BScHons Medicinal Plant Science (02240706)

**Duration of study** 1 year

**Total credits** 135

---

**Programme information**

**Renewal of registration**

i. Subject to exceptions approved by the Dean, on the recommendation of the head of department, and in the case of distance education where the Dean formulates the stipulations that will apply, a student may not sit for an examination for the honours degree more than twice in the same module.

ii. A student for an honours degree must complete his or her study, in the case of full-time students, within two years and, in the case of after-hours students, within three years of first registering for the degree and, in the case of distance education students, within the period stipulated by the Dean. Under special circumstances, the Dean, on the recommendation of the head of department, may give approval for a limited extension of this period.

In calculating marks, General Regulation G.12.2 applies.

Apart from the prescribed coursework, a research project is an integral part of the study.

**Admission requirements**

BSc in Plant Science or a recommendation from the head of department if the candidate did not major in Plant science. A minimum of 60% in Phytomedicine 365 (BOT 365), which is offered at third-year level in the Department of Plant and Soil Science.

The recommended modules at BSc third-year level are as follows:

1. BOT 366 Plant diversity (Department of Plant and Soil Science)
2. BOT 356 Plant ecophysiology (Department of Plant and Soil Science)
3. BCM 368 Molecular basis for disease (Department of Biochemistry)
4. BCM 357 Biocatalysis and integration of metabolism (Department of Biochemistry)
5. FAR 382 Pharmacology (Department of Pharmacology)
6. CMY 282 Physical chemistry (Department of Chemistry)
7. CMY 284 Organic chemistry (Department of Chemistry)

**Pass with distinction**

The BScHons degree is awarded with distinction to a candidate who obtains a weighted average of at least 75% in all the prescribed modules and a minimum of 65% in any one module.
Curriculum: Final year

Minimum credits: 135

Minimum credits: 135
Core credits: 105
Elective credits: 30

Other programme-specific information:
Students may register for modules to the maximum of 20 credits presented by another department, which forms part of the elective modules.

Apart from the compulsory and elective modules, a project, leading to a research report (60 credits), forms an essential part of the programme. One seminar (15 credits) must also be written and presented. Field excursions are undertaken. In addition to the compulsory modules, electives are selected in consultation with the supervisor.

Core modules

Phytopharmacology 748 (BOT 748)

Module content:

Module credits
10.00

Prerequisites
No prerequisites.

Contact time
1 discussion class per week, 1 practical per week

Language of tuition
Module is presented in English

Academic organisation
Plant and Soil Sciences

Period of presentation
Semester 1

Pharmacognosy/Phytotherapy 749 (BOT 749)

Module content:

Module credits
10.00

Prerequisites
No prerequisites.

Contact time
1 practical per week, 1 discussion class per week
Advanced phytomedicine 761 (BOT 761)

Module content:
Metabolism and functions of secondary compounds such as tannins, alkaloids, terpenoids, flavonoids and free amino acids. Importance of secondary compounds in the defence mechanisms of plants. Isolation and identification of medicinal bioactive compounds from plants. Their current scope and potential applications in ethnobotany. Strategies to discover new pharmaceuticals from ethnomedicine.

Module credits: 10.00
Prerequisites: No prerequisites.
Contact time: 1 lecture per week, 1 practical per week

Research report 782 (BOT 782)

Module content:
Teaching and planning, execution and documentation of a research project.

Module credits: 60.00
Prerequisites: No prerequisites.

Seminar 783 (BOT 783)

Module content:
Literature study, discussion and oral presentation of a subject related to the main discipline.

Module credits: 15.00
Prerequisites: No prerequisites.
## Elective modules

### Statistics for biological sciences 780 (BME 780)

**Module content:**
The principles of experimental design as required for the selection of an appropriate research design. Identification of the design limitations and the impact thereof on the research hypotheses and the statistical methods. Identification and application of the appropriate statistical methods needed. Interpreting of statistical results and translating these results to the biological context.

### Seed ecology 714 (BOT 714)

**Module content:**
Regeneration of plants from seed under natural conditions. Early stages in the life of a plant from ovule to established seedling: seed production; seed predation; seed dispersal; seed germination and dormancy, seed bank dynamics and seedling establishment.

Plant and Soil Sciences

**Period of presentation**  
Semester 2

---

**Plant morphology 717 (BOT 717)**

**Module content:**
Speciation in flowering plants; plant variation. Sex determination in flowering plants. Reproductive systems in flowering plants.

**Module credits**  
10.00

**Prerequisites**  
No prerequisites.

**Contact time**  
1 lecture per week, 1 practical per week

---

**Introduction to plant biotechnology 718 (BOT 718)**

**Module content:**
Plant genome: structure and composition of the plant genome (nuclear, mitochondrial and chloroplast); applications in plant biotechnology: plant tissue culture (microproagation, somatic embryogenesis and cell suspension cultures). Genetic manipulation and gene transfer technology (Agrobacterium-based and other) and DNA-marker technology.

**Module credits**  
10.00

**Prerequisites**  
No prerequisites.

**Contact time**  
1 practical per week, 1 lecture per week

---

**Primary plant metabolism 719 (BOT 719)**

**Module content:**
Regulation and interaction of primary plant metabolic pathways on the sub-cellular and whole plant level.

**Module credits**  
10.00

**Prerequisites**  
No prerequisites.

**Contact time**  
1 discussion class per week, 1 web-based period per week, 1 practical per week
Language of tuition | Module is presented in English
--- | ---
Academic organisation | Plant and Soil Sciences
Period of presentation | Semester 1

**Plant taxonomy 741 (BOT 741)**

Module content:
Classification, identification and nomenclature, methodology of a revision study, analysis and presentation of taxonomic information, evolution, phylogeny and cladistics.

| Module credits | 10.00 |
| Prerequisites | No prerequisites. |
| Contact time | 1 lecture per week, 1 practical per week |
| Language of tuition | Module is presented in English |

**Plant classification 742 (BOT 742)**

Module content:
Sources of taxonomic information; morphology, anatomy, chemotaxonomy, cytogenetics, reproductive biology, plant geography, palynology, ethnobotany and paleobotany. Importance of different characteristics, methods to obtain information and interpretation of observed patterns in variation.

| Module credits | 20.00 |
| Prerequisites | No prerequisites. |
| Contact time | 2 lectures per week, 1 practical per week |
| Language of tuition | Module is presented in English |

**Applications in plant biotechnology 746 (BOT 746)**

Module content:
Creation of genetically modified plants and their impact on modern agriculture.

| Module credits | 10.00 |
| Prerequisites | No prerequisites. |
| Contact time | 1 practical per week, 1 lecture per week |
| Language of tuition | Module is presented in English |
### Trends in plant science 784 (BOT 784)

**Module content:**
Literature study of recent publications in a subject related to one of the elective disciplines.

- **Module credits:** 10.00
- **Prerequisites:** No prerequisites.
- **Language of tuition:** Module is presented in English
- **Academic organisation:** Plant and Soil Sciences
- **Period of presentation:** Semester 2

### Practical plant identification 786 (BOT 786)

**Module content:**
Principles of identification, classification and nomenclature; identification of plants; family recognition; collection of plant specimens for identification; herbarium as a source of information. Variation in seed plants and breeding systems. Practical work involves an excursion.

- **Module credits:** 10.00
- **Prerequisites:** BSc with first year Botany/Plant Science
- **Contact time:** 2 lectures per week, 2 practicals per week
- **Language of tuition:** Module is presented in English
- **Academic organisation:** Plant and Soil Sciences
- **Period of presentation:** Semester 1

### Spatial analysis in ecology 788 (BOT 788)

**Module content:**
Mapping and analysing spatial data. Theory and basic techniques of analysing and manipulating spatial data using geographical information systems. Mapping of vegetation types, species distributions and diversity, species traits. Understanding the spatial drivers of biodiversity patterns. The influence of scale on biodiversity analyses. Relevance for conservation planning for mapping biodiversity risk and prioritising conservation, especially in a South African context.

- **Module credits:** 10.00
- **Prerequisites:** No prerequisites.
- **Contact time:** 2 lectures per week
- **Language of tuition:** Module is presented in English
