BSc Construction Management (12132025)

**Duration of study** 3 years

**Total credits** 434

**Contact**  
Mr DE Booyens  
derick.booyens@up.ac.za  
+27 (0)124204433

**Programme information**

Construction management is the field of study meant for the person who wishes to become part of the process of infrastructure development, especially the construction of buildings. The construction manager is a professional business person who acts as manager for undertakings in the building, construction and property industry as well as related support services.

Career opportunities cover a wide spectrum and construction managers find employment as main and subcontractors in the building and construction industry, as project managers or investment experts with financial institutions and property developers, as property experts who offer broker services and compile packages, as managers of building and property portfolios for investors, as suppliers of material and equipment to the building and construction industry, as consultants for financial services in the construction and related sectors, or as private entrepreneurs working in these fields.

The examinations of the BScHons degree in Construction Management are recognised by the minister as prescribed examinations in terms of the stipulations as described in the Project and Construction Management Professions Act (Act No 48/2000), as well as by the Chartered Institute of Building.

The degree is awarded if all the prescribed modules have been passed.

**Admission requirements**

- The following persons will be considered for admission: a candidate who is in possession of a certificate that is deemed by the University to be equivalent to the required Grade 12 certificate with university endorsement; a candidate who is a graduate from another tertiary institution or has been granted the status of a graduate of such an institution; and a candidate who is a graduate of another faculty at the University of Pretoria.
- Life Orientation is excluded when calculating the APS.
- Grade 11 results are used in the provisional admission of prospective students.
- A valid qualification with admission to degree studies is required.
- Minimum subject and achievement requirements, as set out below, are required. On first-year level a student has a choice between Afrikaans and English as language medium. In certain cases, tuition may be presented in English only, for example in electives, where the lecturer may not speak Afrikaans or in cases where it is not economically or practically viable.
- BSc (Construction Management) is a selection programme.

**Minimum requirements**
Promotion to next study year

i. Promotion to the second semester of the first year and to the second year of study

   a. A newly registered first-year student who failed all the prescribed modules for the programme at the end of the first semester shall not be readmitted to the School for the Built Environment in the second semester.
   b. A student who complies with all the requirements of the first year of study, or has at least obtained 110 credits, is promoted to the second year of study.
   c. A student who has not obtained at least 70% of the credits of the first year of study after the November examinations must reapply for admission should he/she intend to continue with his/her studies. Written application must be submitted to the student administration of the School for the Built Environment no later than 12 January. Late applications will be accepted only in exceptional circumstances after approval by the Dean and conditions of readmission as determined by the admissions committee shall apply should first-year students be readmitted.
   d. Students who have not passed all the prescribed modules of the first year of study, as well as students who are readmitted in terms of (c) must register for the outstanding modules of the first year.
   e. A student who is repeating his/her first year, may, on recommendation of the relevant head of department and with the approval of the Dean, be permitted to enrol for modules of the second year of study in addition to the first-year modules which he or she failed, providing that he or she complies with the prerequisites for the second-year modules and that no timetable clashes occur. The number of credits per semester for which a student registers may not exceed the prescribed number of credits per semester by more than 16 credits.

ii. Promotion to the third year of study

   a. A student who complies with all the requirements of the second year of study, or has at least obtained 230 credits, is promoted to the third year of study.
   b. The Dean may, on the recommendation of the Head of Department, allow a student, who qualifies for promotion to a subsequent year of study, but who has not passed all the modules of that year, to carry over those modules to the next or a later year.
   c. The number of credits per semester for which a student registers may not exceed the prescribed number of credits per semester by more than 16 credits.
   d. A student who complies with all the requirements for the degree with the exception of one year module or two semester modules, in which a final mark of at least 40% has been obtained, may be admitted to a special examination in the module(s) concerned, at the start of the ensuing semester.
   e. (e) On the recommendation of the Head of Department, the Dean may in exceptional circumstances deviate from the abovementioned stipulations, provided that no timetable clashes occur.
Pass with distinction

The degree is conferred with distinction on a student:

i. if no module of the second and third study year was repeated and a weighted average of at least 75% was obtained in one year in all the modules (excluding JCP 201), of the final study year;

ii. the degree programme was completed within the prescribed three study years, and the final study year modules were passed on first registration without any supplementary or special examinations.
Curriculum: Year 1
Minimum credits: 141

Fundamental modules

Academic information management 101 (AIM 101)
Module content:
Find, evaluate, process, manage and present information resources for academic purposes using appropriate technology. Apply effective search strategies in different technological environments. Demonstrate the ethical and fair use of information resources. Integrate 21st-century communications into the management of academic information.

Module credits 6.00

Service modules
Faculty of Engineering, Built Environment and Information Technology
Faculty of Education
Faculty of Economic and Management Sciences
Faculty of Humanities
Faculty of Law
Faculty of Health Sciences
Faculty of Natural and Agricultural Sciences
Faculty of Theology
Faculty of Veterinary Science

Prerequisites No prerequisites.
Contact time 2 lectures per week
Language of tuition Separate classes for Afrikaans and English
Academic organisation Information Science
Period of presentation Semester 1

Academic literacy for Construction Economics 122 (ALL 122)
Module content:
By the end of this module students should be able to cope more confidently and competently with the reading, writing and critical thinking demands that are characteristic of the field of Construction Economics.

Module credits 6.00

Service modules Faculty of Engineering, Built Environment and Information Technology

Prerequisites No prerequisites.
Contact time 2 lectures per week, 1 web-based period per week
Language of tuition Module is presented in English
Academic organisation Unit for Academic Literacy
Period of presentation Semester 1
Academic orientation 112 (UPO 112)

- **Module credits**: 0.00
- **Language of tuition**: Afrikaans and English is used in one class
- **Academic organisation**: EBIT Dean's Office
- **Period of presentation**: Year

Core modules

Building organisation 121 (BGG 121)

- **Module content:**
The structure of the building industry and the role of building disciplines and related parties.

- **Module credits**: 3.00
- **Prerequisites**: No prerequisites.
- **Contact time**: 1 lecture per week
- **Language of tuition**: Separate classes for Afrikaans and English
- **Academic organisation**: Construction Economics
- **Period of presentation**: Semester 1

Building drawings 111 (BOU 111)

- **Module content:**
Students are introduced to design aspects in the built environment by doing basic technical drawings of simple building structures with appropriate detail sketches. Assignments during the semester expose the students to building plan interpretation through the following topics: foundations; super-structure; roof structure; window and door types; plan and sectional drawings and local authority submission criteria.

- **Module credits**: 6.00
- **Prerequisites**: No prerequisites.
- **Contact time**: 1 practical per week, 1 lecture per week
- **Language of tuition**: Separate classes for Afrikaans and English
- **Academic organisation**: Construction Economics
- **Period of presentation**: Semester 1

Building drawings 121 (BOU 121)

- **Module content:**
Broadens the vocabulary of the technical language from BOU 111. Students are introduced to other aspects of the building industry that include the following topics: topography; symbols; ergonomic design principles;
orientation of buildings; perspective drawings; waterproofing and dampcourse applications.

| Module credits | 6.00 |
| Prerequisites   | No prerequisites. |
| Contact time    | 1 practical per week, 1 lecture per week |
| Language of tuition | Separate classes for Afrikaans and English |
| Academic organisation | Construction Economics |
| Period of presentation | Semester 2 |

**Building science 110 (BWT 110)**

**Module content:**
Principles, methods and materials used in best practice in the construction of simple single-storey buildings up to wall plate height.

| Module credits | 9.00 |
| Prerequisites   | No prerequisites. |
| Contact time    | 3 lectures per week |
| Language of tuition | Separate classes for Afrikaans and English |
| Academic organisation | Construction Economics |
| Period of presentation | Semester 1 |

**Building science 120 (BWT 120)**

**Module content:**
Principles, methods and materials used in best practice in the construction of simple single-storey buildings from wall plate height to completion including finishes and external work. Introduction to alternative practices and materials for sustainability.

| Module credits | 9.00 |
| Prerequisites   | BWT 110 GS |
| Contact time    | 3 lectures per week |
| Language of tuition | Separate classes for Afrikaans and English |
| Academic organisation | Construction Economics |
| Period of presentation | Semester 2 |

**Economics 110 (EKN 110)**

**Module content:**
This module deals with the core principles of economics. A distinction between macroeconomics and
microeconomics is made. A discussion of the market system and circular flow of goods, services and money is followed by a section dealing with microeconomic principles, including demand and supply analysis, consumer behaviour and utility maximisation, production and the costs thereof, and the different market models and firm behaviour. Labour market institutions and issues, wage determination, as well as income inequality and poverty are also addressed. A section of money, banking, interest rates and monetary policy concludes the course.

**Module credits**

| 10.00 |

**Service modules**

Faculty of Engineering, Built Environment and Information Technology  
Faculty of Education  
Faculty of Humanities  
Faculty of Natural and Agricultural Sciences

**Prerequisites**

No prerequisites.

**Contact time**

1 discussion class per week, 2 lectures per week

**Language of tuition**

Separate classes for Afrikaans and English

**Academic organisation**

Economics

**Period of presentation**

Semester 1

**Economics 120 (EKN 120)**

**Module content:**

This module deals with the core principles of economics, especially macroeconomic measurement the private and public sectors of the South African economy receive attention, while basic macroeconomic relationships and the measurement of domestic output and national income are discussed. Aggregate demand and supply analysis stands core to this course which is also used to introduce students to the analysis of economic growth, unemployment and inflation. The microeconomics of government is addressed in a separate section, followed by a section on international economics, focusing on international trade, exchange rates and the balance of payments. The economics of developing countries and South Africa in the global economy conclude the course.

**Module credits**

| 10.00 |

**Service modules**

Faculty of Engineering, Built Environment and Information Technology  
Faculty of Education  
Faculty of Humanities  
Faculty of Natural and Agricultural Sciences

**Prerequisites**

EKN 110 GS or EKN 113 GS and at least 4 (50-59%) in Mathematics in the Grade 12 examination or 60% in STK 113 and concurrently registered for STK 123

**Contact time**

2 lectures per week, 1 discussion class per week

**Language of tuition**

Separate classes for Afrikaans and English

**Academic organisation**

Economics

**Period of presentation**

Semester 2

**Building services 112 (GBD 112)**
Building services 122 (GBD 122)

Module content:
Sanitary services; hot and cold-water supply to simple and multi-storey buildings; local by-laws; water reticulation to town development; different hot-water systems; water purification systems; water and energy saving.

Module credits 6.00
Prerequisites No prerequisites.
Contact time 2 lectures per week
Language of tuition Separate classes for Afrikaans and English
Academic organisation Construction Economics
Period of presentation Semester 2

Quantities 101 (HVH 101)

Module content:
Introduction to quantity surveying, mensuration; interpretation of drawings, methodology of measuring, working up processes, general instructions, measuring of simple building elements.

Module credits 24.00
Prerequisites No prerequisites.
Contact time 3 lectures per week, 1 practical per week
Language of tuition Separate classes for Afrikaans and English
Academic organisation Construction Economics
Period of presentation Year

History of the environment 122 (OMG 122)

Module content:
Introduction to the vocabulary of the built environment as developed over the history of human settlement. Concise history of the development of the built environment from early settlement to modern cities. The role and responsibilities of the built environment professional in engaging with built environment heritage in the form of cultural and natural landscapes.

**Module credits** 6.00

**Prerequisites** No prerequisites.

**Contact time** 2 lectures per week

**Language of tuition** Separate classes for Afrikaans and English

**Academic organisation** Architecture

**Period of presentation** Semester 2

---

**Introduction to structures 110 (SKE 110)**

**Module content:**
Design; basics (forces, moments, equilibrium, reactions, stress, strain); materials; loads; pin-jointed trusses; tension members.

**Module credits** 9.00

**Service modules** Faculty of Engineering, Built Environment and Information Technology

**Prerequisites** No prerequisites.

**Contact time** 2 lectures per week, 1 discussion class per week

**Language of tuition** Separate classes for Afrikaans and English

**Academic organisation** Civil Eng

**Period of presentation** Semester 1

---

**Structures 120 (SKE 120)**

**Module content:**
Beams (shear force and bending moment, bending and shear stresses, design of standard beams in steel, concrete and timber, section properties, lateral restraint); compression members; combined axial and bending; deflection.

**Module credits** 9.00

**Service modules** Faculty of Engineering, Built Environment and Information Technology

**Prerequisites** SKE 110 GS

**Contact time** 1 tutorial per week, 2 lectures per week

**Language of tuition** Separate classes for Afrikaans and English

**Academic organisation** Civil Eng

**Period of presentation** Semester 2
Mathematics 134 (WTW 134)

Module content:
*Students will not be credited for more than one of the following modules for their degree: WTW 134, WTW 165, WTW 114, WTW 158. WTW 134 does not lead to admission to Mathematics at 200 level and is intended for students who require Mathematics at 100 level only. WTW 134 is offered as WTW 165 in the second semester only to students who have applied in the first semester of the current year for the approximately 65 MBChB, or the 5-6 BChD places becoming available in the second semester and who were therefore enrolled for MGW 112 in the first semester of the current year.*

Functions, derivatives, interpretation of the derivative, rules of differentiation, applications of differentiation, integration, interpretation of the definite integral, applications of integration. Matrices, solutions of systems of equations. All topics are studied in the context of applications.

Curriculum: Year 2

Minimum credits: 143

Core modules

Labour law 311 (ABR 311)

Module content:

Module credits 20.00

Service modules
Faculty of Engineering, Built Environment and Information Technology
Faculty of Economic and Management Sciences
Faculty of Humanities

Prerequisites No prerequisites.

Contact time 1 tutorial every 2nd week, 2 lectures per week

Language of tuition Separate classes for Afrikaans and English

Academic organisation Mercantile Law

Period of presentation Semester 1

Building science 210 (BWT 210)

Module content:
Erection and construction of multi-storey buildings, including site management and temporary site work, building equipment and earthwork machinery, specialised foundations, bulk excavations and advanced concrete construction, including retaining walls. Timber and steel structures as construction methods.

Module credits 9.00

Prerequisites BWT 110 GS and BWT 120 GS

Contact time 3 lectures per week

Language of tuition Afrikaans and English is used in one class

Academic organisation Construction Economics

Period of presentation Semester 1

Building science 220 (BWT 220)

Module content:
Material study of metals and advanced materials. Study and development of sensitivity for and the philosophy of industrial safety, accident prevention and total loss control safety risk management in the construction industry.

Module credits 9.00
Prerequisites | No prerequisites.
Contact time | 3 lectures per week
Language of tuition | Afrikaans and English is used in one class
Academic organisation | Construction Economics
Period of presentation | Semester 2

**Financial management 110 (FBS 110)**

**Module content:**
*Only for BSc (Mathematical Statistics, Construction Management, Real Estate and Quantity Surveying) and BEng (Industrial Engineering) students.*

**Module credits** | 10.00
**Service modules** | Faculty of Engineering, Built Environment and Information Technology
| Faculty of Natural and Agricultural Sciences

**Prerequisites** | No prerequisites.
**Contact time** | 3 lectures per week
**Language of tuition** | Module is presented in English
**Academic organisation** | Financial Management
**Period of presentation** | Semester 1

**Financial management 120 (FBS 120)**

**Module content:**
*Only for BSc (Mathematical Statistics, Construction Management, Real Estate and Quantity Surveying) students.*

Analysis of financial statements. Budgeting and budgetary control. Tax principles and normal income tax for individuals. Time value of money and its use for financial and investment decisions. Calculating the cost of capital and the financing of a business to maintain the optimal capital structure. Capital investment decisions and a study of the financial selection criteria in the evaluation of capital investment projects. The dividend decision and an overview of financial risk management.

**Module credits** | 10.00
**Service modules** | Faculty of Engineering, Built Environment and Information Technology
| Faculty of Natural and Agricultural Sciences
| Prerequisites                     | No prerequisites.                                      |
| Contact time                     | 3 lectures per week                                   |
| Language of tuition              | Module is presented in English                        |
| Academic organisation            | Financial Management                                  |
| Period of presentation           | Semester 2                                            |

**Building services 211 (GBD 211)**

Module content:
Introduction to the principles of indoor comfort. Heating, ventilation and air-conditioning systems. Installation and operation of lifts and other mechanical services. Fire detection and protection.

| Module credits | 6.00 |
| Prerequisites  | No prerequisites. |
| Contact time   | 2 lectures per week |
| Language of tuition | Afrikaans and English is used in one class |
| Academic organisation | Construction Economics |
| Period of presentation | Semester 1 |

**Construction quantities 201 (KSH 201)**

Module content:
Measuring of simple buildings and simple building elements and external works. Abstracting and billing.

| Module credits | 24.00 |
| Prerequisites  | BWT 110 GS, BWT 120 GS and HVH 101 |
| Contact time   | 1 practical per week, 3 lectures per week |
| Language of tuition | Afrikaans and English is used in one class |
| Academic organisation | Construction Economics |
| Period of presentation | Year |

**Reinforced concrete structures 210 (SKE 210)**

Module content:
Properties of reinforced concrete; construction methods; slabs; beams; columns; foundations; retaining walls; placement of reinforcement in the various structural members; basic concepts of prestressed concrete.

| Module credits | 9.00 |
| Service modules | Faculty of Engineering, Built Environment and Information Technology |
Civil engineering services 220 (SKE 220)

Module content:
Water reticulation; sewerage reticulation; stormwater reticulation; roads.

Module credits 9.00

Statistics 110 (STK 110)

Module content:
Descriptive statistics:
Sampling and the collection of data; frequency distributions and graphical representations. Descriptive measures of location and dispersion.
Probability and inference:
Introductory probability theory and theoretical distributions. Sampling distributions. Estimation theory and hypothesis testing of sampling averages and proportions (one and two-sample cases). Identification, use, evaluation and interpretation of statistical computer packages and statistical techniques.

Module credits 13.00

Prerequisites
At least 5 (60-69%) in Mathematics in the Grade 12 examination. Candidates who do not qualify for STK 110 must register for STK 113 and STK 123

Contact time 1 tutorial per week, 1 practical per week, 3 lectures per week

Language of tuition Separate classes for Afrikaans and English

Academic organisation Statistics
Period of presentation  Semester 1

**Statistics 161 (STK 161)**

**Module content:**
*Offered by the Department of Statistics
Multivariate statistics analysis of variance; categorical data analysis; distribution-free methods; curve fitting, regression and correlation; the analysis of time series and indices. Identification, use, evaluation and interpretation of statistical computer packages and statistical techniques.
This module is also presented as an anti-semester bilingual module.

**Module credits**  6.00

**Service modules**  Faculty of Engineering, Built Environment and Information Technology
Faculty of Natural and Agricultural Sciences

**Prerequisites**  STK 110 GS or both STK 113 GS and STK 123 GS

**Contact time**  1 practical per week, 3 lectures per week

**Language of tuition**  Separate classes for Afrikaans and English

**Academic organisation**  Statistics

**Period of presentation**  Quarter 3

---

**Site surveying 213 (TRN 213)**

**Module content:**
General surveying; instruments, their handling and adjusting; surveying systems and simple calculations; determining of levels; setting out of the works; tacheometry and plotting; scales, planimetry; areas and volumes; construction surveying; aerial photography.

**Module credits**  12.00

**Prerequisites**  No prerequisites.

**Contact time**  1 practical per week, 2 lectures per week

**Language of tuition**  Module is presented in English

**Academic organisation**  Geography, Geoinf + Meteor

**Period of presentation**  Semester 1

---

**Building services 221 (GBD 221)**

**Module content:**
Theory of electricity; regulations of electricity-supply authorities; electrical installations; distribution of electricity.

**Module credits**  6.00

#### Building science 310 (BWT 310)

**Module content:**
Building science 320 (BWT 320)

Module content:
Thermal properties of insulation systems and construction materials. Critical review of current development and construction practice; alternative construction technologies; innovation in construction; technical evaluation of innovative construction materials and methods; life cycle costing and life cycle analysis; the National Building Regulations.

Introduction to property law 320 (EOW 320)

Module content:
Moveable and immovable property. Rights over immovable property; private legal circumscription of ownership; relevant legislation pertaining to property; real securities; the registration of rights; zoning regulations.

Financial management 210 (FBS 210)

Module content:
*Only for BCom (Financial Sciences, Investment Management and Law) and BSc (Construction Management,
Quantity Surveying and Real Estate) students.
Framework and purpose of financial management; understanding financial statements; analysis of financial statements for decision making; time value of money; risk and return relationships; business valuation; short-term planning; current asset management.

**Community-based project 201 (JCP 201)**

Module content:
This project-orientated module is a form of applied learning which is directed at specific community needs and is integrated into all undergraduate academic programmes offered by the Faculty of Engineering, Built Environment and Information Technology. The main objectives with the module are as follows:
(1) The execution of a community related project aimed at achieving a beneficial impact on a chosen section of society, preferably but not exclusively, by engagement with a section of society which is different from the student's own social background.

(2) The development of an awareness of personal, social and cultural values, an attitude to be of service, and an understanding of social issues, for the purpose of being a responsible professional.

(3) The development of important multidisciplinary and life skills, such as communication, interpersonal and leadership skills.

Assessment in the module will include all or most of the following components: evaluation and approval of project proposal, assessment of oral and/or written progress reports, peer assessment in the event of team projects, written reportback by those at which the project was aimed at, and final assessment on grounds of the submission of a portfolio and a written report.
