Manufacturing and the environment 823 (GIC 823)

Qualification	Postgraduate
Faculty	Gordon Institute of Business Science
Module credits	12.00
Contact time	28 contact hours per 3 week cycle
Language of tuition	Module is presented in English
Academic organisation	Gordon Institute of Business S
Period of presentation	Semester 2

Module content

Manufacturing is often derided as a polluting activity responsible for much of the damage that has been done to the world's environment. Limiting the environmental damage of manufacturing (while continuing to benefit from the wealth it creates) has consequently become a central focus of policy makers and business executives, hence the growth of environmental laws (and taxes) governing manufacturing processes and manufactured products, and the associated setting of specific environmentally-based standards through manufacturing supply chains. This elective will focus on the latest legislative requirements governing manufacturing processes.
