Module-inhoud

This module helps students to conceptualise a research design. It covers how the choice of a research design relates to the chosen analytic method (Qualitative Research, Quantitative Research or Mixed Methods). Students are expected to relate the research question to the research design and to justify the selection of a given design for a given problem. The objectives of the module are to help students: make informed decisions about their research design; and understand the implications of selecting a given research design in particular around the research questions that can be answered.
