate

Faculty [Faculty of Engineering, Built Environment and Information Technology](#)

Module content

This module will expose students to the evolution of databases systems. They will be able to model data conceptually, in terms of models such as conceptual, relational, object oriented, graph-based and network and the mapping between models, in particular between the conceptual and relational model. Foundational concepts relating to the relational model will be considered, such as: entity and referential integrity, relational algebra and calculus, functional dependency, normal forms, Indexing of database systems and transaction processing will also form an integral part of the curriculum. The physical data representation of the databases system both in memory and within the file system of the operating system will be considered.

Module credits 16.00

Programmes [BSc Computer Science](#)

[BSc Information and Knowledge Systems](#)

Prerequisites COS 110

Contact time 1 practical per week, 4 lectures per week

Language of tuition Module is presented in English

Academic organisation Computer Science

Period of presentation Semester 1
