Module-inhoud

* Hierdie module word slegs in Engels aangebied.

In this module 'technology' and 'emerging markets' will be brought together. The module will explore the challenges that business face when entering emerging markets with a technology enabled offering. The module will not be a theoretical discussion but will take students through practical application of frameworks and tools. The module will start with a technology trends analysis – looking at technology developments over the last 5-10 years and assessing how new and emerging technologies could change the way business is done. If emerging markets are “how” right now, they are certainly not all equally “hot” and the elective will look at emerging country assessment to determine how managers should go about assessing an emerging country.
