Management accounting 853 (GIE 853)

Qualification	Postgraduate
Faculty	Gordon Institute of Business Science
Module credits	9.00
Language of tuition	Module is presented in English
Academic organisation	Gordon Institute of Business S
Period of presentation	Semester 2

Module content

In this course students will come to understand the value and importance of timely and appropriate information – firstly in order to understand the cause and behaviour of costs and to meaningfully allocate these costs to products, customers and inventories; secondly to assist in planning, budgeting and decision making; and finally in order to measure performance. This course is intended as an introduction for individuals who will plan, make business decisions and evaluate the performance in a new growing business using information derived from the accounting system. Students will understand the benefits of basic management accounting tools and techniques and learn how these concepts can be useful in different managerial decision-making situations within early stage, growing or mature businesses.

The information published here is subject to change and may be amended after the publication of this information. The [General Regulations \(G Regulations\)](#) apply to all faculties of the University of Pretoria. It is expected of students to familiarise themselves well with these regulations as well as with the information contained in the [General Rules](#) section. Ignorance concerning these regulations and rules will not be accepted as an excuse for any transgression.
