Module content

This module aims to help researchers and students make the transition from the classroom to research in the 'real world'. The emphasis is on demonstrating how business dynamics are better understood with the use of theory or models, measurement concepts and methods, qualitative and quantitative modes of observation, identifying causes, the logic of control variables, and the design of experiments and quasiexperiments. Students will also be required to communicate these complex ideas in a language that is deemed credible by scholars, but nonetheless accessible to business audiences.
